A MESSAGE FROM THE PRESIDENT

I feel very fortunate to be a part of the world of education in the 21st Century—especially here at Wallace Community College!

With the many technological advancements and learning opportunities in existence today, our students literally have the world at their feet! Today’s students can explore areas of interest on the Internet, practice skills in simulation, and link via satellite with instructors from anywhere in the world!

Yes, technology is amazing. It has not only changed the way students learn, but it has also changed the way we teach. I have been astonished at the rapid growth of the College’s distance learning program within the past two years. We launched the program with seven Internet courses in 2001, and to-date, we have nearly 50 on-line courses for our students to study at their convenience. This option allows students with personal and family obligations time to fit an education into their already busy schedules.

That’s an important aspect of Wallace Community College: the realization that our students are real people with real families and real dreams. We at Wallace Community College seek to address each student as an individual and to help him or her face the future equipped with the knowledge and skills to meet any goal. Our programs are readily adaptable to ensure that instruction is consistent with the expected standards and the ever-changing needs of business and industry.

In a world filled with frequent change, however, it is always comforting to know that some things remain constant—like the Wallace commitment to our students and our many partners in the various industries of our service areas. That means this commitment extends to YOU!

I encourage you to review this catalog to discover how you can benefit from one or more of our programs and special services. Counselors are available to assist you with any questions you may have—and I, too, am always ready to assist you.

Sincerely,

Linda C. Young
President

CHANGES IN PROGRAMS AND CATALOGS

The information contained in this publication conforms with policies and procedures of the State Board of Education, Department of Postsecondary Education, and applicable state and federal statutes. Any policies and procedures of Wallace Community College that may be found to be in violation of such are hereby declared null and void and of no effect. The statements set forth in this catalog are for informational purposes only and should not be construed as the basis of a contract between a student and this institution.

While provisions of this catalog will ordinarily be applied as stated, Wallace Community College reserves the right to change any provision listed in this catalog, including but not limited to academic requirements for graduation, without actual notice to individual students. Every effort is made to keep students advised of any such changes. It is especially important that students keep themselves apprised of current graduation requirements for their particular degree programs. Current information is available in the Student Affairs Department, Grimsley Hall, or by telephone, (334) 983-3521, ext. 2473.

HUMAN RIGHTS AND NON-DISCRIMINATION

Wallace Community College is committed to equal opportunity education. The College is guided in philosophy and practice by the principle that individuals will not be treated differently because of race, creed, religion, color, sex, age, national origin, or disability, and that legitimate and reasonable access to facilities is available to all. This principle particularly applies to the admission of students in all programs of the College and in their academic pursuits. It is also applicable in extracurricular activities, all Student Affairs services, employment of students by the College, and employment of faculty and non-instructional staff. Therefore, WCC is in compliance with Title VI and VII of the Civil Rights Act of 1964, as amended; the Civil Rights Act of 1991; Executive Order 11246, as amended; Title IX of the Education Amendments of 1972; Section 504 of the Rehabilitation Act; and the Americans with Disabilities Act of 1990, Wallace Community College is an Affirmative Action/Equal Employment and Educational Opportunity Institution.

FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

Under the Federal Family Educational Rights and Privacy Act, 20 USC 1232g, WCC may disclose certain student information as directory information. Directory information includes name, address, telephone listing, date of birth, major field of study, participation in officially recognized activities and sports, height and weight of athletic team members, dates of attendance, degrees and awards received, most recent educational institution attended, photographs, enrollment status, and e-mail addresses. If students object to any of the aforementioned information being released during any given term or academic year, they should provide written notification to the Assistant Dean of Student Affairs during the first two weeks of the respective term or academic year. Non-release forms are available at the following locations: Enrollment Services in Grimsley Hall on the Wallace Campus in Dothan; the Student Affairs Department in the Administration Building on Sparks Campus in Eufaula; and the Administrative Office at the Fort Rucker Center.

STATEMENT OF VISION

George C. Wallace Community College will be a leading community college, nationally recognized for excellence and innovation in education and student success. The College will be the primary choice of citizens preparing for the job market, seeking an associate or advanced degree, and/or pursuing career advancement or personal development. College partnerships with area schools, business and industry, and governmental agencies will contribute to an educational system that enhances economic development and quality of life in the region.

Commitment to Students
Belief in providing quality, accessible instruction, resources, and support services to enhance the growth and development of students.

Commitment to Faculty and Staff

STATEMENT OF VALUES

George C. Wallace Community College respects the diversity of its student body and recognizes the worth and potential of each student. Therefore, the College affirms the following values:
Belief in the importance of providing a work and learning environment characterized by integrity, clear communications, open exchange of ideas, involvement in decision making, and respect for all individuals.

**Commitment to Community**
Belief in enhancing the economic vitality and quality of life for all citizens of the community.

**Commitment to Diversity**
Belief in acknowledging and respecting the diversity of the community.

**Commitment to Excellence**
Belief in the pursuit of excellence in all College programs and services.

**STATEMENT OF MISSION**
George C. Wallace Community College, a comprehensive community college, seeks to provide accessible quality educational opportunities, promote economic growth, and enhance the quality of life of its constituents.

**STATEMENT OF ROLE AND SCOPE**
The College fulfills its mission through a clearly defined set of programs and services that include the following:

- **College-level Credit Programs**
The College offers credit courses leading to associate degrees and certificates in career/technical fields and transfer majors.

- **Continuing Education Programs**
The College provides professional and personal development opportunities for individuals, agencies, and business and industry.

- **Economic Development Programs**
The College provides workforce training for new and expanding industries and assists in recruiting business and industry to the region.

- **Student Development Programs and Services**
The College offers programs and services to enrolled and prospective students to enhance their opportunities for success and their potential for personal, educational, and professional growth.

- **Support Programs and Services**
The College provides recruitment, evaluation, counseling, and instructional programs and services that increase access and opportunities for success for students not traditionally served by higher education.

**INSTITUTIONAL GOALS**

1. Develop, enhance, and revise curricula to meet the needs of the community.
2. Promote learning through excellence in teaching, support services, and instructional delivery systems.
3. Ensure access and diversity throughout the College.
4. Provide a quality environment for learning and work through open communication, professional development, and support services.
5. Provide quality facilities and equipment to support College programs and services.
6. Refine processes and procedures to enhance quality, demonstrate effectiveness, and ensure accountability.
7. Seek additional resources to support the College mission.
8. Maximize productivity and efficiency through the allocation of available resources.
9. Expand collaborations and partnerships to promote progress in the region.
10. Strengthen community ownership of and support for the College.

**HISTORY OF THE COLLEGE**

In March 1999, a merger between Sparks State Technical College and George C. Wallace Community College was initiated. By October 1999, both the Alabama State Board of Education and ACHE had approved the Statement of Intent to Merge the two institutions as well as the administrative and programmatic phases of consolidation. Following a substantive change visit, SACS approved the consolidation of Sparks State Technical College with George C. Wallace Community College in 2000.

This merger between Sparks State Technical College and George C. Wallace Community College, followed closely upon the heels of the 1997 merger between George C. Wallace Community College and Alabama Aviation and Technical College in Ozark. However, on January 23, 2003, the Alabama State Board of Education approved the merger of Wallace Community College’s Aviation Campus in Ozark and its Aviation Center in Mobile with Enterprise State Junior College (ESJC) in order to allow ESJC to become a community college. This merger will be finalized by September 2003, and these aviation entities will no longer be part of George C. Wallace Community College.

Brief histories of the Wallace and Sparks Campuses follow:

**Wallace Campus**
The George C. Wallace State Technical Trade School was established by the Alabama Regional Trade School Act of 1947. The first students, 13 in all, enrolled in the school’s Sheet Metal program in January 1949. In 1955, the name of the institution was changed to George C. Wallace State Vocational Trade School. On May 3, 1963, the Alabama State Legislature decreed that a junior college be developed on the technical school site, and the institution became George C. Wallace State Technical Junior College. In response to a recommendation by the Southern Association of Colleges and Schools, the technical school and junior college were united in 1969 to form South Alabama’s first comprehensive community college. The Commission on Colleges of the Southern Association of Colleges and Schools accredited George C. Wallace State Community College to award associate degrees and certificates in 1969, and the College’s accreditation was reaffirmed in 1973, 1984, 1994, and 2002. The Wallace Campus also includes the College’s Fort Rucker Center.

**Sparks Campus**
Sparks State Technical School, named for former Alabama Governor Chauncey Sparks, began operating on July 6, 1966, with an enrollment of 44 students. In 1968, the name was changed to Sparks State Technical Institute. With the offering of the associate in applied technology degree in 1974, the name became Sparks State Technical College. Sparks also provides correctional education programs at Easterling Correctional Facility in Clio, Alabama, and Ventress Correctional Facility in Clayton, Alabama.

STUDENT AFFAIRS

Each member of the Student Affairs staff at Wallace Community College is dedicated to the belief that all people should have the opportunity to reach their maximum potential. Functions that comprise Student Affairs are admissions, career planning, counseling services, job placement, records, services for special student populations, student activities, student financial services, and testing services. Coordinated by the Dean of Student Affairs, these functions serve students and complement classroom instruction by ensuring that students have the opportunity for success.

The message from Student Affairs to students and area residents is, “Wallace Community College cares about you.” The following sections explain services of the Student Affairs Division.

FUNCTIONS

Counseling and Advising. The College provides a staff of professional counselors to assist all students in planning and selecting appropriate educational goals. Counseling services are provided to help students make the best possible adjustments to college life.

General Testing. The testing program includes GED, CLEP, ACT/ ASSET, COMPASS, and CPAT (see placement testing) and is designed to meet the needs of students with varied educational backgrounds and goals. The GED (General Educational Development) exam is administered to residents of the surrounding communities and/or prospective students who do not have a high school diploma or its equivalent. The CLEP (College-Level Examination Program) test is given to students who desire to receive college credit for knowledge they have acquired outside of a normal college classroom setting. The CPAT test is given to students without a high school diploma who wish to enroll in certificate programs. The CPAT determines students’ abilities to benefit from instructional programs.

Job Placement. Job placement services are provided at all campuses. Part- and full-time job offers are updated regularly and posted on a bulletin board outside the Career Lab on the Wallace Campus and in the Student Affairs Department on the Sparks Campus. Students interested in employment must complete a form with the Career Lab enabling the Career Lab to inform them of appropriate job openings that become available. To remain on active file, students must renew their requests at the beginning of each term. Job offers on the Sparks Campus are placed with the Business Industry Coordinator and are routed through the program instructors for student referrals. Wallace Community College is an equal opportunity employer/affirmative action employer and complies with the Americans with Disabilities Act of 1990 (ADA).

Pre-orientation Activities. Pre-orientation is designed to acquaint students with College facilities, services, and rules and regulations and to provide seminars designed to enhance student success. Participation in pre-orientation is required for all first-time students. Group sessions are scheduled by the Admissions and Records Office prior to the beginning of each term.

Placement Testing. Wallace Community College requires a comprehensive assessment of students upon admission and prior to enrollment in associate degree or certificate programs. Students are not allowed to enroll for more than four credit hours before being assessed with the COMPASS or ACT/ASSET written assessment instrument. For more specific information on placement testing and assessment, see page 19.

Disabled Student Services. It is the policy of Wallace Community College to provide reasonable accommodations for environmental and program accessibility for individuals with a disability as defined in Section 504 of the Rehabilitation Act of 1973, as amended, and the Americans with Disabilities Act of 1990 (ADA). Specialized services provide students with disabilities complete access to all academic, technical, and College programs. Students are responsible for reporting their needs to the Disabled Student Affairs Office or the ADA Coordinator and providing proper documentation of their disabilities. Early contact is encouraged to allow sufficient time for evaluating, planning, and arranging needed accommodations and services. For detailed information on available services and eligibility, contact the Disabled Student Services Office by telephone at (334) 983-3241, ext. 2296; by fax at (334) 983-4255; or in writing to Disabled Student Services, Wallace Community College, 1141 Wallace Drive, Dothan, AL 36303. Information on disability services for the Sparks Campus may be obtained from the Student Affairs Coordinator at (334) 687-3343, ext. 4270. Complaints regarding accessibility should be reported to the Dean of Student Affairs at (334) 687-3343, ext. 4211.

Career Development Center. The Career Development Center, located in Grimsley Hall on the Wallace Campus, is dedicated to assisting students who are undecided about their career plans. Faculty and staff members are available, and the career planning process is open to all students and members of the community. Students at the Sparks Campus are encouraged to use the career resources located in the LRC and Student Affairs Department or to visit the Career Development Center on the Wallace Campus.

STUDENT ACTIVITIES, PROGRAMS, AND SERVICES

Wallace Community College offers student activities, programs, and services that promote leadership, academic support, and social and cultural experiences. These are listed alphabetically and are followed by a code indicating the campus or site on which the activity is available: Wallace Campus (W), Sparks Campus (S), and Fort Rucker Center (F).

Association of Students of Practical Nursing (W) (S) (F). An organization designed for students enrolled in Practical Nursing.

Athletics (W). Wallace Community College is a member of the National Junior College Athletic Association and the Alabama Junior College Conference. The College engages in intercollegiate competition in men’s baseball and women’s softball.

Baptist Campus Ministries (W). Baptist Campus Ministries (BCM) is an organization that encourages Christian fellowship among students, both on and off campus. BCM is open to all students, regardless of religious preference. The Columbia Baptist Association provides a campus minister to work as an advisor to the organization.

Chamber Choir (W). The Wallace Community College Chamber Choir, the official College choir, is open to all students who have successfully auditioned. Its purpose is to provide an opportunity for advanced vocal training through study and performance of more demanding choral literature.

Circle K (W). Membership in Circle K, sponsored by the Kiwanis Club of Dothan and Houston County, is open to men and women. Purposes of the club are to develop leadership among members, promote loyalty to the College, and sponsor projects beneficial to the College and community.

Diplomats (W) (S). The Wallace Community College Diplomats serve as official hosts and hostesses for the College. The program is designed to recognize outstanding students in the areas of academic achievement, extracurricular activities, and community concern. To be eligible for membership, students must be recommended by faculty or staff members and be interviewed by the Diplomat Selection Committee.

Jazz Band (W). The Jazz Band is an organization that provides recreation and entertainment through musical participation. Membership is open to all students who have successfully auditioned. The Jazz Band participates in and helps sponsor the annual Downhome Jazz Festival each May.

National Vocational-Technical Honor Society (W) (S) (F). The society is an honor organization for students enrolled in career-technical programs. The organization’s purpose is to promote service, leadership, honesty, career development, and skilled workmanship; reward student achievement; assist career goal-setting; promote linkages between the College and business and industry; and enhance the image of career-technical education in America. To be eligible, students must be full-time, have completed 16 semester hours of study with a 2.9 grade point average, be of good moral character, possess good citizenship qualities, and have established academic excellence. Candidates are recommended by faculty members. Activities include conferences, business competitions, and community service projects.

Phi Theta Kappa (W) (S). Phi Theta Kappa is an international honor society. To be eligible for membership, a student must complete a minimum of 12 semester hours (excluding developmental course work)
toward an AA, AS, or AAS degree and have a minimum GPA of 3.5. First-term freshmen who were members of the National Honor Society or Beta Club, recipients of a WCC academic scholarship, or who scored 25+ on the ACT exam may enter into the organization immediately, as provisional members. For details about provisional membership or to obtain additional information, call (334) 983-3521, ext. 2264.

Student Government Association (W) (S). Student Government Associations (SGAs) provide leadership opportunities for students on the two College campuses. The SGAs are governed by published by-laws that are made available to students at each applicable site. For more information, please contact Student Affairs personnel.

TRIO Programs. Wallace Community College offers three TRIO programs. These federally funded programs provide outreach and support services to assist eligible students in progressing from middle school to post-baccalaureate programs.

·Student Support Services (W) (S) is known as PATHWAYS on the Wallace Campus and as BEACON on the Sparks Campus. Student Support Services (SSS) offers academic assistance and support services in English, mathematics, reading, and selected technical courses to students meeting requirements. Students desiring free tutoring are encouraged to apply. Any student interested in working as a tutor should contact the PATHWAYS Department on the Wallace Campus or the BEACON Department on the Sparks Campus. In addition to academic assistance, SSS offers a full range of counseling services and resources. Students also have the opportunity to participate in escorted visits to senior universities throughout the state of Alabama as well as cultural and academic enrichment activities. SSS offers a supportive atmosphere that is conducive to students’ academic and social development. A flexible schedule is offered to meet the needs of all students. For further information, contact the SSS office on any Wallace Community College Campus.

·Talent Search (S) identifies and assists middle and high school individuals from disadvantaged backgrounds who have the potential to succeed in higher education. The program provides academic, career, and financial counseling to its participants and encourages them to graduate from high school and continue on to the postsecondary school of their choice.

·Upward Bound (S) provides fundamental support to participants in their preparation for college entrance. Participants are high school students. The program provides opportunities for participants to succeed in pre-college performance and ultimately in higher education pursuits.

For more information about these programs, please contact Student Affairs staff at any College location.

Vocational Industrial Clubs of America (S) (W). Vocational Industrial Clubs of America (VICA) is a local, state, and national organization designed to promote excellence in technical skills. Students conduct the organization, and any student enrolled in a vocational, industrial, technical, or health occupations field is eligible for membership. The club’s activities include local competitions, conducted in April of each year, and national competitions, conducted in June of each year.

Wallace Association of Nursing Students (W). The Wallace Association of Nursing Students (WANS) is an organization composed of Associate Degree Nursing (ADN) students. The purpose of WANS is to support and enhance the philosophy, purpose, goals, and policies of the ADN program; promote educational and professional development; and contribute to the health care of the community.

Wallace College Singers (W). The Wallace College Singers is a group of students, selected by audition during spring semester, who perform a variety of musical and choreographic presentations at various campus and community events. The members serve as good will ambassadors for the College.
GENERAL INFORMATION

Emergencies on Campuses. In case of accidents or other emergencies, students are instructed to advise the nearest faculty or staff member. In the absence of a faculty or staff member, students on the Wallace and Sparks Campuses can locate any College telephone and dial "0" for the switchboard operator. Students are to advise appropriate College officials of the nature and location of the emergency and provide other vital information that may be requested. Students are instructed as to further procedures. If College telephones are not operational and faculty or staff members are not available, students should send a messenger to the switchboard operator located in the Administration Building to report the emergency. Students at the Fort Rucker Center will follow procedures prescribed for that location. Posters and diagrams in each building also provide emergency information, and faculty members are directed to review emergency procedures with students on the first day of class each term.

Faculty and staff sponsoring events outside regular campus hours are responsible for providing emergency procedures and information to participants.

Accidents/Illness. In case of serious illness or accident, students may be transported by ambulance at their expense to a nearby emergency room for treatment. Treatment by a physician and/or hospitalization is at the student's expense. The College will notify the person(s) requested by the student. If the student is unable to communicate, the College will notify the emergency contact person(s) listed in the student's file.

Health Services. Wallace Community College does not have a health services department; however, health services and educational information regarding health and safety issues are provided to students in a variety of ways. Health-related educational issues are handled mainly on an information-sharing basis. An overview of health services and safety information is provided to students during pre-orientation sessions, and the Student Affairs Division on each campus maintains health information brochures that may be obtained by students. The Student Affairs Division also maintains a comprehensive list of referral services for student use. Additionally, the College staff encourages students to participate in health-related activities scheduled at any College location and/or within the community. These activities include blood drives, health-related workshops, and health fairs.

Lost and Found. Inquiries pertaining to lost and found items should be made at the switchboard/reception desk in the Administration Building on the Wallace and Sparks Campuses. Students attending the Fort Rucker Center should contact the Director or Administrative Assistant to inquire about lost and found items.

Parking Regulations. All motor vehicles used by faculty and staff members or students must display current parking decals, available at each instructional location.

Public Relations and Marketing. Wallace Community College designs, develops, and implements activities, events, and initiatives that increase awareness of the College's mission, history, and contributions to the region. The WCC philosophy is that all members of the College community are public relations ambassadors. The Director of Public Relations and Marketing serves as media contact for the College. Public relations and marketing activities include, but are not limited to, distributing press releases and news stories concerning College activities, developing and distributing publications reflecting the College's mission and programs, participating in community organizations, planning and implementing community college awareness activities, and designing and implementing marketing campaigns for print and electronic media. For more information about public relations and marketing at the College, call (334) 983-3521, ext. 2244.

Student Membership on College Committees. Wallace Community College is committed to planning and implementing activities and experiences conducive to facilitating student achievement of personal and professional goals. Pursuant to that end, students serve, when appropriate, as voting members of College standing committees and have all rights and responsibilities associated with committee membership.

Telephones and Messages. Pay telephones are centrally located for student use. Faculty and staff telephones are available for student use only in case of an emergency. Students requiring telephone devices for the deaf (TDDs) are asked to contact Disabled Student Affairs or the ADA Coordinator at the respective College location. The TDD Relay number for the College is 1-800-258-2546.

Visitor Policy. Wallace Community College welcomes visitors at any of its campuses or sites. Visitors are expected to abide by College regulations. Visitors should report to the administrative offices at the campus or site visited rather than proceeding to instructional areas. CHILDREN MUST BE UNDER THE SUPERVISION OF THEIR PARENTS AND ARE NOT TO ATTEND CLASSES.

Foundations. Two non-profit corporations, operating independently of Wallace Community College, are vehicles for fund-raising and fund-raising. The Wallace Community College Foundation, organized in January 1992, is led by a board of trustees consisting of community leaders, alumni, and College faculty and staff members. Funds raised by the Foundation are designated to general advancement, scholarships, and campus beautification. The Board meets quarterly or as required to conduct the business of the Foundation. The Sparks State Technical College Foundation was organized in 1991 to support the former Sparks State Technical College by providing scholarships, instructional support, and professional development for staff members. This Foundation's Board of Directors consists of community leaders from Barbour and Henry Counties. As a result of the merger, both Foundations are providing support to the merged College and are investigating ways to better meet the needs of Wallace Community College. For more information about the Foundations or to make a gift to the College, please call (334) 556-2201 or (334) 687-3543, ext. 4247.

INSTRUCTIONAL SUPPORT

INSTRUCTION AT OTHER LOCATIONS

Wallace Community College not only offers programs and courses at the Wallace and Sparks Campuses, but it also offers a variety of instructional programs and/or courses at the Fort Rucker Center and at correctional facilities as described below:

Fort Rucker Center. Wallace Community College offers technical programs for college credit at Fort Rucker. These programs prepare students for careers in technological fields, providing viable employment opportunities that can lead to a certificate. Flexible scheduling allows students to attend day or evening classes. Courses are available to service members, their spouses and eligible dependents, retired military service members, civilian service employees, reservists, and the general public. Army tuition assistance is available to active duty service members. Pell Grants and other financial aid programs are also offered by the College. All Fort Rucker Center programs are VA approved. Service members are awarded credit for military service schools in accordance with recommendations published by the American Council on Education in A Guide to the Evaluation of Educational Experiences in the Armed Services. Individuals interested in more information or desiring to register may visit Wallace Community College's Fort Rucker Center located in Building 4502 on Kingsman Street, or call (334) 598-8866. Office hours are from 7:30 a.m. to 4:30 p.m., Monday through Thursday, and 7:30 a.m. to 2:00 p.m. on Friday.

Correctional Education. Wallace Community College is one of several Alabama two-year colleges mandated by the State Board of Education to provide education to inmates housed in service area correctional facilities. Currently, the Sparks Campus offers instruction at the Ventress Correctional Facility in Clayton and at the Easterling Correctional Facility in Clio. Programs offered at Ventress include Air Conditioning, Refrigeration and Small Engine Repair. Programs offered at Easterling include Cabinetmaking, Drafting and Design Technology, Electrical Technology, Masonry, and Plumbing.

Learning Resources Centers System. The Learning Resources Centers (LRC) System provides various resources for students, faculty, and staff members to support College course work, community and corporate education, and lifelong learning. LRC System services are provided at all locations, including the two campuses, one center, two sites, and on line. Access to resources is available through the College's on-line public access catalog—Voyager. In addition, a website of essential library and
information resources is available online. The LRC System participates in interlibrary loan services and cooperative services with libraries throughout the College service area. In addition to the bound collections in the LRCs, basic reference sources, periodical subscriptions, various media, and electronic online databases, such as Alabama Virtual Library and NetLibrary, are provided.

LRC cards are required to check out materials and may be obtained at the circulation desks. Also, Alabama Virtual Library cards, which provide home access to the AVL, are available for faculty, staff, and students.

Students participate in an orientation program designed to assist them in using LRC resources to enhance learning and research opportunities. They are also encouraged to use computers, microfiche readers and printers, photocopiers, and viewing and listing centers that are available.

**WORKFORCE DEVELOPMENT SERVICES**

Wallace Community College is a major provider of workforce development services in Southeast Alabama. The College maintains that preparing students for the workplace is an important part of its mission to promote economic progress.

In addition to its credit programs and services, the College offers a number of services that are specifically aimed at improving the workplace readiness and skill levels of adults in the region. These programs are listed below.

**ADULT EDUCATION**

Wallace Community College’s Adult Education Department is dedicated to serving the community and preparing adults for a better future. Instruction is free to the student, and a variety of options are available to meet individual scheduling needs. The following services are available to individuals 16 or older who are no longer enrolled in high school:

- **Basic Skills Development and GED Preparation.** Instruction is based on an initial academic assessment. A plan is custom designed for each adult student based on assessment results. Instruction prepares students to pass the General Education Development (GED) test.
- **English as a Second Language (ESL).** ESL classes provide multi-level instruction in listening, speaking, reading, and writing and in grammar.
- **Family Literacy.** Family literacy instruction combines GED preparation classes for adults and education activities for their children. Families attend classes together in a fun, interactive learning environment.
- **Literacy Instruction.** Trained community volunteer tutors provide one-on-one instruction to low-functioning readers.
- **Workplace Education.** Basic skills instruction and GED preparation services can be provided at business or industrial sites. Also, customized instruction designed to meet a company’s specific employment needs is available.

Adult Education services are offered at both the Wallace Campus in Dothan and the Sparks Campus in Eufaula. Classes are also available at several other locations in Dothan and Eufaula as well as in Abbeville, Ashford, Clayton, Columbia, Headland, Louisville, and at the Easterling and Sparks Campuses. For more information about these programs, call (334) 983-3521, ext. 2373 (Dothan area), or (334) 687-3543, ext. 4239 (Eufaula area).

**CORPORATE AND CONTINUING EDUCATION**

The Corporate and Continuing Education department offers non-credit, short courses for the general public and customized training for business and industry.

- **Continuing Education.** Each semester, short courses are offered to the general public in three categories: computer skills, special interest, and professional development. These non-credit courses are open to all citizens, regardless of academic background on both the Wallace and Sparks Campuses. For more information regarding computer and special interest courses, call (334) 536-2292 or 536-2203 or 536-2206 for health care courses. Eufaula area residents may call (334) 687-3543, ext. 4247.
- **Corporate Education.** Custom-designed, short-term training is available for local businesses in the area of computer software skills, supervision, team-building, MBTI, ISO 9000, environmental and health safety, blueprint reading, precision measurement, Cisco and MCSE certification, and a host of other technical and business-related topics. Training can be conducted for credit or non-credit on site, on campus, or at other suitable locations. Flexibility and quality are key objectives. The College and client company share costs in an effort to minimize expenses. For more information, call (334) 536-2202 or 536-2203 or Eufaula area residents may call (334) 687-3543, ext. 4229.

**ACT WorkKeys**

Wallace Community College is pleased to offer WorkKeys job profiling, assessment, and training through its WorkKeys Service Center located on the Wallace Campus. WorkKeys is a national workforce development system developed by ACT—an international leader in educational assessment for the past 40 years. It is used by employers nationwide to identify the skills employees need to be successful on the job and to determine where additional training can help develop a higher caliber workforce. The WorkKeys system is designed to measure an individual’s skills and the competency levels required for successful job performance.

All Career/Technical and Allied Health students entering Wallace Community College take ORI 101—WorkKeys Assessment and Advisement. WorkKeys helps students develop better workplace skills by measuring those skills that have been proven critical to job success—reading, math, locating information, applied technology, teamwork, observation, listening, and writing. WorkKeys assessments help students determine how well prepared they are for the jobs that interest them. The assessments document student skills in key areas and give College faculty guidance in providing the education and training students need to improve those skills. By increasing skills in these areas, students also increase their opportunities for employment and for advancement in their chosen fields.

In the geographic region served by Wallace Community College, WorkKeys is part of a workforce development solution that defines workforce needs and quantifies the skill levels required to meet those needs. To date, more than 60 local jobs have been profiled using the WorkKeys system. Some companies have incorporated WorkKeys into their hiring procedures and are advertising their jobs with WorkKeys skill level requirements listed. Wallace Community College offers this program as part of the College’s commitment to ensuring that students are adequately prepared for higher-skill, higher-wage jobs. For more information, call (334) 536-2245.
ADMISSIONS POLICIES AND PROCEDURES

In keeping with the philosophy that capabilities of each individual student should be developed, Wallace Community College admits all students who have the capability to benefit from institutional programs and courses. This open-door policy grants admission to first-time college students, transfer students, transient students, audit students, early admission students, dual enrollment-dual credit students, international students, and students seeking readmission. The Admissions and Records Office is the unit responsible for administering all admissions policies and procedures for general admission to the College.

ADMISSION OF FIRST-TIME COLLEGE STUDENTS

Applicants who have not previously attended any regionally or Council on Occupational Education (COE) accredited postsecondary institutions are designated first-time college students or native students.

Admission to Courses Creditable Toward an Associate Degree. To be eligible for admission to courses creditable toward an associate degree, first-time college students must meet one of the following criteria:

1. Hold the Alabama High School Diploma, the high school diploma of another state equivalent to the Alabama High School Diploma, or an equivalent diploma issued by a non-public regionally and/or state accredited high school; or

2. Hold a high school diploma equivalent to the Alabama High School Diploma issued by a non-public high school and have passed the Alabama Public High School Graduation Examination; or

3. Hold a high school diploma equivalent to the Alabama High School Diploma issued by a non-public high school and have achieved a minimum ACT score of 16 or equivalent score on the SAT; or

4. Hold the Alabama Occupational Diploma, the high school diploma of another state equivalent to the Alabama Occupational Diploma, or an equivalent diploma issued by a non-public high school, and have achieved a minimum ACT score of 16 or the equivalent score on the SAT; or

5. Hold a GED Certificate issued by the appropriate state education agency.

Students who meet one of these criteria are classified as degree eligible. Wallace Community College may establish additional admission requirements to specific courses or occupational degree programs when student enrollment must be limited or when necessary to ensure ability to benefit.

Admission to Courses Not Creditable Toward an Associate Degree. Applicants to courses not creditable toward an associate degree and programs comprised exclusively of courses not creditable to an associate degree may be admitted provided they meet the standards above or provided they meet the criteria listed below:

1. Are at least 16 years of age.

2. Have not been enrolled in secondary education for at least one calendar year (or on the recommendation of the local superintendent).

3. Have specifically documented ability to benefit (appropriate scores on the CPAT exam; ACT/ASSET or COMPASS for some programs).

Students are classified as non-degree eligible and are not allowed to enroll in courses creditable toward an associate degree unless appropriate conditions are met.

Wallace Community College may establish higher or additional admission requirements for a specific program or service when student enrollment must be limited or when necessary to ensure ability to benefit.

Unconditional Admission of First-Time College Students. For unconditional admission, applicants must have on file at the College a completed application for admission and at least one of the following documents:

1. An official transcript showing graduation with the Alabama High School Diploma, the high school diploma of another state equivalent to the Alabama High School Diploma, or an equivalent diploma issued by a non-public regionally and/or state accredited high school; or

2. An official transcript showing graduation from high school with a high school diploma equivalent to the Alabama High School Diploma issued by a non-public high school and proof of passage of the Alabama
Public High School Graduation Examination; or

3. An official transcript showing graduation from high school with a high school diploma equivalent to the Alabama High School Diploma issued by a non-public high school and evidence of a minimum ACT score of 16 or the equivalent score on the SAT; or

4. An official transcript showing graduation from high school with a high school diploma equivalent to the Alabama Occupational Diploma, the high school diploma of another state equivalent to the Alabama Occupational Diploma, or an equivalent diploma issued by a non-public high school, and have achieved a minimum ACT score of 16 or the equivalent score on the SAT; or

5. An official GED Certificate.

All male students between the ages of 18 and 26 must show proof of registration with the U.S. Selective Service in accordance with Section 36-26-15.1 of the Code of Alabama of 1974 as amended.

For admission to courses not creditable toward an associate degree, applicants with less than a high school diploma or GED Certificate must also have on file documented ability to benefit (appropriate scores on the CPAT exam; ACT/ASSET or COMPASS for some programs).

Conditional Admission of First-Time College Students. Applicants who do not have on file one of the credentials listed above may be granted conditional admission. No student is allowed to enroll for a second term unless all required admission records are received by Wallace Community College prior to registration for the second term. The responsibility for providing all required documents rests with the student.

If all required admission records are not received by Wallace Community College prior to issuance of first-term grades, the grades are reported on the transcript; but the transcript will read CONTINUED ENROLLMENT DENIED PENDING RECEIPT OF ADMISSION RECORDS. This notation is removed from the transcript only upon receipt of all required admission records.

Student Assessment. All first-time students are assessed in the areas of English, mathematics, and reading through administration of the ACT/ASSET or COMPASS and placed at the appropriate level as indicated by the assessment results. Students who are not satisfied with their placement in assigned developmental courses may retake the ACT/ASSET or COMPASS exam. Students will be given a different version of the test. Students must pay $8.00 to retest whether they take one, two, or three portions of the test. Students may retest only once in a three-year period, and testing must be completed in one session. Students testing into developmental courses must remain in those courses unless they satisfy requirements by retesting. Test scores are valid for a three-year period. After three years, scores become invalid and students must retest at no cost.

Exemptions. Students are exempt from assessment requirements if they meet one of the following criteria:

- Score 480 or above on the SAT verbal and 526 or above on the SAT mathematics, or score 20 or above on ACT English and mathematics and enroll within three years of high school graduation; or
- Possess an associate degree or higher; or
- Transfer degree-creditable college-level English or mathematics courses with a grade of “C” or better; or
- Be a senior citizen, undeclared major, or other non-award-seeking major taking classes for avocational reasons only; or
· Be enrolled in a particular short certificate program having no English or mathematics requirements; or

· Have completed required developmental course work at another Alabama College System institution within the last three years; or

· Be an audit or transient student; or

· Be able to provide documentation of assessment (ACT/ASSET or COMPASS) within the last three years.

Students may enroll in college-level courses while enrolled in developmental courses only if the discipline is different from the discipline in which they score below the standard placement score. Students who score below the College's standard placement score are placed into a developmental course of instruction in a given discipline(s) and must remain in the discipline(s) until academic competencies are developed. Students enrolled in developmental courses in two or more of the discipline areas of English, mathematics, and reading are prohibited from enrolling in more than 12 semester credit hours per term.

ADMISSION OF TRANSFER STUDENTS

Applicants who have previously attended other regionally or Council on Occupational Education accredited postsecondary institutions are considered transfer students and are required to furnish official transcripts of all work attempted at all said institutions. Applicants who have completed the baccalaureate degree are required to furnish only the transcript from the institution granting the degree. Wallace Community College may also require transfer students to submit other documents required of first-time college students.

Transfer students must disclose all postsecondary institutions previously attended. Failure to do so may result in disapproval of the application for admission or expulsion from the College.

Transfer students who meet requirements for admission to a course creditable toward an associate degree are classified as degree eligible. Transfer students who do not meet these requirements are classified as non-degree eligible.

Unconditional Admission of Transfer Students. Transfer students must submit to Wallace Community College an application for admission and official transcripts from all regionally or Council on Occupational Education accredited postsecondary institutions attended and, as designated by the College, any other documents required for first-time college students. Ability-to-benefit students must also meet testing requirements (appropriate scores on the CPAT exam; ACT/ASSET or COMPASS exam for some programs).

Transfer students who have completed the baccalaureate degree must submit only the transcript from the institution granting the degree.

Conditional Admission of Transfer Students. Transfer students who do not have on file official transcripts from all postsecondary institutions attended, if required, and any additional documents required by Wallace Community College may be granted conditional admission. No transfer students are allowed to enroll for a second term unless all required admission records have been received by Wallace Community College prior to registration for the second term. The responsibility for providing all required documents rests with the student.

If all required admission records are not received by Wallace Community College prior to issuance of first-term grades, the grades are reported on the transcript, but the transcript will read CONTINUED ENROLLMENT DENIED PENDING RECEIPT OF ADMISSION RECORDS. This notation is removed from the transcript only on receipt of all required admission records.

Initial Academic Status of Transfer Students. Transfer students whose cumulative grade point
average at the transfer institution(s) is 2.0 or above on a 4.0 scale are admitted on CLEAR academic status.

Transfer students whose cumulative grade point average at the transfer institution(s) is less than 2.0 on a 4.0 scale are admitted only on ACADEMIC PROBATION. The transcript will read ADMITTED ON ACADEMIC PROBATION.

Applicants who have been academically suspended from another regionally or Council on Occupational Education accredited postsecondary institution may be admitted as transfer students only after appeal to the Admissions and Academic Standards Committee. If transfer students are admitted on appeal, they will enter the College on ACADEMIC PROBATION. The transcript will read ADMITTED UPON APPEAL—ACADEMIC PROBATION.

GENERAL PRINCIPLES FOR TRANSFER OF CREDIT
Course work transferred or accepted for credit toward an undergraduate program must represent collegiate course work relevant to the formal award. Course content and level of instruction must result in student competencies at least equivalent to those of students enrolled in the College's undergraduate formal award programs. In assessing and documenting equivalent learning and qualified faculty members, the College may use recognized guides that aid in the evaluation for credit. Such guides include those published by the American Council on Education, The American Association of Collegiate Registrars and Admissions Officers, and the National Association of Foreign Student Affairs.

Courses completed at other regionally or Council on Occupational Education accredited postsecondary institutions with a passing grade are accepted for transfer as potentially creditable toward graduation requirements. Transfer students from collegiate institutions Transfer students who attend another postsecondary institution and who seek credit for transfer to that parent institution may be not accredited by the appropriate regional association or Council on Occupational Education may request an evaluation of transfer credits after completing 15 semester hours with a cumulative GPA of 2.0 or above. Transfer grades of “D” are accepted only when the transfer student's cumulative GPA is 2.0 or above. If students have a cumulative GPA of 2.0 or above, the “D” grade is accepted the same as for native students.

Transfer students who desire to have course work completed at international colleges or universities evaluated for transfer credit must submit a course-by-course evaluation provided by World Education Services (WES). WES application forms are available from the Admissions and Records Office.

Student Assessment. Transfer students who have not earned college-level credit for English and mathematics with a grade of “C” or better (or who cannot provide ASSET scores in English, mathematics, and reading that are less than three years old) are assessed through administration of the ACT/ASSET or COMPASS and placed at the appropriate level as indicated by assessment results. Students who apply for admission and enroll within three years of high school graduation and who score 480 or above on SAT verbal and 526 or above on SAT mathematics or 20 or above on ACT English and 20 or above on ACT mathematics are exempt from placement test requirements. Transfer students who meet the following criteria are also exempt from placement testing: (1) possess an associate degree or higher and (2) have completed required developmental course work at another Alabama College System institution within the last three years. Procedures for objecting to placement in assigned developmental courses are outlined on page 19 of this catalog.

UNCONDITIONAL ADMISSION OF TRANSIENT STUDENTS

admitted to Wallace Community College as transient students. Transient students must submit an application for admission and an
official letter or transient permission form from the parent institution certifying that the credits earned at Wallace Community College are accepted as part of their academic program. The official letter or transient permission form must be properly signed by the dean, registrar, or advisor at the parent institution and must contain the specific Wallace Community College course(s) students have been approved to take. Transient students are not required to file transcripts of previously earned credits at other postsecondary institutions. Transient students are not allowed conditional admission. The transient permission form must be on file prior to registration for the first term.

ADMISSION OF STUDENTS TO CORPORATE AND CONTINUING EDUCATION COURSES
Students should refer to page 17.

ADMISSION OF AUDIT STUDENTS
Students may apply for admission to credit courses on a non-credit basis as auditors. Auditors must meet the same admission requirements as regular students and must complete course prerequisites. Students may change from audit to credit or credit to audit only during the official drop and add period.

ADMISSION OF STUDENTS SEEKING READMISSION
Students returning to Wallace Community College after one or more terms of non-attendance, excluding summer term, are required to submit an application for readmission and official transcripts from all regionally or Council on Occupational Education accredited postsecondary institutions attended since the last date of attendance at Wallace Community College.

Returning students are eligible for readmission only if they are in good standing for the last term of attendance. Students who are not in good standing or who have not served designated suspension periods may request readmission by appeal to the Admissions and Academic Standards Committee.

EARLY ADMISSION FOR ACCELERATED HIGH SCHOOL STUDENTS
Students are eligible for early admission if they desire to take courses for high school and college credit, if their school system has signed a contract with Wallace Community College to participate in this program, and if they meet the following criteria:

1. Successful completion of the 10th grade
2. Completion of an application for admission to Wallace Community College and the statement of eligibility, Early Admission for Accelerated High School Students, certifying that students have a minimum cumulative “B” average and recommending that they be admitted under this policy
3. Enrollment only in postsecondary courses for which high school prerequisites have been completed (for example, students may not take English Composition until all required high school English courses have been completed)

Exceptions may be granted by the Chancellor of the Department of Postsecondary Education for students documented as gifted and talented according to standards included in the State Plan for Exceptional Children and Youth. Exceptions apply only to requirements 1 and 3 above.

Accelerated high school students who later enroll as regular students at Wallace Community College automatically receive credit for hours earned under this accelerated high school program if the credits are applicable toward their degree program. Students attending other colleges, however, must request in writing that official transcripts be mailed to those institutions if they desire to receive credit earned through this program. College credit earned through this program may not substitute for high school credit.

ADMISSION OF DUAL ENROLLMENT-DUAL CREDIT STUDENTS
Students are eligible for admission as dual enrollment-dual credit students if they desire to take courses for high school and college credit, if their school system has signed a contract with Wallace Community College to participate in this program, and if they meet the following criteria:

1. Complete an application for admission to Wallace Community College
2. Submit the form Dual Enrollment-Dual Credit Statement of Eligibility in verification of having earned a “B” average in completed high school courses
3. Have written approval of the high school principal and local superintendent of education (Dual Enrollment-Dual Credit Statement of Eligibility)

4. Be in grade 10, 11, or 12 or have an exception granted by Wallace Community College on recommendation of the high school principal and superintendent and in accordance with Alabama Administrative Code 290-8-9.17 regarding gifted and talented students

5. Take the ACT/ASSET/COMPASS exam

Students may enroll in career/technical courses and/or programs in accordance with guidelines of the Department of Postsecondary Education.

Students enrolled in courses offered during the normal high school day on or off the high school campus must have prior permission from their principal, superintendent, and the appropriate Wallace Community College dean.

Six semester credit hours at Wallace Community College equal one credit at the high school level in the same or related subject.

ADMISSION OF INTERNATIONAL STUDENTS
Wallace Community College is authorized by the U.S. Immigration Service to enroll eligible international students. Prior to being issued an I-20 form, students must submit the following items:

1. Application for admission to Wallace Community College

2. Signed, notarized statement declaring full personal responsibility for financial obligations while attending Wallace Community College

3. Official transcript showing a minimum of 500 on the Test of English as a Foreign Language (TOEFL) or 173 on the computer test. The TOEFL score of 500 may be waived for students from the following countries: Antigua and Barbuda, Australia, Bahamas, Barbados, Belize, Bermuda, Canada (verify from transcript), Dominica, England, Tanzania, Grenada, Ireland, Jamaica, New Zealand, Nigeria, Scotland, St. Kitts and Nevis, St. Lucia, Trinidad and Tobago, The Gambia, and the Virgin Islands

4. Official English translation of the high school transcript (and college transcript, if applicable)

An I-20 form is issued on receipt of all items listed above.

International students must purchase health and life insurance from the College at the time of registration for each term.

International students who desire to have course work completed at international colleges or universities evaluated for transfer credit must submit a course-by-course evaluation provided by World Education Services (WES). WES application forms are available from the Admissions and Records Office.

ADMISSION TO HEALTH EDUCATION PROGRAMS
Students must meet all requirements for general admission to the College. Certain health education programs may have additional standards for admission and progression. Students should refer to the program descriptions in this catalog and/or contact the specific program director or chairperson for additional information.

ADMISSION TO THE SENIOR ADULT SCHOLARSHIP PROGRAM
Students who are 60 years of age or older and who are eligible for the Senior Adult Scholarship program must meet institutional admission requirements.

IN-STATE RESIDENCY
For information regarding determining residency for in-state tuition rates, please refer to the Tuition and Fees section on page 24.
TUITION AND FEES/FINANCIAL AID
TUITION AND FEES

All students are required to pay tuition and fees according to dates published in registration schedules. Sponsored students whose tuition and fees are paid by agencies such as Vocational Rehabilitation Services, Alabama Veterans' Affairs, Title IV Grants, etc. must have written authorization on file to be exempt from personal payment.

Students failing to pay at the appropriate time will have their registration voided and will have to repeat the entire registration process.

Note: Tuition and fees at Wallace Community College are subject to change at the beginning of any term, prior to or during the 2003-2004 academic year, as a result of state budget proration and other factors beyond the College’s control.

</table>

In-State Tuition. In-state tuition is $64 per semester hour.

Out-of-State Tuition. Out-of-state tuition is $128 per semester hour. Wallace Community College allows in-state tuition for certain neighboring Florida and Georgia residents. Refer to Qualifications for In-State Tuition below for specific information.

Internet Tuition. Tuition for Internet courses will be $84 per credit hour. No facility renewal or technology fees will be charged for Internet courses.

Qualifications for In-State Tuition. Students qualified to pay in-state tuition on the Wallace Campus in Dothan are Alabama residents; Georgia residents from Baker, Calhoun, Clay, Decatur, Early, Miller, Quitman, Randolph, and Seminole Counties; and Florida residents from Bay, Calhoun, Holmes, Jackson, Walton, and Washington Counties. Students qualified to pay in-state tuition on the Sparks Campus in Eufaula are Alabama residents and Georgia residents from Baker, Chattahoochee, Calhoun, Clay, Dougherty, Early, Marion, Miller, Muscogee, Quitman, Randolph, Stewart, Sumter, Terrell, and Webster Counties. Military personnel assigned to an active military installation in Alabama and their immediate family members also qualify for in-state tuition. Other qualifying categories may be determined by the Admissions and Records Office.

Refund check(s) are made payable to the student and mailed to the student's home address as recorded in the registration file. An administrative fee of 5% of tuition and other institutional charges is assessed for each withdrawal within the period beginning the first day of class and ending at the end of the third week of class. The total amount charged for this service will not exceed $100. Financial Aid students are subject to the “Financial Aid Return of Title IV Funds policy” found below.

FEES

Cap/Gown Fee. Students who participate in the graduation ceremony must order caps and gowns from the College Bookstore. The fee is $27.25.

Challenge Examination Fee. A fee of $50 is charged for challenge examinations listed in various program information sections throughout this catalog but not to challenge placement in English, mathematics, or reading.

Continuing Education and Special Interest Course Fees. Fees vary according to the nature and length of the course.

Facility Renewal Fee. A facility renewal fee of $8 per credit hour per term is charged to provide funds for the improvement of facilities.

Graduation Fee. The graduation fee is $16 for diploma and cover for graduates.

International Student Insurance. International students must purchase health and life insurance from the College each term. The fee for fall and spring terms is $265; summer term is $118.

Late Registration Fee. A fee of $25 is charged to students who register on or after the first day of classes as stated in the College calendar.

Returned Check Fee. A fee of $25 is charged for each worthless check issued to the College. Students issuing worthless checks may be subject to class withdrawal for non-payment of tuition and fees. A returned check may be subject to collection through the Worrisome Check Unit of the District Attorney's Office.

Student Liability Insurance. Health program students enrolled in clinical and/or laboratory courses are charged a fee of $18 per term for professional liability insurance. This insurance coverage is a requirement of each allied health program.

Substance Abuse Screening Fee. Students enrolled in health programs are charged a fee of $30 for substance abuse screening. This screening is required on initial program admission and/or readmission following a break in enrollment.

Technology Fee. A fee of $6 per credit hour per term is charged for acquisition and maintenance of technology and technological applications for students.

Validation Examination Fee. A fee is charged for validation examinations listed in various program information sections throughout this catalog.

Withdrawal Fee. An administrative fee of 5% of tuition and other institutional charges is assessed for each withdrawal within the period beginning the first day of class and ending at the end of the third week of class. The total amount charged for this service will not exceed $100.

TUITION REFUNDS

Withdrawal Procedures. To be entitled to a tuition and fees refund, students on the Wallace Campus must officially withdraw IN PERSON by visiting a College counselor, or on duty administrator, to complete a withdrawal form. Students at the Sparks Campus must see a staff member in the Student Affairs Department, while students at other College locations must see the designated College official at the site.

Complete Withdrawal. Students who officially withdraw and have never attended any class(es) are refunded the total tuition and other refundable fees. Students who officially withdraw and have attended class(es) are refunded tuition and refundable fees calculated from the actual date of withdrawal. Refunds are calculated based on the following schedule:

<table>
<thead>
<tr>
<th>Complete Withdrawal/Refund</th>
<th>During first week</th>
<th>During second week</th>
<th>During third week</th>
<th>After end of third week</th>
</tr>
</thead>
<tbody>
<tr>
<td>75%</td>
<td>50%</td>
<td>25%</td>
<td>None</td>
<td></td>
</tr>
</tbody>
</table>

Partial Withdrawal. Students who do not completely withdraw from the College but drop a class during the regular drop and add period are refunded the difference in tuition and fees paid and tuition and fees

28
applicable to the reduced number of hours, including fees appropriate to the classes dropped. No refund is due a student who partially withdraws after the official drop and add period.

Students who have not attended class by the fifth class day of a term are removed from that class. Students who have not attended any classes by the fifth class day will have their registrations voided and will not be registered for that term. It is the student's responsibility to attend class. If an emergency should occur, Wallace Campus students are to contact the Office of the Assistant Dean of Student Affairs at (334) 983-3247, ext. 2470, and Spars Campus students should contact the Student Affairs Office at (334) 687-3543, ext. 4282, prior to the fifth day of a term. Students at other College locations should contact the designated College official.

Ineligibility for Refund. Students who are withdrawn by the College for disciplinary reasons, non-payment of charges, or other similar reasons are not eligible for a refund.

**TITLE IV REFUNDS**

General. When a Pell and/or SEOG Grant recipient completely withdraws from the College, the business office must determine the amount of the grant(s) that the student earned as of the student's withdrawal date.

The student's withdrawal date is either:

1. The date, as determined by the College, that the student began the withdrawal process prescribed by the College;

2. The date, as determined by the College, that the student otherwise provided official notification to the College, in writing or orally, of his or her intent to withdraw; or

3. If the student ceases attendance without providing official notification to the college, the midpoint of the payment period or the date that the institution becomes aware that the student ceases attendance will be used as the date of withdrawal.

**Calculation of the Amount Earned Title IV Assistance Earned by the Student.** The amount of earned Title IV assistance is calculated by dividing the number of days attended (total calendar days) by the total number of days in the payment period (calendar days). The total number of calendar days in a payment period includes all days within the period, except scheduled breaks of at least five consecutive days, which are excluded from the total number of calendar days in a payment period and the number of calendar days completed in that period. If the student’s withdrawal date occurs after 60% of the payment period, none of the Title IV aid has to be returned. Otherwise the College, the student, or both must return a portion.

**Return of Unearned Aid, Responsibility of the College.** The College must return an amount equal to the total of tuition and fees incurred by the student for the payment period multiplied by the percentage of Title IV aid (Pell and/or SEOG) that has not been earned by the student (calculated by subtracting the earned percentage as described above from 100%). Because of this requirement by the U.S. Department of Education, the College Refund Policy does not apply to students who receive Title IV assistance. If a student receives Pell or SEOG, regardless of who actually paid the tuition and fees, the return or refund created by the withdrawal {according to provisions} will be made to the Pell and/or SEOG Grant programs subject to the maximum amount of the award for the payment period. Therefore, no sponsoring agency that pays tuition and fees (for a student that receives Pell and/or SEOG Grants) will receive a refund if the student withdraws from the College until all monies due to the Pell and/or SEOG programs have been returned.

**Return of Unearned Aid, Responsibility of the Student.** The amount of aid that the student is responsible for returning (considered to be an overpayment) is calculated by subtracting the amount of unearned aid that the College is required to return from the total amount of unearned Title IV assistance (Pell and/or SEOG). The student is required to return or repay 50% of the grant assistance that is the responsibility of the student to repay. The student remains eligible for Title IV aid only if repayment is made to the College within 45 days.

**OTHER REFUNDS**

**Books and Supplies.** A student who drops/withdraws and has purchased returnable books and/or supplies from the College and returns the items with the original purchase receipt in new/unused condition during the first 10 calendar days of the term will receive a full refund. After the first 10 calendar days of the term, supplies are non-returnable regardless of condition.

FINANCIAL AID

29
The primary purpose of student financial assistance programs at Wallace Community College is to assist students with meeting the cost of their education. All students are encouraged to apply. Eligibility for grants is based on financial need.

**APPLYING FOR FEDERAL FINANCIAL AID**

Wallace Community College awards financial assistance on a continuous basis for the entire year. Priority for the limited campus-based programs (FWS, FSEOG, and ASAP) is given to students whose applications are completed prior to May 1 of each year.

Students applying for financial aid must:

1. Apply for admission and request a high school transcript, GED scores and certificates, and academic transcripts from other colleges previously attended.

2. Complete the Free Application for Federal Student Aid (FAFSA). Application forms can be obtained at high school guidance offices and college financial aid offices. This should be done as soon as the student (and the parents of a dependent student) completes the Federal Income Tax Return each year.

3. Mail the FAFSA to the Federal Processor, a Student Aid Report (SAR) will be sent to the student in approximately four weeks. Students filing the FAFSA via the Internet can expect slightly faster response time. The SAR should be submitted to the Financial Aid Office to determine the student’s eligibility.

4. Complete verification documents if selected. Approximately one-third of all financial aid applications are selected by the federal government for a process called verification. Students who are selected are notified of the documentation requirements.

**ELIGIBILITY**

To receive Title IV student financial assistance, a student must meet the following requirements:

1. Have financial need, which is determined by subtracting the expected family contribution from the cost of education.

2. Have a high school diploma, a GED, or have passed an independently administered Ability to Benefit test approved by the U.S. Department of Education.

3. Be enrolled as a regular student working toward a degree or certificate in an eligible program.

4. Maintain satisfactory academic progress.

5. Sign a statement of educational purpose and a certification statement on overpayment and default (both found on the Free Application for Federal Student Aid [FAFSA]).

6. Be unconditionally admitted to Wallace Community College.

7. Be registered with Selective Service, if required.

8. Be a United States citizen or eligible non-citizen.

**VERIFICATION OF FINANCIAL AID ELIGIBILITY**

Federal regulations require that certain information on selected applications be verified. Students whose applications are selected by the Department of Education for verification are required to document the accuracy of application information, such as adjusted gross income, taxes paid, number of family members, untaxed income as well as other information from tax returns, and other documentation as requested by the Director of Financial Aid. Students cannot be certified as eligible for financial aid until the verification process has been completed and any errors outside the tolerance limits have been corrected.

**FINANCIAL AID COURSE LOAD REQUIREMENT**

To receive the amount of Pell Grant as indicated on the financial aid award letter, students must enroll for a full-time course load, which is a minimum of 12 semester credit hours each term. Students who enroll for fewer than 12 semester credit hours will have their Pell Grant award adjusted according to their registration status. Students enrolling in 9 to 11 semester credit
hours are considered three-quarter time, 6 to 8 semester credit hours are half time, and 1 to 5 semester credit hours are less than half time.

FINANCIAL AID PAYMENT PROCEDURES
1. Students are paid based on their training time as of the end of the published drop and add period. Students who officially withdraw or drop out are subject to the Financial Aid Return of Title IV funds policy.

2. Students are not eligible for financial aid for classes they never attend.

3. Students who are withdrawn by the College for disciplinary reasons, non-payment of charges, or other similar reasons, are subject to the Financial Aid Return of Title IV Funds policy.

4. Additional information regarding the College's Financial Aid Payment and Return of Title IV Funds policy is published in the Tuition and Fees section of this catalog.

MINIMUM STANDARDS OF SATISFACTORY ACADEMIC PROGRESS
Federal regulations require that all students meet minimum standards of satisfactory academic progress to receive federal financial aid. These standards are checked at least annually.

Standards of Satisfactory Academic Progress. All students receiving financial aid under Title IV must meet the same Standards of Student Progress applicable to all students at the institution. (See Grading System in the General Policies section of this catalog for complete standards).

1. Time Frame. Each student receiving financial aid is expected to complete his or her course of study within a period not to exceed 1.5 times the length of his or her program of study. For example, a two-year program of study (6 terms) must be completed within three years (9 terms) of attendance.

2. Qualitative Measures. Each student is expected to meet or exceed the following grade point average (GPA) at the indicated points in their program of study:

   - 12-21 semester credit hours 1.50 Cumulative GPA
   - 22-32 semester credit hours 1.75 Cumulative GPA
   - 33 or more semester credit hours 2.00 Cumulative GPA

3. Quantitative Measures. Each student on Title IV federal financial aid must earn two-thirds of the minimum number of hours required for each academic year to complete a program in the normal length of time allowed.

   **Financial Aid Suspension.** When a student who is eligible for Title IV federal financial aid is suspended, whether the student serves the suspension or is readmitted on appeal, the student is not eligible to receive financial aid for the duration of the suspension. The student is not eligible again to receive financial aid until he or she makes the cumulative GPA required for the number of credit hours attempted at the institution or the GPA for that term is 2.0 or above (based on at least 12 semester credit hours or above attempted at the institution during that term).

   **Reinstatement.** A student may have financial aid reinstated by (1) attending college at his or her own expense and (2) bringing grades into compliance with the minimum standards of satisfactory academic progress. Students are responsible for notifying the Office of Financial Aid when his or her grades are brought into compliance with the policy. Financial aid is not retroactively paid for any periods of enrollment during which the student is not eligible.

   **Program of Study.** Students receiving financial assistance must be enrolled in a program of study that leads to a degree, certificate, or diploma.
Repeated Courses and Remedial Courses. A Title IV federal financial aid recipient who is enrolled in a developmental (remedial) course may not enroll in the same course more than three times and continue to receive financial assistance. A Title IV federal financial aid recipient may not be paid for more than 30 semester credit hours of developmental work.

Extenuating Circumstances and Appeals. Students who have had eligibility to receive financial aid terminated may appeal this decision in writing to the Director of Financial Aid, who will advise the student regarding the proper procedures and provide assistance in achieving an equitable solution to the problem.

Students’ Rights and Responsibilities. Students have the responsibility of knowing the requirements for applying for financial aid, College refund and repayment policies, procedures relative to guidelines affecting a financial aid award, and procedures relative to disbursement of financial aid.

Financial Aid Overpayment Policy. In accordance with federal regulations (CFR 668-61), any financial aid overpayment made to a student must be repaid to the College to be refunded to the Title IV program from which the overpayment occurred.

FEDERAL FINANCIAL AID PROGRAMS
Federal Pell Grant. Federal Pell Grants provide a foundation of financial aid to which other federal and non-federal sources of aid may be added. The amount of a Pell Grant is based on a family’s financial circumstances. Students should complete the Free Application for Federal Student Aid (FAFSA) to apply for a Pell Grant. A Pell Grant is awarded for one academic year (3 terms). The financial aid year begins with the fall semester and ends with the summer term. Students are paid only after all required documents are received, reviewed, and approved by the Office of Financial Aid.

Federal Supplemental Educational Opportunity Grant (FSEOG). Federal Supplemental Educational Opportunity Grant is designed to assist students with exceptional financial need. Priority is given to Pell Grant recipients who apply early. Students should complete the Free Application for Federal Student Aid (FAFSA) to apply for Federal Supplemental Educational Opportunity Grant (FSEOG). Students who drop below half-time status (5 hours or fewer) or students who totally withdraw are not eligible for the award.

Alabama Student Assistance Program. This grant program is awarded only to Alabama residents. All applicants must complete the FAFSA. Priority awarding goes to students with the lowest family contribution who also receive Pell Grant.

VETERANS’ BENEFITS
The federal government and the state of Alabama have programs that provide financial assistance to veterans and their dependents. Wallace Community College believes that veterans are entitled to all benefits accrued through service to their country. The following information is given for those applying for veterans' benefits:

Alabama GI Dependents’ Scholarship Program. The Alabama Department of Veterans Affairs offers financial assistance to eligible dependents—child, stepchild, spouse, or unmarried widow(er)—of disabled veterans (living or deceased), who were permanent civilian residents of Alabama prior to entry into
military service. Special consideration is given to dependents of permanently and totally disabled veterans who are bona fide residents or were prior to their death. Other benefits may be available to eligible dependents of the following: former prisoners of war (POW), declared missing in action (MIA), and those who died in service.

Maximum educational benefits include free tuition and required textbooks excluding non-credit and/or remedial courses for four standard academic years or a prescribed technical course at any state-supported junior or community college, university, or technical school.

Dependent children must file an application prior to age 26 (may be extended to age 30 in certain cases). A spouse or widow(er) does not have a filing deadline or age limitation.

For more information and application procedures, students should contact the nearest Veterans Affairs Office located in each county courthouse or write to the Alabama GI Dependents’ Scholarship Program, P.O. Box 1509, Montgomery, AL 36102-1509.

Survivors’ and Dependents’ Educational Assistance Program (Chapter 35). This program provides financial aid for the education of dependent sons, daughters, and spouses of the following individuals:

1. Veterans who died or are permanently and totally disabled as the result of a service-connected disability. The disability must arise out of active service in the Armed Forces.

2. Veterans who died from any cause while such service-connected disability was in existence.

3. Servicepersons missing in action or captured in the line of duty by a hostile force.

4. Servicepersons forcibly detained or interned in the line of duty by a foreign government or power.

Eligible dependents under this program must provide the following items:

2. Official grade transcripts from any colleges previously attended (submitted to the Admissions and Records Office).

Old GI Bill (Vietnam Era—Chapter 34). Benefits for veterans under the Old GI Bill were terminated December 31, 1989. Some benefits for these veterans were carried over to the new bill (Montgomery GI Bill, Chapter 30). If a veteran feels he or she has some remaining eligibility under the Chapter 34 program, he or she should contact the Department of Veterans Affairs at 1-888-442-4551.

Veterans' Educational Assistance Program (Chapter 32). Veterans under this program (service beginning on or after January 1, 1977, through June 30, 1985) must provide the following items to apply for these benefits:

1. Completed application for educational benefits (Form 22-1990 available in the Veterans Office at Wallace Community College).

2. Copy of DD 214 (separation papers).

3. Official grade transcripts from any colleges previously attended (submitted to the Admissions and Records Office).

Montgomery GI Bill—Active Duty Educational Assistance Program (Chapter 30). Certain veterans with an honorable discharge and servicepersons may qualify for the Montgomery GI Bill. Veterans under this program must provide the following items:

1. Completed application for educational benefits (Form 22-1990 available in the Veterans Office at Wallace Community College).
2. Copy of DD 214 (separation papers).

3. Official grade transcripts from any colleges previously attended (submitted to the Admissions and Records Office).

Active duty or servicepersons complete Form 22-1990 only.

Montgomery GI Bill—Selected Reserve Educational Assistance Program (Chapter 1606). Members of the Selected Reserve who enlist, reenlist, or extend an enlistment in Selected Reserve so that the reservist has an obligation to serve for a period of not less than six years following the date of such action may qualify for Chapter 1606. Reservists under this program must provide the following items:

1. Completed application for educational benefits (Form 22-1990 available in the Veterans Office at Wallace Community College).

2. DD 2384 (Notice of Basic Eligibility) completed by Guard or Reserve unit.

3. Official grade transcripts from any colleges previously attended (submitted to the Admissions and Records Office).

Alabama National Guard Educational Assistance Program (ANGEAP). A financial award by the state of Alabama to an Alabama National Guard Educational Assistance Program applicant who is a resident of Alabama, and who is designated to be an eligible student enrolled in or accepted for enrollment in an eligible program at an eligible institution, and is awarded to the student to defray direct educational-related expenses: tuition, mandatory fees, books, and supplies, not to exceed $500 per term and not more than $1,000 annually.

Vocational Rehabilitation (Chapter 31). Vocational Rehabilitation is intended to help the service-disabled veteran become independent in daily living and, to the extent possible, to select, prepare for, and secure employment that is compatible with his or her interests, abilities, physical capabilities, and goals. Under Chapter 31, the Veterans Administration pays the cost of required tuition, fees, books, equipment, and supplies. The veteran also receives a monthly subsistence allowance.

Note: Interested students should contact the county Veterans Affairs Office or the Regional Veterans Administration at 1-800-827-1000.

REQUIRED STANDARDS OF SATISFACTORY ACADEMIC PROGRESS FOR VETERANS

To retain eligibility for veterans’ benefits, all veterans must meet the same Standards of Student Progress applicable to all students at the institution. (See Grading System in the General Policies section of this catalog for complete standards.)

CERTIFICATION OF VETERANS

The following criteria are used for certifying veterans or eligible dependents:

1. Certification is granted only for courses that are applicable to the declared program of study. Any deviation must be approved in writing.

The Veterans Affairs Office does not certify enrollment for veterans to the Department of Veterans Affairs (VA) until after the last day of late registration. This is to ensure that the correct information is sent to the VA for the semester in which veterans are registering. However, the College will certify the veteran prior to registration for fall term based on the assumption that the veteran's enrollment status remains the same as summer term. Because of the early
certification, the veteran could be overpaid or underpaid until the correct information is received and processed by the VA after the last day of late registration.

5. Veterans who have received college credit at other institutions are certified only for courses necessary to complete the declared program of study at Wallace Community College. Veterans are required to have an official grade transcript in WCC’s Admissions and Records Office if they have attended any other college. **It is the veteran's responsibility to notify the Wallace Community College Veterans Office when the transcript has been received in the Admissions and Records Office.** Enrollment is certified to the VA for only two semesters until prior transcripts are received and evaluated by the Admissions and Records Office at Wallace Community College.

6. Benefits are paid on the following enrollment schedule:

- Full time = 12 or more semester hours
- Three-quarter time = 9-11 semester hours
- Half time = 6-8 semester hours
- Part time = 5 or fewer semester hours

A veteran may, under certain circumstances, be awarded credit in physical education (PED) for prior military service. A copy of the veteran’s DD 214 with honorable discharge must be submitted to the Registrar’s Office for credit to be granted. Credit for military learning experiences may also be granted. Veterans should refer to the General Policies section of this catalog for the official policy.

Payment and application processing by the Department of Veterans Affairs normally takes up to 90 days; therefore, the veteran must be prepared to pay all tuition and fees for the first two terms of enrollment before benefits are received. **ELIGIBILITY IS DETERMINED BY THE VETERANS AFFAIRS.**

**ADVANCE PAY**

Veterans may also apply for advance pay. To be eligible for advance pay, veterans must submit their application and other documentation in accordance with the deadlines established each term by the Office of Financial Aid at Wallace Community College. The advance payment is then mailed to the appropriate College location for delivery to the veteran on registration day. The advance payment includes an allowance for the portion of the month in which the school term begins as well as the next month’s allowance. Veterans will not receive another check until the end of the third calendar month of enrollment. Advance pay is based on full-time enrollment. If the veteran changes enrollment status to less than full time, the result is an overpayment which the veteran is responsible for resolving with the VA.

For additional information about the full range of veterans’ programs available through the Department of Veterans Affairs, veterans and dependents should contact the Veterans Affairs Regional Office at 1-888-442-4551, their county Veterans Affairs Office, or the Office of Financial Aid at Wallace Community College at (334) 983-3521, ext. 2275, (334) 687-3543, ext. 4285.

**SCHOLARSHIPS**

Wallace Community College has a limited number of scholarships awarded primarily to students who excel in areas identified below. State-supported scholarships (waivers) provide 100% of in-state tuition, not to exceed 18 semester hours per term for full-time. Categories and levels of support for other scholarships are determined by the agencies or individuals managing those funds. Consideration is given to students who meet requirements set forth in the individual scholarship.

**Academic Scholarships.** These scholarships are based on academic achievement, and 100% of in-state tuition (Facility Renewal/Technology Fee **not included**) is provided for the number of terms needed to complete an associate degree, not to exceed a two-year calendar period. Applications are available from
high school counselors or the Student Affairs Department at any campus.

**Athletic Scholarships.** WCC awards athletic scholarships for men’s baseball and women’s softball. Tuition is provided for two years and must be used within a two-year calendar period. Fees for each term of scholarship support are waived. Students receiving athletic scholarships must participate in and be declared eligible for the sport under which they signed the scholarship agreement. Interested students should contact the College’s Athletic Director.

**Diplomats.** WCC Diplomats receive 100% of in-state tuition (Facility Renewal/Technology Fee not included) not to exceed two terms, as long as they maintain eligibility to participate in the Diplomat program and remain in good standing.

**Performing Arts Scholarships.** These scholarships are awarded to talented students for participation in the Jazz Band and Chamber Choir as well as in the areas of drama and art, and 100% of in-state tuition (Facility Renewal/Technology Fee not included) is provided, not to exceed a two-year calendar period. Information is available from the Fine Arts Department.

**Technical Scholarships.** These scholarships are based on academic achievement in technical and general education courses as well as recommendations from high school teachers and counselors. Qualified students receive 100% of in-state tuition (Facility Renewal/Technology Fee not included) for the number of terms needed to complete a degree or certificate, not to exceed a two-year calendar period. Applications are available from high school counselors or the Student Affairs Department.

**Workforce Investment Act (WIA).** This Act was designed to provide training to individuals who are unemployed, underemployed, unskilled, or recently dislocated from a job because of layoff or plant closure. Assistance through the WIA program includes tuition, fees, books, tools, and supplies. Eligibility for a daily training allowance is assessed on an individual basis. For information, contact the local state employment service in your home county.

**The Trade Adjustment Act (TAA).** This Act was designed to assist individuals in returning to suitable employment after becoming unemployed as a result of increased foreign imports. The TAA provides Trade Act funds for
individual referral training if applicant meets all requirements. Interested applicants must contact their local state employment service to determine eligibility.

**The Alabama Works Technical Scholarship.**
The Alabama Works Technical Scholarship program is designed to support incoming students interested in preparing for careers in three major areas— automotive, information technology, and manufacturing—to help with workforce development issues in the state of Alabama. The Alabama Industrial Development and Training department manages these scholarships. Recipients may receive support for tuition, fees, books, and tools. Applications are available through the Student Affairs Department at the campuses.
GENERAL POLICIES

The information in this section of the catalog is intended for students with general information, regulations, and policies of Wallace Community College. The general policies of this College have been established to assist students with a smooth transition in their educational endeavors.

MAXIMUM AND MINIMUM COURSE LOADS

As a general rule, the curriculum for all full-time students in any given term should include a minimum of 12 credit hours and a maximum of 19 credit hours. Students enrolled in non-degree programs must carry the appropriate minimum contact hours to be considered full-time. Students who desire to take more than 19 credit hours may do so only with special permission from the Dean of Instructional Affairs. Students are not allowed to pursue more than 24 semester credit hours during a single term. The normal student load is 15-18 semester hours. Students are strongly encouraged to work with their advisors to develop a schedule that takes maximum advantage of educational offerings and provides the best opportunity for success.

CREDIT FOR NON-TRADITIONAL LEARNING

Wallace Community College awards credit for the following types of non-traditional learning: Advanced Placement (AP) challenge examinations; College-Level Examination Program (CLEP); experiential, specialized, or occupational training; military training; and professional certification, licensure, or registry. Awarding credit for non-traditional learning at Wallace Community College does not guarantee that other institutions will approve such action. This determination is made by the respective transfer institution.

In assessing and documenting equivalent learning and qualified faculty, the College may use recognized guides that aid in the evaluation for credit. Such guides include those published by the American Council on Education, the American Association of Collegiate Registrars and Admissions Officers, and the National Association of Foreign Student Affairs.

Advanced Placement (AP) Credit. Wallace Community College recognizes a number of Advanced Placement courses that are taken in high school and supplemented by satisfactory scores on National Examinations of the College Entrance Examination Board (CEEB) Advanced Placement Program.

With a score of “3” or higher in mathematics or “4” or higher on all other exams, students receive credit for a minimum of one course in the subject area corresponding to the test. Credit is awarded based on students' majors. Additional AP credit in a single subject area may be awarded based on an evaluation of students’ high school records and career goals. To apply for additional credit, students should contact a representative of the Student Affairs department at their primary learning location. A maximum of 20 semester hours may be approved for AP credit.

Challenge and Validation Examinations. Credit for challenge and validation examinations is available for courses in certain programs or departments. Information regarding availability of these examinations appears with appropriate program descriptions throughout this catalog. Credit is awarded based on students' majors.

College-Level Examination Program (CLEP). Credit for completion of CLEP examinations may be awarded provided appropriate scores are achieved, certain restrictions are observed, and adequate documentation is provided. Students may receive a maximum of 32 semester hours of CLEP credit, but that credit will be awarded only in areas offered within the current College curriculum and only when it exceeds the level already attained in that discipline by other means.

Most academic disciplines at WCC have adopted specific designated scores for their subject areas. If no score has been established, the minimum score recommended by the American Council on Education (ACE) will be accepted. The Assistant Dean of Student Affairs maintains a list of the subject areas, applicable exams, scores acceptable to the College, and the minimum scores recommended by ACE.

GRADING SYSTEM

Grading: The following letter grades are assigned to courses for which students are registered:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Definition</th>
<th>Quality Points</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>Excellent</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>Good</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>Average</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>Poor</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>Failure</td>
<td>0</td>
</tr>
<tr>
<td>S</td>
<td>Satisfactory</td>
<td>0</td>
</tr>
<tr>
<td>U</td>
<td>Unsatisfactory</td>
<td>0</td>
</tr>
</tbody>
</table>

WCC accepts CLEP credit awarded by other institutions only if WCC requirements regarding scores and other restrictions are met. The College cannot guarantee that other institutions of higher education will accept CLEP credit awarded by WCC. Students should consult their institution’s policy prior to taking a CLEP examination.

Experiential, Specialized, or Occupational Training. Credit may be awarded in certain programs for experiential, specialized, or occupational training that is relevant to a student's program of study. Students should consult program information in this catalog.

Military Training. Military training is not recorded on transcripts until students have registered for their first term of work. Any one of the following credentials verifying completion of training is acceptable:

- AARTS transcript
- DD Form 255
- DD Form 214
- Certificates of completion

Credit is awarded based on students' majors and recommendations of the American Council on Education (ACE) as outlined in the Guide to the Evaluation of Educational Experiences in the Armed Services if the College has equivalent courses. Recommendations for awarding credit are made by the Assistant Dean of Student Affairs and approved by Dean of Instructional Affairs. The College will accept up to 32 semester hours of college credits based on ACE Guide recommendations.

Professional Certification, Licensure, or Registry. Credit may be awarded for professional certification, licensure, or registry that is relevant to the student's program of study. Documentation of such certification, licensure, or registry must be provided to the College for evaluation. Students should consult program descriptions for information.

SERVICEMEMBERS OPPORTUNITY COLLEGE PROGRAM

Wallace Community College is a member of the Servicemembers' Opportunity College (SOC) and the Servicemembers' Opportunity College Associate Degree Network (SOCAD) System, which allows military service members and their eligible dependents to pursue college-level programs without penalty for unusual situations and transfer over which they have no control. Through a student agreement with the College, service members and their dependents must complete a minimum of 25% of their degree requirements with Wallace Community College. On transfer from the College’s service area, students are allowed to complete degree requirements at other accredited colleges in the SOCAD network and transfer these credits to Wallace Community College for award of the degree.

CONCURRENT ADMISSIONS PROGRAM

As a Servicemembers' Opportunity College (SOC) institution, Wallace Community College has joined with the Army, Army Reserve, and Army National Guard to participate in the Concurrent Admissions Program (ConAP). Army and Army National Guard recruiters refer new soldiers to Wallace Community College where they are admitted to the College while deferring actual registration until completion of active military service.

TECH PREP PROGRAM

Wallace Community College is an active supporter of the Tech Prep program. The Wallace and Sparks Campuses participate in the Wiregrass Tech Prep Consortium. The consortium includes Dothan and Eufaula Schools as well as Houston, Henry, and Barbour County Schools. Articulation agreements between area high schools and these campuses facilitate the transfer of credit opportunities for students desiring to enroll in designated programs. Articulation agreements between Wallace Community College and high schools within the consortium provide advanced placement opportunities for high school students. Students should contact their high school counselors, a counselor at the College, or the Tech Prep program for more specific information regarding these articulation agreements.

SOPHOMORE STATUS

Students who have completed 33 or more semester credit hours have achieved sophomore status.
Developemental Courses. Courses numbered 0-0-0 carry institutional credit and are not applicable toward degree or certificate requirements. Satisfactory grades earned in these courses are “S.” Unsatisfactory grades are “U.”

Drop/Add. Students must drop or add classes during the designated drop/add period. Drop/add procedures originate with an academic counselor on the Wallace Campus, faculty advisors on the Sparks Campus, and the Administrative Assistant at the Fort Rucker Center. After the drop/add period is over, students cannot add classes to their term schedules and can drop classes only by following withdrawal procedures outlined on this page.

Withdrawals. If students desire to discontinue attendance after the drop/add period, they must withdraw during the designated withdrawal period which begins the fourth day of class and ends one week prior to the beginning of final exams. No withdrawals will be processed after this date. Withdrawal procedures originate in Enrollment Services on the Wallace Campus in Dothan, the Office of Student Affairs on the Sparks Campus in Eufaula, and the Administrative Office at the Fort Rucker Center. A grade of “W” will be assigned.

Incomplete. An incomplete grade in a course (grade of “I”) indicates that students have not completed all assigned course work or have not taken all class examinations. Students who receive a grade of “I” must complete the required work for removing incomplete grades no later than mid-term of the following term. Exceptions must be approved by the appropriate instructional dean. Failure to clear an incomplete grade results in an assignment of a grade of “F” for the course. The grade of “I” is calculated as an “F” until it is removed. A grade of “I” cannot be removed by repeating the course because it must be counted against the hours attempted in the original term.

Auditing. Students who desire to enroll in a course as auditors must meet the same admission requirements as regular students and complete course prerequisites. Auditors receive grades of “AU” for the course and are not required to take examinations. Credit hours are not averaged into the grade point average. Students may change from credit to audit or from audit to credit only during the drop and add period and may not change thereafter. Auditors must follow regular registration procedures and must pay tuition in accordance with regular tuition schedules. Classes taken for audit do not count toward credit hours earned.

Continuing Education Units. The Community Education and Corporate Services programs at Wallace Community College award continuing education units (CEUs) to participants who satisfactorily complete quality, non-credit courses. One CEU is awarded for each 10 contact hours of active participation in such organized learning experiences. Minimum attendance and performance requirements for courses may vary depending on length and nature of the learning experience.

QUALITY POINTS
The College uses a four-point grading system to evaluate student scholastic standing. The following grade points are assigned:

<table>
<thead>
<tr>
<th>Grade</th>
<th>Quality Points per Hour</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4</td>
</tr>
<tr>
<td>B</td>
<td>3</td>
</tr>
<tr>
<td>C</td>
<td>2</td>
</tr>
<tr>
<td>D</td>
<td>1</td>
</tr>
<tr>
<td>F</td>
<td>0</td>
</tr>
<tr>
<td>I</td>
<td>0</td>
</tr>
<tr>
<td>AU</td>
<td>0</td>
</tr>
<tr>
<td>S</td>
<td>0</td>
</tr>
<tr>
<td>U</td>
<td>0</td>
</tr>
<tr>
<td>W</td>
<td>0</td>
</tr>
</tbody>
</table>

Non-credit courses (developmental, Community Education, and Corporate Services) do not count in calculating the grade point average (GPA).

Students’ scholastic standings or GPAs are obtained by dividing their total number of quality points by the total number of semester hours pursued. Any course for which students have previously registered may be repeated; however, a course may be counted only once toward fulfillment of credit hours for graduation.

GRADE CHALLENGES
See Academic Grievances on page 121 of the Student Handbook portion of this catalog.

TERM GRADES
Term grades are available via the web. Information on how to access grades is published on the Wallace Community College home page at www.wallace.edu.

NAME/ADDRESS CHANGES
Students should report to one of the following College locations to file name and/or address changes: Enrollment Services on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center.

CHANGES IN MAJOR
Students should report to one of the following locations to report changes in major and/or degree options: Enrollment Services on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center.

FINAL EXAMINATIONS
Examinations are required in all courses of study, and each individual course requires a final examination. Attendance at final exams is mandatory, and no student is allowed to exempt this requirement. Students who wish to schedule an exam at a time other than that published on the final exam schedule must receive approval from the appropriate instructional dean.

Final exam schedules are issued by instructional deans and other important information is provided in each course syllabus distributed to students by faculty members at the beginning of each term. Any student who desires to schedule an exam at a time other than that published on the final exam schedule must receive approval from the appropriate instructional dean.

STANDARDS OF ACADEMIC PROGRESS
The standards of academic progress apply to all students unless one of the following exceptions exists:

- Programs within the institution that are subject to external licensure, certification, and/or accreditation that are fewer than four terms in length may have higher standards of academic progress than the College’s standards of progress.

1. Students who have attempted 12-21 semester credit hours at the College must maintain a 1.5 cumulative GPA.

2. Students who have attempted 22-32 semester credit hours at the College must maintain a 1.75 cumulative GPA.
3. Students who have attempted 33 or more semester credit hours at the College must maintain a 2.0 cumulative GPA.

**Intervention for Student Success.** When students are placed on Academic Probation, One-Term Academic Suspension, or One-Calendar-Year Academic Suspension, College officials may provide intervention for students by taking such steps as imposing maximum course loads, requiring a study skills course, and/or prescribing other specific courses.

**APPLICATION OF STANDARDS OF PROGRESS**

*Clear.* When the cumulative GPA is at or above the GPA required for the total number of credit hours attempted at the College, the student's status is CLEAR.

*Academic Probation.* When a student's cumulative GPA is below the GPA required for the number of credit hours attempted at the College, the student is placed on ACADEMIC PROBATION.

When the cumulative GPA of a student who is on ACADEMIC PROBATION remains below the GPA required for the total number of credit hours attempted but the term GPA is 2.0 or above, the student remains on ACADEMIC PROBATION.

When the cumulative GPA of a student is at or above the GPA required for the total number of credit hours attempted, the student's status is CLEAR.

*Academic Suspension for One Term.* When the cumulative GPA of a student who is on ACADEMIC PROBATION remains below the GPA required for the total number of hours attempted and the term GPA is below 2.0, the student is suspended for one term. The transcript will read SUSPENDED—ONE TERM.

The student who is SUSPENDED FOR ONE TERM may appeal to the Admissions and Academic Standards Committee. If, after appeal, the student is readmitted without serving the suspension, the transcript will read SUSPENDED—ONE TERM/READMITTED UPON APPEAL. The student who is READMITTED UPON APPEAL reenters the institution on ACADEMIC PROBATION.

A student who returns to the College on ACADEMIC PROBATION after being suspended for one term (whether the student has served the suspension or has been readmitted upon appeal) without having since achieved CLEAR academic status and whose cumulative GPA falls below the level required for the total number of hours attempted at the College but whose term GPA is 2.0 or above will remain on ACADEMIC PROBATION until the student achieves the required GPA for the total number of hours attempted. When the cumulative GPA is at or above the GPA required for the total number of credit hours attempted at the College, the student’s status is CLEAR.

*Academic Suspension for One Year.* A student who returns to the College on ACADEMIC PROBATION after being suspended for one term (whether the student served the suspension or was readmitted upon appeal) without having since achieved CLEAR academic status and whose cumulative GPA remains below the level required for the total number of hours attempted at the College and whose term GPA is below 2.0 will be suspended for one calendar year. The transcript will read SUSPENDED—ONE YEAR.

A student who serves a one-year suspension reenters the College on ACADEMIC PROBATION.

A student who is suspended for one year may appeal to the Admissions and Academic Standards Committee. If, after appeal, the student is readmitted without serving the one-year suspension, the transcript will read SUSPENDED—ONE YEAR/READMITTED UPON APPEAL. The student who is readmitted upon appeal reenters the College on ACADEMIC PROBATION.

**Process of Appeal for Readmission.** If students who declare no contest to the facts leading to suspension simply desire to request
consideration for readmission, they may submit a request in writing for an appeal for readmission to the chairperson of the Admissions and Academic Standards Committee prior to the first day of the upcoming term following receipt of the notice of suspension. During the meeting of the Admissions and Academic Standards Committee, which will not be considered a due process hearing but rather a petition for readmission, students are given an opportunity to present a rationale and/or statement of mitigating circumstances in support of immediate readmission. The decision of the Admissions and Academic Standards Committee, together with materials presented by students, are placed in the College's official records. Additionally, a copy of the written decision is provided to the student. Equity, reasonableness, and consistency should be the standards by which such decisions are measured.

STANDARDS OF ACADEMIC PROGRESS:
TRANSFER STUDENTS
Transfer students who are admitted on CLEAR academic status are subject to the same standards of academic progress as native students. Transfer students are admitted on CLEAR academic status when the cumulative GPA from the transfer institution is 2.0 or above. Grades accrued at other regionally or nationally accredited postsecondary institutions are not included in GPA calculations.

Transfer students who are admitted on ACADEMIC PROBATION retain that status until they have attempted at least 12 semester credit hours at Wallace Community College. If, at the conclusion of the term in which students have attempted a total of 12 or more semester credit hours at the College, the Wallace Community College GPA is below 1.5, students are suspended for one term. The transcript will read SUSPENDED—ONE TERM.

2. If three or more calendar years have elapsed since the most recent term for which students desire to declare bankruptcy, students may declare academic bankruptcy.

If, at the conclusion of the term in which transfer students admitted on ACADEMIC PROBATION have attempted a total of 12 or more semester credit hours at the College and the Wallace Community College cumulative GPA is 1.5 or above, the student's status is CLEAR.

STANDARDS OF ACADEMIC PROGRESS:
DEVELOPMENTAL COURSES
Students who are enrolled in developmental courses and who receive a grade of “U” one term may not take the course a second term until they receive special academic advising. After the second term in which students receive a grade of “U” in the same course, they must appeal through the Admissions and Academic Standards Committee before being allowed to reenroll in the course.

ACADEMIC BANKRUPTCY
Students may request forms for declaring academic bankruptcy from one of the following College locations: the Admissions and Records Office on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center. Students may declare academic bankruptcy under the following conditions:

1. If fewer than three calendar years have elapsed since the term for which students desire to declare bankruptcy, students may declare academic bankruptcy on all course work taken during the one term, provided they have taken a minimum of 18 semester credit hours of course work at the College since the bankruptcy term occurred. All course work taken, even hours completed satisfactorily during the term for which academic bankruptcy is declared, is disregarded in the cumulative GPA.

2. If three or more calendar years have elapsed since the most recent term for which students desire to declare bankruptcy, students may declare academic bankruptcy on all course work taken during one to three terms, provided they have taken a minimum of 18 semester credit hours of course work at the College since the bankruptcy term occurred.
occurred. All course work taken, even hours completed satisfactorily during the term(s) for which academic bankruptcy is declared, is disregarded in the cumulative GPA.

When academic bankruptcy is declared, the term ACADEMIC BANKRUPTCY is reflected on the transcript for each term affected. The transcript will reflect the term of its implementation and will read ACADEMIC BANKRUPTCY IMPLEMENTED.

Students may declare academic bankruptcy only once. Implementation of academic bankruptcy at the College does not guarantee that other institutions will approve such action. This determination is made by the respective transfer institution.

COURSE FORGIVENESS
If students repeat a course, the last grade awarded (excluding a grade of “W”) replaces the previous grade in computing the cumulative GPA. The GPA during the term in which the course was first attempted will not be affected. When a course is repeated more than once, all grades for the course—including the first grade—are used to compute the cumulative GPA. Official records at Wallace Community College will list each course in which students have enrolled. It is the student's responsibility to complete a form for requesting course forgiveness at one of the following locations: the Admissions and Records Office on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center.

TRANSCRIPTS OF RECORDS
The Family Educational Rights and Privacy Act of 1974 as Amended (FERPA), also known as the Buckley Amendment (PL93-380), will apply to the handling of student records at Wallace Community College. Transcripts must be requested in writing. There is no charge for this service. Transcript request forms are available from one of the following College locations: the Admissions and Records Office on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center.

In compliance with the Family Educational Rights and Privacy Act, Wallace Community College does not release transcripts from the College except when students submit written requests. Students or former students who desire transcripts of their records must write, well in advance of the time the transcript is needed, to the Assistant Dean of Student Affairs, giving Social Security number, date of birth, dates of attendance, and name and address of the institution or person to whom the records should be sent. Students must state ALL names that may have been entered on their records. Students may secure unofficial transcripts (no College seal and stamped ISSUED TO STUDENT), but official transcripts are sent only to colleges or organizations. Official transcripts cannot be hand delivered unless specifically requested by the College or organization receiving the transcript. These transcripts are stamped ISSUED TO STUDENT.

Wallace Community College does not issue copies of another school's transcript. Transcripts are not issued to students who have failed in some way to complete admission requirements. Advance notice of 72 hours is required on all transcript requests.

ATTENDANCE POLICY
**General.** Students are expected to attend all meetings of all classes for which they are registered. Students should recognize the academic responsibilities inherent in their college career, especially those of timely arrival for and attendance of all classes. Any absences from scheduled classes, regardless of the cause or circumstance, reduce academic opportunities for students. Class activities and assignments missed during excused absences may be made up as directed by faculty members. Because of unique circumstances, timing, equipment availability, or faculty schedules, not all missed examinations, quizzes, laboratory work, or projects may be made up. Such missed assignments may adversely affect students’ grades.

Class attendance policies are in effect from the first scheduled class meeting. Faculty members will ensure that their attendance policy is contained in the course syllabus provided to students. Students with excessive absences should be counseled concerning the probability that they will not be able to meet course requirements.

Individual faculty members will make decisions regarding excused absences. Examples of excused absences include serious illness, death in the student's immediate family, military obligations, or official College business. Students called to extended military or court duty will be excused to the extent possible without jeopardizing successful attainment of course objectives.

The attendance policy applicable to a specific instructional program may be more restrictive than the College policy. These policies may be influenced by requirements of external agencies that oversee curricula in those programs and provide certification, licensure, or registry opportunities for students and graduates.

Students with legitimate concerns may appeal the attendance actions of faculty members by following the procedures outlined under the Student Academic Grievance Policy in the Student Handbook section of this catalog.

**DEGREES**

The College awards associate in arts, associate in science, and associate in applied science degrees. The associate in arts (AA) and associate in science (AS) degree programs are designed for students planning to transfer to a senior institution to pursue a course of study in liberal arts, the sciences, or a specialized professional field. These degree programs require completion of a minimum of 60 semester credit hours in an approved program of study and are awarded to students completing a planned university-parallel program and the general education program outlined in this catalog.

The associate in applied science (AAS) degree is designed for students planning to seek employment based on competencies and skills attained through AAS degree programs of study. Although not designed to meet the needs of students who will transfer to senior institutions, some portions of AAS degree programs may do so. This degree comprises 60-76 semester credit hours.

**DEGREE REQUIREMENTS**

To fulfill degree requirements, students must meet the following criteria:

1. Complete, satisfactorily, a minimum of 60 semester hours of college credit in an approved program of study, including prescribed general education courses.

2. Earn a 2.0 cumulative GPA in all courses attempted at the College. Calculation of the GPA for graduation will not include grades earned in developmental courses. A course may be counted only once for the purposes of meeting graduation requirements.

3. Complete at least 25% of the semester credit hours required for the degree at Wallace Community College.

4. Meet all requirements for graduation within a calendar year from the last term of attendance.
5. Transfer in only credit hours that represent course work relevant to the degree, with course content and level of instruction resulting in student competencies at least equivalent to those of students enrolled in the College's undergraduate degree programs. In assessing and documenting equivalent learning and qualified faculty, the College may use recognized guides that aid in the evaluation for credit. Such guides include those published by the American Council of Education, the American Association of Collegiate Registrars and Admissions Officers, and the National Association of Foreign Student Affairs.

6. Submit a formal application for graduation by mid-term of the term prior to graduation. Graduation applications are available at the following locations: Admissions and Records Office on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center.

7. Fulfill all financial obligations to the College.

8. Meet graduation requirements for the appropriate catalog. Students are guided by the Wallace Community College catalog in effect their first term of enrollment as long as they maintain continuous enrollment (except summer term). Students may elect to be guided by a new catalog during their continuous enrollment period. Breaking continuous enrollment will result in students being guided by the catalog in effect at the time the new major is declared.

CERTIFICATES
Wallace Community College awards certificates for programs below the degree level that are designed for students who plan to seek employment based on competencies and skills attained through these programs of study. These formal awards are comprised of at least 27 semester credit hours but no more than 60. Certificates are also awarded for programs equal to or less than 26 semester hours that are comprised of at least 9 semester credit hours but no more than 26. Information regarding the length of certificate programs appears with the appropriate program descriptions throughout this catalog.

CERTIFICATE REQUIREMENTS
Students must meet the following criteria:

1. Complete an approved program of study satisfactorily.

2. Earn a 2.0 cumulative GPA in all courses attempted at the College. Calculation of the GPA for graduation will not include grades earned in institutional credit courses. All grades in repeated courses are averaged into the GPA; however, a course may be counted only once for purposes of meeting graduation requirements.

3. Complete at least 25% of the program's required semester credit hours at Wallace Community College.

4. Meet all requirements for graduation within a calendar year from the last term of attendance.

5. Transfer in only credit hours that represent course work relevant to the degree, with course content and level of instruction resulting in student competencies at least equivalent to those of students enrolled in the College's undergraduate degree programs. In assessing and documenting equivalent learning and qualified faculty, the College may use recognized guides that aid in the evaluation for credit. Such guides include those published by the American Council of Education, the American Association of Collegiate Registrars and Admissions Officers, and the National Association of Foreign Student Affairs.

6. Submit a formal application for graduation by mid-term of the term prior to graduation. Graduation applications are available at the following locations: Admissions and Records Office on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, or the Administrative Office at the Fort Rucker Center.

7. Fulfill all financial obligations to the College.

8. Meet graduation requirements for the appropriate catalog. Students are guided by the Wallace Community College catalog in effect their first term of enrollment as long as they maintain continuous enrollment (except summer term). Students may elect to be guided by a new catalog during their continuous enrollment period. Breaking continuous enrollment will result in students
being guided by the catalog in effect the term they reenroll.

HONORS AND RECOGNITIONS

Graduation Honors for Degrees. Superior academic achievement by graduating students is recognized by the following designations on transcripts:

- Graduation with Honor (Cum Laude)—3.50 to 3.69 GPA
- Graduation with High Honor (Magna Cum Laude)—3.70 to 3.89 GPA
- Graduation with Highest Honor (Summa Cum Laude)—3.90 to 4.0 GPA

Note: Calculation of the GPA for graduation honors is identical to the method used to calculate the GPA to fulfill graduation requirements for the degree being earned. In addition, to be eligible for a graduation honor, students must have completed a minimum of 32 semester credit hours at the College.

Graduation Honors for Certificates. Students earning certificates are recognized by the following designation on transcripts:

- Graduation with Distinction — 3.50 to 4.0 GPA

Note: Calculation of the GPA for graduation honors is identical to the method used to calculate the GPA to fulfill graduation requirements for the degree being earned. In addition, to be eligible for a graduation honor, students must have completed a minimum of 32 semester credit hours at the College.

Dean's List. A Dean's List is compiled at the end of each term. Requirements for the Dean's List are listed below:

- Receive a term GPA of 3.5 or above but below a 4.0
- Complete a minimum of 12 semester hours of college-level work. Developmental courses will not count toward the minimum course load requirement.

President's List. A President's List is compiled at the end of each term. Requirements for the President's List are listed below:

- Receive a term GPA of 4.0
- Complete a minimum of 12 semester hours of college-level work. Developmental courses will not count toward the minimum course load requirement.

SPECIAL RECOGNITIONS

All-Alabama Academic Team. Students are nominated for the All-Alabama Academic Team by Wallace Community College faculty and staff members. Students participate in statewide recognition ceremonies sponsored annually by the Chancellor's office.

Honors Day Convocations. Outstanding students in each program of study at Wallace Community College are recognized at annual Honors Day Convocations held at major campuses during spring semester. In addition to outstanding students from each program, outstanding student leaders and athletes, students selected for Who's Who Among Students in American Junior Colleges, and students receiving scholarships to four-year colleges and universities are honored. The James B. Allen Award, given to the most outstanding graduating student in each of Alabama's junior colleges, is also awarded at an Honors Day Convocation.

James B. Allen Award. Named in honor of former Alabama U.S. Senator James B. Allen, this award is bestowed upon the graduating sophomore selected by a committee of faculty and staff members as the most outstanding student at the College. Recipients are selected not only for their academic achievement but also for their leadership and community and campus involvements.

Who's Who in American Junior Colleges. Students at Wallace Community College are chosen annually to be included in Who's Who Among Students in American Junior Colleges. Qualifications include academic achievement, community service, leadership, and participation in extracurricular activities. Names of students selected by the faculty committee appear in the national publication Who's Who Among Students in American Junior Colleges.
EDUCATIONAL OPTIONS

PROGRAMS OF STUDY
Wallace Community College is authorized to award the associate in arts, associate in science, and associate in applied science degrees as well as certificates in career, technical, and occupational programs. These degrees and certificates are obtained by students successfully completing a series of courses called a program of study.

The primary objective of Wallace Community College is to meet the needs of our students. These needs will most often be met by the degrees and certificates offered by the College. However, the following list illustrates the whole array of options available to the student. In choosing an option, students should consult with their faculty advisor or meet with a counselor.

OPTION I. **Associate in Arts Degree.** Students MUST complete the general education requirements identified on page 41 and 23 hours of electives from departmental course offerings.

OPTION II. **Associate in Science Degree.** Students MUST complete the general education requirements identified on page 41 and 23 hours of additional approved credits from departmental course offerings.

OPTION III. **Associate in Applied Science Degree.** Students MUST complete requirements of a specific program outlined in this catalog.

OPTION IV. **Certificates.** Students MUST complete requirements of a specific program outlined in this catalog.

OPTION V. **Non-Degree Academic Transfer.** Students MAY complete general education requirements and electives from departmental course offerings.

OPTION VI. **Non-Degree Technical Transfer.** Students MAY complete courses in technical programs outlined in this catalog.

OPTION VII. **Selected Enrichment Courses** (personal interest and job enhancement). Students MAY select courses from all departmental course offerings provided all prerequisites have been met.

MODES OF DELIVERY
Wallace Community College delivers courses and programs in a variety of formats at a number of locations. Courses may be taught in lecture format, as laboratory performance classes, as seminars, or as independent study, using the Internet to enhance content and instruction in any of these modes; or they may be taught solely through the Internet as distance education. With an advisor’s assistance, each student may choose any delivery mode or location that fits his or her needs, schedule, and abilities with only one limitation: No student may complete more than 25% of his or her certificate or degree program requirements through Internet-based distance education course offerings. Therefore, students and their advisors must carefully review course offerings each term and limit the use of Internet-based courses in meeting overall program requirements.

TRANSFER CREDITS
Students completing courses that have been approved for the General Education curriculum and are appropriate to their major and/or degree can transfer these courses with credit applicable to their degree program among two- and four-year colleges and universities in Alabama. It is the responsibility of students to maintain contact with their transfer institutions to assure transfer of credit without loss of hours.

Students are responsible for becoming familiar with requirements of their program of study. All students are encouraged to declare a major field of study as soon as possible so they can be assigned an advisor. Failure to do so may result in a delay in completing degree requirements.

UNDECIDED TRANSFER STUDENTS
Students entering college without having chosen a major or a transfer institution will have a special need for counselors and advisors at Wallace Community College. These professionals can help students determine their career strengths and interests, select majors, and (if an advanced degree is desired) identify upper-division institutions for program continuance.

Students with undecided majors are strongly encouraged to talk with a counselor/advisor from the first meeting at orientation and begin to make the right decisions as early in their postsecondary careers as possible. Counselors/advisors will help students select courses that are generally accepted, nationwide, as part of a core curriculum while they explore career options. However, students will get the most from time spent at Wallace Community College once they identify a major and, if appropriate, a transfer institution. Counselors/advisors can only assure acceptability of courses for degrees awarded by Wallace Community College. It is the responsibility of each student to check with their transfer institution to assure applicability of courses toward their planned educational goals; however, if students adhere to the courses outlined in their degree program that have been approved statewide, then transferability to two- and four-year colleges and universities in Alabama is assured.

Wallace Community College is committed to helping students get what they need from a postsecondary education. Students must assist in this effort by choosing a career path on which to build a solid educational program.

FACULTY ADVISING
Faculty members are available throughout each term to advise students about courses, programs, and careers and to assist them individually with their course work and other appropriate concerns. This communication with the faculty provides students with many opportunities for both personal and educational advising. To encourage students to take advantage of these opportunities, faculty members post schedules reflecting their office hours and announce this information to their classes.

Every effort is made to ensure that the courses and programs described in this catalog are offered to students in an appropriate and reasonable sequence. Students should be aware, however, that admission to the College or registration for a given term does not guarantee the availability of a specific course or program of courses that may be under review for continuance. Course and program availability is determined by student demand, instructor availability, and the College’s program review process.

UNIVERSITY-PARALLEL PROGRAMS
Programs leading to the associate in arts (AA) and the associate in science (AS) degrees are referred to as university-parallel programs because they are designed to prepare the student to transfer to a four-year college or university to pursue a bachelor of arts or a bachelor of science degree.

The AA and AS degrees require a minimum of 64 semester hours credit for completion. These degrees are essentially planned sets of general education courses that make up the first half of a four-year baccalaureate degree. Majors are actually defined by the institutions to which the student transfers. However, AA and AS degree students are assigned to advisors on the basis of an intended major indicated by the individual student.

It is the student’s responsibility to become familiar with the requirements of the senior institution to which he or she plans to transfer. A student planning to transfer should follow a prescribed transfer program to prevent loss of credit upon transferring. Students should consult with their faculty advisor or a counselor before registering.
ASSOCIATE IN ARTS DEGREE AND
ASSOCIATE IN SCIENCE DEGREE

The Associate in arts degree (AA) or Associate in science degree (AS) are designed for students who plan to transfer to a senior institution and are conferred by the College as official recognition for successful completion of a prescribed program of study in an appropriate university-parallel track.

Requirements Semester Hours of Credit
AREA I: Written Composition ................................. 6
  1 ENG 101-102 English Composition I-II ................. 6

AREA II: Humanities and Fine Arts ........................... 12
  2 Literature .......................................................... 3
  3 Fine Arts .......................................................... 3
  4 Humanities or Fine Arts ......................................... 3

AREA III: Natural Science, Computer Science, and Mathematics ................................................................. 11
  5 MTH 110 Finite Math or higher level course for AA degree; 3
  6 MTH 112 Precalculus Algebra or higher level courses for 3
    AS degree................................................................. 3
  7 Natural Science which includes laboratory experiences .... 8

AREA IV: History, Social, and Behavioral Sciences ........ 12
  8 History ................................................................. 3
  9 History, Social, and Behavioral Sciences ..................... 9

Minimum General Education Requirements .................. 41

AREA V: Pre-Professional, Pre-Major, and Elective Courses 19-23
  10 CIS 146 Microcomputer Applications .......................... 3
  11 ORI 101 Orientation to College ................................. 1

Maximum Program Semester Credit Hours ...................... 64

  1 Entrance is determined by ASSET/COMPASS placement exam score.
    A score of 42 or above is required for entrance into ENG 101.
  2 Must complete 3 semester hours in Literature, Fine Arts, and History.
    Must complete a 6-semester hour sequence either in Literature or in
    History.
  3 At least 6-semester hours from Social and Behavioral Sciences.
  4 Students who fail to demonstrate adequate competency in Computer
    Science by passing a computer competency exam must take CIS 146.
  5 Entrance is determined by ACT score or by ASSET/COMPASS
    placement exam scores in numerical skills and algebra.
  6 Required of all first-time college students.

In addition to the General Education Semester Program described above, students must complete the appropriate university-parallel program. They should check with their transfer institution to assure applicability of courses toward their planned major. Respective programs of study for baccalaureate degrees at Alabama public universities range from 120 to 128 semester credit hours in length. Dependent on the total hours allocated for bachelor's degrees, institutions in The Alabama College System will only be authorized to provide 50% of that total (60-64).

ASSOCIATE IN APPLIED SCIENCE DEGREE

The Associate in applied science degree (AAS) is an undergraduate award designed for students who plan to specialize in technical, business, semi-professional, and supervisory fields that are career-oriented or, in selected fields, to transfer to a senior institution. Though many of the courses in these programs transfer to four-year colleges and universities, their primary intent is to prepare students for immediate employment after successful completion of a two-year program of study.

Requirements Semester Hours of Credit
AREA I: Written and Oral Communication ..................... 6-9
  1 ENG 101 English Composition I ................................ 3
  2 SPH 106 Fundamentals of Oral Communications ............. 3

AREA II: Humanities and Fine Arts ........................... 3
  3 Choose from degree-applicable ART, HUM, MUS, PHL, REL, or THR courses.

AREA III: Natural Science, Computer Science, and Mathematics ................................................................. 9-11
  4 CIS course ........................................................... 3
  5 MTH course as prescribed by program .......................... 3
  6 Additional hours may be chosen from degree-applicable
    BIO, CHM, CIS, GEO, MTH, PHS, or PHY courses .......... 3-5

Students enrolled as majors in health-related disciplines for which the AAS degree is awarded must take BIO 103 as the prerequisite for BIO 201, 202, and 230 to ensure the transfer of courses within parameters of the AGSC Minimum General Education Semester Hour Distribution Requirements or, in lieu, successfully complete the validated system-wide biology placement examination.

AREA IV: History, Social, and Behavioral Sciences ........ 3-6
  7 Choose from degree-applicable ECO, HIS, POL, PSY, or SOC courses.

Minimum General Education Requirements .................. 21-29

AREA V: Career/Technical Concentration and Electives 39-57
  8 ORI 101 Orientation to College ................................. 1
  9 ORI 104 WorkKeys Assessment and Advisement ............. 1

  Course appropriate to degree requirements, technical
  specialty requirements, core courses, and electives .......... 38-56

Students planning programs of study for which the AAS degree does not represent the terminal degree and for which national or regional programmatic licensure and certification are required should integrate general studies transfer courses whenever possible.

Maximum Program Semester Credit Hours ...................... 76

  1 Entrance is determined by ASSET placement exam score. A score of
    42 or above is required for entrance into ENG 101.
  2 Students who fail to demonstrate adequate competency in computer
    science by passing a computer competency exam must take CIS 146.
  3 Entrance is determined by ACT score or by ASSET placements exam
    scores in numerical skills and algebra.
  4 Required for all first-time entering freshmen.
  5 Required for AAS degree and program completion.

Students may earn an AAS degree in the following programs:

41
CERTIFICATES
Certificate programs are designed to give students specific skills in a particular curriculum and require less time to complete than degree programs. Should students later desire to pursue a degree, all courses within the certificate in a program in which a degree is offered will apply toward the degree.

The policies and procedures in this catalog are subject to change due to actions of the State Board of Education, Federal and State legislative actions, and changes in levels of financial support provided by Federal and State agencies. Wallace Community College intends to deliver the courses, offer the programs, and provide the services described in this document unless circumstances require adjustments. Wallace Community College faculty and staff will communicate changes when they occur.

**INSTRUCTIONAL PROGRAMS**
The policies and procedures in this catalog are subject to change due to actions of the State Board of Education, Federal and State legislative actions, and changes in levels of financial support provided by Federal and State agencies. Wallace Community College intends to deliver the courses, offer the programs, and provide the services described in this document unless circumstances require adjustments. Wallace Community College faculty and staff will communicate changes when they occur.
The two-year Associate Degree Nursing (ADN) program is designed to prepare nurses to take the National Council Licensure Examination—Registered (NCLEX-RN). The ADN program is accredited by the National League for Nursing Accrediting Commission (NLNAC). The NLNAC is a resource for information regarding the ADN program. The NLNAC can be contacted at 61 Broadway, New York, New York 10006, 1-800-669-9656.

The nursing student shall comply with legal, moral, and legislative standards in accordance with the Alabama Law Regulating Practice of Registered and Practical Nursing as stated below:

Each applicant must apply for admission following the steps below:

1. Meet College requirements for admission. Students who have attended Wallace Community College must also have a cumulative GPA of 2.5 or above at the College, effective fall 2004.
2. Submit proof of completion of the three pre-nursing courses (BIO 201; MTH 100, 110, 112, 113, or 115; and PSY 200) with a grade of "C" or above in each.

**ASSOCIATE DEGREE NURSING**

*Alabama Board of Nursing, Nurse Practice Act, 1997-98.*

It is important that nursing students are aware of Alabama Board of Nursing regulations on the review of candidates for eligibility for initial and continuing licensure. The Application for Licensure by Examination asks specific questions such as the following:

- Have you ever been arrested or convicted of a criminal offense other than a minor moving traffic violation?
- Have you, within the last five years, abused drugs/alcohol or been treated for dependency to alcohol or illegal chemical substances?
- Have you ever been arrested or convicted for driving under the influence of drugs/alcohol?
- Have you ever had disciplinary action or is action pending against you by any state board of nursing?
- Have you, within the last five years, received inpatient or outpatient treatment or been recommended to seek treatment for mental illness?
- Have you ever been placed on a state and/or federal abuse registry?
- Have you ever been court martialed/disciplined or administratively discharged by the military?

Application to take the registered nurse examination may be denied based on this review. Although these policies specifically refer to Alabama, other states have similar stipulations regarding licensure.

**ASSOCIATE IN APPLIED SCIENCE DEGREE**

Any student who completes all courses in the curriculum will be awarded an associate in applied science degree in Associate Degree Nursing.

**ADMISSION**

Each applicant must apply for admission following the steps below:

1. Meet College requirements for admission. Students who have attended Wallace Community College must also have a cumulative GPA of 2.5 or above at the College, effective fall 2004.
2. Submit proof of completion of the three pre-nursing courses (BIO 201; MTH 100, 110, 112, 113, or 115; and PSY 200) with a grade of “C” or above in each.
3. Complete the required ADN program application packet (available in the ADN office) to include the following data:
   a. Tetanus vaccination date(s)
   b. Rubella titer
   c. Varicella titer
   d. RPR or VDRL titer
   e. Two-step TB skin test results
   f. Verification of at least the first vaccine for Hepatitis B (series completion must follow with proof of immunity) or a titer showing immunity
   g. Statement of ability to meet the essential functions of nursing in a clinical setting as listed on the essential functions form. The examining physician or nurse practitioner must certify the essential functions form.

4. Provide proof of health insurance upon admission to the ADN program. If a student does not have health insurance, a signed waiver is required. The student is responsible for his/her own medical treatment regardless of the origin of injury or illness.

Notification of program acceptance will be made by mail.

Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered. Students seeking special consideration for admission should contact the ADN Admissions Committee.

Contractual agreements between the College and clinical agencies impose additional requirements on students enrolled in health programs. These requirements include, but are not limited to, the areas of confidentiality, attire, liability insurance, and substance abuse screening.

PROGRESSION
Each term, students are allowed to progress in the ADN program if they meet the following criteria:

1. Receive a grade of “C” or above in all required prerequisite nursing and academic courses.
2. Maintain a cumulative GPA of 2.0 or above at Wallace Community College.
3. Achieve 90% on scheduled Drug Computation Exams as required for the clinical components of NUR 211, 251, 253, 271, 272, 275, 277, and 279.

A student is restricted to a total of three attempts for any required nursing course before becoming ineligible to continue in the nursing program. An attempt is defined as withdrawal from a nursing course with a grade of “W” or receipt of a grade of “D” or “F.” Dropping during drop/add does not count as an attempt.

Notwithstanding the restriction on attempts in the immediately preceding paragraph and regardless of any other provisions contained in this catalog, a student who receives two grades of “D” or below in any required nursing course(s) is deemed ineligible to continue in the nursing program and thereafter is dropped from the program. Conferences are scheduled with students who do not meet course requirements. Academic and discipline problems involving ADN students are treated in accordance with general College policies. Students are required to sign a statement that they have read and fully understand the significance of the ADN grade policy.

REENROLLMENT AND READMISSION POLICIES
For full-time students, the ADN program is designed to be completed within five consecutive terms following admission to the program (enrolling in or validating any required nursing [NUR] course. A full-time student is defined as one who follows the ADN curriculum exactly as it is printed in this catalog.) Program officials expect that 70% of full-time students will complete the program in five consecutive terms.

The majority of ADN students are part time, and the program offers considerable flexibility in meeting their needs. Program officials expect that 70% of part-time students will complete the ADN program in 10 consecutive terms or fewer, following admission.

The faculty reserves the right to make changes or adaptations in the curriculum. If changes do occur, every effort is made to inform students of these changes and assist them in proceeding through required NUR courses as scheduled.

Reenrollment. Students who withdraw from a required NUR course, choose not to enroll in a required NUR course, or do not achieve a grade of “C” or above in a required NUR course must request reenrollment in the ADN program. The reenrollment request must be submitted no later than mid-term of the term prior to the planned reentry. Students who withdraw after midterm because of extenuating circumstances or do not achieve a grade of “C” or above in a required NUR course and plan to reenter the next term must submit a re-enrollment request as soon as the above status is determined. Failure to submit a reenrollment request may delay reenrollment into the program.

Readmission. Students who are not enrolled in required NUR courses for two or more consecutive terms, excluding summer terms, are required to meet current admission criteria and to comply with the current program of study. Previous work is subject to reevaluation under the policies and program requirements in effect at the time of the student's readmission to the ADN program. Students seeking special consideration for readmission should contact the ADN Admissions Committee.

TRANSFER STUDENTS
Students who have been enrolled in other schools of nursing (for registered nurses) are evaluated individually to determine appropriate placement. To be considered for transfer into the ADN program, the applicant must be eligible to return to a previous nursing program. A letter of eligibility from the previous school's Dean of Nursing or Program Director must be submitted with the ADN application. Validation exams may be required. In order to graduate from Wallace Community College, transfer students must earn at least 18 semester hours through instruction by the College.

OPTIONS FOR LICENSED PRACTICAL NURSES
The LPN-to-RN Mobility Program. The LPN-to-RN Mobility Program is designed for the LPN to complete requirements to become an RN in three semesters. Admission guidelines are as follows:

1. Applicants must have a current non-restricted Alabama LPN license.
2. Applicants must have completed all academics with a “C” or better and have a GPA of 2.5 or above to receive a mobility application packet. A transcript must be submitted to the ADN program office showing proof of completed academic requirements (BIO 201, 202, 220; ENG 101; MTH 100 or higher; PHL 206; PSY 200, 210; SPH 106; and evidence of computer competency). Official transcripts from all colleges attended must be submitted to the Admissions/Records Office for final evaluation.
3. LPNs who have begun a basic ADN program either at Wallace Community College or elsewhere may request admission to the Wallace Community College Mobility program. Admission is based on presentation of a letter from the Dean of Nursing or Program Director at their previous nursing program stating they left in good standing and are eligible to return to the program.
4. Applicants are admitted in order of return of the completed mobility application packet.

5. Students are encouraged to take NUR 202 (Specialized Area of Study—Drug Comp Exam Prep) prior to beginning the Mobility program.

**Course Validation.** Licensed Practical Nurses may choose to validate NUR 111, 121, 131, and/or 241 to enter the generic ADN program. The following admission requirements must be met.

1. Applicants must have a current non-restricted Alabama LPN license.

2. Applicants must have completed the following academic courses with a grade of “C” or better: BIO 201, 202; MTH 100 or higher; and PSY 200, 210.

3. Applicants must have a cumulative GPA of 2.0 or above, if a current or previous student at Wallace Community College.

4. Applicants must apply for validation and pay associated testing fees by mid-term of the term in which validation is desired. Exceptions for currently enrolled ADN students may be made.

5. Licensed Practical Nurses who have begun a nursing program elsewhere must present a letter of eligibility from the Dean of Nursing or Program Director at their previous program stating they left in good standing and are eligible to return to the program.

For curriculum diagrams and/or questions, contact the ADN program office.

**CURRICULUM**

The two-year ADN program is designed to provide educational opportunities to qualified students for a career in nursing. The curriculum includes a balance of general education, nursing theory, and laboratory/c clinical experience. Students may choose to take some or all of the general education courses prior to enrolling in the first nursing course. BIO 201, MTH 100 (110, 112, 113, or 115), and PSY 200 must be successfully completed with a “C” or better before admission to the ADN program.

**Total Field of Concentration Credits**: 42

**Total Credits for Degree**: 72

* On completion of NUR 211, mobility students receive non-traditional credit for 14 hours of NUR courses (NUR 111, 121, 131, 241, 242, 274, and 276).

**Note:** ORI 101—Orientation to College is a prerequisite to this degree for those who enter as first–time college students.

**ORI 104—WorkKeys Assessment and Advisement is a prerequisite to this degree.**

**Important Note:** If a student is concurrently taking NUR 111, 131, or 241 with NUR 121 and withdraws from one or those courses, then the student must also withdraw from 121. For Mobility Program, NUR 211 is a prerequisite or corequisite for NUR 278.

Before completing this program, students must prove competency in computer applications. Students who fail to demonstrate adequate competency in Computer Science by passing a computer competency exam must successfully complete CIS 146.

BCLS certification is required prior to clinical experience in nursing (NUR) courses. It may be taken through the College by registering for EMS 100, preferably the semester prior to entering the ADN program.

**AUTO BODY REPAIR (ABR)**

**(Sparks Campus)**

This program is designed to provide the necessary skills, knowledge, and experience for employment in the Auto Body Repair and Refinishing field.

The student will acquire fundamental processes and skills necessary to remove, repair, and replace metallic and non-metallic parts as well as straighten and repair frame and main body parts. Other areas covered include refinishing repaired surfaces, repair and replacement of electrical/electronic systems, and proper alignment of steering and drive train. Students must purchase their own books and tools.

Students completing all courses listed in the curriculum will be awarded a program certificate in Auto Body Repair. Admission is conditional and depends on the student’s ability to perform the essential functions identified for this program. A high school diploma or GED certificate is not required. Reasonable accommodations are considered.

Total Field of Concentration Credits: 48
Total Credits: 54

Note: ORI 100—Orientation for Career Students is a prerequisite to this certificate for those who enter as first-time college students.

ORI 104—WorkKeys Assessment and Advisement is a prerequisite to this certificate.

AUTOMOTIVE TECHNOLOGY (ASE)
TOYOTA T-TEN
(Wallace Campus)

Advancements in technology have greatly affected today's automotive technician. Being a good mechanic is not enough. Today a technician must possess excellent mechanical skills, be knowledgeable of electronics, be able to diagnose complex problems, and be committed to keeping pace with future advancements. Over 100,000 jobs are available to qualified applicants, but technical training and hands-on experience are required. To fill these needs in the Wiregrass area, WCC has established a partnership with Toyota Technical Education (T-Ten) to provide the most comprehensive automotive educational opportunities possible.

Students are trained on late-model vehicles with modern equipment in a classroom and laboratory setting. After two semesters of training, students are placed in dealerships (Toyota and others) for a cooperative educational experience for the next semester. This rotation from classroom to shop experience is continued throughout the program. Students must purchase their own books and supplies.

Students completing all courses listed in the curriculum will be awarded an associate in applied science degree in Automotive Technology. Students completing all Automotive Technology courses, MTH 116, SPH 106, CIS 146, and ENG 101 will be awarded a program certificate. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

BUSINESS AND OFFICE INFORMATION PROCESSING
(Wallace and Sparks Campuses)

The Office Information Processing curriculum offers an opportunity for students to develop the knowledge, skills, and attitudes needed by professional workers in today's business world. Office workers are needed in a variety of positions in many business areas such as banking, industry, education, and government. Specific job titles may include: administrative assistant, secretary, word processing specialist, office manager, bookkeeper, clerk, or office supervisor.

An associate in applied science degree and/or a program certificate can be earned in Business and Office Information Processing with major concentrations in Office Administration, Accounting Technology, or Business Computer Applications. To receive an associate in applied science degree, students must complete General Education core requirements, Business Technology core requirements, and additional courses to satisfy the requirements in the chosen area of concentration.

Students completing Business Technology core requirements, all courses in a particular area of concentration, as well as CIS 146, ENG 101, MTH 116, and SPH 106 will be awarded a program certificate. Admission is conditional and depends on the student’s ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

Students may pursue the program certificate or degree in one of two options or a short certificate. The Educarer Option focuses on developing competencies involved in the direct care of young children. The Administrator Option includes a general background in child development along with business management and childcare administration skills development. Both are designed to allow students to develop a broad base of competencies that will prepare them to guide experiences of children from birth through early childhood. The short

**CABINETMAKING/CARPENTRY (CAB)**

(Wallace and Sparks Campuses, Easterling Correctional Facility)

The Cabinetmaking/Carpentry program is designed to develop skilled craftsmen. Classroom and shop experiences involve layout, fabrication, assembly, and installation of structural units. Instruction emphasizes care and use of hand and power tools, common systems of construction, principles of estimating and blueprint reading, and care and use of numerous wood and composite building materials. Students must purchase their own books and tools.

Students completing all courses listed in the curriculum will be awarded a program certificate. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. A high school diploma or GED is not required. Reasonable accommodations are considered.

**CHILD DEVELOPMENT (CHD)**

(Wallace and Sparks Campuses)

The Child Development programs are offered to prepare students for employment in the field of early care and education. The program is designed to provide students with skills and knowledge to work effectively with young children and families. Graduates may be employed as administrators in private preschool programs; as teachers in state pre-kindergarten programs, preschool programs, Head Start and Early Head Start programs; or aides in public school systems.

Students may pursue the program certificate or degree in one of two options or a short certificate. The Educarer Option focuses on developing competencies involved in the direct care of young children. The Administrator Option includes a general background in child development along with business management and childcare administration skills development. Both are designed to allow students to develop a broad base of competencies that will prepare them to guide experiences of children from birth through early childhood. The short
certificate is designed to prepare students to enter the field of early care and education and to be an intermediate step for those working toward the program certificate or degree.

Students completing Child Development core requirements, all courses in a particular area of concentration, as well as CIS 146, ENG 101, MTH 100, and SPH 106 will be awarded a program certificate. Those who complete the Child Development core requirements, the general education core requirements, and all courses in a particular area of concentration will receive the associate in applied science degree. Admission is conditional and depends on the student’s ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

**COMPUTER INFORMATION SCIENCE (CIS)**

(Wallace and Sparks Campuses)

Recognizing the role of the computer and persons with computer skills in the world of today, the College offers a Computer Information Science program with appropriate options for students. These programs are for students who are interested in programming, operations, analysis, systems engineering, or related jobs in this field. Students are expected to possess proficient keyboarding skills.

An associate in applied science degree and/or a program certificate can be earned in Computer Information Science with major concentrations in Computer Programming, Computer Applications, and Internet Technology. To receive an associate in applied science degree, students must complete general education core requirements, the Computer Information Science core requirements, and additional courses to satisfy the requirements in the chosen area of concentration.

Students completing Computer Information Science core requirements, all courses in a particular area of concentration, as well as CIS 146, ENG 101, MTH 100, and SPH 106 will be awarded a program certificate. Those who complete the Computer Information Science core requirements, the general education core requirements, and all courses in a particular area of concentration will receive the associate in applied science degree. Admission is conditional and depends on the student’s ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

### COSMETOLOGY (COS)

(College of Alabama, Wallace and Sparks Campuses, Fort Rucker Center)

Cosmetology is a constantly growing field and offers opportunities to be self-employed or work in salons. Students learn to cut and style hair and give permanent waves and tints. They learn to give manicures, shape eyebrows, and provide individual make-up analysis. They also become proficient in the field of wig styling and use of hair pieces.

Students are required to purchase their own cosmetology kit, books, and lab coat-style uniform.

**COSMETOLOGY INSTRUCTOR TRAINING (CIT)**

(For Rucker Center)

**SHORT CERTIFICATE**

The Cosmetology Instructor Training (CIT) program is designed to train qualified cosmetologists in the basic skills needed to teach Cosmetology. The program is also designed to aid the student in preparing for the Alabama Board of Cosmetology Instructors' Examination. Students averaging 12 hours each term may be able to complete the program in as little as two terms. This is an estimate and does not include any non-credit courses that are needed by individual students.

The Alabama Board of Cosmetology, a health certificate no more than one year old, and proof of a high school diploma or GED. All applicants...
must be interviewed by a member of the Cosmetology faculty and the Dean of Instructional Support Services prior to enrollment. No more than two students per licensed Cosmetology faculty member may be enrolled in the program at any given time.

Students completing all courses in this curriculum will be awarded a program certificate. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

**COSMETOLOGY—NAIL TECHNOLOGY**

**(Wallace and Sparks Campuses, Fort Rucker Center)**

**SHORT CERTIFICATE**

The Nail Technology program is designed to provide students with knowledge and skills for employment as a Nail Technician in a salon setting, including working in department stores, beauty shops, nursing homes, health spas, and owning their own business.

Students learn how to apply sculptured, acrylic overlay, fiberglass, linen, silk wraps, gel nails, and nail art. Entering students must have completed the 10th grade of high school or passed the GED. Students are required to purchase their own nail technology kit, books, and lab coat-style uniform. Reasonable accommodations are considered.

Students completing all courses listed in the curriculum will be awarded a program certificate and will be eligible to apply for the State Board Examination. After passing the examination, students are awarded a license to practice as a Nail Technician in Alabama. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. A high school diploma or GED is not required. Reasonable accommodations are considered.

**DRAFTING AND DESIGN TECHNOLOGY (DDT)**

**(Wallace and Sparks Campuses, Easterling Correctional Facility)**

Drafting Technology encompasses many divergent fields of study, including aerospace, architectural, civil, electrical, mechanical, piping, structural, and technical illustrating. All of these fields focus on the ability to communicate by using a graphic language. Graphic communication is the ability to translate ideas and rough sketches into finished drawings that can be used to manufacture or assemble the desired product. These drawings are produced with the aid of specialty drawing and measuring instruments and the use of special computer programs. Students in this program learn basic drafting techniques as well as advanced topics within the fields of architectural and mechanical design. Computer-Aided Drafting and Design (CAD) is an essential part of this program and is explored in depth.

Drafting and Design Technology is directly related to other aspects of construction management. Students desiring to enter the construction management field must be prepared to supervise sites, estimate, schedule, and management projects. Those interested in Construction Management can select that field of concentration.

Students who complete general education core requirements and the required curriculum concentration courses will earn an associate in applied science degree. Students completing required curriculum concentration courses and CIS 146, ENG 101, MTH 100, and SPH 106 will be awarded a program certificate. Students completing all Construction Management concentration courses and CIS 146, ENG 101, MTH 100, and SPH 106 will be awarded a program certification. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

ELECTRICAL TECHNOLOGY (ELT)  
(Wallace and Sparks Campuses, Easterling Correctional Facility)

Electricians assemble, test, install, and maintain electrical systems used in commercial and industrial applications. They install and test complete electrical systems including conduit, wiring, and control devices. They troubleshoot, repair, and modify electrical power and control systems including hydraulic/pneumatic, programmable controllers, relays, control systems, and AC/DC drives. Students must purchase their own tools and books.

Students have the option of focusing on commercial or residential applications through selection of ELT course electives. Any student who completes all courses listed in the General Education Core, Required Field of Concentration, and 15 hours of ELT electives will be awarded an associate in applied science degree in Electrical Technology. Students completing all courses in the Required Field of Concentration, 15 hours of ELT electives, CIS 146, ENG 101, MTH 100, and SPH 106 will be awarded a program certificate in Electrical Technology. Admission is conditional and depends on the student's ability to perform essential functions identified for this program. Reasonable accommodations are considered.

ORI 104—WorkKeys Assessment and Advisement is a prerequisite to the program certificate or degree.

EMERGENCY MEDICAL SERVICES  
(Wallace Campus)

The Emergency Medical Services (EMS) program is designed to provide the student with theory, demonstration, and experiential laboratory in EMT Basic, EMT Paramedic, and Rescue.

ADMISSION

Students are admitted to the EMS program without regard to race, creed, color, marital status, sex, or national origin. The applicant must meet all College admission requirements, including appropriate placement testing; be at least 18 years of age; and have a current physical exam. Prior to entering the clinical components of EMT Paramedic, students must possess a valid Alabama EMT Basic license. Costs associated with licensure are the responsibility of the applicant.

EMT Basic and Paramedic students are admitted to the program throughout the year. Admission is conditional and depends on the student’s ability to perform the essential functions identified by the Alabama Department of Public Health. A copy of the essential functions is available from the EMS Department. Reasonable accommodations are considered.

Contractual agreements between the College and clinical agencies may impose additional requirements on students enrolled in health programs. These requirements include, but are not limited to, the areas of confidentiality, attire, liability insurance, and substance abuse screening.

Students transferring to Wallace Community College who have successfully completed EMT Basic are eligible to apply for acceptance into the EMS Paramedic concentration.

Hazardous Materials Awareness and Operations certification is required prior to entering the EMS program. Any student not currently certified at the Hazardous Materials Awareness and Operations level must take EMS 171, either prior to or concurrently with EMT Basic.

PROGRESSION

EMT Basic students must maintain an average of 80% and successfully pass the State Board Examination to be licensed as an EMT Basic.

To be admitted into the EMT Paramedic phase of training, each student must successfully complete ENG 101 and MTH 100. Students must also complete EMT Basic with an average of 80%. EMT Paramedic students must maintain an average of 80% in each of the required classes at all times through four terms of supervised clinical internship, field internship, classroom lecture, and laboratory experiences. Prior to entering the second term of EMT Paramedic, students must possess a valid Alabama EMT Basic license.

READMISSION

Students who do not continue in the program for consecutive terms are subject to the most current catalog and State of Alabama Department of Public Health, EMS Division, policies for the latest term of admission.
LICENSURE
Preparation for two licensure levels in EMT is provided at WCC: EMT Basic and EMT Paramedic. On successful completion of the program of study for each level of EMT, the student is eligible to take the EMT National Registry Examination.

EDUCATIONAL OPTIONS
As associate in applied science degree and/or program certificate can be earned in Emergency Medical Services with major concentrations in Paramedic or Rescue. To receive an associate in applied science degree, students must complete the general education core requirements and either the Paramedic concentration or Rescue concentration course requirements. Students who complete the Paramedic or Rescue concentration course requirements as well as CIS 146, ENG 101, MTH 100, and SPH 106 will earn the appropriate program certificate.

INDUSTRIAL ELECTRONICS TECHNOLOGY (ILT)
(Wallace and Sparks Campuses)

Electronic technicians must be capable of working closely with engineers, craftspersons, and electronic maintenance personnel. They must be able to plan, assemble, install, calibrate, evaluate, and operate electronic devices as they apply to processes or systems.

A solid foundation in electricity and basic electronics is planned for the first year. The second year builds directly on this background, introducing the new subject areas such as wave shaping, communications, computer technology, control systems, and electromagnetic devices. Mathematics, English, and science courses are coordinated with technical courses at all stages. All programs are classroom work and laboratory oriented. Students must satisfactorily complete the classroom work and then demonstrate proficiency in the laboratory by applying principles and skills taught in the classroom. The instructional approach ranges from simple to complex. Instruction begins with basic laws, theories, components, and concepts which students are taught to build into simple circuits. The study is then broadened to encompass complex circuits and devices.

Students completing all courses listed in the curriculum will be awarded an associate in applied science degree in Industrial Electronics. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

MACHINE TOOL TECHNOLOGY (MTT)
(Wallace Campus)

Machinists are skilled workers who use machine tools to make metal parts. Machinists can set up and operate most types of machine tools. They select tools and materials required for each job and plan the cutting and finishing operations to complete the finished work according to blueprint or written specifications. They make standard shop computations related to dimensions of work, tooling, feeds, and speeds of machinery. Machinists often use precision measuring instruments such as micrometers and gauges to measure the accuracy of work to thousandths or even millionths of an inch. Machinists must be mechanically inclined and temperamentally suited to highly accurate work that requires concentration as well as physical effort. Machinists must have good vision and keen judgments of depth and distance.

Students will receive instruction in orientation and safety, shop mathematics, and benchwork as well as in the use of a drill press, shaper, saw, lathe, and milling machine. Grinding, heat treatment, mechanical drawing, and blueprint reading are also emphasized. Students will also be introduced to a Computerized Numerical Controlled (CNC) milling machine and a computerized programming center. Students must purchase their own books and tools. Students completing all courses listed in the curriculum will be awarded an associate in applied science degree in Machine Tool Technology.

Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

The Medical Assistant is a professional, multi-skilled individual trained to assist physicians in the many aspects of medical practice. Duties of the Medical Assistant vary from administrative tasks to assisting with examination and treatment of patients. Students learn to measure and record vital signs, take medical histories, administer medications, sterilize instruments, assist with minor office surgeries, and handle emergencies. Students also learn to obtain blood samples, perform routine office laboratory procedures and electrocardiograms, and instruct students in proper patient positioning. A high school diploma or GED is not required. Reasonable accommodations are considered.

MASONRY (MAS)
(Sparks Campus and Easterling Correctional Facility)

The Masonry program trains students in the basic concepts of building construction, including brick veneering, cement finishing, cinder block installation, and others. Students averaging 15 hours each term may be able to complete the program in as little as four terms. This is an estimate and does not include any non-credit courses that are needed by individual students.

Students completing all courses in this curriculum will be awarded a program certificate. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. A high school diploma or GED is not required. Reasonable accommodations are considered.

CURRICULUM

General Education Core Requirements Credit Hours
ORT 100—Orientation for Career Students is a prerequisite to this certificate for those who enter as first-time college students.

Medical Assisting (MAT)
(Wallace Campus)
patients in preparation for x-ray and laboratory procedures. In the administrative area, students learn to schedule and receive patients; handle telephone calls; type correspondence, reports, manuscripts, and perform medical transcription; process insurance forms; and handle office accounts, fees, and collections. Prior to completion of an area of concentration, 225 hours of experience in a medical setting is required.

An associate in applied science (AAS) degree and/or a program short certificate may be earned in Medical Assisting. To receive an AAS degree in Medical Assisting, students must complete general education core requirements and all courses in the medical assisting field of concentration. Students desiring a short certificate in the areas of phlebotomy or medical transcription will only be required to meet requirements listed in the corresponding fields of concentration. Students desiring an AAS degree in Medical Assisting with a Transcription short certificate must complete all Medical Assisting courses and MAT 222, 223, and 242. Students who desire to receive an AAS degree in Medical Assisting with a Phlebotomy short certificate must complete all Medical Assisting courses and MAT 239.

On completion of degree requirements for the AAS degree in Medical Assisting and complying with the Disciplinary Standards of the American Association of Medical Assistants, graduates are eligible to apply for the Certified Medical Assistant (CMA) examination. Students completing all courses required for the short certificate in a Phlebotomy concentration are qualified to sit for the Phlebotomy Technician (ASCP) and Registered Phlebotomy Technician (AMT) certification examinations.

**PROGRESSION**

Each term, students are allowed to progress in the Medical Assisting program as they meet the following criteria:

1. Receive a grade of “C” or above in all MAT prefix courses.
2. Receive a score of 70% or higher in all clinical and administrative skills components.
3. Receive a score of 80% or higher on any drug calculation, phlebotomy, and CPR component.

Students are restricted to a total of two attempts at any MAT prefix courses before becoming ineligible to continue in the Medical Assisting program. Withdrawals are allowed according to College policy. A grade of “W” will be recorded as a withdrawal. Grades of “F” and “D” will be considered unsuccessful attempts.

**READEMISSION**

Students who are not enrolled in the Medical Assisting program for two or more consecutive terms, excluding summer terms, are required to meet current admission criteria and to comply with the current program of study. Previous work is subject to reevaluation under the policies and program requirements in effect at the time of the student’s readmission to the Medical Assisting program.

**TRANSFER**

Students who have been enrolled in other programs are evaluated individually to determine appropriate placement. Validation exams may be required.

PHYSICAL THERAPIST ASSISTANT
(Wallace Campus)

The associate in applied science degree in Physical Therapist Assistant (PTA) is designed to provide general education and physical therapy courses. PTA courses are designed to apply learning acquired in the general education courses and to provide knowledge and skills that fulfill the objectives of the PTA program.

The program is designed to be completed in 5 semesters. Coursework is progressive, requiring a grade point average of 2.0 in general education courses and a “C” or higher in each PTA course each term to advance to the next level course. A final comprehensive examination is required before graduation, and the student must pass this examination with a grade of “C” or higher to graduate.

Clinical experiences are a critical part of the PTA curriculum and as such are integrated into the didactic portion of the program. Clinical experiences are provided in a variety of settings, including hospitals, rehabilitation agencies, schools, private offices, and nursing homes located within a 200-mile radius of the Wallace Campus. Faculty members consider each student’s educational needs as well as personal factors in making clinical assignments.

On successful completion of the program, students are awarded an associate in applied science degree in PTA and are eligible to apply for the state licensing examination, which must be passed before being eligible to practice. PTA students are required to comply with legal, moral, and legislative standards in accordance with Rule No. 700-X-2-01 of the Alabama State Board of Physical Therapy Administrative Code, which states the following:

The Board shall refuse registration or licensure to any applicant who is of other than good moral character. Grounds for refusal include, but are not limited to: (1) history of using drugs or intoxicating liquors to an extent that professional competency is affected, (2) conviction of a felony or crime involving moral turpitude, (3) attempt to obtain or having obtained a license by fraud or deception, (4) guilty of conduct unbecoming a person registered as a physical therapist or licensed as a physical therapist assistant or of conduct detrimental to the best interest of the public, and (5) conviction of violating any state or federal narcotic law. The determination as to what constitutes other than good moral character and reputation shall be solely within the judgment of the Board. Each applicant shall be required to submit references from two professional sources which address the student’s moral character, as well as other qualifications.

Failure to comply with any of the stipulations above while enrolled in the PTA program will constitute grounds for dismissal from the program. (See Code of Conduct in the Student Handbook section of this catalog and the PTA Student Handbook.)

It is important for PTA students to be knowledgeable of all Alabama Board of Physical Therapy Regulations regarding the review of candidates for eligibility both for initial and continuing licensure. Questions on the application for licensure address these rules. Application to write the examination may be denied on the basis of this review. Although these policies refer specifically to Alabama, other states have similar stipulations regarding licensure.

ACCREDITATION
The PTA program is accredited by the Commission on Accreditation of Physical Therapy Education. Accreditation was initially granted in May of 1997.

ASSOCIATE IN APPLIED SCIENCE DEGREE

Transfer students previously enrolled in other PTA programs are evaluated on an individual basis by the PTA faculty and the Office of

Any student who completes all courses in the curriculum will be awarded an associate in applied science degree in Physical Therapist Assistant.

ADMISSION
Students are admitted to the PTA program without discrimination regarding race, sexual orientation, age, creed, gender, marital status, religion, national origin, or disability. Applicants must meet College requirements for admission. Admission packets for the program are available in May of each year and may be obtained from the Office of Instructional Affairs in Room 116 of the Administration Building on the Wallace Campus. Applicants will be ranked for admission based on GPA, academic courses completed, and performance on the Health Occupations Basic Entrance Test (HOBET). Ranking weight applied to academic performance (GPA, completed courses) will be 66%, with the remaining 34% applied to scores received on the HOBET. The applicant will incur cost of the HOBET. Wallace Community College complies with the Americans with Disabilities Act, 1990. Students who have a disability and require some accommodation in taking the HOBET examination should contact Disability Support Services in Room 110 of the Administration Building on the Wallace Campus. If accommodation is not requested in advance, its availability on site cannot be guaranteed.

Applicants must submit two copies of high school and college transcripts to be considered for admission into the program. An unofficial copy should be included in the PTA admission packet, and an official copy should be forwarded directly to the Office of Admissions and Records. Further information regarding admission is provided in the Physical Therapist Assistant admission packet.

Upon conditional admission into the program, students must complete a medical history questionnaire and submit evidence of a physical examination that includes required immunizations and documents their ability to perform all essential functions identified for this program. All students must be covered by appropriate health insurance. Reasonable accommodations will be considered.

Students must meet ALL deadlines for the admission process; otherwise, applications will be considered void and returned.

Contractual agreements between the College and clinical agencies impose additional requirements on students enrolled in health programs. These requirements include, but are not limited to, the areas of confidentiality, attire, liability insurance, and substance abuse screening.

PROGRESSION
Students are allowed to progress in the PTA program only if they satisfy the following requirements:

1. Maintain a GPA of 2.0 or higher in general education courses and a “C” or higher in all courses in the field of concentration component of the curriculum. Specifics are outlined in the PTA Student Handbook distributed during orientation.

2. Comply with clinical affiliates and PTA Department regulations, policies, and procedures.

3. Students who accumulate excessive absences in field of concentration courses are subject to suspension and, therefore, are unable to progress to the next semester of instruction. Specifics are outlined in the PTA Student Handbook distributed during orientation.

ADMISSION
Students who have been suspended from the PTA program or who have dropped out of the program for any reason must submit a readmission request in writing to the PTA Program Director no later than mid-term of the term prior to reentry. Readmission may be limited by availability of openings.

TRANSFER STUDENTS
Admissions and Records to determine appropriate placement. Validation examinations may be required. Transfer students must apply no later
than mid-term prior to the term in which they expect to enroll. Acceptance may be limited by availability of openings.

All PTA courses apply only to the AAS degree in Physical Therapist Assistant, not AA or AS degrees.

**CURRICULUM**

Before completing this program, students must prove competency in computer applications. Students who fail to demonstrate adequate competency in Computer Science by passing a Computer Competency Exam must successfully complete a CIS course.

**Note:** ORI 101—Orientation to College is a prerequisite to this degree for those who enter as first-time college students.

ORI 104—WorkKeys Assessment and Advisement is a prerequisite to this degree.

* Certification in BCLS and first aid is required prior to PTA 210. This may be obtained at the College or at any other approved agency or facility. A copy of successful completion must be presented and certification must be kept current during the entire program of study.

**PLUMBING**

(Easterling Correctional Facility)

Plumbing and pipefitting involve much more than installing pipes or solving plumbing problems. The Plumbing program encompasses such areas as blueprint reading, fixture design, and appliance/fixtures installation. Other areas of study include trenching, grading, and installing sewers, septic tanks, and drainage lines. The Plumbing program places emphasis on both residential and commercial applications, including swimming pools, water heaters, and solar systems.

Students who complete the following requirements earn the program certificate in Plumbing. Admission depends on the student’s ability to perform the essential functions identified for this program. Reasonable accommodations are considered. A high school diploma or GED is not required.

**PRACTICAL NURSING (LPN)**

(Wallace and Sparks Campuses, Fort Rucker Center)

Licensed practical nurses (LPN) provide bedside patient care under the supervision of a registered nurse, physician, or dentist. While providing direct patient care, the LPN is in a strategic position to observe the patient’s response to treatment and care. As an effective and contributing member of the nursing team, the LPN assists in implementing the patient’s care plan. In some settings, the LPN may be responsible for supervising nursing care delivery to a group of patients. The LPN may administer medications and treatments to assigned patients while supervising nursing assistants performing basic nursing functions.

The Practical Nursing program is approved by the Alabama Board of Nursing and is accredited by the National League for Nursing Accrediting Commission (NLNAC). The NLNAC is a resource for information regarding the PN program. The NLNAC can be contacted at 61 Broadway, New York, NY 10006, 1-800-669-1656.

The educational course of study is three semesters for full-time students and four semesters for part-time students. Course offerings include nursing theory, biological sciences, and clinical experiences. Graduates of the program are issued a certificate and are eligible to take the licensing examination. Graduates are eligible to apply to take the NCLEX-PN exam to become a Licensed Practical Nurse.
The nursing student will comply with legal, moral, and legislative standards in accordance with the Alabama Law Regulating Practice of Registered and Practical Nursing as stated below:

The Board may also deny, revoke or suspend any license issued by it or to otherwise discipline a licensee upon proof that the licensee: is guilty of fraud or deceit in procuring or attempting to procure a license; has been convicted of a felony; is guilty of a crime involving moral turpitude or of gross immorality that would tend to bring reproach upon the nursing profession; is unfit or incompetent due to the use of alcohol, or is addicted to the use of habit-forming drugs to such an extent as to render him or her unsafe or unreliable as a licensee; has been convicted of a violation of a federal or state law relating to controlled substances; is guilty of unprofessional conduct of a character likely to deceive, defraud, or injure the public in matters pertaining to health or has willfully or repeatedly violated any of the provisions of this article, as defined by board rules and regulations. *

*Alabama Board of Nursing, Nurse Practice Act, 1997-98.

It is important that Practical Nursing students are aware of Alabama Board of Nursing regulations on the review of candidates for eligibility for initial and continuing licensure. The Application for Licensure by Examination asks specific questions such as the following:

- Have you ever been arrested or convicted of a criminal offense other than a minor moving traffic violation?
- Have you, within the last five years, abused drugs/alcohol or been treated for dependency on alcohol or illegal chemical substances?
- Have you ever been arrested or convicted for driving under the influence of drugs/alcohol?
- Have you ever had disciplinary action or is action pending against you by any state board of nursing?
- Have you, within the last five years, received inpatient or outpatient treatment or been recommended to seek treatment for mental illness?
- Have you ever been placed on a state and/or federal abuse registry?
- Have you ever been court martialed/disciplined or administratively discharged by the military?

Application to take the licensed practical nurse examination may be denied on the basis of this review. Although these policies specifically refer to Alabama, other states have similar stipulations regarding licensure.

Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered.

ADMISSION
Each applicant must meet the following criteria:

1. Be a high school graduate or possess a GED certificate.
2. Meet College requirements for admission.
3. Make acceptable scores on ACT/ASSET or COMPASS test. Acceptable scores are predetermined by the Licensed Practical Nursing faculty.
4. Have a cumulative GPA of at least 2.0 on courses taken at the College prior to entering the LPN program.

Contractual agreements between the College and clinical agencies impose additional requirements on students enrolled in health programs. These requirements include, but are not limited to, the areas of confidentiality, attire, liability insurance, and substance abuse screening.

READMISSION
Students remaining out of the Practical Nursing program for one term or longer will be subject to program policies in effect at the time of readmission. Revised policies will take precedence over those in place prior to readmission.

Students previously dismissed from the Practical Nursing program because they have received three failures may apply for readmission after two years. Applicants for readmission must meet all current program admission requirements. Students readmitted to the Practical Nursing program following dismissal for academic failures must repeat any previously taken LPN- and MAH-prefix courses. Program guidelines in place at the time of readmission will apply. Readmission following a dismissal related to failures will only be granted one time.

PROGRESSION
Students are allowed to progress in the Practical Nursing program if they receive a grade of “C” or higher in all required general education and LPN-prefix courses. LPN-prefix courses will be evaluated using the following grading system:

- F Below 60
- D 60-74
- C 75-80
- B 80-89
- A 90-100

In calculating theory grades for LPN-prefix courses, no grades will be rounded. All clinical requirements for courses in the Practical Nursing curriculum must be met in order to satisfy course and program requirements.

TRANSFER STUDENTS
Students who have been enrolled in other schools of nursing are evaluated individually to determine appropriate placement. Validation exams may be required.

GRADUATE OPTIONS
After completing the LPN program and successfully passing the National Council Licensure Examination for Practical Nurses, students are eligible to apply for admission to the Associate Degree in Nursing (ADN) mobility program. Contact the ADN office for details.

**RADIOLOGIC TECHNOLOGY (RAD)**
*(Wallace Campus)*

The Radiologic Technology program is designed to provide the student with clinical and didactic training in producing and processing radiographs, essential for a radiologist's accurate interpretation of the human anatomy on x-ray film and/or digital imaging systems.

**ASSOCIATE IN APPLIED SCIENCE DEGREE AND PROGRAM CERTIFICATE**

On successful completion of the Radiologic Technology program, students are granted an associate in applied science degree and a certificate of completion of the Radiologic Technology Program. They are also eligible for the certification examination of the American Registry of Radiologic Technologists.

**ADMISSION**

Students are admitted to the Radiologic Technology program without discrimination regarding color, age, creed, marital status, race, religion, sex, or national origin. Applicants must meet College requirements for admission. Admission packets for the program are available in May of each year and may be obtained from the Instructional Affairs Office in the Administration Building, Room 116. Applicants will be considered for admission into the program based on past academic achievement and performance on the Radiologic Technology admissions examination (HOBET exam). Cost of the test will be incurred by the applicant. Wallace Community College complies with the Americans with Disabilities Act, 1990. Students who have a disability and require some accommodation in taking the HOBET exam should notify Radiography personnel when submitting application to the program. If accommodation is not requested in advance, its availability on site cannot be guaranteed.

Applicants must submit two official copies of high school and college transcripts to be considered for admission into the program. One copy should be included in the admission packet, and the other should be forwarded to the Admissions Office. Two letters of recommendation, a self-evaluation essay, and a completed form verifying visitation to the radiology department of a hospital must be included in each admission packet.

All applicants are required to take a Radiologic Technology program admissions examination. Further information regarding admissions is provided in the Radiologic Technology admission packet. On conditional admission into the program, students must complete a medical history questionnaire and submit evidence of a physical examination that includes required immunizations. Final acceptance into the clinical portion of the program is determined by the Radiologic Technology Admissions Committee. Admission is conditional and the program, Two letters of recommendation, a self-evaluation essay, and a completed form verifying visitation to the radiology department of a hospital must be included in each admission packet.

Contractual agreements between the College and clinical agencies impose additional requirements on students enrolled in health programs. These requirements include, but are not limited to, the areas of confidentiality, attire, liability insurance, and substance abuse screening.

**PROGRESSION**

Students must maintain a grade of “C” or above in each Radiologic Technology course to progress from one term to another. Students must maintain a cumulative grade point average of 2.0 or above in each term to continue with the program or to graduate. The clinical proficiency outlined in the **Clinical Education Handbook** must be met to progress from one term to the next.

Students must complete all general education requirements of the Radiologic Technology program before entering the sixth term. Students may repeat any Radiologic Technology course only once. Failure to pass a course a second time will result in termination from the program. Students must comply with hospital and Radiologic Technology Department regulations, policies, and procedures. Repeated counseling may result in termination from the program.

**READMISSION**

Students who apply for readmission are given consideration by the Radiologic Technology Admissions Committee. Students must submit a readmission request no later than mid-term of the term prior to planned reentry. All students who are readmitted must reenroll in all RAD courses required for the term of readmission.

**TRANSFER STUDENTS**

Students who have been enrolled in other accredited schools of radiography are evaluated on an individual basis to determine appropriate placement.

Note: ORI 101—Orientation to College is a prerequisite to this degree for those who enter as first-time college students.

ORI 104—WorkKeys Assessment and Advisement is a prerequisite to this degree.

Before completing this program, students must prove competency in computer applications. Students who fail to demonstrate adequate competency in Computer Science by passing a computer competency exam must successfully complete a CIS course.

*(Wallace Campus)*
The Respiratory Therapist program is designed to provide the student with didactic and clinical training in various techniques used in the diagnosis and treatment of patients who suffer from disorders of the cardiopulmonary system. The Respiratory Therapist program is fully accredited by the Committee for Accreditation of Allied Health Education Programs (CAAHEP), in cooperation with the Committee on Accreditation for Respiratory Care (CoARC), and is recognized by the National Board for Respiratory Care (NBRC). Graduates of the program are eligible to attempt both the Entry-Level Examination for Respiratory Care Practitioners and the Advanced Practitioner Examination System as administered by the NBRC. Successful completion of this system of examinations results in the award of the nationally recognized credential of Registered Respiratory Therapist. Graduates of this program who complete the examination system also meet criteria for licensure in states where licensure is required.

ASSOCIATE IN APPLIED SCIENCE DEGREE
On successful completion of all Respiratory Therapist curriculum requirements, graduates are awarded the associate in applied science degree.

GENERAL PROGRAM INFORMATION
The Respiratory Therapist program consists of two separate and distinct parts or phases: (1) the pre-professional phase and (2) the professional phase. The pre-professional phase (27 semester hours) is designed to be completed in two terms. The professional phase (49 semester hours) is designed to be completed in four consecutive terms (summer term included). Admission to the professional phase of the program is competitive, and completion of pre-professional phase requirements in no way guarantees that the student will be admitted into the professional phase. Final acceptance into the professional phase of instruction requires favorable action by the Respiratory Therapist Admissions Committee.

ADMISSION
Students in the pre-professional phase of the Respiratory Therapist curriculum must meet all College admission requirements as listed in this catalog. Students are admitted to the Respiratory Therapist program without discrimination regarding age, creed, marital status, race, religion, gender, or national origin. Qualified applicants are admitted to the professional phase of the program and begin classes only in fall semester. Applications for admission may be obtained from the Instructional Affairs Office in Room 116 of the Administration Building and the Wallace Campus in May of each year. Complete application packets must be submitted prior to the deadline date provided in the application packet. Further information concerning admission is provided in the Respiratory Therapist program admissions packet.

After submission of the application packet, the applicant will be scheduled to complete the Health Occupations Basic Entrance Test (HOBET). The applicant will incur cost of this test. The HOBET will be administered only once each year. Information concerning the date, time, and location of test administration is included in the application packet. Wallace Community College complies with the Americans with Disabilities Act, 1990. Applicats who have a disability and require some accommodation in taking the HOBET examination should contact Disability Support Services in Room 110 of the Administration Building or the Wallace Campus in May of each year. Complete application packets must be submitted prior to the deadline date provided in the application packet. Further information concerning admission is provided in the Respiratory Therapist program admissions packet.

In addition to the statement above, students must meet each of the following criteria in order to continue to participate in the program and/or progress from term to term and graduate from the Respiratory Therapist program:

1. Complete each course listed as a Respiratory Therapist program curriculum requirement with a grade of “C” or above.

2. Receive a passing score (75%) on the Cumulative Clinical Proficiency Examination administered at the end of each professional phase term.

3. Maintain American Heart Association certification in Basic Cardiac Life Support.

4. Present evidence of numbers 1, 2, and 3 above to the instructor no later than the third class day of each term.

5. Comply with clinical affiliate and Respiratory Therapist Department regulations, policies, and procedures. Failure to do so could result in dismissal from the program and the award of “F” as the grade for all RPT coursework.

Students may repeat any RPT-prefix course only once. Failure to pass a course with the minimum acceptable grade of “C” or above on a second attempt will result in termination from the program without the possibility of readmission. Students who accumulate excessive absences in the professional phase of the Respiratory Therapist program are subject to counseling regarding attendance.

READMISSION
The Respiratory Therapist Program, Wallace Community College. In order to allow timely scheduling of the readmission examination, this letter should be postmarked no later than 60 days prior to the desired date of readmission. Failure to submit this request on time will result in denial or delay of readmission.

</tbody>
</table>

Applicants will be ranked in descending numerical order based on admission score. Final notification of admission status will be provided to each applicant by mail.

Contractual agreements between the College and clinical agencies impose additional requirements on students enrolled in health programs. These requirements include, but are not limited to, the areas of confidentiality, attire, liability insurance, and substance abuse screening.

CONDITIONS OF PARTICIPATION AND PROGRESSION
Participation in clinical activities within the program requires strict adherence to departmental and clinical affiliate policies concerning professional standards of personal appearance, dress, speech, attendance, and behavior. Written policies are provided to each student upon entrance into the program, and penalties for non-compliance are clearly explained. Students who are unable or unwilling to comply with departmental and clinical policies will not be allowed continued participation in clinical activity, thus resulting in failure to successfully complete the requirements of the clinical course and/or program.

Completion of the Respiratory Therapist Admissions Committee.

Readmission to the professional phase of the program is competitive and applicant ranking will determine final acceptance. The following criteria, along with their maximum weight, are considered in determining admission to the Respiratory Therapist program:
In order to complete readmission requirements, students must achieve a passing score on a readmission examination. The readmission examination will be composed from the content of the last Cumulative Clinical Proficiency Examination and Clinical Skills Examination successfully completed by the student. Failure to achieve a passing score on the readmission examination will result in denial of readmission.

TRANSFER STUDENTS

Students previously enrolled in other respiratory therapist programs will be evaluated on an individual basis to determine appropriate placement. Validation examinations may be required. Transfer students should apply for admission at least 60 days prior to the term in which they expect to enroll. Acceptance may be limited by availability of openings.

SMALL ENGINE REPAIR (SER)
(Wallace Campus and Ventress Correctional Facility)

SHORT CERTIFICATE
This short certificate program is designed to teach students to repair small gasoline engines. Students receive instruction in the principles of four-stroke cycle and two-stroke cycle engines. Other areas of emphasis are troubleshooting and repair procedures on valves, power producing components, fuel systems, ignition systems, exhaust, lubrication, and cooling systems.

After completing this program, students will be able to diagnose small engine problems and make repairs to lawnmowers, chain saws, and other similar equipment. Students completing all courses listed in the curriculum will be awarded a certificate. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered. A high school diploma or GED is not required.

UPHOLSTERY (UPH)
(Wallace Campus)

SHORT CERTIFICATE
Furniture and automobile upholsterers are skilled craftsperson who cover furniture, automobile seats, and other surfaces with padding and finishing fabric. They may replace worn fabric, repair broken frames, and replace and/or repair bent springs, webbing, and other worn parts of furniture. In addition, they assist customers in selecting materials and colors. Upholsterers must have good manual and finger dexterity, mechanical inclination, and good eyesight and color vision. A flair for creative work is also helpful.

Students learn orientation and safety, upholstery equipment and tools, webbing and spring foundation, burlap foundation, muslin cover, and final fabrics. Channeling, making tufts and skirts, trimming, dismantling, repairing, and remodeling are covered along with specialization techniques for autos. Students must be able to do simple arithmetic because of calculations involved in laying out and planning the work. Students must purchase their own books and tools.

Students completing all courses listed in the curriculum will be awarded a certificate. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered. A high school diploma or GED is not required.

WELDING TECHNOLOGY (WDT)  
(Wallace and Sparks Campuses)

The purpose of this program is to prepare students for employment in the welding industry as plate or pipe welders. Certification is encouraged and performed in accordance with American Welding Society and American Petroleum Institute standards. The program includes a wide variety of welding experiences for plate and pipe welders. Students may exit the program after three semesters with a certificate in plate welding or complete both plate and pipe welding as listed below and receive a program certificate as a combination welder. Students must purchase their own books and tools. Admission is conditional and depends on the student's ability to perform the essential functions identified for this program. Reasonable accommodations are considered. A high school diploma or GED is not required.

COURSE DESCRIPTIONS

ACR 112. REFRIGERATION PRINCIPLES (1-4-3)
This course emphasizes the fundamental principles for air conditioning and refrigeration. Instruction is provided in the theory and principles of refrigeration, heat transfer, refrigeration system components, the mechanical cycle of operation, and refrigeration characteristics. On completion, students should understand the functions of major system components, terminology, heat transfer, safety, and the use and care of tools and equipment. CORE

ACR 113. REFRIGERATION PIPING PRACTICES (1-5-3)
The course introduces students to the proper installation procedures of refrigerant piping and tubing for the heating, ventilation, air conditioning, and refrigeration industry. This course includes various methods of working with and joining tubing. On completion, students should understand related terminology and be able to identify ACR pipe and tubing and various fittings. CORE

ACR 115. HEATING SYSTEMS I (2-10-6)
This course covers the fundamentals of heating systems. Components, operations, general service procedures, and basic installation procedures are emphasized. On completion, students should be able to install and service gas and electric furnaces.

ACR 117. HEAT PUMPS I (2-10-6)
This course covers the basic theory and application of heat pump systems. Topics include refrigeration cycle operations, system components, and troubleshooting. On completion, students should be able to install and service heat pumps.
ACR 121. PRINCIPLES OF ELECTRICITY FOR HVACR (1-4-3)  
This course is designed to provide the student with basic knowledge of electrical theory and circuitry as it pertains to air conditioning and refrigeration. Safety, definitions, symbols, laws, circuits, and electrical test instruments are emphasized. On completion, students should understand and be able to apply basic principles of electricity to HVACR circuits and circuit components. **CORE**

ACR 122. HVACR ELECTRICAL CIRCUITS (2-3-3)  
This course introduces the student to electrical circuits and diagrams. Electrical symbols and basic wiring diagrams are constructed in this course. On completion, students should understand standard wiring diagrams and symbols.

ACR 123. HVACR ELECTRICAL COMPONENTS (2-3-3)  
This course introduces students to electrical components and controls. Operations on motors, relays, contactors, starters, and other HVAC controls are emphasized. On completion, students should be able to understand motor theory and control functions in HVACR equipment. **CORE**

ACR 132. RESIDENTIAL AIR CONDITIONING (2-3-3)  
**PREREQUISITE: ACR 111.**  
This course introduces students to residential air conditioning systems. Operation, service, and repair of residential air conditioning systems are emphasized. On completion, students should be able to service and repair residential air conditioning systems.

ACR 133. DOMESTIC REFRIGERATION (1-5-3)  
**PREREQUISITE: ACR 111.**  
This course covers domestic refrigerators and freezers. Operation, maintenance, and repair of domestic refrigerators are emphasized. On completion, students should be able to service and repair home refrigerators and freezers.

ACR 134. ICE MACHINES (1-5-3)  
This course introduces students to commercial ice machines. Components, electrical and mechanical operation sequences, control adjustment procedures, preventive maintenance, repairs, and installation procedures are emphasized. On completion, students should be able to install, service, and repair commercial ice machines.

ACR 137. SERVICE AND REPAIR TECHNIQUES (1-5-3)  
This course covers the theory and application of techniques and procedures used to service, repair, and maintain HVAC equipment. Emphasis is placed on procedures used in all types of HVACR repair.

ACR 145. WINDOW AIR CONDITIONING (1-5-3)  
This course provides the fundamentals on the operation, maintenance, and troubleshooting of window air conditioners. Emphasis is placed on unit operation, evacuation, charging, maintaining, and troubleshooting window air conditioning units.

ACR 147. REFRIGERATION TRANSITION AND RECOVERY (3-0-3)  
This course is EPA approved and covers material relating to the requirements necessary for Type I, II, III, and universal certification. The EPA certification exam is administered at the end of the course. On completion, students should be able to pass the EPA refrigerant certification exam.

ACR 205. SYSTEM SIZING AND AIR DISTRIBUTION (2-3-3)  
This course provides instruction in the load calculation of a structure and systems sizing. Topics include heat loss and gain, equipment and air distribution sizing, and factors making acceptable indoor air quality.

ANTHROPOLOGY (ANT)  

ANT 200. INTRODUCTION TO ANTHROPOLOGY (3-0-3)  
This course is a survey of physical, social, and cultural development and behavior of human beings.

ART (ART)  

ART 100. ART APPRECIATION (3-0-3)  
This course helps students find personal meaning in works of art and develops a better understanding of the nature and validity of art. Diversity of form and content in original art work is emphasized. On completion, students should understand the fundamentals of art and the materials used and have a basic overview of the history of art.

ART 113. DRAWING I (3-3-3)  
This course provides an opportunity to develop perceptual and technical skills in a variety of media. Communication through experimenting with composition, subject matter, and technique is emphasized. On course completion, students should demonstrate and apply the fundamentals of art to various creative drawing projects.

ART 114. DRAWING II (3-3-3)  
**PREREQUISITE: ART 113.**  
This course advances drawing skills in various art media. Communication through experimentation, composition, technique, and personal expression is emphasized. On course completion, students should demonstrate creative drawing skills, application of the fundamentals of art, and communication of personal thoughts and feelings.

ART 121. TWO-DIMENSIONAL COMPOSITION I (3-3-3)  
This course introduces the basic concepts of two-dimensional design. Topics include elements and principles of design, with emphasis on arrangements and the relationships among them. On course completion, students should demonstrate effective use of these elements and principles of design in creating two-dimensional compositions.

ART 127. THREE-DIMENSIONAL COMPOSITION (3-3-3)  
This course introduces art materials and principles of design that acquaint the beginner with fundamentals of three-dimensional art. Use of art fundamentals and creative exploration of materials in constructing three-dimensional art works is emphasized. On course completion, students should demonstrate basic technical skills and a personal awareness of the creative potential inherent in three-dimensional art forms.

ART 133. CERAMICS I (3-3-3)  
This course introduces methods of clay forming as a means of expression. Topics may include hand building, wheel throwing, glazing, construction, design, and the functional and aesthetic aspects of pottery. On course completion, students should demonstrate through their work a knowledge of these methods as well as an understanding of the craftsmanship and aesthetics involved in ceramics.

ART 134. CERAMICS II (3-3-3)  
**PREREQUISITE: ART 133.**  
This course develops methods of clay forming as a means of expression. Topics may include hand building, wheel throwing, glazing, design, and the functional and aesthetic aspects of pottery, although the wheel-throwing method is emphasized. On course completion, students should demonstrate improved craftsmanship and aesthetic quality in the production of pottery.

ART 173. PHOTOGRAPHY I (3-3-3)  
This course is an introduction to the art of photography. Technical and aesthetic aspects of photography, with detailed instruction in darkroom techniques, are emphasized. On course completion, students should understand the camera as a creative tool; understand types of films, chemicals, and papers; and have a knowledge of composition and history.

ART 174. PHOTOGRAPHY II (3-3-3)  
**PREREQUISITE: ART 173.**
This course advances technical and aesthetic knowledge of photography beyond the introductory level. Photographic composition and darkroom techniques as a means of communication are emphasized. On course completion, students should demonstrate creative and communication skills through the photographic process.

PREREQUISITE: ART 233.

This course is designed to develop knowledge of materials and procedures of painting beyond the introductory level. Creative and technical problems associated with communicating through composition and style are emphasized. On course completion, students should be able to demonstrate application of painting fundamentals and the creative process to the communication of ideas.

PREREQUISITE: ART 127 or instructor permission.

This course provides a study of three-dimensional form by familiarizing students with sculpting media and techniques. Topics include the fundamentals of art and sculpting media, with emphasis on the creative process. On course completion, students should understand the fundamentals of art and three-dimensional form as well as various media and processes associated with sculpture.

PREREQUISITE: ART 243.

This course is designed to sharpen skills in media and processes of sculpture. Personal expression through three-dimensional form is emphasized. On course completion, students should be able to apply the fundamentals of art, knowledge of form, and sculptural processes to the communication of ideas.

PREREQUISITE: ART 180.

This course is designed to introduce the study of visual communication through design. Application of design principles to projects involving such skills as illustration, layout, typography, and production technology is emphasized. On course completion, students should demonstrate knowledge of the fundamentals of art and understanding of the relationship between materials, tools, and visual communication.

PREREQUISITE: ART 253.

This course further explores the art of visual communication through design. Application of design principles to projects involving such skills as illustration, layout, typography, and production technology is emphasized. On course completion, students should be able to apply knowledge of the fundamentals of art, materials, and tools to the communication of ideas.

PREREQUISITE: ART 174.

This course addresses special problems in the student’s area of interest. Design, techniques, and results are emphasized. On course completion, the student will be able to produce professional quality photographs in one particular area of photography.

PREREQUISITE: Instructor permission.

This course is designed to enable the student to continue studio experiences in greater depth. Topics are to be chosen by the student with the approval of the instructor. On completion, the student should have greater expertise in a particular area of art.

PREREQUISITE: ART 291 or instructor permission.

This course is designed to enable the student to continue studio experiences in greater depth. Topics are chosen by the student with the approval of the instructor. On course completion, the student should have greater expertise in a particular area of art.

PREREQUISITE: Instructor permission.

This course is designed to help the art major in preparing and presenting an art portfolio. Representing the student’s potential as an artist to interest employers, clients, or schools is emphasized. On course completion, students should have an understanding of professional computer graphics through production on a graphic program in a computer environment.

PREREQUISITE: ART 220.

This course is designed to enhance the ability to produce computer-generated graphics. Application of original design to practical problems using a variety of hardware and software is emphasized. On course completion, students should have an understanding of professional computer graphics.

PREREQUISITE: ART 221.

This course is designed to enhance the ability to produce an advanced level of computer-generated graphics. Application of original design to practical problems using a variety of hardware and software is emphasized. On course completion, students should have an understanding of professional computer graphics.

PREREQUISITE: ART 113, ART 121, or instructor permission.

This course is designed to introduce fundamental painting processes and materials. Topics include art fundamentals, color theory, and composition. On course completion, students should be able to demonstrate the fundamentals of art and discuss various approaches to media and creative processes associated with painting.

PREREQUISITE: Instructor permission.

This course is designed to help the art major in preparing and presenting an art portfolio. Representing the student’s potential as an artist to interest employers, clients, or schools is emphasized. On course completion, students should demonstrate creative and communication skills through the graphic design process.

PREREQUISITE: ART 180.

This course is designed to introduce various printmaking processes. Topics include relief, intaglio, serigraphy or lithography, and the creative process. On course completion, students should have a basic understanding of the creative and technical problems associated with printmaking.

PREREQUISITE: ART 216.

This course provides an opportunity to study a printmaking process beyond the introductory level. Creativity, composition, and technique in the communication of ideas through printmaking are emphasized. On course completion, students should have a basic understanding of the creative and technical problems associated with printmaking.

PREREQUISITE: ART 216.

This course is designed to develop knowledge of materials and procedures of painting beyond the introductory level. Creative and technical problems associated with communicating through composition and style are emphasized. On course completion, students should be able to demonstrate application of painting fundamentals and the creative process to the communication of ideas.

PREREQUISITE: ART 127 or instructor permission.

This course provides a study of three-dimensional form by familiarizing students with sculpting media and techniques. Topics include the fundamentals of art and sculpting media, with emphasis on the creative process. On course completion, students should understand the fundamentals of art and three-dimensional form as well as various media and processes associated with sculpture.

PREREQUISITE: ART 243.

This course is designed to sharpen skills in media and processes of sculpture. Personal expression through three-dimensional form is emphasized. On course completion, students should be able to apply the fundamentals of art, knowledge of form, and sculptural processes to the communication of ideas.

PREREQUISITE: ART 180.

This course is designed to introduce the study of visual communication through design. Application of design principles to projects involving such skills as illustration, layout, typography, and production technology is emphasized. On course completion, students should demonstrate knowledge of the fundamentals of art and understanding of the relationship between materials, tools, and visual communication.

PREREQUISITE: ART 253.

This course further explores the art of visual communication through design. Application of design principles to projects involving such skills as illustration, layout, typography, and production technology is emphasized. On course completion, students should be able to apply knowledge of the fundamentals of art, materials, and tools to the communication of ideas.

PREREQUISITE: ART 174.

This course addresses special problems in the student’s area of interest. Design, techniques, and results are emphasized. On course completion, the student will be able to produce professional quality photographs in one particular area of photography.

PREREQUISITE: Instructor permission.

This course is designed to enable the student to continue studio experiences in greater depth. Topics are to be chosen by the student with the approval of the instructor. On completion, the student should have greater expertise in a particular area of art.

PREREQUISITE: ART 291 or instructor permission.

This course is designed to enable the student to continue studio experiences in greater depth. Topics are chosen by the student with the approval of the instructor. On course completion, the student should have greater expertise in a particular area of art.

PREREQUISITE: Instructor permission.

This course is designed to help the art major in preparing and presenting an art portfolio. Representing the student’s potential as an artist to interest employers, clients, or schools is emphasized. On course completion, students should demonstrate creative and communication skills through the graphic design process.

PREREQUISITE: ART 180.

This course is designed to introduce various printmaking processes. Topics include relief, intaglio, serigraphy or lithography, and the creative process. On course completion, students should have a basic understanding of the creative and technical problems associated with printmaking.

PREREQUISITE: ART 216.

This course provides an opportunity to study a printmaking process beyond the introductory level. Creativity, composition, and technique in the communication of ideas through printmaking are emphasized. On course completion, students should have a basic understanding of the creative and technical problems associated with printmaking.

PREREQUISITE: ART 216.
ASSOCIATE DEGREE NURSING (NUR)

NUR 101. BASIC LIFE SUPPORT (1-0-1)
PREREQUISITE: Instructor permission.
This course includes theory and application in the area of cardiopulmonary resuscitation (CPR). Single rescue of the adult, two-rescuer CPR, managing obstructed airways, and infant and child CPR are emphasized. The student should be able to successfully demonstrate CPR.

NUR 111. FUNDAMENTALS OF NURSING (4-0-4)
PREREQUISITE: Program admission or instructor permission.
This course presents concepts and theories to the art and science of nursing. Application of the nursing process to provide and manage care as a member of the discipline of nursing is emphasized. Students are introduced to the concepts of needs, growth and development, safety, communication, teaching and learning, critical thinking, ethics and the law, nursing history, and the program’s philosophy of nursing. Students should be able to demonstrate beginning competence in providing care for individuals with common health alterations. Clinical is required.

NUR 121. CLINICAL NURSING SKILLS (0-6-2)
PREREQUISITE: Program admission or instructor permission. COREQUISITE: NUR 111, 131, and 241.
This course presents psychomotor nursing skills needed to assist individuals in meeting basic human needs. Skills necessary for maintaining microbial, physical, and psychological safety are introduced along with skills needed in therapeutic interventions. Students will demonstrate a beginning level of competency in performing basic nursing skills. Lab/clinical is required.

NUR 131. HEALTH ASSESSMENT (0-3-1)
PREREQUISITE: Program admission or instructor permission.
This course is designed to provide an opportunity to learn and practice history-taking and physical examination skills with individuals of all ages. Symptoms analysis along with physical, psychosocial, and growth and development assessment are the focus. Students will be able to use critical-thinking skills to identify health alterations, formulate nursing diagnoses, and document findings appropriate to nursing. Lab is required.

NUR 200. BASIC LIFE SUPPORT UPDATE (1-0-1)
PREREQUISITE: Instructor permission.
This course provides the student with a review of concepts related to cardiopulmonary resuscitation (CPR). Single rescue of the adult, two-rescuer CPR, managing obstructed airways, and infant and child CPR are emphasized. The student should be able to successfully demonstrate CPR.

NUR 201. SPECIALIZED AREA OF STUDY (1-0-1)
PREREQUISITE: Instructor permission.
This course is directed toward the specialized study of theory experiences in a selected area as determined by student, employers, and/or the program. Development of knowledge and skills in an area of interest to the student is emphasized. The student should be able to meet course objectives as approved the instructor.

NUR 202. SPECIALIZED AREA OF STUDY (2-0-2)
PREREQUISITE: Instructor permission.
This course is directed toward the specialized study of nursing experiences in a selected area as determined by students, employers, and/or the program. Development of knowledge and skills in an area of interest to the student is emphasized. The student should be able to meet the theoretical and skills objectives of the course as approved the instructor.

NUR 203. SPECIALIZED AREA OF STUDY (0-3-1)
PREREQUISITE: Instructor permission.

This course is directed toward application of the clinical experience in a selected area as determined by students, employers, and/or the program. The student should be able to meet the theoretical and skills objectives of the course as approved the instructor/preceptor.

NUR 204. COMPUTER APPLICATIONS IN NURSING (1-0-1)
PREREQUISITE: NUR 251 or instructor permission.
This course is designed to enhance knowledge of nursing care of the older adult. Current issues and research in gerontology are emphasized. The student should be able to integrate research findings into nursing practice.

NUR 205. ADVANCED CONCEPTS OF GERIATRIC NURSING (2-0-2)
PREREQUISITE: NUR 251 or instructor permission.
This course is designed to enhance knowledge of nursing care of the older adult. Current issues and research in gerontology are emphasized. The student should be able to integrate research findings into nursing practice.

NUR 206. ADVANCED NUTRITION CONCEPTS (2-3-0-2-3)
This course includes concepts related to normal nutrition and modifications for therapeutic diets throughout the life cycle. Topics include enteral/parenteral feedings, disabling disease, rehabilitation, and drug-nutrient interactions. The student should be able to provide diet therapy for clients in acute care as well as community settings.

NUR 207. DIRECTED STUDY IN NURSING (1-0-1)
PREREQUISITE: Instructor permission.
This course is designed to increase the opportunity for exploring, reading, and reporting on specific theoretical topics related to the field of nursing. Topics must be approved by the instructor. Development of knowledge in an area of interest to the student is emphasized. The student should be able to meet course objectives as approved by the instructor.

NUR 208. DIRECTED STUDY IN NURSING (1-3-2)
PREREQUISITE: Instructor permission.
This course is designed to increase the opportunity for exploring, reading, and practicing selected clinical laboratory skills related to the field of nursing. Topics must be approved by the instructor. Development of knowledge and clinical skills in an area of interest to the student is emphasized. The student should be able to meet course objectives as approved by the instructor. Clinical is required.

NUR 209. DIRECTED STUDY IN NURSING (3-0-3)
PREREQUISITE: Instructor permission.
This course is designed to provide the opportunity for study in a specific area of nursing. Increasing knowledge in an area of interest to the student is emphasized. The student should be able to meet course objectives as approved by the instructor.

NUR 211. NURSING CONCEPTS FOR MOBILITY STUDENTS (4-3-5)
This course is designed to assist the licensed practical nurse with transition into the role of the associate degree nurse. The program's philosophy, objectives, and conceptual framework are also introduced. The nursing process, communication, selected theory, and the nursing skills and role of the registered nurse are emphasized. On completion, students should be able to articulate into the ADN program. Clinical is required. This course is required ONLY for LPN Mobility Program students.

NUR 241. BASIC PHARMACOLOGY (0-3-1)
PREREQUISITE: Program admission or instructor permission.
This course introduces basic principles of pharmacology and skills necessary to safely administer medications. Concepts of legal implications, pharmacokinetics, pharmacodynamics, calculation of drug dosages, and medication administration are emphasized. Students will be
able to demonstrate accurate dosage calculations, correct medication administration, and knowledge of drug classifications. **Lab is required.**

This course is designed to provide comprehensive knowledge of drug classifications and applications of pharmacology. Nursing responsibility, accountability, and application of the nursing process regarding drug therapy are emphasized. Actions, dosages, side effects, and adverse reactions are presented for drug prototypes from each classification of drugs. The student will be able to synthesize knowledge of drug therapy in a variety of settings with individuals across the life span.

**NUR 242. ADVANCED PHARMACOLOGY (2-0-2)**
PREREQUISITE: NUR 241, BIO 202, or instructor permission.

acute and chronic health alterations in a variety of settings. **Clinical is required.**

**NUR 251. ADULT NURSING I (3-6-5)**
PREREQUISITE: NUR 111, 121, 131, 241; BIO 202; or instructor permission.

This course provides an opportunity to use the provider and manager of care roles to meet nursing needs of adults in a variety of settings. The aging process, as it applies to normal developmental changes and alterations in health commonly occurring in the adult, is emphasized. Students should be able to apply the nursing process in caring for adults in a variety of settings. **Clinical is required.**

**NUR 252. ADULT NURSING II (3-6-5)**
PREREQUISITE: NUR 211, 242, 251 or instructor permission.

This course introduces concepts related to the nursing care of individuals experiencing acute and chronic alterations in health. Using the nursing process as a framework for providing and managing nursing care to individuals is emphasized. Students should be able to apply the nursing process to individuals experiencing acute and chronic health alterations in a variety of settings. **Clinical is required.**

**NUR 253. ADULT NURSING III (3-6-5)**
PREREQUISITE: NUR 252 or instructor permission.

This course provides expanded concepts related to nursing care for individuals experiencing common, complex alterations in health. The nurse’s role as a member of a multidisciplinary team and as a manager of care for a group of individuals is emphasized. Students should be able to provide comprehensive nursing care for groups of individuals with common, complex alterations in health in a variety of settings. **Clinical is required.**

**NUR 271. MATERNAL-NEWBORN NURSING (2-6-4)**
PREREQUISITE: NUR 252 or instructor permission.

This course provides a family-centered approach to nursing care of the childbearing family. Concepts related to the antepartal, intrapartal, postpartal, and neonatal periods are emphasized. The student should be able to manage and provide care to the childbearing family in a variety of health care settings. **Clinical is required.**

**NUR 272. PEDIATRIC NURSING (2-6-4)**
PREREQUISITE: NUR 252 or instructor permission.

This course provides a family-centered approach to nursing of children from infancy through adolescence. Concepts of growth and development, health promotion, and alterations in health are emphasized. The student should be able to use the nursing process in providing and managing nursing care to the family in a variety of health care settings. **Clinical is required.**

**NUR 274. CONCEPTS OF PEDIATRIC NURSING I (1-3-2)**
PREREQUISITE: NUR 252 or instructor permission.

This course provides a family-centered approach to nursing of children from infancy through adolescence. Concepts of growth and development, health promotion, and alterations in health are emphasized. The student should be able to use the nursing process in providing and managing nursing care to the family in a variety of health care settings. **Clinical is required.**

**NUR 275. CONCEPTS OF PEDIATRIC NURSING II (1-3-2)**
COREQUISITE: NUR 252, Mobility program admission, or instructor permission.

This course provides expanded concepts related to care of children from infancy through adolescence. Using the nursing process as a framework for providing and managing care for children is emphasized. The student should be able to provide comprehensive care for children experiencing
NUR 276. CONCEPTS OF MATERNAL-NEWBORN NURSING I (1-3-2)
PREREQUISITE: Mobility program admission or instructor approval.
This course provides a family-centered approach to the care of the childbearing family. Emphasis is placed on the normal concepts relating to the antepartal, intrapartal, postpartal, and neonatal periods. The student should be able to manage and provide care to the childbearing family in a variety of settings. Clinical is required.

NUR 277. CONCEPTS OF MATERNAL-NEWBORN NURSING II (1-3-2)
PREREQUISITE: NUR 252, Mobility program admission, or instructor permission.
This course provides expanded concepts related to the care of the childbearing family. Common and acute alterations in health during antepartal, intrapartal, postpartal, and neonatal periods are emphasized. The student should be able to provide comprehensive care in a variety of settings. Clinical is required.

NUR 278. CONCEPTS OF PSYCHOSOCIAL NURSING I (1-3-2)
PREREQUISITE: NUR 242, 278, or instructor permission.
This course provides concepts related to the psychosocial needs of individuals. Cultural, familial, and individual beliefs that influence mental health and illness are emphasized. Common alterations in mental health, psychodynamic theories, and treatment modalities are included. The student should be able to apply these concepts to the care of individuals experiencing alterations in mental health in a variety of settings. Clinical is required.

NUR 279. CONCEPTS OF PSYCHOSOCIAL NURSING II (1-3-2)
PREREQUISITE: NUR 242, 278, or instructor permission.
Students are introduced to the various types of automotive finishes and equipment used in their application. Identification of refinishing materials, types of paint equipment, and proper safety precautions are emphasized. On completion, students should be able to properly select paint materials and equipment. Non-degree credible. CORE

ABR 122. SURFACE PREPARATION (1-5-3)
This course introduces students to methods of surface preparation for automotive refinishing. Topics include sanding techniques, metal treatment, selection and use of undercoats, and proper masking procedures. On completion, students should be able to prepare a vehicle for refinishing. Non-degree credible. CORE.

ABR 152. PLASTIC REPAIRS (1-5-3)
This course provides instruction in automotive plastic repairs. Topics include plastic welding (both hot and chemical), use of flexible repair fillers, primers and paint additives, identification of types of plastics, and determining the correct repair procedures for each. On completion, students should be able to correctly identify and repair the different types of automotive plastics. Non-degree credible.

ABR 153. CORROSION PROTECTION (1-5-3)
This course introduces the theory of corrosion and anticorrosion methods. Restoring factory corrosion protection after collision damage is emphasized. On completion, students should be able to replace the factory corrosion protection on repaired or replaced panels. Non-degree credible.

ABR 154. AUTO GLASS AND TRIM (1-5-3)
This course is a study of automotive glass and trim. Removal and replacement of structural and nonstructural glass and auto trim are emphasized. On completion, students should be able to remove and replace automotive trim and glass. Non-degree credible.

ABR 155. AUTOMOTIVE MIG WELDING (1-5-3)
This course provides instruction in automotive Metal Inert Gas (MIG) welding. Safety, set up, and operation of equipment and various types of weld are emphasized. On completion, students should be able to successfully join automotive sheet metal using the MIG process. Non-degree credible.

ABR 156. AUTO CUTTING AND WELDING (1-5-3)
Students are introduced to various automotive cutting and welding processes. Safety, plasma arc, and oxy-acetylene cutting, resistance-type spot welding, and Metal Inert Gas (MIG) welding are emphasized. On completion, students should be able to perform basic sheetmetal repairs. Non-degree credible.

ABR 211. STRUCTURAL ANALYSIS (1-5-3)
Students learn methods of determining structural misalignment. Topics include methods of inspection, types of measuring equipment, data sheets, and identifying types of structural damage. On completion, students should be able to locate and identify structural damage. Non-degree credible. CORE.

ABR 212. STRUCTURAL REPAIR (1-5-3)
This course provides instruction in the correction of structural damage. Topics include types and use of alignment equipment, anchoring and pulling methods, and repair/replacement of structural components to factory specifications. Non-degree credible. CORE.

ABR 221. MECHANICAL COMPONENTS (1-5-3)
This course provides instruction in collision-related mechanical repairs. Diagnosis and repairs to drivetrain, steering/suspension components and various other mechanical repairs are emphasized. On completion, students should be able to diagnose and repair collision-damaged mechanical components. Non-degree credible. CORE.

ABR 222. ELECTRICAL COMPONENTS (1-5-3)
This course provides instruction in collision-related electrical repairs. Topics include basic DC theory, types of diagnostic equipment, circuit protection, wire repair, and use of wiring diagrams. On completion, students should be able to diagnose and repair collision-damaged electrical components. Non-degree credible. CORE.
This course is a study of automotive air conditioning and cooling systems. It includes automotive air conditioning and cooling theory, component replacement, and system service. On completion, students should be able to repair and service air conditioning and cooling systems related to collision repair. **Non-degree credible.**

**ABR 254. COLLISION DAMAGE REPORTS (1-5-3)**
In this course, students are introduced to the principles of collision cost estimating. Calculation of parts and labor amounts based on collision estimating guides is emphasized. On completion, the student should be able to prepare an accurate damage report (estimate). **Non-degree credible.**

**ABR 256. TOPCOAT APPLICATIONS (1-5-3)**
The focus of this course is application of various automotive topcoats. Topics include applying single-stage, basecoat/clearcoat, and tricoat finishes. On completion, students should be able to properly apply automotive topcoats. **Non-degree credible.**

**ABR 259. CERTIFICATION REVIEW (3-0-3)**
This review course covers materials that relate to requirements for the ASE Collision Repair and Refinish test. Topics include painting and refinishing, nonstructural analysis and damage repair, structural analysis and damage repair, mechanical and electrical components, and damage analysis and estimating. On completion, students should be prepared to take the ASE Collision Repair and Refinish Certification test. **Non-degree credible.**

**ABR 291. AUTO BODY REPAIR CO-OP (0.5-15.1-3)**
**PREREQUISITE:** Instructor approval.
This course is designed to provide practical shop experience for advanced students through part-time employment in the collision repair industry. Techniques used in collision repair facilities are emphasized. On completion, students should have gained the skills necessary for entry-level employment. **Non-degree credible.**

**ASE 120. STEERING, SUSPENSION, AND ALIGNMENT (1-5-3)**
This course is designed to give a working knowledge of the design, operation, diagnosis, and repair of conventional and strut-type suspension systems. Topics include alignment procedures, wheel balancing, conventional, and rack and pinion systems. On completion, students should be able to make repairs and adjustments to suspension systems. **CORE.**

**ASE 131. POWERTRAIN FUNDAMENTALS (1-5-3)**
This course provides a study of the automotive power flow from the transmission to the drive wheels. Topics include drive lines, gear ratios, differentials, drive axles, troubleshooting, and diagnostics. On completion, students should be able to troubleshoot, diagnose, and repair automatic and manual power trains. **CORE.**

**ASE 132. AUTOMOTIVE HEATING AND AIR CONDITIONING (1-5-3)**
This course covers nomenclature, theory of operation, repairs and service procedures, electrical control circuits for the compressor, and blower and coolant fan. Proper use of service manuals and safety are emphasized. On completion, students should be able to diagnose and repair heating and air conditioning systems.

**ASE 150. DEALERSHIP WORK EXPERIENCE (0-10-2)**
At the end of each on-campus period, the student returns to the sponsoring dealership to complete this segment of the program, working full time under the supervision of the dealership student work coordinator. The student is expected to complete work assignments in the dealership that will reinforce and parallel the course work just completed at the College. Although indicated as 10 contact hours, students generally work full time (40 hours per week) at the dealership. An evaluation of the student's in-dealership work performance is completed by the dealership supervisor.

**AUTOMOTIVE TECHNOLOGY (ASE)**

**ASE 101. FUNDAMENTALS OF AUTOMOTIVE TECHNOLOGY (1-5-3)**
This course provides a study of safety rules and procedures based on OSHA standards. Topics include use of shop tools and equipment, measuring devices, preventive maintenance, light duty service procedures, and use of shop manuals. On completion, students should be able to use basic tools and equipment safely and in observance of OSHA standards. **CORE.**

**ASE 111. AUTOMOTIVE ELECTRICAL SYSTEMS (1-5-3)**
This course provides a study of the principles of electricity, magnetism, and Ohm's Law. Batteries, starting, charging, and lighting circuits are emphasized. On completion, students should be able to identify and repair minor electrical problems on the automobile. **CORE.**

**ASE 112. STARTING, CHARGING SYSTEMS, AND ACCESSORIES (1-5-3)**
This course is designed to provide the basic knowledge of troubleshooting, maintenance, and repair of automotive electrical accessories. This includes use of special tools when servicing batteries, starting systems, and changing lighting systems. All troubleshooting and maintenance procedures must be in accordance with manufacturer's specifications. **CORE.**

**ASE 211. AUTOMOTIVE ELECTRONICS (1-5-3)**
This course builds on the principles of the laws of electricity. Series, parallel, and series/parallel circuits are emphasized. On completion, students should be able to calculate, build, and measure circuits. **CORE.**

**ASE 212. FUEL SYSTEMS (1-5-3)**
**PREREQUISITE:** ASE 111
This course focuses on fuel delivery systems operation and diagnosis and repair of fuel system components. Emphasis is placed on servicing the fuel injection system. On completion, students should be able to perform advanced engine tune-ups. **CORE.**

**ASE 214. IGNITION SYSTEMS (1-5-3)**
**PREREQUISITE:** ASE 120 or instructor approval.
This course provides a study of the principles of operation, diagnosis, and repair of ignition system components. Topics include primary and secondary circuit operations and diagnosis and repair of conventional electronic and distributorless ignition systems. On completion, students will be prepared to diagnose and repair ignition system problems. **CORE.**

**ASE 221. ENGINE REPAIR (1-5-3)**
**PREREQUISITE:** ASE 123 or instructor approval.
This course provides understanding of the troubleshooting and repair procedures for the gasoline engine. Topics include engine disassembly, identification of components, inspection and measuring of parts, repair and reassembly, use of service manuals, and safety. On completion, students should be able to repair or rebuild an automotive engine. **CORE.**

**ASE 222. MANUAL TRANSMISSION/TRANSAXLE (1-5-3)**
**PREREQUISITE:** ASE 141 or instructor approval.
This course includes a study of manual transmission/transaxle components, gear ratios, and power flow. Topics include manual and hydraulic clutches and their service and repair. On completion, students should be able to remove, repair, and replace manual transmission/transaxle components.
ASE 223. ENGINE MANAGEMENT SYSTEMS (1-5-3)
PREREQUISITES: ASE 111, 112, and 211.
This course is designed to provide a working knowledge of the principles of operation, diagnosis, and repair of computerized engine control systems, which includes a study of microprocessors, sensors, actuators, and emission control devices and their interaction. All diagnostics and repair procedures must be accomplished in accordance with manufacturer’s specifications. CORE

ASE 231. AUTOMATIC TRANSMISSION/TRANSAXLE (1-5-3)
PREREQUISITE: ASE 131 or instructor approval.
This course is designed to provide a working knowledge of the construction and operation of automatic transmissions/transaxles. Topics include the study of torque converters, gear and clutch assemblies, hydraulic and mechanical power flow, and electronic controls. On completion, students should be able to remove, install, and perform basic repairs on automatic transmissions and transaxles.

ASE 250. DEALERSHIP WORK EXPERIENCE (0-10-2)
At the end of each on-campus period, the student returns to the sponsoring dealership to complete this segment of the program, working full time under the supervision of the dealership student work coordinator. The student is expected to complete work assignments in the dealership that will reinforce and parallel the course work just completed. The student is expected to complete work assignments in the dealership that will reinforce and parallel the course work just completed at the College. Although indicated as 10 contact hours, students normally work full time (40 hours per week) at the dealership. An evaluation of the student’s in-dealership work performance is completed by the dealership supervisor.

BIOLOGY (BIO)

BIO 101. INTRODUCTION TO BIOLOGY I (3-2-4)
PREREQUISITE: Regular admission status.
This course emphasizes structure and function of the human body. Included is an orientation to the human body; basic principles of chemistry; a study of cells and tissues; metabolism; joints; the integumentary, skeletal, muscular, and nervous systems; and the senses. Dissection, histological studies, and physiology are featured in the laboratory experience. A 120-minute laboratory is required.

BIO 202. HUMAN ANATOMY AND PHYSIOLOGY II (3-2-4)
PREREQUISITES: BIO 103 and 201.
This course emphasizes structure and function of the human body. Included is a study of basic nutrition; basic principles of water, electrolyte, and acid-base balance; and the endocrine, respiratory, digestive, excretory, cardiovascular, lymphatic, and reproductive systems. Dissection, histological studies, and physiology are featured in the laboratory experience. A 120-minute laboratory is required.

BIO 220. GENERAL MICROBIOLOGY (2-4-4)
PREREQUISITE: BIO 103 or 212. RECOMMENDED: 4 SEMESTER HOURS OF CHEMISTRY.
This course includes historical perspectives; cell structure and function; microbial genetics; infectious diseases; and immunology, distribution, physiology, culture, identification, classification, and disease control of microorganisms. The laboratory experience includes microtechniques, distribution, culture, identification, and control. Two 120-minute laboratories are required.

BUILDING CONSTRUCTION (BUC)

BUC 111. BASIC CONSTRUCTION LAYOUT (2-1-3)
PREREQUISITE: Instructor approval.
This course provides students with basic building layout skills. Topics include the builder’s level, transit, and basic site layout techniques. On completion, students should be able to solve differential leveling problems, set up and operate the builder’s level and transit, build batter boards, and perform basic construction layout procedures.

BUC 214. SOILS AND SITE WORK (3-0-3)
Introduction to Biology I is the first of a two-course sequence designed for non-science majors. It covers historical studies illustrating the scientific method, cellular structure, bioenergetics, cell reproduction, Mendelian and molecular genetics, and a survey of human organ systems. A 120-minute laboratory is required.

BIO 102. INTRODUCTION TO BIOLOGY II (3-2-4)
PREREQUISITE: BIO101.
Introduction to Biology II is the second of a two-course sequence designed for non-science majors. It covers evolutionary principles and relationships, environmental and ecological topics, classification, and a survey of biodiversity. A 120-minute laboratory is required.

BIO 103. PRINCIPLES OF BIOLOGY I (3-2-4)
PREREQUISITE: Regular admission status.
This is an introductory course for science and non-science majors. It includes physical, chemical, and biological principles common to all organisms. These principles are explained through a study of cell structure and function, cellular reproduction, basic biochemistry, cell energetics, the process of photosynthesis, and Mendelian and molecular genetics. Also included are the scientific method, basic principles of evolution, and an overview of the diversity of life, with emphasis on viruses, prokaryotes, and protists. A 120-minute laboratory is required. CORE

BIO 104. PRINCIPLES OF BIOLOGY II (3-3-4)
PREREQUISITE: BIO 103.
This course is an introduction to basic ecological and evolutionary relationships of plants and animals and a survey of plant and animal diversity including classification, morphology, physiology, and reproduction. A 180-minute laboratory is required. CORE

BIO 201. HUMAN ANATOMY AND PHYSIOLOGY I (3-2-4)
PREREQUISITE: BIO 103.
This course covers site conditions and soil types and their physical properties. Topics include site preparation, access, mechanical analysis, classification of soils, and hydrostatics of ground water. On completion, students should be able to adequately prepare a building site according to plans and specifications.

BUSINESS (BUS)

BUS 150. BUSINESS MATH (3-0-3)
This course is a study of practical business mathematics. Topics include fundamental processes of arithmetic with emphasis on decimals and percentages, mark-up, discounts, bank reconciliation, simple and compound interest, computing interest, and present value.

BUS 186. ELEMENTS OF SUPERVISION (3-0-3)
This course is an introduction to the fundamentals of supervision. Topics include the functions of management, responsibilities of the supervisor, management-employee relations, organizational structure, project management, and employee training and rating.

BUS 241. PRINCIPLES OF ACCOUNTING I (3-0-3)
This course provides a basic theory of accounting principles and practices used by service and merchandising enterprises. Financial accounting, including the accounting cycle, and financial statement preparation analysis are emphasized.

BUS 242. PRINCIPLES OF ACCOUNTING II (3-0-3)
PREREQUISITE: BUS 241.
This course is a continuation of BUS 241. In addition to a study of financial accounting, this course also emphasizes managerial accounting, with coverage of corporations; statement analysis; introductory cost accounting; and use of information for planning, control, and decision making.

BUS 248. MANAGERIAL ACCOUNTING (3-0-3)
PREREQUISITE: BUS 242.
This course is designed to familiarize the student with management concepts and techniques of industrial accounting procedures. Cost behavior, contribution approach to decision-making, budgeting, overhead analysis, cost-volume-profit analysis, and cost accounting systems are emphasized.

**BUS 263. THE LEGAL AND SOCIAL ENVIRONMENT OF BUSINESS (3-0-3)**
This course provides an overview of the legal and social environment for business operations, with emphasis on contemporary issues and their subsequent impact on business. Topics include the Constitution, Bill of Rights, legislative process, civil and criminal law, administrative agencies, trade regulations, consumer protection, contracts, employment, and personal property.

**BUS 271. BUSINESS STATISTICS I (3-0-3)**
**PREREQUISITE:** Two years of high school algebra, intermediate algebra, or appropriate score on math placement test.
This is an introductory study of basic statistical concepts applied to economic and business problems. Topics include the collection, classification, and presentation of data, statistical description and analysis of data, measures of central tendency and dispersion, elementary probability, sampling, estimation, and introduction to hypothesis testing.

**BUS 275. PRINCIPLES OF MANAGEMENT (3-0-3)**
This course provides a basic study of the principles of management. Topics include planning, organizing, staffing, directing, and controlling, with emphasis on practical business applications.

**BUS 279. SMALL BUSINESS MANAGEMENT (3-0-3)**
This course provides an overview of the creation and operation of a small business. Topics include buying a franchise, starting a business; identifying capital resources; understanding markets; managing customer credit; managing accounting systems, budgeting systems, and inventory systems; purchasing insurance; and using appropriate legal counsel.
This is an introductory course to maintaining woodworking tools and equipment. Topics include preventive maintenance, troubleshooting, and repair of woodworking tools and machines. On course completion, students should be able to repair, service, and maintain woodworking tools and machines. **Non-degree credible.**

**CAB 101. INTRODUCTION TO CABINETMAKING (1-4-3)**
This is a beginning woodworking course that deals with basic materials and processes. Topics include introduction to tools and equipment and safety. On completion, students should be able to perform techniques for building small projects and techniques for gluing, clamping, nailing, and screwing. **Non-degree credible. CORE**

**CAB 102. INTRODUCTION TO LUMBER (1-6-3)**
This is an introductory course in grades, sizes, characteristics, and uses of lumber. Also included in the course are operation, care, and sharpening of woodworking equipment. On completion, students should be able to construct and finish a furniture project and demonstrate the characteristics and methods of sawing lumber. **Non-degree credible.**

**CAB 103. SIZE, DIMENSION, AND JOINTS (1-4-3)**
This course covers the cutting of lumber to dimensions and materials to size with power tools. Job planning and construction of all types of joints made with hand and power tools are emphasized. On completion, students should be able to plan jobs and make shop drawings, job layouts, and patterns. **Non-degree credible.**

**CAB 104. CABINET SHOP OPERATIONS (3-0-3)**
This course covers establishing and maintaining a custom cabinet shop. Topics include financing, equipment acquisition, maintenance, inventory techniques, OSHA requirements, shop organization, and safety and delivery systems. On completion, students should be able to organize and maintain a custom cabinet business. **Non-degree credible.**

**CAB 105. INTRODUCTION TO CABINETMAKING/CARPENTRY (CAB) (3-0-3)**
This course covers the design and construction of fine furniture. Development of highly advanced woodworking skills, such as turning duplicate parts, joinery, and building jigs and fixtures are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 106. SPECIAL PROJECTS IN CABINET CONSTRUCTION (0-6-3)**
This course is a continuation of the study and performance of advanced furniture projects that began in CAB 205. Shaping, routing, and carving are emphasized. On completion, students should be able to perform advanced skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 107. EQUIPMENT MAINTENANCE FUNDAMENTALS (1-4-3)**
construct, and install basic interior casework. **Non-degree credible.**

**CAB 108. FURNITURE CONSTRUCTION (1-10-5)**
**PREREQUISITE:** CAB 102.
This course covers design and construction of fine furniture. **Non-degree credible.**

**CAB 109. FURNITURE INSTALLATION AND TRIM WORK (3-0-3)**
This course introduces students to cabinet installation and stair construction theories. On completion, students should be able to explain proper sequence and methods of installing kitchen and bathroom cabinets as well as figure and design interior stairs. **Non-degree credible.**

**CAB 110. BASIC CARPENTRY (1-4-3)**
This course is a continuation of CAB 110. Removing, sharpening, and replacing joiner and planer knives are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 111. CABINET INSTALLATION AND TRIM WORK (3-0-3)**
This course introduces students to cabinet installation and stair construction theories. On completion, students should be able to explain proper sequence and methods of installing kitchen and bathroom cabinets as well as figure and design interior stairs. **Non-degree credible.**

**CAB 112. ELECTRONIC TOOLS AND MACHINES (0-6-3)**
This course covers the design and construction of fine furniture. Development of highly advanced woodworking skills, such as turning duplicate parts, joinery, and building jigs and fixtures are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 113. CABINET SHOP OPERATIONS (3-0-3)**
This course covers establishing and maintaining a custom cabinet shop. Topics include financing, equipment acquisition, maintenance, inventory techniques, OSHA requirements, shop organization, and safety and delivery systems. On completion, students should be able to organize and maintain a custom cabinet business. **Non-degree credible.**

**CAB 114. SPECIAL PROJECTS IN CABINET CONSTRUCTION (0-6-3)**
This course is a continuation of the study and performance of advanced furniture projects that began in CAB 205. Shaping, routing, and carving are emphasized. On completion, students should be able to perform advanced skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 115. EQUIPMENT MAINTENANCE FUNDAMENTALS (1-4-3)**
construct, and install basic interior casework. **Non-degree credible.**

**CAB 116. SPECIAL PROJECTS IN CABINET CONSTRUCTION (0-6-3)**
This course is a continuation of the study and performance of advanced furniture projects that began in CAB 205. Shaping, routing, and carving are emphasized. On completion, students should be able to perform advanced skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 117. ELECTRONIC TOOLS AND MACHINES (0-6-3)**
This course covers the design and construction of fine furniture. Development of highly advanced woodworking skills, such as turning duplicate parts, joinery, and building jigs and fixtures are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 118. SPECIAL PROJECTS IN CABINET CONSTRUCTION (0-6-3)**
This course is a continuation of the study and performance of advanced furniture projects that began in CAB 205. Shaping, routing, and carving are emphasized. On completion, students should be able to perform advanced skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 119. ELECTRONIC TOOLS AND MACHINES (0-6-3)**
This course covers the design and construction of fine furniture. Development of highly advanced woodworking skills, such as turning duplicate parts, joinery, and building jigs and fixtures are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 120. ELECTRONIC TOOLS AND MACHINES (0-6-3)**
This course covers the design and construction of fine furniture. Development of highly advanced woodworking skills, such as turning duplicate parts, joinery, and building jigs and fixtures are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**

**CAB 121. ELECTRONIC TOOLS AND MACHINES (0-6-3)**
This course covers the design and construction of fine furniture. Development of highly advanced woodworking skills, such as turning duplicate parts, joinery, and building jigs and fixtures are emphasized. On completion, students should be able to perform basic skills necessary to construct fine furniture. **Non-degree credible.**
The focus of this course is basic carpentry practices. Basic principles of layout and excavation; foundations and form building as related to cabinetmaking; and use of the framing square in figuring rafters, step strings, and board feet are emphasized. On completion, students should be able to perform basic carpentry techniques. Non-degree credible.

CAB 225. KITCHEN AND BATH DESIGN (2-10-6)
PREREQUISITE: CAB 101.
This course offers instruction in using CAD for kitchen and bath design. Computer use and design requirements for kitchens and baths are emphasized. On completion, students should be familiar with kitchen and bath design by using CAD software for this purpose. Non-degree credible.

CAB 230. ESTIMATING COSTS IN CABINETMAKING (1-2-2)
The focus of this course is the estimating costs necessary to complete cabinetmaking projects. Figuring the costs of materials and labor on the use of pertinent formulas is emphasized. On course completion, students should be able to estimate costs of complete cabinetmaking projects. Non-degree credible.

CAB 242. SPECIAL FINISHES (1-6-3)
PREREQUISITE: CAB 141.
This course is a continuation of CAB 141. Spraying and hand rubbing with lubricants are emphasized. On completion, students should be able to apply special finishes to wooden surfaces. Non-degree credible.

CAB 260. WOOD TURNING (1-10-5)
PREREQUISITE: CAB 205 or instructor approval.
The focus of this course is on turning components for fine furniture projects. Operation and maintenance of wood lathes and tools are emphasized. On completion, students should be able to turn duplicate posts and table legs. Non-degree credible.

CHEMISTRY (CHM)

CHM 104. INTRODUCTION TO INORGANIC CHEMISTRY (3-3-4)
PREREQUISITE: MTH 092 or equivalent math placement score.
The is a survey course of general chemistry for students who do not intend to major in science or engineering and may not be substituted for CHM 111. Lecture will emphasize the facts, principles, and theories of general chemistry, including math operations, matter and energy, atomic structure, symbols and formulas, nomenclature, the periodic table, bonding concepts, equations, reactions, stoichiometry, gas laws, phases of matter, solutions, pH, and equilibrium reactions. Laboratory is required.

CHM 105. INTRODUCTION TO ORGANIC CHEMISTRY (3-3-4)
PREREQUISITE: CHM 104 or CHM 111.
This is a survey course or organic chemistry and biochemistry for students who do not intend to major in science or engineering. Topics will include basic nomenclature, classification of organic compounds, typical organic reactions, reactions involved in life processes, function of biomolecules, and the handling and disposal of organic compounds. Laboratory is required.

CHM 111. COLLEGE CHEMISTRY I (3-3-4)
PREREQUISITE: MTH 112 or equivalent math placement score.
The first in a two-semester sequence, this course is designed for science or engineering majors who are expected to have a strong background in mathematics. Topics include measurement, nomenclature, stoichiometry, atomic structure, equations and reactions, basic concepts of thermochemistry, chemical and physical properties, bonding, molecular structure, gas laws, kinetic-molecular theory, condensed matter, solutions, colloids, and some descriptive chemistry topics. Laboratory is required.

CHM 112. COLLEGE CHEMISTRY II (3-3-4)
PREREQUISITE: CHM 111.
chemistry, including metals, nonmetals, semi-metals, coordination compounds, transition compounds, and post-transition compounds. Laboratory is required.

CHM 221. ORGANIC CHEMISTRY I (3-3-4)
PREREQUISITE: CHM 112.
The first in a two-semester sequence, this course includes nomenclature, structure, physical and chemical properties, synthesis, and typical reactions for aliphatic, alicyclic, and aromatic compounds with special emphasis on reaction mechanisms, spectroscopy, and stereochemistry. Laboratory includes synthesis and confirmation of representative organic compounds with emphasis on basic techniques. Laboratory is required.

CHM 222. ORGANIC CHEMISTRY II (3-3-4) PREREQUISITE: CHM 221.
The second in a two-semester sequence, this course includes nomenclature; structure; physical and chemical properties; synthesis; and typical reactions for aliphatic, alicyclic, aromatic, and biological compounds, polymers and their derivatives; with special emphasis on reaction mechanisms, spectroscopy, and stereochemistry. Laboratory includes synthesis and confirmation of representative organic compounds with emphasis on basic techniques. Laboratory is required.

CHILD DEVELOPMENT (CHD)

CHD 100. INTRODUCTION TO EARLY CARE AND EDUCATION OF CHILDREN (2-2-3)
This course introduces the childcare profession, including the six functional areas of the Child Development Association (CDA) credential. Emphasis is placed on positive guidance techniques, setting up a classroom, and planning a schedule. On completion, students should be able to create and modify children's environments to meet individual needs, use positive guidance to develop positive relationships with children, and promote children's self-esteem, self-control, and self-motivation. CORE

CHD 201. CHILD GROWTH AND DEVELOPMENT PRINCIPLES (3-0-3)
This course is a systematic study of child growth and development from conception through early childhood. Emphasis is placed on principles underlying physical, mental, and social development, and on methods of child study and practical implications. On completion, student should be able to use knowledge of how young children differ in their development and approaches to learning to provide opportunities that support the physical, social, emotional, language, cognitive, and aesthetic development of children. CORE

CHD 202. CHILDREN’S CREATIVE EXPERIENCES (2-2-3)
This course focuses on fostering creativity in preschool children and developing a creative attitude in teachers. Topics include selecting and developing creative experiences in language arts, music, art, science, math and movement with observation and participation with young children required. On completion, student should be able to select and implement creative and age-appropriate experiences for young children.

CHD 203. CHILDREN’S LITERATURE AND LANGUAGE DEVELOPMENT (2-2-3)
This course surveys appropriate literature and language arts activities designed to enhance young children’s speaking, listening, pre-reading, and writing skills. Emphasis is placed on developmental appropriateness as related to language. On completion, students should be able to create, evaluate and demonstrate activities which support a language-rich environment for young children.

CHD 204. METHODS AND MATERIALS FOR TEACHING YOUNG CHILDREN (2-2-3)
This course introduces basic methods and materials used in teaching young children. Emphasis is placed on students compiling a professional resource file of activities used for math, language arts, and social studies concepts. On completion, students should be able to demonstrate basic methods of creating learning experiences using appropriate techniques, materials and realistic expectations. CORE

CHD 205. PROGRAM PLANNING FOR EDUCATING YOUNG CHILDREN (3-0-3)
This course is designed to give students practice in lesson and unit planning, writing behavioral objectives, and evaluating activities taught to young children. Emphasis is placed identifying basic aspects of cognitive development and how children learn. On completion, student should be able to plan and implement developmentally appropriate curriculum and instructional practices based on knowledge of individual differences and the curriculum goals and content.

CHD 206. CHILDREN’S HEALTH, SAFETY, AND NUTRITION (3-0-3)
This course introduces basic health, nutrition, and safety management practices for young children. Emphasis is placed on setting up and maintaining a safe, healthy environment for young children including specific procedures for infants and toddlers and procedures regarding childhood illnesses and communicable diseases. On completion, students should be able to prepare a healthy, safe environment, plan nutritious meals and snacks, and recommend referrals if necessary.

CHD 207. OBSERVING AND RECORDING BEHAVIORS OF YOUNG CHILDREN (3-0-3) PREREQUISITE: CHD 201 or instructor approval.
This course provides students information on child observations, portfolio building, observation documentation, and various recording techniques, as well as a review of child development principles. Students will also be given guidance for the appropriate use of assessment materials and ways to support and work with families.

CHD 208. ADMINISTRATION OF CHILD DEVELOPMENT PROGRAMS (3-0-3)
This course includes appropriate administrative policies and procedures relevant to preschool programs. Topics include local, state, and federal regulations: budget planning; record keeping; personnel policies and parent involvement. On completion, student should be able to identify elements of a sound business plan, develop familiarity with basic record-keeping techniques, and identify elements of a developmentally appropriate program.

CHD 209. INFANT AND TODDLER EDUCATION PROGRAMS (2-2-3) PREREQUISITE: Permission of Program Director.
Select one of two course options: CHD 209 or 229 This course focuses on child development from infancy to thirty months of age with emphasis on positive ways to support an infant's social, emotional physical and intellectual development. On completion, student should be able to plan an infant-toddler program and environment that is appropriate and supportive of the families and the children.

CHD 210. EXCEPTIONAL YOUNG CHILDREN (2-2-3)
This course explores the many different types of exceptionalities found in young children. Topics include speech, language, hearing and visual impairments; gifted and talented children; mental retardation; emotional, behavioral, and neurological handicaps. On completion, students should be able to identify appropriate strategies for working with young exceptional children.

CHD 212. CHILD DEVELOPMENT ASSOCIATE SEMINAR (2-2-3) PREREQUISITE: Permission of Program Director.
This course includes topics from competency areas required for individuals working toward or renewing CDA credentials. Industry needs determine course topics. On completion, students will demonstrate competency in meeting course objectives.

CHD 214. FAMILIES AND COMMUNITIES (3-0-3) PREREQUISITE: CHD 201
This course will provide students information about how to work with diverse families and communities. Students will be introduced to family and community settings, their important relationship to children, and the pressing needs of today's society. Students will study techniques for developing these important relationships and effective communication skills.
COST ESTIMATING (CET 220) (3-0-3)
PREREQUISITE: CMT 206.
This course covers material and quantity estimating for construction projects along with bidding. Topics include earth work, concrete, lumber, steel, unit price bid, lump sum bid, bonding, using computer software in estimating, overhead, and profit. On completion, students should be able to estimate and bid construction projects.

COMPELNT INFANT AND TODDLER CARE (CHD 229) (1-0-3)
This course provides guidelines for professional ethics and responsibilities of teachers who work with infants and toddlers. Emphasis is placed on health, nutrition, safety, parental involvement, record keeping and other responsibilities, especially for children ages birth to 30 months. On completion, students should be able to identify competent infant and toddler care strategies.

HIGHWAY (CE 201) (3-0-3)
PREREQUISITE: Permission of Program Director.
This course provides a minimum of 90 hours of hands-on, supervised experience in an approved program for young children. Emphasis is placed on performance of daily duties which are assessed by the college instructor and the cooperating teacher. On completion, students should be able to demonstrate competency in a child care setting on performance of daily duties.

PARENTING SKILLS (CHD 220) (3-0-3)
This course will focus on important issues in parenting education, beginning with prenatal concerns and continuing through childhood years. Particular emphasis will be placed on appropriate positive discipline methods.

COMPETENT INFANT AND TODDLER CARE (CHD 229) (1-0-3)
This course provides guidelines for professional ethics and responsibilities of teachers who work with infants and toddlers. Emphasis is placed on health, nutrition, safety, parental involvement, record keeping and other responsibilities, especially for children ages birth to 30 months. On completion, students should be able to identify competent infant and toddler care strategies.

CIVIL ENGINEERING TECHNOLOGY (CET) COST ESTIMATING (CET 220) (3-0-3)
PREREQUISITE: CMT 206.
This course covers material and quantity estimating for construction projects along with bidding. Topics include earth work, concrete, lumber, steel, unit price bid, lump sum bid, bonding, using computer software in estimating, overhead, and profit. On completion, students should be able to estimate and bid construction projects.

COMPUTER INFORMATION SCIENCE (CIS)
BASIC WEB PAGE DEVELOPMENT (CIS 140) (3-0-3)
PREREQUISITE: CIS 146.
This course introduces HyperText Markup Language (HTML 1.0, 2.0, and 3.0) and the World Wide Web authoring tools. Using HyperText and the authoring tools, the student will create web pages that include: text, emphasis, lists, nested lists, graphics, URL links, combined formatting and list tags, image maps, forms, tables, and multimedia objects. The Common Gateway Interface (CGI), Perl, and JavaScript programming languages will be introduced.

ADVANCED WEB PAGE DEVELOPMENT (CIS 145) (3-0-3)
PREREQUISITE: CIS 140.
This course is a continuation of CIS 140 and will cover such advanced topics as JavaScript, Dynamic HTML, Java Aplets, style sheets, and creating interactive web pages and sites.

MICROCOMPUTER APPLICATIONS (CIS 146) (3-0-3)
PREREQUISITE: Instructor permission.
This course is an introduction to the most common software applications and includes hands-on use of microcomputers and some of the major commercial software. These software packages should include typical features of office suites such as word processing, spreadsheets, database systems, and other features found in current software packages. On course completion, students will understand common applications and be able to use selected features of these packages.

COMPUTER PROGRAMMING LOGIC (CIS 150) (3-0-3)
PREREQUISITE: CIS 146.
This course includes logic and design techniques used by programmers and analysts in developing programming code. The most commonly used techniques of flowcharts, structure charts, and pseudocode will be covered. The student will be able to apply the techniques to designated situations and problems.

MICROCOMPUTER OPERATING SYSTEMS (CIS 156) (3-0-3)
PREREQUISITE: CIS 146 and/or as required by program.
This course provides an introduction to microcomputer operating systems. Topics include a description of the operating system, system commands, and effective and efficient use of the microcomputer with the aid of its systems programs. On completion, students should understand the function and role of the operating system, its operational characteristics, its configuration, how to execute programs, and efficient file management.

ETHICS AND THE INTERNET (CIS 185) (3-0-3)
PREREQUISITE: As required by program.
This course will investigate the various issues and facets of computer crime and computer ethics. Topics to be covered include: general ethics, privacy, data protection, employee privacy, data regulation, artificial intelligence, information technology and the third world, the "look and feel" issue, computer malfunction liability, computer crime (electronics trespassing), and the professional responsibility of the computer user.

MARKETING ON THE WORLD WIDE WEB (CIS 187) (3-0-3)
PREREQUISITE: As required by program.
This course provides guidelines for professional ethics and responsibilities of teachers who work with infants and toddlers. Emphasis is placed on health, nutrition, safety, parental involvement, record keeping and other responsibilities, especially for children ages birth to 30 months. On completion, students should be able to identify competent infant and toddler care strategies.

COMMERCIAL SOFTWARE APPLICATIONS (CIS 196) (3-0-3)
PREREQUISITE: CIS 146 or instructor approval.
This is a hands-on introduction to software packages, languages, and utility programs currently in use. The course can be repeated for credit for each different application. The purpose capabilities and use of each package, language, or program are emphasized. On course completion, students will be able to use the features selected for the application discussed.

INTRODUCTION TO THE INFORMATION HIGHWAY (CIS 203) (3-0-3)
PREREQUISITE: CIS 146.
This course introduces the student to the basic principles of the information highway. Students will be exposed to different network information tools, such as electronic mail, network news, gophers, the World Wide Web, Netscape, and commercial information services.

VISUAL BASIC (CIS 212) (3-0-3)
PREREQUISITE: Instructor permission.
This course emphasizes BASIC programming using a graphical user interface. Graphical user interfaces, advanced file handling techniques, simulation, are other selected areas are emphasized. On course completion, the student will be able to demonstrate knowledge of the program through completion of programming projects and appropriate tests.

ESSENTIALS OF NETWORKING (CIS 237) (3-0-3)
PREREQUISITE: As required by program.
This course serves as a general introduction for students who desire to acquire a foundation in current networking technologies for local area networks (LANs), wide area networks (WANs), and the Internet. The course provides an introduction to the hardware, software, terminology, components, design, and connections of a network, as well as the topologies and protocols for LANs. The course maps directly to CompTIA’s Network + exam.

WINDOWS 2000 PROFESSIONAL (CIS 238) (4-0-4)
PREREQUISITE: As required by program.
This course provides students with the knowledge and skills necessary to perform installation and day-to-day administrative tasks in a Windows 2000 Professional environment. Students will manage hardware profiles and user/group accounts. This course also introduces various tools, including the Microsoft Management Console, Task Scheduler, Control Panel, the registry, and Device Manager for configuring and troubleshooting devices.

CIS 241. INTRODUCTION TO RPG PROGRAMMING (3-0-3) PREREQUISITE: Instructor permission. This course introduces the fundamental concepts of RPG (Report Program Generator). It includes such topics as report preparation, control breaks, and file processing. On completion, the student will be able to demonstrate knowledge of the topics through the completion of programming projects and appropriate tests.

CIS 242. ADVANCED RPG PROGRAMMING (3-0-3) PREREQUISITE: CIS 241. This course is a continuation of CIS 241. It includes such topics as sequential and random access file processing techniques. It may cover many of the structured programming commands, externally described files, display files, and other capabilities unique to some versions of RPG. On completion, the student will be able to demonstrate knowledge of the topics through completion of programming projects and appropriate tests.

CIS 245. C++ PROGRAMMING LANGUAGE (3-0-3) PREREQUISITE: CIS 146 or instructor permission. This course is an introduction to the C++ programming language, including object-oriented programming. Topics include problem solving and program design, control structures, objects and events, user interface construction, and documentation and program testing.

CIS 247. WINDOWS 2000 SERVER (4-0-4) PREREQUISITE: As required by the program. This course provides students with the knowledge and skills necessary to install and configure Microsoft Windows 2000 Server. After installation, students will learn about the various file systems and disk management functions available in Windows 2000 Server. Administering the operating system and Active Directory services is explored because they are integral to students' understanding of Windows 2000. Additionally, students will learn about network protocols, routing and remote access, and other applications server functions such as Terminal Services. Students will be introduced to monitoring and optimizing Windows 2000 Server.

CIS 248. WINDOWS 2000 SERVER NETWORK INFRASTRUCTURE ADMINISTRATION (3-0-3) PREREQUISITE: As required by program. This course provides the knowledge and skills necessary to plan network infrastructure around features supported by Windows 2000. Issues such as network protocol and services are introduced and compared using requirements of students' organizations. Students will learn how to utilize, manage, and configure the TCP/IP protocol and use features such as NetBIOS, WINS, DHCP, and DNS. Students will also learn how to configure, manage, and troubleshoot routing and remote access, including setting up virtual private networks (VPNs).

CIS 249. WINDOWS 2000 ACTIVE DIRECTORY SERVICES (3-0-3) PREREQUISITE: As required by program. This course provides students with the knowledge and skills necessary to plan, configure, and administer an Active Directory infrastructure. Students will learn to configure Domain Name System (DNS) to manage name resolution, schema, an replication. Students will also learn to use Active Directory to centrally manage users, groups, shared folders, and network resources, and to administer the user environment and software group policy.

CIS 261. COBOL PROGRAMMING (3-0-3) PREREQUISITE: Previous computer science course or equivalent.

This course is an introduction to the COBOL programming language. Included are structured programming techniques, report preparation, arithmetic operations, conditional statements, group totals, and table processing. On completion, the student will be able to demonstrate knowledge of the topics through completion of programming projects and appropriate tests.

CIS 262. ADVANCED COBOL PROGRAMMING (3-0-3) PREREQUISITE: CIS 261. This course consists of development, completion, testing, and execution of complex problems in COBOL using various data file structures. A structured approach will be implemented as a methodological system. On completion, the student will be able to demonstrate knowledge of the topics through completion of programming projects and appropriate tests.

CIS 272. DESIGNING WINDOWS 2000 SECURITY (4-0-4) PREREQUISITE: As required by program. This course provides students with the knowledge and skills necessary to design a security framework for small, medium, and enterprise networks using Microsoft Windows 2000. Students will be able to plan an Active Directory service structure that facilitates secure and verifiable user account creation and administration, define security requirements for Windows 2000-based domain controllers, application servers, file and print servers, and workstations.

CIS 273. NETWORKING AND DATA COMMUNICATIONS (3-0-3) PREREQUISITE: Instructor permission. This course is an introduction to computer networks and data communications technology. Topics included are networking and communications hardware, software, topologies, models, and protocols. On completion, students will be able to demonstrate knowledge of the topics through completion of assignments and appropriate tests.

CIS 285. OBJECT-ORIENTED PROGRAMMING (3-0-3) PREREQUISITE: CIS 251 and/or as required by program. This is an advanced object-oriented programming course and covers advanced program development techniques and concepts in the context of an object-oriented language, such as C++ or Java. Subject matter includes object-oriented analysis and design, encapsulation, inheritance, polymorphism (operator and function overloading), information hiding, abstract data types, reuse, dynamic memory allocation, and file manipulation. On completion, students should be able to develop a hierarchical class structure necessary to the implementation of an object-oriented software system.

CIS 289. COMPUTER PROBLEM DETERMINATION (3-0-3) PREREQUISITE: Instructor permission. This course is an introduction to problem determination on microcomputers. It uses software diagnostic tools and simple hardware test equipment to identify and repair typical problems of microcomputers. On course completion, the student will be able to demonstrate knowledge of microcomputer repair through completion of programming projects and appropriate tests.

CIS 290. DESIGNING WINDOWS 2000 ACTIVE DIRECTORY SERVICES (4-0-4) PREREQUISITE: As required by program. This course provides students with the knowledge and skills necessary to design a Microsoft Windows 2000 directory services infrastructure in an enterprise network. Strategies are presented to assist the student in identifying the information technology needs of an organization and then designing an Active Directory structure that meets those needs.

CIS 296. DESIGNING A WINDOWS 2000 NETWORK INFRASTRUCTURE (4-0-4) PREREQUISITE: As required by program. This course provides students with the knowledge and skills needed to create a networking services infrastructure design. Some Microsoft
CMT 104. COMMERCIAL CONSTRUCTION MATERIALS AND METHODS (3-0-3)
The purpose of this course is to introduce the student to the modern materials and methods used in heavy and commercial construction. This will include the total construction process. On completion of this course, the student will know how the various building materials relate to the various phases of the commercial construction process.

CMT 204. CONCRETE CONSTRUCTION (1-2-3)
This course introduces the student to the use of concrete in construction. Students are exposed to all major components of concrete construction. On completion, students will know how to design concrete mixes, place forms for cast-in-place concrete, build with masonry units, and know the major components in building with concrete.

CMT 206. CONSTRUCTION ESTIMATING (3-0-3)
PREREQUISITES: MTH 111, CMT 105, and either CMT 102 or instructor approval.
This course introduces the student to the principles and practices used in estimating construction costs. A methodical approach to estimating each cost element of a construction project is emphasized. On completion, students will know methods and procedures used in estimating, making quantity surveys from working drawings, developing unit and subcontractor costs, and will be able to identify major considerations involved in the total pricing of a construction project.

CMT 207. HVAC SYSTEMS (3-0-3)
This course introduces students to major mechanical systems used in buildings. Heating, cooling, and ventilation equipment are emphasized. On completion, students will be knowledgeable of the basic principles of heating, cooling, ventilation, and related hardware and will understand design considerations that affect the selection of equipment.

CMT 208. ELECTRICAL AND PLUMBING SYSTEMS (3-0-3)
This course introduces students to plumbing, electrical, and lighting systems used in buildings. Design considerations based on plumbing and electrical codes are emphasized. On completion, students will understand the basic principles and hardware requirements in designing plumbing, electrical, and lighting systems.

CMT 212. CONSTRUCTION SAFETY (3-0-3)
The purpose of this course is to introduce students to law practices pertinent to the construction industry. Law as it relates to the contractor is emphasized. On completion, students will understand articles of Shortest Path First (OSPF), Routing Information Protocol (RIP), and Internet Group Management Protocol (IGMP), to design an IP routing scheme. Incorporation, building contracts, contracts for purchase of labor and materials, construction loans, and various types of construction agreements, permits, plans and specifications, warranties, and insurance.

CMT 216. CONSTRUCTION LAW (3-0-3)
This course introduces students to law practices pertinent to the construction industry. Law as it relates to the contractor is emphasized. On completion, students will understand articles of incorporation, building contracts, contracts for purchase of labor and materials, construction loans, and various types of construction agreements, permits, plans and specifications, warranties, and insurance.

CONSUMER ELECTRONICS (CCT)

CCT 212. ADVANCED DIGITAL TECHNIQUES (2-3-3)
PREREQUISITE: As required by program.
This course is designed to give the student advanced knowledge of digital techniques. Topics include flip-flop circuits, counter devices and circuits, shift registers, clocks and one-shots, decoders, encoders, multiplexers, demultiplexers, exclusives or functions, digital troubleshooting, circuit construction, and operational characteristics. On course completion, students will be able to define terms and demonstrate their ability to construct, analyze, and troubleshoot digital circuits, using a variety of test equipment items.

COSMETOLOGY (COS)

COS 111. COSMETOLOGY SCIENCE AND ART (3-0-3)
COREQUISITE: COS 112 or instructor permission.
This course provides students with a study of personal and professional image, ethical conduct, sanitation, hairstyling, and nail care. Topics include personal and professional development, bacteriology, decontamination, infection control, draping, shampooing, conditioning, hair shaping, and hairstyling. On completion, students should be able to apply safety rules and regulations and write procedures for skills identified in this course. Non-degree creditable. CORE

COS 112. COSMETOLOGY SCIENCE AND ART LAB (0-9-3)
COREQUISITE: COS 111 or instructor permission.
This course provides students with practical experience for sanitation, shampooing, hair shaping, hairstyling, and nail care. Sterilization, shampooing, hair shaping, hairstyling, manicuring, and pedicuring are emphasized. On completion, students should be able to perform safety and sanitary precautions, shampooing, hair shaping, hairstyling, and nail care procedures. Non-degree creditable. CORE

COS 113. CHEMICAL METHODOLOGY (3-0-3)
COREQUISITE: COS 114 or instructor permission.
The focus of this course is the theory of hair and scalp disorders, permanent waving, chemical relaxers, and the composition of the hair. Topics include disorders and analysis of the scalp and hair, permanent waving, chemical hair relaxing, and soft curling. On completion, students should be able to write procedures for permanent waving and chemical relaxing, identify the composition of the hair, and sanitary precautions, and steps for scalp and hair analysis as well as the disorders. Non-degree creditable. CORE

COS 114. CHEMICAL METHODOLOGY LAB (0-9-3)
COREQUISITE: COS 113 or instructor permission.
This course provides students with practical experience in permanent waving, chemical relaxing, and hair analysis. Topics include permanent waving, chemical relaxing, soft curl, and scalp and hair analysis. On completion, students should be able to analyze the scalp and hair and perform these chemical services using safety and sanitary precautions. Non-degree creditable. CORE

COS 121. COLORIMETRY (3-0-3)
COREQUISITE: COS 122 or instructor permission.
In this course, students learn the techniques of hair coloring and lightening. Color application, laws, levels; classifications of color; and problem solving are emphasized. On completion, students should be able to identify all phases of hair coloring and effects on the hair. *Non-degree credible.*

**COS 122. COLORIMETRY LAB (0-9-3)**
COREQUISITE: COS 121 or instructor permission.
In this course, students apply hair coloring and lightening techniques. Topics include consultation, hair analysis, skin test, and procedures and applications of all phases of hair coloring and lightening. On completion, students should be able to perform procedures for hair coloring and lightening. *Non-degree credible.*

**COS 123. COSMETOLOGY SALON PRACTICES (0-9-3)**
This course is designed to allow students to practice all phases of cosmetology in a salon setting. Professionalism, receptionist duties, hairstyling, hair shaping, and chemical and nail and skin services for clients are emphasized. On completion, students should be able to demonstrate professionalism and cosmetology procedures in a salon setting. *Non-degree credible.*

**COS 124. SALON MANAGEMENT (3-0-3)**
In this course, students develop entry-level management skills for the beauty industry. Topics include job-seeking, leader and entrepreneurship development, business principles, business laws, insurance, marketing, and technology issues in the workplace. On completion, students should be able to list job-seeking and management skills and the technology that is available for use in the salon. *Non-degree credible.*

**COS 131. ESTHETICS (3-0-3)**
COREQUISITE: COS 132 or instructor permission.
This course is the study of cosmetic products, massage, skin care, and hair removal as well as identifying the structure and function of various systems of the body. Topics include massage skin analysis, skin structure, disease and disorder, light therapy, facials, facial cosmetics, anatomy, and hair removal. On completion, students should be able to state procedures for analysis, light therapy, facials, hair removal, and identify the structures, functions, and disorders of the skin. *Non-degree credible.*

**COS 132. ESTHETICS LAB (0-9-3)**
COREQUISITE: COS 131 or instructor permission.
This course provides practical applications related to the care of the skin and related structure. Facial treatments, product application, skin analysis, massage techniques, facial make up, and hair removal are emphasized. On completion, students should be able to prepare clients, assemble sanitized materials, follow procedures for product application, recognize skin disorders, and demonstrate facial massage movement, cosmetic application, and hair removal using safety and sanitary precautions. *Non-degree credible.*

**COS 151. NAIL CARE (3-0-3)**
COREQUISITE: COS 152 or instructor permission.
The focus of this course is all aspects of nail care. Topics include salon conduct, professional ethics, sanitation, nail structure, manicuring, pedicuring, nail disorders, and anatomy and physiology of the arm and hand. On completion, students should be able to demonstrate professional conduct, recognize nail disorders and diseases, and identify procedures for sanitation and nail care services. *Non-degree credible.*

**COS 152. NAIL CARE APPLICATIONS (0-9-3)**
COREQUISITE: COS 151 or instructor permission.
This course provides practice in all aspects of nail care. Topics include salon conduct, professional ethics, bacteriology, sanitation and safety, manicuring, and pedicuring. On completion, students should be able to perform nail care procedures. *Non-degree credible.*

**COS 153. NAIL ART (3-0-3)**
COREQUISITE: COS 154 or instructor permission.

The focus of this course is advanced nail techniques. Topics include acrylic, gel, fiberglass nails, and nail art. On completion, students should be able to identify different types of sculptured nails and recognize different types of nail art. *Non-degree credible.*
COS 154. NAIL ART APPLICATIONS (0-9-3)
COREQUISITE: COS 153 or instructor permission.
This course provides practice in advanced nail techniques. Topics include acrylic, gel, fiberglass nails, and nail art. On completion, students should be able to perform procedures for nail sculpturing and nail art. Non-degree credible.

COS 158. EMPLOYABILITY SKILLS (3-0-3)
This course provides the study of marketable skills to prepare the student to enter the world of work. Resumes, interviews, client and business relations, personality, computer literacy, and attitude are emphasized. On completion, the student should be prepared to obtain employment in the field for which they have been trained. Non-degree credible.

COS 167. STATE BOARD REVIEW (0-9-3)
Students are provided a complete review of all procedures and practical skills pertaining to their training in the program. On completion, the student should be able to demonstrate the practical skills necessary to successfully complete the required State Board of Cosmetology examination and entry-level employment. Non-degree credible.

COS 182. SPECIAL TOPICS (1-6-3)
COREQUISITE: Determined by the instructor.
These courses provide for instruction unique to various areas of the cosmetology industry. Meeting individual student needs is emphasized. Non-degree credible.

COSMETOLOGY INSTRUCTOR TRAINING (CIT)

CIT 211. TEACHING AND CURRICULUM DEVELOPMENT (1-0-3)
COREQUISITE: Licensed managing cosmetologist standing (one year's experience).
This course focuses on principles of teaching, teaching maturity, personal conduct, and the development of cosmetology curriculum. Teacher roles, teaching styles, teacher challenges, aspects of curriculum development, and designing individual courses are emphasized. On completion, the student should be able to prepare teaching aids and determine their most effective use. Non-degree credible. CORE

CIT 221. LESSON PLAN IMPLEMENTATION (0-9-3)
COREQUISITE: Licensed managing cosmetologist standing (one year's experience).
This course introduces students to methods for development of lesson plans. Writing lesson plans and the four-step teaching method are emphasized. On completion, the student should be able to prepare and present a lesson using the four-step teaching method. Non-degree credible. CORE

CIT 222. INSTRUCTIONAL MATERIALS AND METHODS (1-0-3)
COREQUISITE: Licensed managing cosmetologist standing (one year's experience). COREQUISITE: CIT 223 or instructor approval.
This course focuses on visual and audio aids and materials. The use and characteristics of instructional aids are emphasized. On completion, the student should be able to prepare teaching aids and determine their most effective use. Non-degree credible. CORE

CIT 233. INSTRUCTIONAL MATERIALS AND METHODS APPLICATIONS (0-9-3)
COREQUISITE: Licensed managing cosmetologist standing (one year's experience). COREQUISITE: CIT 222 or instructor approval.
This course is designed to provide practice in preparing and using visual and audio aids and materials. Preparation and use of different categories of instructional aids are emphasized. On completion, the student should be able to prepare and effectively present different types of aids for use with a four-step lesson plan. Non-degree credible. CORE

DRAFTING AND DESIGN TECHNOLOGY (DDT)

DDT 103. INTRODUCTION TO COMPUTER-AIDED DRAFTING (2-3-3)
This course provides an introduction to basic Computer-Aided Design and Drafting (CAD) functions and techniques, using hands-on applications. Topics include terminology, hardware, basic DOS and Windows functions, file manipulation, and basic CAD software applications in producing softcopy and hardcopy. On completion, students should be able to identify and select CAD hardware, employ basic DOS and Windows functions, handle basic text and drawing files, and produce acceptable hardcopy on a CAD system. CORE

DDT 111. FUNDAMENTALS OF DRAFTING AND DESIGN student should be able to describe the role of a teacher, identify means of motivating students, develop a course outline, and develop lesson plans. Non-degree credible. CORE

CIT 212. TEACHER MENTORSHIP (0-9-3)
COREQUISITE: Licensed managing cosmetologist standing (one year's experience). COREQUISITE: CIT 211 or instructor approval.
This course is designed to provide practice through working with a cosmetology instructor in a mentoring relationship. Communication, student assessment, and assisting students in the lab are emphasized. On completion, the student should be able to communicate with students, develop a course of study, and apply appropriate teaching methods. Non-degree credible. CORE

CIT 223. TECHNICAL DRAWING (3-0-3)
COREQUISITE: Licensed managing cosmetologist standing (one year's experience).
This course is designed to develop a strong foundation in common drafting and design practices and procedures. Topics include auxiliary views, basic space geometry, pictorial drawings, and basic charts and

TECHNOLOGY (1-4-3)

DIT 112. INTRODUCTORY TECHNICAL DRAWING (1-4-3)
This course covers drawing reproduction and orthographic projection and sectioning. The theory as well as the mechanics of orthographic projection and shape description, the relationship of orthographic planes and views, the views and their space dimensions, the application of various types of sections, and drawing reproduction are emphasized. On completion, students should have an understanding of orthographic projection and be able to identify orthographic plans, produce orthographic views of objects, apply various sectioning techniques and methods, and reproduce drawings. CORE

DIT 117. MANUFACTURING PROCESS (1-4-3)
This course covers drawing reproduction and orthographic projection and sectioning. The theory as well as the mechanics of orthographic projection and shape description, the relationship of orthographic planes and views, the views and their space dimensions, the application of various types of sections, and drawing reproduction are emphasized. On completion, students should have an understanding of orthographic projection and be able to identify orthographic plans, produce orthographic views of objects, apply various sectioning techniques and methods, and reproduce drawings. CORE

DIT 121. INTERMEDIATE TECHNICAL DRAWING (1-4-3)
PREREQUISITES: DIT 111 and 112 or instructor approval.
This course is designed to develop a strong foundation in common drafting and design practices and procedures. Topics include auxiliary views, basic space geometry, pictorial drawings, and basic charts and
graphs. On completion, students should be able to project and develop auxiliary views; locate and specify points, lines, and planes in space; develop axonometric, oblique, and perspective drawings; and draw basic charts and graphs. 

**DDT 122. ADVANCED TECHNICAL DRAWING** (1-4-3)
**PREREQUISITES:** DDT 111 and 112 or instructor approval.
This course covers the methods of providing size description and manufacturing information for production drawings. Accepted dimensioning and tolerancing practices, including Geometric Dimensioning and Tolerancing for both the Customary English system and the ISO System, are emphasized. On completion, students should be able to apply dimensions, tolerances, and notes to drawings to acceptable standards, including Geometric Dimensioning and Tolerancing, and produce drawings using and specifying common threads and various fasteners, including welding methods. **CORE**

**DDT 123. INTERMEDIATE CAD** (2-2-3)
**PREREQUISITE:** Instructor approval.
This course covers intermediate-level concepts and applications of CAD design and drafting. Intermediate-level features, commands, and applications of CAD software are emphasized. On completion, students should be able to develop and use external references and paper space, apply higher level block creation techniques and usage, including attributes, and apply basic-level customization techniques to CAD software. **CORE**

**DDT 130. FUNDAMENTALS OF DRAFTING FOR RELATED TRADES** (3-0-3)
**PREREQUISITE:** Instructor approval. **COREQUISITE:** DDT 139 or instructor approval.
This course provides an overview of related technical trades drafting. Theory is covered within a broad range of drafting specialties, including civil, structural, electrical, mechanical, and electronic drawing. A basic understanding of what each of these fields requires for graphic communication is emphasized.

**DDT 134. DESCRIPTIVE GEOMETRY** (1-4-3)
**PREREQUISITE:** Determined by the instructor.
This course is designed to teach the fundamental concepts of descriptive geometry through an emphasis on logical reasoning, visualization, and practical applications. Topics include orthographic projection, points and lines in space, auxiliary views, plane representation, intersecting and non-intersecting lines, piercing and intersecting planes, plane development, and calculations. On completion, students should be able to project and intersect points, lines, and planes, with their relationship in space, as well as develop surfaces of an object for fabrication purposes.

**DDT 139. FUNDAMENTALS OF DRAFTING FOR RELATED TRADES LAB** (0-6-3)
**PREREQUISITE:** Instructor approval. **COREQUISITE:** DDT 130 or instructor approval.
This course is a direct applications lab to the topics covered in DDT 130. Drawing accuracy using each of the fields listed in DDT 130 is emphasized.

**DDT 150. THEORY OF RESIDENTIAL DRAWING AND DESIGN** (3-0-3)
**PREREQUISITE:** Instructor approval. **COREQUISITE:** DDT 155 or instructor approval.
This course provides the theory of residential drawing and design. Topics include architectural styles, house design, site and space planning, climate, drawing requirements, construction materials and process, terminology, and specific types of drawings required to complete a full set of construction documents. Introductory, intermediate, and advanced topics are covered. An understanding of various issues and requirements essential to the field of residential drawing and design is emphasized.

**DDT 155. DRAWING FOR RESIDENTIAL CONSTRUCTION** (0-8-4)
**PREREQUISITE:** Instructor approval. **COREQUISITE:** DDT 150 or instructor approval.
This course is a direct applications lab to the topics covered in DDT 150. Production of quality construction documents is emphasized.
DDT 216. DESIGN OF STRUCTURAL WOOD MEMBERS (3-0-3)
PREREQUISITE: Instructor approval.
This course provides structural theory and rule-of-thumb design for structural wood members. Joists, beams, girders, rafters, posts, and columns are designed as related to residential and light commercial needs. Bending moment, shear, and slenderess ratios are discussed as well as code requirements and rule-of-thumb design. Competency is emphasized.

DDT 220. TECHNICAL AND MECHANICAL DRAWING II (3-0-3)
PREREQUISITE: Instructor approval. COREQUISITE: DDT 229 or instructor approval.
This course provides an intermediate to advanced theory of technical and mechanical drawing. Topics include thread fasteners, tolerancing, manufacturing materials, computerized numerical control (CNC) layout, cams, and specialty mechanical CAD programs. Both ANSI and SI standards are covered. Comprehension of the theory of subjects covered is emphasized.

DDT 222. ADVANCED ARCHITECTURAL DRAFTING (1-4-3)
PREREQUISITE: Instructor approval.
This third course in architectural design and drafting continues with advanced architectural plans, including a slant toward light commercial construction. Topics include climate control plans, application of building codes, building materials and finish specifications, cost estimating, and bid specifications. On completion, students should be able to apply current techniques in producing advanced-level architectural plans, including residential and light commercial applications.

DDT 225. STRUCTURAL STEEL DRAFTING (1-4-3)
PREREQUISITES: DDT 111 and 112 or instructor approval.
This course covers the theory and practical applications necessary to understand the basic design and terminology of structural steel components used in light commercial buildings. Structural steel drafting techniques, bolted and welded connections, framing plans, sections, fabrication and connection details, and bills of material are emphasized. On completion, students should be able to produce engineering and shop drawings incorporating standard shapes, sizes, and details using the AISC Manual and incorporating safety practices.

DDT 227. STRENGTH OF MATERIALS (4-0-4)
PREREQUISITES: As required by program.
This course in statics and strength of materials includes the study of forces and how they act and react on bodies and structures. Topics include the effects of forces as found in structures and machines under conditions of equilibrium, how materials resist forces, strengths of common construction materials, and structural components. Force systems such as parallel, concurrent, and non-concurrent are studied in co-planar and non-co-planar situations are included. On completion, students should understand and be able to apply the principles of force in engineering drawings.

DDT 229. TECHNICAL AND MECHANICAL DRAWING II LAB (0-4-2)
PREREQUISITE: Instructor approval. COREQUISITE: DDT 220 or instructor approval.
This course is a direct applications lab to the topics covered in DDT 220. Accuracy, line quality, and the importance of effective graphic communication as related to end-user applications are emphasized.

DDT 231. ADVANCED CAD (2-2-3)
This course covers the advanced applications of CAD software to engineering projects in various applications, including architectural, civil, mechanical, and environmental engineering, with consideration for advanced physical and psychological principles of CAD. These principles will be applied toward CAD customization and programming principles for the expressed purpose of increasing productivity and improving the performance of the CAD operator, thereby making CAD much more productive in an engineering environment. Using intelligent CAD techniques to increase the quality of output is emphasized, and 3-D modeling and rendering is introduced. On completion, students should be able to apply advanced CAD techniques in solving complex problems related to all engineering applications.

ECONOMICS (ECO)

ECO 231. PRINCIPLES OF MACROECONOMICS (3-0-3)
This course is an introduction to macroeconomic theory, analysis, and policy applications. Topics include scarcity, demand and supply, national income analysis, major economic theories concerning monetary and fiscal policies as stabilization measures, the banking system, and other economic issues or problems including international trade.

ECO 232. PRINCIPLES OF MICROECONOMICS (3-0-3)
This course is an introduction to microeconomic theory, analysis, and applications. Topics include scarcity, theories of consumer behavior, production and cost, markets, output and resource pricing, and international aspects of microeconomics.

ELECTRICAL TECHNOLOGY (ELT)

ELT 101. PRINCIPLES OF DC ELECTRICITY (2-3-3)
PREREQUISITE: MTH 091 or as required by program.
This course is a study of basic atomic structure, electron flow, Ohm's Law, electrical power, and conductors and insulators. Topics include atomic theory, series and parallel circuits, complex circuits, magnetism, and electromagnetism. On completion, students should be able to solve DC electrical quantity problems and use voltmeters, ohm meters, and amp meter.

ELT 102. PRINCIPLES OF AC ELECTRICITY (2-3-3)
PREREQUISITE: ELT 101, MTH 091, or as required by program.
This course is a study of alternating current and its measurements, circuit analysis, resistive, inductive and capacitive circuits, vectors, AC power and AC test equipment. Sinewave generation and valves, circuit construction, and analysis and test equipment. On completion, students should be able to construct AC circuits and use AC test equipment.

ELT 103. WIRING METHODS (2-3-3)
PREREQUISITE: As required by program.
This course is a study of various tasks, wiring methods, materials, and associated NEC requirements that students will be required to work with in residential and commercial wiring courses.

ELT 111. RESIDENTIAL WIRING METHODS (2-3-3)
PREREQUISITE: MTH 092, ELT 102, or as required by program.
This course introduces students to residential wiring practices and methods, use of hand and power tools, electrical safety, NEC requirements, and residential blueprint interpretations. Topics include standard residential wiring procedures and practices, grounding NEC requirements, wiring diagrams, and wiring layouts. On completion, students should be able to read blueprints, understand code requirements, and wire lights and switches.

ELT 112. ADVANCED RESIDENTIAL WIRING METHODS (2-3-3)
PREREQUISITES: ELT 102 and 111 and MTH 092 or as required by program.
This course provides the student with information on how to interpret electrical residential blueprints, wiring diagrams, and layouts and will teach them to wire many different residential circuits in accordance with the National Electrical Code. Applying the National Electrical Code, actual wiring of panels, service and branch circuits are emphasized. On completion, students should be able to interpret and wire to code most aspects of a residential application.

ELT 121. BASIC AC/DC MACHINES (2-3-3)
PREREQUISITES: MTH 092, ELT 102, or as required by program.
single- and three-phase motors, wiring diagrams, starting devices, and practical application in the lab are emphasized. On completion, students
should be able to explain, wire, and troubleshoot most single- and three-phase AC motors. **CORE**

**ELT 131. BASIC COMMERCIAL/INDUSTRIAL WIRING (2-3-3)**
PREREQUISITE: MTH 092, ELT 102, or as required by program. This course teaches students the principles and applications of commercial and industrial wiring. Blueprint symbols, hand and power tools, electrical safety, calculations, and NEC code requirements as applied to commercial and industrial wiring are emphasized. On completion, students should be able to read electrical plans, understand electrical symbols, calculate electrical loads for commercial industrial applications, and interpret NEC code requirements.

**ELT 132. ADVANCED COMMERCIAL/INDUSTRIAL WIRING (2-3-3)**
PREREQUISITE: MTH 092, ELT 131, or as required by program. This course is a continuation of ELT 131 and includes the study of branch circuits, installation requirements for services, and feeders and special equipment considerations including NEC code requirements. Load calculations, conductors, service sizing, installation requirements, NEC code requirements, transformers, lighting, HVAC, and special equipment considerations are emphasized. On completion, students should be able to size complete electrical commercial/industrial systems and understand NEC requirements for each system.

**ELT 182. SPECIAL TOPICS IN ELECTRICAL TECHNOLOGY (2-3-3)**
PREREQUISITE: As required by program. This course provides specialized instruction in various areas related to electrical technology. Emphasis is placed on meeting students’ needs.

**ELT 211. MOTOR CONTROLS I (2-3-3)**
PREREQUISITE: ELT 102 or as required by program. This course introduces the use of motor control symbols, magnetic motor starters, running overload protection, push-button stations and sizing of magnetic motor starters, and overload protection. Topics include sizing magnetic starters and overload protection and use of push-button stations, ladder diagrams, and magnetic motor starters in control of electric motors. On completion, students should be able to understand the operation of magnetic motor starters and overload protection and be able to interpret ladder diagrams using push-button stations.

**ELT 212. MOTOR CONTROLS II (2-3-3)**
PREREQUISITE: ELT 211. COREQUISITE: ELT 211. This course covers complex ladder diagrams of motor control circuits and the use of different motor starting techniques. Topics include wye-delta starting, part start winding, resistor starting, and electronic starting devices. On completion, the student should be able to understand and interpret the more complex motor control diagrams and understand the different starting techniques of electrical motors.

**ELT 213. INDUSTRIAL EQUIPMENT (2-3-3)**
PREREQUISITE: As required by program. This course is designed to give a general overview of the different types of equipment used in large commercial and industrial facilities. Topics covered include, but are not limited to, the following: motor coupling and alignment, gears and pulleys, belts and chains, basic hydraulics, basic pneumatics, and other applications. Students will learn the techniques involved with each application and, where applicable, demonstrate their abilities with practical examples.

**ELT 214. HYDRAULICS (2-3-3)**
PREREQUISITE: Determined by the instructor. This course is the study of fluid power systems including the theory and function of devices that pressurize, direct, and control fluid power systems. Lab will reinforce the principles and characteristics of hydraulic systems. Setting up and operating hydraulic trainers in the correct manner with the aid of hydraulic prints is emphasized. On completion, students should be able to explain and operate a typical hydraulic system.

This course provides the knowledge to understand how to properly ground an electrical system. Emphasis is placed on, but not limited to,

**ELT 217. TRANSFORMERS (2-3-3)**
PREREQUISITE: As required by program. This course is designed to train the student in the theory of operation, various connections, troubleshooting, and repair of single phase as well as three phase transformers. KVA load calculations and applications will also be covered in the class. On completion, the student should be able to perform calculations relating to the transformers, make proper Delta and WYE connections, and understand the basic polarity and voltage test for each application.

**ELT 221. ELECTRONICS FOR ELECTRICIANS (2-3-3)**
PREREQUISITE: ELT 102 or as required by program. This course introduces students to the basic principles of solid state electronic equipment as found in many electrical and motor control circuits. Fundamental concepts of diodes, transistors, FETs and MOSFETs as they are used in electrical control circuits are emphasized. On completion, students should understand the basic operation of solid state components and be able to perform basic troubleshooting tasks.

**ELT 231. INTRODUCTION TO PROGRAMMABLE CONTROLS (2-3-3)**
PREREQUISITE: ELT 231 or as required by program. COREQUISITE: ELT 231. The focus of this state-of-the-art course is PLC hardware, programming, and program design. Developing working programs, timers, counters, different special functions, and designing programs from existing hardwired systems are the emphasis. On completion, students should be able to develop programs, load programs into PLCs, and troubleshoot the system.

**ELT 232. ADVANCED PROGRAMMABLE CONTROLS (2-3-3)**
PREREQUISITE: ELT 232 or as required by program. This state-of-the-art course covers the more advanced topics of PLCs. Emphasis is placed on, but is not limited to, the following: high-speed devices, analog programming, designing complete working systems, start-up and troubleshooting techniques, and special projects. On completion, students must demonstrate their ability by developing programs, loading programs into PLCs, and troubleshooting the system, if necessary.

**ELT 241. NATIONAL ELECTRIC CODE (3-0-3)**
PREREQUISITE: ELT 101, ELT 102, and/or as required by program. COREQUISITE: ELT 102. This course introduces the students to the National Electric Code and text and teaches the student how to find needed information within this manual. Emphasis is placed on locating and interpreting needed information within the NEC code manual. On completion, students should be able to locate requirements for a specific electrical installation within the NEC code.

**ELT 242. JOURNEYMAN/MASTER PREP EXAM (3-0-3)**
This course is designed to prepare students for the Journeyman or Master Certification Exam. Review of electrical concepts and principles, practice tests, and test-taking procedures are emphasized. On completion, students should be able to pass the Journeyman/Master Certifying Exam.

**ELT 245. ELECTRICAL GROUNDING SYSTEMS (3-0-3)**
PREREQUISITE: ELT 101, ELT 102, and/or as required by program. The following: residential installations, commercial installations, and the function of independent grounding elements. On completion, the
students should be able to explain and design a simple grounding system.

EMERGENCY MEDICAL SERVICES—
PARAMEDIC (EMP)

EMP 189. APPLIED ANATOMY AND PHYSIOLOGY FOR
THE PARAMEDIC (4-0-4)
PREREQUISITE: Admission to EMT-Paramedic Program.
This course introduces human anatomy and physiology and includes
concepts related to basic chemistry, fluid, electrolyte, and acid-base
balance; functions of cells, tissues, organs, and systems; pathophysiology; and associated medical terminology. Emphasis is
placed on applying content to signs, symptoms, and treatments; and
situations commonly seen by paramedics. On course completion,
students should be able to demonstrate a basic understanding of
the structure and function of the human body.

EMP 191. PARAMEDIC PREPARATORY (2-0-2)
PREREQUISITE: Admission to EMT-Paramedic program.
This course introduces issues related to the practice of prehospital
advanced life support as a career, with a focus on issues common to all
health care professions. Content areas include: paramedic roles and
responsibilities, well-being of the paramedic, illness and injury
prevention, medical-legal-ethical issues, therapeutic communications,
and medical terminology. On course completion, students will have
demonstrated competency in those respective components of the
National Standard Curriculum for the EMT-Paramedic and requirements
set forth by the Alabama Department of Public Health. CORE

EMP 192. PARAMEDIC OPERATIONS (2-2-3)
PREREQUISITE: Admission to EMT-Paramedic program.
This course focuses on the operational knowledge and skills needed for
safe and effective patient care within the paramedic’s scope of practice.
Content areas include pathophysiology, life span development,
ambulance operations, medical incident command, rescue awareness and
operations, hazardous materials incidents, crime scene awareness, and
Alabama EMS laws and rules. On course completion, students will have
demonstrated competency in those respective components of the
National Standard Curriculum for the EMT-Paramedic and requirements
set forth by the Alabama Department of Public Health. CORE

EMP 193. PATIENT ASSESSMENT AND MANAGEMENT
(2-2-3)
PREREQUISITE: Admission to EMT-Paramedic program.
This course provides the knowledge and skills needed to perform a
comprehensive patient assessment, make initial management decisions,
and communicate assessment findings and patient care verbally and in
writing. Content areas include airway management, history taking,
techniques of the physical examination, patient assessment, clinical
decision making, communications, documentation, and assessment-
based management. On course completion, students will have
demonstrated competency in those respective components of the
National Standard Curriculum for the EMT-Paramedic and requirements
set forth by the Alabama Department of Public Health. CORE

EMP 194. PARAMEDIC GENERAL PHARMACOLOGY
(1-2-2)
PREREQUISITE: Admission to EMT-Paramedic program.
COREQUISITE: EMP 189.
This course introduces basic pharmacological agents and concepts, with
an emphasis on drug classifications and the knowledge and skills
required for safe, effective medication administration. Content areas include
general principles of pharmacology and pharmacologic pathophysiology;
venous and intraosseous access techniques, the metric and apothecary system; computation of dosage and solution problems,
administration of pharmacologic agents; and nasogastric tube placement.
On course completion, students will have demonstrated competency in
This course relates pathophysiology and assessment findings to the
formulation of field impressions and implementation of treatment plans
for specific medical conditions. Content areas include endocrinology,
allergies and anaphylaxis, behavioral/psychiatric conditions,
gynecology, obstetrics, neonatology, pediatrics, and geriatrics. Students
integrate and reinforce the didactic and skills laboratory components of
their education by performing basic and advanced life support
assessments and skills on a variety of patient presentations and

EMP 196. ADVANCED TRAUMA MANAGEMENT B
(2-2-3)
PREREQUISITE: Admission to EMT-Paramedic program.
COREQUISITE: EMP 189 and 193.
This course relates pathophysiology and assessment findings to the
formulation of field impressions and implementation of treatment plans
for trauma patients. Content areas include the pathophysiology,
assessment, and management of trauma as related to trauma systems;
mechanisms of injury; hemorrhage and shock; soft tissue injuries; burns;
and head, facial, spinal, thoracic, abdominal, and musculoskeletal
trauma. On course completion, students will have demonstrated
competency in those respective components of the National Standard
Curriculum for the EMT-Paramedic and requirements set forth by the
Alabama Department of Public Health. CORE

EMP 197. PARAMEDIC CLINICAL COMPETENCIES I
(0-9-3)
PREREQUISITES: Admission to EMT-Paramedic program, EMT-Basic
license/certification, EMP 194, and program approval for clinical
studies. COREQUISITES: EMP 193 and EMP 196.
This course is directed toward the application of knowledge and skills
developed in didactic and skills laboratory experiences to the clinical
setting. Theory and skills are applied to a variety of patient situations in
the clinical setting, with a focus on patient assessment, trauma
management, advanced airway management, I.V./I.O. initiation and
medication administration. On course completion, students will have
demonstrated competency in those respective components of the
National Standard Curriculum for the EMT-Paramedic and requirements
set forth by the Alabama Department of Public Health. CORE

EMP 198. MEDICAL PATIENT MANAGEMENT I (2-2-3)
PREREQUISITES: Admission to EMT-Paramedic program and
EMP 194. COREQUISITE: EMP 193.
This course relates pathophysiology and assessment findings to the
formulation of field impressions and implementation of treatment plans
for specific medical conditions. Content areas include pulmonology,
nephrology, gastroenterology, renal/urology, toxicology, hematology,
environmental conditions, infectious and communicable diseases, abuse
and assault, patients with special challenges, and acute interventions for
the chronic care patient. On course completion, students will have
demonstrated competency in those respective components of the
National Standard Curriculum for the EMT-Paramedic and requirements
set forth by the Alabama Department of Public Health. CORE

EMP 199. CARDIOVASCULAR ELECTROPHYSIOLOGY
(2-2-3)
PREREQUISITES: Admission to EMT-Paramedic program and
EMP 189.
This course introduces the cardiovascular system, cardiovascular
electrophysiology, and electrocardiographic monitoring. Content areas
include cardiovascular anatomy and physiology, cardiovascular
electrophysiology, electrocardiographic monitoring, rhythm analysis,
and prehospital 12-lead electrocardiogram monitoring and interpretation.
On course completion, students will have demonstrated competency in
those respective components of the National Standard Curriculum for the
EMT-Paramedic and requirements set forth by the Alabama Department of Public Health. CORE

EMP 201. MEDICAL PATIENT MANAGEMENT IIB (2-2-3)
PREREQUISITE: Admission to EMT-Paramedic program.
COREQUISITE: EMP 198.
complaints in the clinical setting. On course completion, students will have demonstrated competency in those respective components of the National Standard Curriculum for the EMT-Paramedic and requirements set forth by the Alabama Department of Public Health. **CORE**

**EMP 202. PARAMEDIC CLINICAL COMPETENCIES II** (0-9-3)

**PREREQUISITES:** Admission to EMT-Paramedic program, EMP 197, and program approval for clinical studies. **COREQUISITE:** EMP 201. This course is directed toward the application of knowledge and skills developed in didactic and skills laboratory experiences to the clinical setting. Theory and skills are applied to a variety of medical situations across the life span of the patient, with a focus on communication with and management of cardiac, acute care, psychiatric/behavioral, obstetrical, newborn, pediatric, geriatric, and acute interventions for chronic care patients, and patients with special challenges. On course completion, students will have demonstrated competency in those respective components of the National Standard Curriculum for the EMT-Paramedic and requirements set forth by the Alabama Department of Public Health. **CORE**

**EMP 203. CARDIOVASCULAR PATIENT MANAGEMENT** (2-2-3)

**PREREQUISITES:** Admission to EMT-Paramedic program, EMP 194, and EMP 199. This course relates pathophysiology and assessment findings to the formulation of field impressions and implementation of treatment plans for specific cardiovascular conditions. Content areas include assessment of the cardiovascular patient, pathophysiology of cardiovascular disease and techniques of management, including appropriate pharmacologic agents and electrical therapy. On course completion, students will have demonstrated competency in those respective components of the National Standard Curriculum for the EMT-Paramedic and requirements set forth by the Alabama Department of Public Health. **CORE**

**EMP 204. TRANSITION TO PARAMEDIC PRACTICE** (2-2-3)

**PREREQUISITES:** Admission to EMT-Paramedic program, EMP 202, and EMP 203. This course is designed to meet additional state and local educational requirements for paramedic practice. Content may include prehospital protocols, transfer medications, topics in critical care and transport, systems presentation, and/or national standard certification courses as dictated by local needs or state requirements. On course completion, students should have met all ancillary educational requirements set forth by the Alabama Department of Public Health and local employers.

**EMP 205. PARAMEDIC TERMINAL COMPETENCIES** (1-2-2)

**PREREQUISITES:** Admission to EMT-Paramedic program, EMP 191, EMP 192, and EMP 197. **COREQUISITE:** EMP 204. This course is designed to review the National Standard Curriculum for the EMT-Paramedic and to assist students in preparation for the paramedic licensure examination. Emphasis is placed on validation of knowledge and skills through didactic review, skills lab performance, computer simulation, and practice testing. On course completion, students should be sufficiently prepared to sit for the paramedic licensure examination. **CORE**

**EMP 206. PARAMEDIC FIELD PRECEPTORSHIP** (1-15-6)

**PREREQUISITES:** Admission to the EMT-Paramedic program and program approval for clinical studies. **COREQUISITE:** EMP 205. This course provides field experiences in the prehospital setting with advanced life support EMS units. Under the direct supervision of a field preceptor, students synthesize cognitive knowledge and skills developed in the skills laboratory and hospital clinical to provide safe and effective patient care in the prehospital environment. On course completion, students should have refined and validated their patient care practices to This course provides students with a survey of words, terms, and descriptions commonly used in health-related professions. The course includes spelling, pronunciation, and meaning of prefixes, suffixes, roots, and terms. Students may have the opportunity to use computer-assisted instruction for learning various medical terms. On course completion, students should have the knowledge to associate a variety of medical terms with their meaning and use medical terms to effectively communicate with other health professionals.

**EMP 207. PARAMEDIC TEAM LEADER PRECEPTORSHIP** (0-3-1)

**PREREQUISITES:** Admission to the EMT-Paramedic program and program approval for clinical studies. **COREQUISITE:** EMP 206. This course is designed to evaluate students’ ability to integrate didactic, psychomotor skills, clinical, and field internship instruction to serve as a competent entry-level paramedic. This final evaluative (rather than instructional) course focuses on students’ professional attributes and integrative competence in clinical decision-making and team leadership in the prehospital setting. On course completion, students should have demonstrated adequate knowledge and skills, professional attitudes and attributes, clinical decision-making and team leadership abilities to effectively function as a competent entry-level paramedic. **CORE**

**EMERGENCY MEDICAL SERVICES (EMS)**

**EMS 100. CARDIOPULMONARY RESUSCITATION I** (1-0-1)

This course provides concepts related to areas of basic life support that include coronary artery disease, prudent heart living, symptoms of heart attack, Adult I and II Rescuer CPR, first aid for choking, pediatric basic life support, airway adjuncts, EMS system entry access, automated external defibrillation (AED), and special situations for CPR. On course completion, students should be able to identify situations requiring action related to heart or breathing conditions and effectively implement appropriate management for each condition. Students successfully completing this course will receive appropriate documentation of completion.

**EMS 101. CARDIOPULMONARY RESUSCITATION II** (1-0-1)

**PREREQUISITE:** EMS 100 or program approval. This course provides a review of concepts learned in EMS 100 as well as theory and application of airway adjuncts used with airway obstruction and maintenance and respiratory and cardiac arrest. Assessment and management of acute ischemic stroke will also be included. On course completion, students should be able to identify situations requiring action related to heart or breathing conditions and effectively implement appropriate management for these conditions. Students successfully completing this course will receive appropriate documentation of completion.

**EMS 103. FIRST AID** (1-0-1)

**PREREQUISITE:** Current training in CPR or program approval. This course introduces initial first aid care. Topics include scene safety, universal precautions, activation of the EMS system, assessment, airway/breathing/circulation, shock/injuries/bleeding, medical emergencies, and altered level of consciousness. On course completion, students should have knowledge to manage various emergencies requiring first aid techniques.

**EMS 104. FIRST AID FOR STUDENTS OF HEALTH-RELATED PROFESSIONS** (1-0-1)

**PREREQUISITE:** Current training in CPR or program approval. This course is designed for students who plan to enter a health-related profession and provides educational concepts related to first aid for various health disciplines. The course includes instruction in emergency administration of oxygen, use of airway adjuncts, medication administration techniques, equipment for mechanical breathing, suctioning techniques, and automated external defibrillation (AED). On course completion, students should be able to recognize emergency situations requiring immediate action and appropriately manage them.

**EMS 106. MEDICAL TERMINOLOGY FOR HEALTH PROFESSIONS** (2-0-2)

**PREREQUISITE:** As required by program. This course is designed for students who plan to enter a health-related profession and provides educational concepts related to first aid for various health disciplines. The course includes instruction in emergency administration of oxygen, use of airway adjuncts, medication administration techniques, equipment for mechanical breathing, suctioning techniques, and automated external defibrillation (AED). On course completion, students should be able to recognize emergency situations requiring immediate action and appropriately manage them.

**EMS 107. EMERGENCY VEHICLE OPERATOR**
PREREQUISITE: Must present a valid driver’s license as required by program.
The Emergency Vehicle Operator Course-Ambulance provides the student with training as contained in the current National Standard Training Curriculum (NSTC) for the Emergency Vehicle Operator Course (EVO)-Ambulance. The course provides the knowledge and skill practice necessary for individuals to learn how to safely operate all types of ambulances. Topics include introduction to the NSTC for ambulance operators; legal aspects of ambulance operation; communication and reporting; roles and responsibilities; ambulance types and operation; ambulance inspection, maintenance, and repair; navigation and route planning; basic maneuvers and normal operating situations; operations in emergency mode and unusual situations, special considerations in safety; and the run. Completion of specific student competencies, using NSTC guidelines as required for successful completion of this course.

This course is a continuation of EMS 120 and provides concepts and skills related to patient management and hazards encountered during vehicle rescue operations. Topics include mechanisms of trauma; patient injuries, assessment, management, and extrication tools; and potential hazards to include faulty air bags, loaded hydraulic bumper systems, and patient restraints. On course completion, students should be able to identify different areas of vehicle damage and associate this damage with specific patient injuries; and keep the scene safe by recognizing potential hazards encountered during rescue of patients from vehicles.

This course provides concepts related to extrication of individuals from water accidents where they are located on the water’s surface. Topics include pathophysiology of near drowning, effects from extreme temperatures, and basic assessment and management techniques of water extrication. On course completion, students should have a basic understanding of how to remove individuals from the water’s surface in accidents occurring in the water.

PREREQUISITE: Admission to EMT-Basic program.
This course is one of four courses (EMS 140, 141, 142, 143) required for successful completion of the EMT-Basic Program according to the current National Standard Curriculum for EMT-Basic. Content areas include general pharmacology, respiratory emergencies, cardiovascular emergencies, diabetic emergencies (including the use of a digital glucometer), altered mental status, allergic reactions, poisoning/overdose emergencies, environmental emergencies, behavioral emergencies, obstetrics, and infants/children. Computer use in simulated scenarios
will also be included in the course. Successful completion of cognitive, psychomotor, and affective domain competencies is required in this course. **CORE**

EMS 143. EMT-BASIC CLINICAL COMPETENCIES (0-3-1)
PREREQUISITE: Admission to EMT-Basic program.
This course is one of four courses (EMS 140, 141, 142, 143) required for successful completion of the EMT-Basic Program according to the current National Standard Curriculum for EMT-Basic. It provides clinical education experiences to enhance knowledge and skills learned in the EMT-Basic Program. Successful completion of cognitive, psychomotor, and affective domain competencies is required in this course. **CORE**

EMS 171. HAZARDOUS MATERIALS AWARENESS AND OPERATIONS (2-0-2)
PREREQUISITE: Program approval.
This course provides theory in hazardous materials incident awareness and initial operational response. Topics include hazardous materials terms and definitions; recognition of hazardous materials; incident risks and risk assessment; use of protective equipment; basic control, containment, and/or confinement; basic decontamination procedures; and hazardous materials incident standard operating procedures. On course completion, students should have a basic understanding of hazardous materials incidents and initial response required by the first personnel responding to such an incident.

EMS 172. HAZARDOUS MATERIALS TECHNICIAN I (2-0-2)
PREREQUISITE: EMS 171.
This course provides theory in hazardous materials incident response and is a continuation of EMS 171. Topics include an appropriate emergency response plan; classification and verification of known and unknown materials through use of survey instruments and equipment; use of specialized chemical protective equipment, hazard, and risk assessment techniques; advanced control, containment, and/or confinement; implementation of decontamination procedures; and understanding termination procedures. On course completion, students should be able to effectively respond to and manage a hazardous materials incident.

EMS 173. HAZARDOUS MATERIALS TECHNICIAN II (2-0-2)
PREREQUISITE: EMS 172.
This course provides theory in hazardous materials incident response specialization and is a continuation of EMS 172. Topics include specific knowledge of various hazardous materials; federal, state, and local requirements regarding the development of a site safety and control plan; and chemical, radiological, and toxicological terminology and behavior. On course completion, students should be familiar with requirements for managing a hazardous materials incident.

EMS 250. EMS ADVANCED STUDIES I (2-2-3)
This course provides theory and computer-assisted instruction under faculty supervision in a paramedic educational subject relevant to the student’s need. Specific cognitive objectives must be met by the student for successful course completion.

EMS 251. EMS ADVANCED STUDIES II (2-2-3)
This course provides theory and computer-assisted instruction under faculty supervision in a paramedic educational subject relevant to the student’s need. Specific cognitive objectives must be met by the student for successful course completion.

EMS 252. EMS ADVANCED STUDIES III (2-2-3)
This course provides theory and computer-assisted instruction under faculty supervision in a paramedic educational subject relevant to the student’s need. Specific cognitive objectives must be met by the student for successful course completion.

**ENGLISH (ENG)**

ENG 092. BASIC ENGLISH I (3-0-3)

EMS 266. ADVANCED CV LIFE SUPPORT PROVIDER (1-0-1)
PREREQUISITE: As required by program.
The Advanced Cardiovascular Life Support Provider course provides students with concepts related to advanced cardiovascular life support. Content areas include acute myocardial infarction, stroke, cardiovascular pharmacology, electrophysiology, various rhythm disturbances, and techniques of management of cardiovascular emergencies. The course is taught in accordance with national standards and requires specific student competencies. Students successfully completing this course will receive appropriate documentation of course completion.

EMS 267. BASIC TRAUMA LIFE SUPPORT PROVIDER (1-0-1)
PREREQUISITE: LPN, RN, Intermediate EMT, Paramedic, and/or as required by program.
This course provides students with theory and demonstration in advanced trauma care and management. Content areas include mechanism of trauma, trauma assessment, airway-breathing-circulation management, trauma to various portions of the body, multiple system trauma, and load-and-go situations. The course is taught in accordance with national standards and requires specific student competencies. Students successfully completing this course will receive appropriate documentation of course completion.

EMS 269. PEDIATRIC MEDICAL LIFE SUPPORT PROVIDER (1-0-1)
PREREQUISITE: LPN, RN, Intermediate EMT, Paramedic, and/or as required by program.
This course provides students with theory and simulated case studies in pediatric care. Content areas include recognition of pediatric pre-arrest conditions, shock, basic life support, oxygenation and airway control, newborn resuscitation, essentials in pediatric resuscitation, dysrhythmia recognition and management, vascular access, and use of medications. This course is taught in accordance with national standards and requires specific student competencies. Students successfully completing this course will receive appropriate documentation of course completion.

EMS 280. BASIC LIFE SUPPORT INSTRUCTOR (1-0-1)
PREREQUISITE: Successful completion, within the past 12 months, of all areas of basic life support training (CPR).
This course provides students with concepts as related to areas of basic life support instruction. Topics include history, concepts, and systems of emergency cardiac care; cardiopulmonary physiology, dysfunction, and actions for survival; introduction to the performance of CPR; foreign body airway obstruction management; pediatric basic life support; special techniques/resuscitation situations, pitfalls, and complications; teaching and learning in basic life support; teaching strategies; and basic provider course organization. Students will also successfully participate in practice teaching of a cardiopulmonary resuscitation (CPR) class prior to course completion. Students successfully completing this course will receive appropriate documentation of course completion.

EMS 281. ADVANCED CV LIFE SUPPORT INSTRUCTOR (1-0-1)
PREREQUISITE: EMS 266 and/or as required by program.
This course provides the student with theory and practice in the techniques of teaching advanced cardiovascular life support (ACLS). The course is taught in accordance with national standards. Students will also successfully participate in practice teaching of an ACLS provider course prior to course completion. Students successfully completing this course will receive appropriate documentation of course completion.

**ENGLISH (ENG)**

ENG 092. BASIC ENGLISH I (3-0-3)

PREREQUISITE: A score of 23-41 on the English section of the ASSET or a score of 0-61 on the writing section of the COMPASS. This course is a review of basic grammar and writing skills. The composing process of sentences and paragraphs in standard American written English is emphasized. Students will demonstrate these skills.
chiefly through writing well-developed, multi-sentence paragraphs. Non-degree creditable.

ENG 093. BASIC ENGLISH II (3-0-3)
PREREQUISITE: A grade of “S” (Satisfactory) in ENG 092. This course is a review of composition skills and grammar. Coherence, use of a variety of sentence structures in the composing process, and standard American written English are emphasized. Students will demonstrate these skills chiefly through writing paragraph blocks and short essays. Non-degree creditable.

ENG 101. ENGLISH COMPOSITION I (3-0-3)
PREREQUISITE: Successful completion of ENG 093, or score of 42 or better on the English section of the ASSET, or a score of 62 or higher on the writing section of the COMPASS, or a score of 20 or better on the ACT (or equivalent SAT score). This course provides instruction and practice in writing at least six extended compositions and developing analytical and critical reading skills and basic reference and documentation skills in the composition process. It may include instruction and practice in library use.

ENG 102. ENGLISH COMPOSITION II (3-0-3)
PREREQUISITE: A grade of “C” or better in ENG 101 or equivalent. This course provides instruction and practice in writing six formal, analytical essays, at least one of which is a research project using outside sources and/or references effectively and legally. Additionally, the course provides instruction in developing analytical and critical reading skills in the composition process and may include instruction and practice in library use.

ENG 130. TECHNICAL REPORT WRITING (3-0-3)
PREREQUISITE: ENG 101 or equivalent. This course provides instruction in the production of technical and/or scientific reports. Research, objectivity, organization, composition, documentation, and presentation of the report are emphasized. Students will demonstrate the ability to produce a written technical or scientific report by following the prescribed process and format.

ENG 251. AMERICAN LITERATURE I (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a survey of American literature from its inception to the middle of the nineteenth century. Representative works and writers of this period and the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them are emphasized. On course completion and in written compositions, students will be able to interpret aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

ENG 252. AMERICAN LITERATURE II (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a survey of American literature from the middle of the nineteenth century to the present. Representative works and writers of this period and the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them are emphasized. On course completion and in written compositions, students will be able to interpret aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

ENG 261. ENGLISH LITERATURE I (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a survey of English literature from the Anglo-Saxon period to the Romantic Age. Representative works and writers of this period and the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them are emphasized. On course completion and in written compositions, students will be able to interpret aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

ENG 262. ENGLISH LITERATURE II (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a survey of English literature from the Romantic Age to the present. Representative works and writers of this period and the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them are emphasized. On course completion and in written compositions, students will be able to interpret aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

ENG 271. WORLD LITERATURE I (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a study of selected literary masterpieces from Homer to the Renaissance. Major representative works and writers of this period and the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them are emphasized. On course completion and in written compositions, students will be able to interpret aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

ENG 272. WORLD LITERATURE II (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a study of selected literary masterpieces from the Renaissance to the present. Major representative works and writers of this period and the literary, cultural, historical, and philosophical forces that shaped these works and that are reflected in them are emphasized. On course completion and in written compositions, students will be able to interpret aesthetic and thematic aspects of these works, relate the works to their historical and literary contexts, and understand relevant criticism and research.

ENG 279. AFRICAN-AMERICAN LITERATURE (3-0-3)
PREREQUISITE: ENG 102 or equivalent. This course is a study of literature produced by representative African-Americans from the 18th century to the present. The course emphasizes the diversity of themes and techniques found in these works and examines the historical, cultural, literary, and philosophical forces that shaped these works and that are reflected in them. Students will demonstrate the ability to interpret the literature and to relate the works to their historical and literary contexts.

ENG 298. SPECIAL TOPICS IN LANGUAGE AND LITERATURE (1-2-0-1-2)
PREREQUISITE: Instructor permission. This course, which may be repeated for credit as long as the topics differ, allows a student to study along with an instructor a subject in English language or literature. A narrowly focused topic in which the instructor has special expertise, knowledge, or interest is emphasized. Students will demonstrate an understanding of the topic through a research paper and/or literary critique.

ENGLISH, VOCATIONAL/TECHNICAL (COM)

COM 103. VOCATIONAL/TECHNICAL ENGLISH II (3-0-3)
This course enhances writing and speaking skills for the workplace. Generating short writings, such as job application documents and memoranda, and developing interpersonal communication skills with employees and the public are emphasized, with substantial focus on occupational performance requirements and industry standards. On completion, students should be able to prepare effective, short, and job-related written and oral communications. Non-degree creditable.
health, chronic and degenerative diseases, control of communicable diseases, and understanding depressants and stimulants. Healthful living habits are emphasized.

**HED 231. FIRST AID (3-0-3)**
This course provides instruction for the immediate, temporary care of victims of accidents and sudden illness. It also includes standard and advanced requirements of the American Red Cross and/or American Heart Association. CPR training also is included.

**HISTORY (HIS)**

**HIS 101. WESTERN CIVILIZATION I (3-0-3)**
This course is a survey of social, intellectual, economic, and political developments that have molded the modern western world. The course covers the ancient and medieval periods and concludes in the era of the Renaissance and Reformation.

**HIS 102. WESTERN CIVILIZATION II (3-0-3)**
This course is a continuation of HIS 101; it surveys development of the modern western world from the era of the Renaissance and Reformation to the present.

**HIS 201. UNITED STATES HISTORY I (3-0-3)**
This course surveys United States history during colonial, Revolutionary, early national, and antebellum periods. It concludes with the Civil War and Reconstruction.

**HIS 202. UNITED STATES HISTORY II (3-0-3)**
This course is a continuation of HIS 201; it surveys United States history from the Reconstruction Era to the present.

**HIS 216. HISTORY OF WORLD RELIGIONS (3-0-3)**
This course presents a comparison of the major religions of the world from a historical perspective. The origin, development, and social influence of Christianity, Judaism, Islam, Hinduism, Buddhism, and others are emphasized.

**HIS 256. AFRICAN-AMERICAN HISTORY (3-0-3)**
This course focuses on the experience of African-American people in the western hemisphere, particularly the United States. It surveys the period from the African origins of the slave trade during the period of exploration and colonization to the present. The course presents a comparison between the African experiences in the United States, Mexico, and South America.

**HIS 260. ALABAMA HISTORY (3-0-3)**
This course surveys the development of the state of Alabama from prehistoric times to the present. It presents material on the discovery, exploration, colonization, territorial period, antebellum, Reconstruction, and modern history of Alabama.

**HIS 299. DIRECTED STUDIES IN HISTORY (3-0-3)**
**PREREQUISITE:** Instructor permission.
This course affords students opportunities to study selected topics of a historical nature under the direction of an instructor, either as part of class or on an individual basis. Internships with historical and preservation organizations, thesis development, and the analysis of secondary monographs are examples of activities for this course.

**HUMANITIES (HUM)**

**HUM 100. HUMANITIES FORUM (1-0-1)**
In this course, credit is given for participation in lectures, concerts, and other events which have relevance to the study of the humanities. This course may be repeated for credit.

**HUM 101. INTRODUCTION TO HUMANITIES I (3-0-3)**
This is the first course in a two-semester sequence which offers the student an introduction to the humanities, using selections from art, music, literature, history, and philosophy which relate to a unifying theme.

**HUM 298. DIRECTED STUDIES IN HUMANITIES (3-0-3)**
**PREREQUISITE:** Instructor permission.
This course provides an opportunity for the student to study selected topics in the area of the humanities under the supervision of a qualified instructor. The specific topics will be determined by the interests of the students and faculty. This course may be repeated for credit.

**INDUSTRIAL ELECTRONICS TECHNOLOGY (ILT)**

**ILT 119. ELECTRONICS CIRCUITS (3-0-3)**
This course emphasizes electronic circuits. Topics include solid state devices in a variety of circuit configurations, biasing, op-amps, frequency, and class of operations of amplifiers. On completion, students will be able to design bipolar and unipolar transistors and integrated circuits.

**ILT 120. ELECTRONICS CIRCUITS LAB (0-4-2)**
The focus of this lab is solid state devices in a variety of circuit configurations, biasing, op-amps, frequency, and classes of operations of amplifiers. On completion, students will be able to design bipolar and unipolar transistors and integrated circuits.

**ILT 123. DIGITAL ELECTRONICS (3-0-3)**
This course introduces digital fundamentals and number systems, including logic gates, flip flops, registers, combinational circuits, sequential circuits, multiplexers, demultiplexers, and memory devices. On completion, students should be able to perform binary arithmetic, explain theories related to digital gates and circuits, use Boolean algebra and Karnaugh maps to simplify digital designs, and describe various logic families. **CORE**

**ILT 124. DIGITAL ELECTRONICS LAB (0-4-2)**
This course provides a working knowledge of digital techniques through experimentation on a broad range of combinational and sequential circuits and includes design and troubleshooting methods. On completion of this course and Digital Electronics, students will be able to construct, evaluate, troubleshoot, repair, and demonstrate operation of digital circuits. **CORE**

**ILT 125. DIGITAL COMMUNICATIONS (3-0-3)**
This course provides the electronic technician with sufficient background in data and digital communications to enter this rapidly expanding field. It includes telephone systems, error detection and correction, data link protocols, modems, multiple-channel systems, network architecture, fiber optic communications, and data communications applications. On completion, students should be able to describe operation of various digital communications circuits and calculate all parameters.

**ILT 126. DIGITAL COMMUNICATIONS LAB (0-4-2)**
This course provides experimentation to verify theories of digital communications. On completion of this course and Digital Communications, students should be able to construct various digital communications circuits and make necessary measurements and adjustments.

**ILT 127. MICROCOMPUTER FUNDAMENTALS (3-0-3)**
This course provides students with knowledge in installation of and familiarization with basic assemblies in microcomputer systems. Topics include DOS, hard and floppy drives, dip switches, and RAM. On completion, students should be able to use DOS, format hard and floppy drives, and configure circuit boards functions, and install RAM.

This lab focuses on installation of basic assemblies in microcomputer systems. Topics include DOS, hard and floppy drives, dip switches, and
RAM. On completion, students should be able to use DOS, format hard and floppy drives, configure circuit boards functions, and install RAM.

ILT 135. LOCAL AREA NETWORKS (2-3-3) PREREQUISITE: Determined by the instructor. This course provides the student with knowledge of planning, installation, maintenance, and administration of local area networks. On completion, students should be able to install and set up a basic local area network.

ILT 136. MICROCOMPUTER INTERFACING (3-0-3) This course focuses on microcomputer interfacing. Topics include memory circuits, including RAM, ROM, EPROM, and EEPROM. On completion, students should be able to perform programming operations and handshaking techniques and perform interfacing synchronous and asynchronous data communications.

ILT 137. MICROCOMPUTER INTERFACING LAB (0-4-2) This lab emphasizes memory circuits including RAM, ROM, EPROM, and EEPROM. On completion, students should be able to perform programming operation and handshaking techniques and perform interfacing synchronous and asynchronous data communications.

ILT 138. DC FUNDAMENTALS (3-0-3) This course covers atomic theory, properties of conductors and insulators, direct current characteristics of series, parallel, and series/parallel circuits. The resistor color code, power, magnetism, and direct current sources are thoroughly examined. Inductors and capacitors are introduced and their effects on DC circuits are examined. On completion, students should be able to solve DC problems with electronic laws and network theorems, reduce series and parallel resistive circuits, and solve a resistive series/parallel circuit for at least one unknown variable. CORE

ILT 139. DC FUNDAMENTALS LAB (0-4-2) This course provides familiarization with test equipment and component identification. Direct current theory is verified through fabrication of circuits that are analyzed by performing voltage, current, and resistance measurements. On completion of this course and DC Fundamentals, students should be able to calculate all parameters in DC circuitry, construct equivalent circuits, and describe circuit behavior. CORE

ILT 140. AC FUNDAMENTALS (3-0-3) This course covers generation of a sine wave, instantaneous values of alternating current, transformers, inductors, capacitors, vector analysis of series and parallel LCR circuits, resonant circuits, and transient wave forms of RC and LC circuits. On completion, students should be able to calculate all parameters in AC circuits, describe circuit behavior, and use AC instruments. CORE

ILT 141. AC FUNDAMENTALS LAB (0-4-2) This course provides verification of alternating current theory and complete familiarization with the oscilloscope. Students fabricate circuits and use vector analysis to verify the behavior of inductors and capacitors as applied to sine wave alternating current circuits. On completion of this course and AC Fundamentals, students will be able to construct circuitry and perform all necessary AC measurements. CORE

ILT 176. SOLID STATE DEVICES (3-0-3) PREREQUISITE: ILT 140. This course covers atomic structure, covalent bonding, semiconductor device construction, characteristics of diodes, special purpose diodes, bipolar transistors, field effect transistors, thyristors, and optoelectronic devices such as LEDs and photodiodes. On completion, students should be able to identify solid state devices and explain their operation.

This course allows students to practice using proper procedures discussed in the theory course. Students will repair computers following proper procedures covered. This course will help prepare students for the

ILT 177. SOLID STATE DEVICES LAB (0-4-2) PREREQUISITE: Determined by instructor. COREQUISITE: ILT 176. This course allows verification of the characteristics of the various solid state devices covered in the theory class and introduces students to various circuits using these devices. On completion, students should be able to test the various devices, use schematic symbols and diagrams of solid state devices, and construct basic circuits with these devices.

ILT 201. INDUSTRIAL ELECTRONICS (3-0-3) This course covers applications of electronics in the industry, with a major emphasis on microprocessors as applied to data acquisition and machine control. Topics include A/D and D/A conversion, signal conditioning, sensors and transducers, control devices, stepper motors, and microprocessor interfacing. On completion, students should be able to describe operation of various sensors, signal conditioning, A/D and D/A conversion, and control devices as well as perform necessary calculations.

ILT 202. INDUSTRIAL ELECTRONICS LAB (0-4-2) This course demonstrates concepts, devices, and applications of electronics in industrial processes. On completion, students should be able to construct, evaluate, and calibrate basic industrial sensing and control circuits.

ILT 205. MICROPROCESSORS (3-0-3) This course introduces microprocessors and explores their applications. The course emphasizes programming and interfacing the microprocessor chip. On completion, students should be able to perform binary and computer arithmetic, describe basic operating procedures for a microprocessor system, and write programs for a basic microprocessor.

ILT 206. MICROPROCESSORS LAB (0-4-2) This course provides familiarization with microprocessor instruction sets. Experiments in programming and interfacing provide an understanding of microprocessor theory. On completion, students should be able to program and interface a basic microprocessor system.

ILT 211. TROUBLESHOOTING TECHNIQUES (1-4-3) This course focuses on the systematic approach to solving problems. Instrument failures and their interaction with process down time are emphasized. On completion, student should be able to solve problems on a process simulator or in an actual setting.

ILT 224. ELECTRONIC COMMUNICATIONS (3-0-3) This course provides students with knowledge in electronic circuits used in amplitude, frequency, and phase modulation communication systems. Topics include modulation and detection techniques, antennas, and transmission lines. On completion, students should be able to apply principles of filters, oscillators, classes of amplifiers, and resonance.

ILT 225. ELECTRONIC COMMUNICATIONS LAB (0-4-2) This lab focuses on electronic circuits used in amplitude, frequency, and phase modulation communications systems. Topics include modulation and detection techniques, antennas, and transmission lines. On completion, students should be able to apply principles of filters, oscillators, classes of amplifiers, and resonance.

ILT 229. PC REPAIR (3-0-3) PREREQUISITE: Instructor permission. This course covers repair of personal computers, including hardware and software problems. Proper procedures for circuit card handling and replacement, installation of various drives, and installation of software are covered. This course helps prepare the student for the A+ certification. On completion, students should be able to explain proper procedures used in handling and replacing circuit cards, drives, memory, and installing software.

ILT 230. COMPUTER REPAIR LAB (0-4-2) PREREQUISITE: ILT 229 A+ certification. On completion, students should be able to repair a personal computer.

ILT 271. INDEPENDENT STUDY (0-6-2)
INT 280. SPECIAL TOPICS IN INDUSTRIAL MAINTENANCE TECHNOLOGY (0-9-3)
This course provides specialized instruction in various areas related to industrial maintenance. Emphasis is placed on meeting students’ needs.

MACHINE TOOL TECHNOLOGY (MTT)

MTT 101. PRINCIPLES OF MACHINE TOOL TECHNOLOGY (1-8-5)
PREREQUISITE: As required by program.
This course introduces machining operations as they relate to the metalworking industry. Topics include machine shop safety, measuring tools, lathes, drilling machines, saws, milling machines, bench grinders, and layout instruments. On completion, students should be able to safely perform the basic operations of measuring, layout, drilling, sawing, turning, and milling. CORE

MTT 102. INTERMEDIATE MACHINE TECHNOLOGY (2-8-6)
PREREQUISITE: MTT 101.
This course provides additional instruction and practice in the use of precision measuring tools, lathes, milling machines, and grinders. Set-up and operation of machine tools, including the selection and use of workholding devices, speeds, feeds, cutting tools, and coolants, are emphasized. On completion, students should be able to perform basic procedures on precision grinders and advanced operations of measuring, layout, drilling, sawing, turning, and milling. CORE

MTT 105. LATHE SET-UP AND OPERATIONS (2-8-6)
PREREQUISITE: Determined by instructor.
This course includes more advanced lathe practices such as taper turning, threading, boring, and set-up procedures. Safety procedures and the machinist's responsibility in the set-up and operation of lathes are emphasized. On completion, students should be able to apply lathe techniques to produce machine tool projects.

MTT 106. MILLING MACHINE OPERATIONS (2-8-6)
PREREQUISITE: Determined by instructor.
This course provides basic knowledge of milling machines. Main topics include types of milling machines and their uses, cutting speed, feed calculations, and set-up procedures. On completion, students should be able to apply milling techniques to produce machine tool projects.

MTT 111. INTRODUCTION TO COMPUTER NUMERIC CONTROL (2-2-3)
PREREQUISITE: MTT 101.
This course introduces the concepts and capabilities of computer numeric control machine tools. Topics include set-up, operation, and basic applications. On completion, students should be able to explain operator safety, machine protection, data input, program preparation, and program storage.

MTT 112. BASIC COMPUTER NUMERIC CONTROL TURNING (0-6-3)
PREREQUISITE: MTT 111.
This course introduces the programming, set-up, and operation of CNC turning centers. Topics include programming formats, control functions, program editing, part production, and inspection. On completion, students should be able to manufacture simple parts using CNC turning centers.

MTT 113. BASIC COMPUTER NUMERIC CONTROL MILLING (0-6-3)
PREREQUISITE: MTT 111.
This course introduces the manual programming, set-up, and operation of CNC machining centers. Topics include programming formats, control functions, program editing, part production, and inspection. On completion, students should be able to manufacture simple parts using CNC machining centers.
PREREQUISITE: Determined by instructor.
This course provides the applications and uses of hand and small power tools in laying out work, filing, sawing metal parts as well as operation and safety rules for radial and standard drilling and pedestal grinding machines.

**MTT 121. BASIC BLUEPRINT READING FOR MACHINISTS (2-2-3)**
PREREQUISITE: Determined by instructor.
This course covers the basic principles of blueprint reading and sketching. Topics include multi-view drawings; interpretation of conventional lines; and dimensions, notes, and thread notations. On completion, students should be able to interpret basic drawings, visualize parts, and make pictorial sketches. CORE

**MTT 123. ENGINE LATHE LAB I (0-6-3)**
PREREQUISITE: MTT 116.
In this course, students learn to safely operate an engine lathe in calculating feeds and speeds and shaping a variety of cutting tools by grinding. Students will also safely operate an engine lathe in straight turning, facing, turning to the shoulder, and tapers.

**MTT 131. INTRODUCTION TO METROLOGY (2-2-3)**
PREREQUISITE: Determined by instructor.
This course introduces the care and use of precision measuring instruments. The inspection of machine parts and use of a wide variety of measuring instruments are emphasized. On completion, students should be able to demonstrate the correct use of measuring instruments. CORE

**MTT 215. COMPUTER NUMERIC CONTROL GRAPHICS PROGRAMMING MILLING (1-6-3)**
PREREQUISITE: MTT 113.
This course introduces CNC graphics programming and concepts for machining center applications. Developing a shape file in a graphics CAM system and transferring coded information from CMA graphics to the CNC milling center are emphasized. On completion, students should be able to develop a complete job plan using CMA software to create a multi-axis CNC program.

**MTT 242. CNC PROGRAMMING (3-0-3)**
This course is a study of the theory of transforming blueprints into computer commands when using a computer-controlled mill.

**MTT 243. CNC PROGRAMMING LAB I (0-6-3)**
PREREQUISITE: MTT 116.
This course provides the practical application of the principles of CNC operations to produce metal parts, determine proper speeds and feeds, and to describe the “G” codes and their application. Students manually set up and operate the milling machine and write programs for straight milling, radius cutting, drilling, tapping, boring, and auto-routines.

**MASONRY (MAS)**

**MAS 111. MASONRY FUNDAMENTALS (2-3-3)**
This course is designed as an introduction and orientation to masonry construction, specifically to brick and block construction. Identification and safe use of tools, equipment, and masonry materials are emphasized. On completion, students should be able to apply masonry techniques properly. Non-degree credible. CORE

**MAS 121. BRICK/BLOCK MASONRY (3-0-3)**
PREREQUISITE: MAS 111 or instructor approval.
This course is designed to provide the student with a working knowledge of the various concrete block and brick sizes as well as types of joints. Understanding the modular system, wall types, joints, and wall insulation is emphasized. On completion, students should be able to identify methods of brick and block reinforcements, wall supports and wall types, joints insulation, and sample panels and prisms. Non-degree credible. CORE

**MAS 131. RESIDENTIAL/COMMERCIAL (3-0-3)**
PREREQUISITE: MAS 111 or instructor approval.
This course introduces the student to residential and commercial construction, plans and layouts, and reinforced masonry. Home building, shopping centers and high-rise buildings, residential and commercial drawings and specifications, job costing, job preparation, and brick and block moisture control are emphasized. On completion, students should be able to read full-scale construction drawings, estimate job costs, specify job preparation techniques, and identify methods for veneering a wall, constructing a composite wall, installing expansion joints, setting, coping, and controlling moisture. Non-degree credible. CORE

**MAS 151. MASONRY FUNDAMENTALS LAB I (0-9-3)**
COREQUISITE: MAS 111.
This course provides a practical application of introductory brick and block construction. Mixing mortar, using masonry equipment and tools, job preparation, spreading and furrowing mortar, and dry bonding are emphasized. On completion, students should be able to demonstrate appropriate practices in brick and block construction to entry-level standards (including safety). Non-degree credible. CORE

**MAS 152. MASONRY FUNDAMENTALS LAB II (0-9-3)**
PREREQUISITE: MAS 111 or instructor approval.
This course provides a practical application of introductory brick and block construction. Spreading mortar and laying bricks; coursing bricks; laying bricks in a running bond; building course pyramids; and building stretcher, wall common, Flemish, English, and stack bonds are emphasized. On completion, students should be able to demonstrate appropriate practices in brick and block construction to entry-level standards (including safety). Non-degree credible. CORE

**MAS 153. SPECIAL TOPICS/PROJECTS (0-6-3)**
This course provides practical application of masonry, and construction and layout of brick panels. Building common bonds, return corners, block corners, and block wall stack bonds is emphasized. On completion, students should be able to describe and demonstrate appropriate masonry techniques. Developing skill in laying brick and constructing and reinforcing walls, joints, and sample panels and prisms is emphasized. On completion, students should be able to construct brick walls to entry-level standards. Non-degree credible. CORE

**MAS 161. CONCRETE BLOCK MASONRY LAB (0-9-3)**
PREREQUISITE: MAS 111 or instructor approval.
This course provides practical application of concrete block advanced laying techniques. Developing skill in laying concrete block and constructing and reinforcing walls, joints, and sample panels and prisms is emphasized. On completion, students should be able to construct brick walls to entry-level standards. Non-degree credible. CORE

**MAS 162. BRICK MASONRY LAB (0-9-3)**
PREREQUISITE: MAS 111 or instructor approval.
This course provides practical application of advanced brick laying techniques. Developing skill in laying brick and constructing and reinforcing walls, joints, and sample panels and prisms is emphasized. On completion, students should be able to construct brick walls to entry-level standards. Non-degree credible.

**MAS 171. RESIDENTIAL/COMMERCIAL LAB (0-9-3)**
PREREQUISITE: MAS 111 or instructor approval.
This course provides application of residential and commercial techniques for plans and layouts as well as brick veneer, composite walls, expansion joints, and moisture control. Developing skill in reading residential and commercial drawings and applying specifications to acceptable code standards, job costing, job preparation, and brick and block moisture control are emphasized. On completion, students should be able to demonstrate use of scaling rule for a set of plans; identify and sketch standard symbols for walls, openings, floors, and materials; estimate job costs according to plan; use appropriate methods to ensure moisture control; lay brick and block to the line; and build brick and block foundations to entry-level standards. Non-degree credible. CORE
MAS 181. SPECIAL TOPICS IN MASONRY (3-0-3)
PREREQUISITE: As required by program.
This course provides specialized instruction in various areas related to the industry. Emphasis is placed on meeting students’ needs. Non-degree credible.

MAS 211. STONE MASONRY (3-0-3)
PREREQUISITES: MAS 131 and 171.
This course provides an introduction to stone and decorative masonry techniques, fireplace construction, and repair and restoration of brick structures. Topics include brick arches, fireplace construction, stone materials, laying techniques, moisture control, wall supports, joints, coping, sample panels, and cultured stone. On completion, students should be able to identify appropriate materials and techniques for the stated topics. Non-degree credible.

MAS 231. BASIC CEMENT MASONRY (3-0-3)
This course is designed to introduce the various types of cement masonry, concrete requirements, flat work, estimating, and finishing methods. Estimating concrete for small- to medium-sized projects, flat work, form work, footings, and the correct tools and methods of finishing and placing are emphasized. Non-degree credible.

MAS 251. STONE MASONRY LAB (0-9-3)
PREREQUISITES: MAS 131 and 171.
This course provides practical application of stone and decorative masonry techniques, repair and restoration of brick structures, and brick arches. Developing skill in performing these techniques is emphasized. On completion, students should be able to lay stone, repair and restore brick structures, and build brick arches to entry-level standards. Non-degree credible.

MAS 252. FIREPLACE CONSTRUCTION LAB (0-9-3)
PREREQUISITES: MAS 131, 171, and 211.
This course provides practical application of techniques for constructing fireplaces and other decorative work. Developing skill in constructing decorative masonry techniques is emphasized. On completion, students should be able to construct a variety of fireplaces to entry-level standards. Non-degree credible.

MAS 261. SPECIALIZED MASONRY LAB (0-9-3)
PREREQUISITES: MAS 211, 251, and 252.
This course provides practical application of geographically specific masonry techniques. Developing skill in laying and installing panel construction, acid brick, refractories, structural glazed tile, glass block, passive solar design, barrier walls, and hollow metal frames is emphasized. On completion, students should be able to perform appropriate techniques for selecting, laying, and installing geographically specific masonry applications to entry-level standards. Non-degree credible.

MAS 271. BASIC CEMENT MASONRY LAB (0-9-3)
This course introduces the student to basic concrete masonry, including the use of various tools, estimating, and placing concrete. Correct methods used in placing concrete, finishing concrete, placing forms, and curing properly for concrete tools are emphasized. On completion, students should demonstrate entry-level skills for placing, finishing, estimating, and curing concrete. Non-degree credible.

MAS 272. ADVANCED CEMENT MASONRY LAB (0-9-3)
PREREQUISITE: MAS 271.
This course continues skill building in concrete masonry. Correct methods used in placing concrete, finishing concrete, placing forms, and maintaining concrete tools are emphasized. On completion, students should be able to demonstrate increased speed and accuracy in building structures covered in this course. Non-degree credible.

MATHEMATICS (MTH)

MTH 090. BASIC MATHEMATICS (3-0-3)
This developmental course reviews arithmetical principles and computations and is designed to increase the student’s mathematical proficiency for selected curriculum entrance. Non-degree credible.

MTH 091/092. DEVELOPMENTAL ALGEBRA I-II (4-0-4)
PREREQUISITE: MTH 090 or appropriate mathematics placement score.
This sequence of developmental courses provides a review of arithmetic and algebraic skills designed to provide sufficient mathematical proficiency necessary for entry into Intermediate College Algebra. Non-degree credible.

MTH 098. ELEMENTARY ALGEBRA (4-0-4)
PREREQUISITE: MTH 090 or appropriate mathematics placement score.
This course is a review of fundamental arithmetic and algebra operations. Topics include the numbers of ordinary arithmetic and their properties, integers and rational numbers, solving equations, polynomials and factoring, and an introduction to systems of equations and graphs. Non-degree credible.

MTH 100. INTERMEDIATE COLLEGE ALGEBRA (3-0-3)
PREREQUISITE: MTH 092, or MTH 098, or appropriate mathematics placement score.
This course provides a study of algebraic techniques, such as linear equations and inequalities, quadratic equations, systems of equations, and operations with exponents and radicals. Functions and relations are introduced and graphed with special emphasis on linear and quadratic functions. This course does not apply toward the general core requirement for mathematics.

MTH 110. FINITE MATHEMATICS (3-0-3)
This course is intended to give an overview of topics in finite mathematics, together with their applications, and is primarily for students who are not majoring in science, engineering, commerce, or mathematics (i.e., students who are not required to take Calculus). This course will draw on and significantly enhance the student’s arithmetic and algebraic skills. It includes sets, counting, permutations, combinations, basic probability (including Baye’s Theorem), introduction to statistics (including work with Binomial Distributions and Normal Distributions), and matrices and their applications to Markov chains and decision theory. Additional topics may include symbolic logic, linear models, linear programming, and the simplex method and applications.

MTH 112. PRECALCULUS ALGEBRA (3-0-3)
PREREQUISITE: All core mathematics courses in Alabama must have as a minimum prerequisite high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score. An alternative is that the student successfully pass Intermediate College Algebra with a grade of C or higher.
This course is intended to give an overview of topics in finite mathematics, together with their applications, and is primarily for students who are not majoring in science, engineering, commerce, or mathematics (i.e., students who are not required to take Calculus). This course will draw on and significantly enhance the student’s arithmetic and algebraic skills. It includes sets, counting, permutations, combinations, basic probability (including Baye’s Theorem), introduction to statistics (including work with Binomial Distributions and Normal Distributions), and matrices and their applications to Markov chains and decision theory. Additional topics may include symbolic logic, linear models, linear programming, and the simplex method and applications.

MTH 113. PRECALCULUS TRIGONOMETRY (3-0-3)
PREREQUISITE: A minimum prerequisite of high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score is required. An alternative is that the student successfully pass MTH 112 with a grade of C or higher.
This course includes the study of trigonometric (circular functions) and inverse trigonometric functions, and includes extensive work with trigonometric identities and equations. The course also includes vectors, complex numbers, DeMoivre’s Theorem, and polar coordinates. Additional topics may include conic sections, sequences, and using matrices to solve linear systems.
MTH 115. PRECALCULUS ALGEBRA AND TRIGONOMETRY (4-0-4)
PREREQUISITE: A minimum prerequisite of high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score is required. An alternative is that the student successfully pass MTH 100 with a grade of C or higher and receive permission from the department director.
This course is a one-semester combination of Precalculus Algebra and Precalculus Trigonometry intended for superior students. The course includes the algebra of functions (including polynomial, rational, exponential, and logarithmic functions), systems of equations and inequalities, quadratic inequalities, and the binomial theorem as well as the study of trigonometric (circular functions), and inverse trigonometric functions. It also includes extensive work with trigonometric identities and trigonometric equations, vectors, complex numbers, DeMoivre’s Theorem, and polar coordinates.

MTH 116. MATHEMATICAL APPLICATIONS (3-0-3)
PREREQUISITE: MTH 090 or appropriate mathematics placement score.
This course provides practical mathematics applications and includes selected topics from consumer math and algebra. Some topics included are integers, percentages, interest and proportion, metric system, probability, linear equations, and problem solving. This is a terminal course designed for students seeking an AAS degree and does not meet the general core requirement for mathematics.

MTH 120. CALCULUS AND ITS APPLICATIONS (3-0-3)
PREREQUISITE: A minimum prerequisite of high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score is required. An alternative is that the student successfully pass MTH 112 with a C or higher.
This course is intended to give a broad overview of calculus and is taken primarily by students majoring in Commerce and Business Administration. It includes differentiation and integration of algebraic, exponential, and logarithmic functions and applications to business and economics. The course should include functions of several variables, partial derivatives (including applications), Lagrange Multipliers, L'Hopital’s Rule, and multiple integration (including applications).

MTH 125. CALCULUS I (4-0-4)
PREREQUISITE: A minimum prerequisite of high school Algebra I, Geometry, and Algebra II with an appropriate mathematics placement score is required. An alternative is that the student successfully pass MTH 113 or MTH 115 with a C or higher.
This is the first of three courses in the basic calculus sequence taken primarily by students in science, engineering, and mathematics. Topics include the limit of a function; the derivative of algebraic, trigonometric, exponential, and logarithmic functions; and the definite integral and its applications. This is the second of three courses in the basic calculus sequence. Topics include vectors in the plane and in space, lines and planes in space, applications of integration (such as volume, length, and work, and average value), techniques of integration, infinite series, polar coordinates, and parametric equations.

MTH 131. MATHEMATICS IN GENERAL EDUCATION I (3-0-3)
This course is designed for general education and all students in education programs except those who will concentrate on science or mathematics. The structure of the number system from integers to real numbers, logic, numeration systems, prime numbers, basic concepts of algebra, elementary probability and statistics, graphs, informal geometry, and the metric system are emphasized. This course does not apply toward the general core requirement for mathematics.

MTH 132. MATHEMATICS IN GENERAL EDUCATION II (3-0-3)
PREREQUISITE: MTH 131 or appropriate mathematics placement score.
This course is a continuation of MTH 131. It does not apply toward the general core requirement for mathematics.

MTH 227. CALCULUS III (4-0-4)
PREREQUISITE: MTH 126.
This is the third of three courses in the basic calculus sequence. Topics include vector functions, functions of two or more variables, partial derivatives (including applications), quadric surfaces, multiple integration, and vector calculus (including Green’s Theorem, Curl and Divergence, surface integrals, and Stokes’ Theorem).

MTH 237. LINEAR ALGEBRA (3-0-3)
PREREQUISITE: MTH 126.
This course introduces the basic theory of linear equations and matrices, real vector spaces, bases and dimension, linear transformations and matrices, determinants, eigenvalues and eigenvectors, inner product spaces, and diagonalization of symmetric matrices. Additional topics may include quadratic forms and use of matrix methods to solve systems of linear differential equations.

MTH 228. APPLIED DIFFERENTIAL EQUATIONS I (3-0-3)
COREQUISITE: MTH 227.
This course introduces numerical methods, qualitative behavior of first order differential equations, techniques for solving separable and linear equations analytically, and applications to various models (e.g., populations, motion, chemical mixtures, etc.). The course provides techniques for solving higher order linear differential equations with constant coefficients (general theory, undetermined coefficients, reduction of order and the method of variation of parameters), with emphasis on interpreting the behavior of the solutions, and applications to physical models whose governing equations are of higher order. The Laplace transform as a tool for the solution of initial value problems whose n-homogeneous terms are discontinuous is emphasized.

MTH 265. ELEMENTARY STATISTICS (3-0-3)
PREREQUISITE: MTH 100 or appropriate mathematics placement score.
This course provides an introduction to methods of statistics, including the following topics: sampling, frequency distributions, measures of central tendency, graphic representation, reliability, hypothesis testing, confidence intervals, analysis, regression, estimation, and applications. Probability, permutations, combinations, binomial theorem, random variables, and distributions may be included.

VOCATIONAL/TECHNICAL MATHEMATICS (MAH)

MAH 101. VOCATIONAL/TECHNICAL MATHEMATICS I (2-2-3)
PREREQUISITE: Satisfactory placement score.
This course is intended to give a broad overview of calculus and is taken primarily by students majoring in Commerce and Business Administration. It includes differentiation and integration of algebraic, exponential, and logarithmic functions and applications to business and economics. The course should include functions of several variables, partial derivatives (including applications), Lagrange Multipliers, L’Hospital’s Rule, and multiple integration (including applications).

MAH 105. MATH FOR NURSING (2-2-3)
meet practical nursing program requirements. Topics include a review of basic arithmetic, metric system conversions, ration and proportion, and
conversions among and between the metric, apothecaries, and household unit systems and intravenous infusion rates as well as ethical, cultural, and legal aspects of accurate mathematic skills. On completion, students will demonstrate proficiency in calculating drug dosages and IV infusion rates for adults and children. *Non-degree credible.*

**MEDICAL ASSISTING (MAT)**

**MAT 101. MEDICAL TERMINOLOGY (3-0-3)**  
**PREREQUISITE:** Instructor permission.  
This course is designed for medical assistants, student nurses, and others in medically related fields. The course focuses on the more common prefixes, roots, and suffixes used to construct medical terms with these word parts to determine the meanings of new or unfamiliar terms. Students will learn a system of word building that will enable them to interpret medical terms. **CORE**

**MAT 102. MEDICAL ASSISTING THEORY I (3-0-3)**  
**PREREQUISITE:** Instructor permission.  
A description of anatomical descriptors and the cell introduces students to and serves as an overview of the body's systems. The structure and function of the nervous, sensory, integumentary, muscular, skeletal, respiratory, and cardiovascular systems are taught with the diseases related to the systems presented. On completion, students should be able to demonstrate a basic working knowledge of these body systems. **CORE**

**MAT 103. MEDICAL ASSISTING THEORY II (3-0-3)**  
**PREREQUISITE:** Instructor permission.  
The structure and function of the digestive, urinary, reproduction, endocrine, and immune systems are presented. Disease processes that are related to these systems are included. Basic concepts of reproduction, growth and development, and nutrition are taught. On completion, students should be able to demonstrate a basic working knowledge of these body systems. **CORE**

**MAT 111. CLINICAL PROCEDURES I FOR THE MEDICAL ASSISTANT (2-3-3)**  
**PREREQUISITE:** Instructor permission.  
This course includes instruction in clinical examining room procedures. Topics include asepsis, infection control, assisting with examinations, and patient education. On completion, students will be able to demonstrate competence in exam room procedures. **CORE**

**MAT 120. MEDICAL ADMINISTRATIVE PROCEDURES I (2-3-3)**  
**PREREQUISITES:** MAT 101 and college-level computer course or instructor permission.  
This course introduces medical office administrative procedures. Topics include appointment scheduling, telephone techniques, managing the physician's schedule, handling mail, preparing and maintaining medical records, and patient orientation. On completion, students should be able to perform basic medical secretarial skills. **CORE**

**MAT 121. MEDICAL ADMINISTRATIVE PROCEDURES II (2-3-3)**  
**PREREQUISITE:** MAT 120 or instructor permission.  
This course is a continuation of Medical Administrative Procedures I. Topics include physical plant maintenance, equipment and supplies, inventories, liability coverage, medical economics, and an introduction to insurance procedures. On completion, students should be able to manage economics of the medical office and supervise personnel. **CORE**

**MAT 122. BASIC CONCEPTS OF INTERPERSONAL RELATIONS (3-0-3)**  
**PREREQUISITE:** Instructor permission.  
This course is designed to assist students in health occupations with learning basic principles of human behavior. Activities for developing effective interpersonal relations are included. Exploration of self-concept and the negative effect of poor self-concept as they relate to one's health are presented. On completion, students should be able to apply these concepts to the work setting.
MAT 125. LABORATORY PROCEDURES I FOR THE MEDICAL ASSISTANT (2-3-3)
PREREQUISITE: Instructor permission.
This course provides instruction in basic laboratory techniques used by the medical assistant. Topics include lab safety; quality control; collecting and processing specimens; and performing selective diagnostic tests such as a CBC, screening and follow-up of test results, and OSHA/CLIA regulations. On completion, students should be able to perform basic lab tests/skills based on course topics. CORE

MAT 128. MEDICAL LAW AND ETHICS FOR THE MEDICAL ASSISTANT (3-0-3)
PREREQUISITE: Instructor permission.
This course provides basic information related to the legal relationship of patient and physician. Topics covered include creation and termination of contracts, implied and informed consent, professional liability, invasion of privacy, malpractice, tort, liability, breach of contract, and the Medical Practice Act. On completion, students should be able to recognize ethical and legal implications of these topics as they relate to the medical assistant. CORE

MAT 130. MEDICAL OFFICE COMMUNICATION (3-0-3)
PREREQUISITE: Instructor permission.
This course prepares the student to communicate with patients and other allied health professionals whom he/she may come in contact within the medical setting. Emphasis is placed on verbal, nonverbal, written communication skills, and medical document formatting. On completion, students should be able to demonstrate an understanding of the skills needed for effective communication in the medical setting.

MAT 200. MANAGEMENT OF OFFICE EMERGENCIES (2-0-2)
PREREQUISITE: Instructor permission.
This course is designed to instruct students in handling emergencies in the medical office. Emergencies presented will include cardiovascular emergencies, diabetic emergencies, seizures, syncope, hyperthermia and hypothermia, shock, musculoskeletal emergencies, and poisoning. On completion, students should be able to recognize emergency situations and take appropriate actions.

MAT 220. MEDICAL OFFICE INSURANCE (2-3-3)
PREREQUISITES: MAT 101, 121, and college-level computer course or instructor permission.
This course emphasizes insurance procedures with advanced diagnostic and procedural coding in the outpatient facility. Study will include correct completion of insurance forms, ICD-9, and CPT coding. On completion, students should be able to demonstrate proficiency in coding for reimbursements. CORE

MAT 222. MEDICAL TRANSCRIPTION I (1-3-2)
PREREQUISITES: MAT 101, college-level computer course, acceptable keyboarding speed, or instructor permission.
This course introduces dictating equipment and typical medical dictation. Correct punctuation, capitalization, and spelling are emphasized. On completion, students should be able to transcribe physician dictation. CORE

MAT 223. MEDICAL TRANSCRIPTION II (1-3-2)
PREREQUISITES: MAT 101, college-level computer course, acceptable keyboarding speed, or instructor permission. COREQUISITE: MAT 222.
This course provides additional skills required to competently transcribe medical dictation. Efficient use of equipment, references, editing, proofreading, and various formats are emphasized. On completion, students should be able to demonstrate competence in transcribing physician dictation.

MAT 227. SPECIAL TOPICS IN MEDICAL ASSISTING (1-0-1)
PREREQUISITE: Instructor permission.
This course includes specialized study on current topics and issues in the field of medical assisting. Personal and occupational responsibilities and developing problem-solving skills encountered in the medical office are emphasized. On completion, students should be able to apply problem-solving skills to medical office situations.

MAT 228. MEDICAL ASSISTANT REVIEW COURSE (1-0-1)
PREREQUISITE: Instructor permission.
This course provides instruction in vital signs and special examination procedures. Interviewing skills, appropriate triage, and preparing patients for diagnostic procedures are emphasized. On completion, students should be able to assist with special procedures. CORE

MAT 229. MEDICAL ASSISTANT PRECEPTORSHIP (0-15-3)
PREREQUISITES: MAT 111, 125, 200, 211, 215, 216, 222, plus 30 additional credit hours in MAT program, or instructor permission.
This course provides an opportunity to apply clinical, laboratory, and administrative skills in a physician's office, clinic, or outpatient facility. The student will gain experience in applying knowledge learned in the classroom, enhancing competence, and strengthening professional communications and interactions. On completion, students should be able to perform as an entry-level Medical Assistant. CORE

MAT 239. PHLEBOTOMY PRECEPTORSHIP (0-15-3)
PREREQUISITES: MAT 101, 102, 128, 215, and acceptable computer course, or instructor permission.
This course provides an opportunity to apply phlebotomy techniques in the physician's clinic and the hospital. Training individuals to properly collect and handle blood specimens for laboratory testing and to interact with health care personnel, patients, and the general public are emphasized. On completion, students should be prepared for entry-level phlebotomy and to sit for the Phlebotomy Technician Examination (ASCP).

MAT 242. TRANSCRIPTION PRECEPTORSHIP (0-15-3)
PREREQUISITE: Instructor permission.
This course provides an opportunity to apply transcription skills to the physician's office or the hospital. Students will gain experience in applying knowledge learned in transcription classroom to medical office dictation. On completion, students should be able to demonstrate entry-level transcription skills.
MUSIC ENSEMBLES (MUL) (0-2-4-1-2)  
PREREQUISITE: Instructor permission.  
These courses provide opportunities for students to participate in a performing ensemble. Rehearsing and performing literature appropriate to the mission and goals of the group are emphasized. On completion, students should be able to effectively participate in performances presented by the ensemble. All ensembles may be repeated for credit.  

180-81; 280-81  CHORUS I, II, III, IV  
182-83; 282-83  VOCAL ENSEMBLE I, II, III, IV  
184-85; 284-85  JAZZ/SHOW CHOIR I, II, III, IV  
192-93; 292-93  INSTRUMENTAL ENSEMBLE I, II, III, IV  
196-97; 296-97  JAZZ/SHOW BAND I, II, III, IV  
198-99; 298-99  MARCHING BAND I, II, III, IV  

Group instruction is available in voice and piano for students with little or no previous training. Emphasis is placed on rudiments of music, basic performance techniques, and general musicianship. On completion of one or a sequence of courses, students should be able to demonstrate a basic proficiency in singing or playing and a knowledge of music fundamentals. No prerequisite.  

101-02; 201-02  CLASS PIANO I, II, III, IV  
111-12; 211-12  CLASS VOICE I, II, III, IV  

MUSIC PERFORMANCE (MUP) (0-1½-1-1-2)  
PREREQUISITE: Instructor permission.  
Individual performance instruction is available in keyboard instruments, voice, strings, woodwinds, brass, percussion, and fretted instruments. Developing technique, repertoire, and performance skills commensurate with the student's education goals is emphasized. Students are required to practice a minimum of five hours per week for each credit hour. On completion, students should be able to effectively perform assigned repertoire and technical studies in an appropriate performance evaluation setting.  

MUS 111. MUSIC THEORY I (3-1-4)  
PREREQUISITE: MUS 110 or suitable placement score or instructor permission. COREQUISITE: MUS 113, if ear training lab is a separate course.  
This course introduces diatonic harmonic practices in the Common Practice Period and introduces students to 20th century techniques through analysis, writing, sight singing, dictation, and keyboard skills.  

MUS 112. MUSIC THEORY II (3-1-4)  
PREREQUISITE: MUS 111. COREQUISITE: MUS 114, if ear training lab is a separate course.  
This course completes the study of diatonic harmonic practices in the Common Practice Period and introduces simple musical forms. Topics include principles of voice leading and harmonic progression. On completion, students should be able to demonstrate a basic competency using diatonic harmony through analysis, writing, sight singing, dictation, and keyboard skills.  

MUS 211. MUSIC THEORY III (3-1-4)  
PREREQUISITE: MUS 112. COREQUISITE: MUS 213, if ear training lab is a separate course.  
This course introduces chromatic harmonic practices in the Common Practice Period. Topics include secondary functions, modulatory techniques, and binary and ternary forms. On completion, students should be able to demonstrate competence using chromatic harmony through analysis, writing, sight singing, dictation, and keyboard skills.  

MUS 212. MUSIC THEORY IV (3-1-4)  
PREREQUISITE: MUS 211. COREQUISITE: MUS 214, if ear training lab is a separate course.  

101-02; 201-02  PIANO I, II, III, IV  
103-04; 203-04  ORGAN I, II, III, IV  
111-12; 211-12  VOICE I, II, III, IV  
127-28; 227-28  DOUBLE BASS I, II, III, IV  
135-36; 235-36  GUITAR I, II, III, IV  
145-46; 245-46  SAXOPHONE I, II, III, IV  
161-62; 261-62  TRUMPET I, II, III, IV  
171-72; 271-72  TROMBONE I, II, III, IV  
175-76; 275-76  TUBA I, II, III, IV  
181-82; 281-82  PERCUSSION I, II, III, IV  

MUSIC (MUS)  

MUS 101. MUSIC APPRECIATION (3-0-3)  
This course is designed for non-music majors and requires no previous musical experience. It is a survey course that incorporates several modes of instruction, including lecture, guided listening, and similar experiences involving music. The course covers a minimum of three stylistic periods to provide a multicultural perspective, and includes both vocal and instrumental genres. On completion, students should be able to demonstrate knowledge of music fundamentals, aesthetic/ stylistic characteristics of historical periods, and an aural perception of style and structure in music.  

MUS 110. BASIC MUSICIANSHIP (3-0-3)  
PREREQUISITE: MUS 099, or suitable placement score, or instructor permission.  
This course is designed to provide rudimentary music knowledge and skills for the student with a limited music background. Topics include a study of notation, rhythm, scales, keys, intervals, and chords and basic sight-singing and ear-training skills. On course completion, students should be able to read and understand musical scores and demonstrate basic sight-singing and ear-training skills for rhythm, melody, and harmony.  

OFFICE ADMINISTRATION (OAD)  

OAD 101. BEGINNING KEYBOARDING (3-0-3)  
This course is designed to enable use of the touch method of keyboarding through classroom instruction and outside lab. Speed and accuracy in keying alphabetic, symbol, and numeric information using the typewriter or microcomputer keyboard are emphasized. On course completion, the student should be able to demonstrate proper technique and an acceptable rate of speed and accuracy in producing basic business documents such as letters and reports.  

OAD 103. INTERMEDIATE KEYBOARDING (3-0-3)  
PREREQUISITE: OAD 101 or instructor permission.  
This course is designed to increase speed and accuracy using the touch method of keyboarding through classroom instruction and outside lab. Production of business documents such as memoranda, letters, reports, tables, and outlines is emphasized. On course completion, the student should be able to demonstrate proficiency and an acceptable rate of speed and accuracy in producing business documents.  

OAD 104. ADVANCED KEYBOARDING (3-0-3)  
PREREQUISITE: OAD 103 or instructor permission.  
This course is designed to continue development of speed and accuracy using the touch method of keyboarding through classroom instruction and outside lab. Production of business documents using decision-making skills is emphasized. On course completion, the student should
be able to demonstrate proficiency and an acceptable rate of speed and accuracy in producing high-quality business documents.

OAD 125. WORD PROCESSING (3-0-3)
PREREQUISITE: OAD 101 or instructor permission.
This course is designed to provide basic word processing skills through classroom instruction and outside lab. Use of software features to create, edit, and print common office documents is emphasized. On course completion, the student should be able to demonstrate the ability to use industry-standard software to generate appropriately formatted, accurate, and attractive business documents such as memos, letters, and reports.

OAD 126. ADVANCED WORD PROCESSING (3-0-3)
PREREQUISITE: OAD 125 or instructor permission.
This course is designed to increase proficiency in using advanced word processing functions through classroom instruction and outside lab. Use of industry-standard software to maximize productivity is emphasized. On course completion, the student should be able to demonstrate ability to generate complex documents such as forms, newsletters, and multi-page documents.

OAD 133. BUSINESS COMMUNICATIONS (3-0-3)
PREREQUISITE: OAD 101 or instructor permission.
This course is designed to provide skills necessary to communicate effectively. Application of communication principles to produce clear, correct, and logically organized business communications is emphasized. On course completion, the student should be able to demonstrate effective communication techniques in written, oral, and nonverbal communications.

OAD 138. RECORDS/INFORMATION MANAGEMENT (3-0-3)
This course is designed to provide knowledge about managing office records and information. Basic filing procedures, methods, systems, supplies, equipment, and modern technology used in creation, protection, and disposition of records stored in a variety of forms are emphasized. On course completion, the student should be able to perform basic filing procedures.

ORI 104. WORKKEYS ASSESSMENT AND ADVISEMENT (1-0-1)
PREREQUISITE: As required by program.
This course provides entering students with an introduction to the ACT WorkKeys System. Students will complete WorkKeys assessments in the areas of Applied Mathematics, Reading for Information, and Locating Information. On completion, students will be advised of their performance on the assessments and of the methods available to improve their individual performance levels. Course may be repeated for credit to determine performance levels following remediation.

ORT 100. ORIENTATION FOR CAREER STUDENTS (1-0-1)
PREREQUISITE: As required by program.
This course is designed to introduce the beginning student to college. College policies and regulations are covered as well as stress management, resume preparation, job application procedures, and employment interviewing techniques. Non-degree creditible.

PHILOSOPHY (PHL)

PHL 206. ETHICS AND SOCIETY (3-0-3)
This course involves the study of ethical issues that confront individuals in the course of daily living. Fundamental questions of right and wrong, human rights, and conflicting obligations are the focus. On course completion, the student should be able to understand and be prepared to make decisions in life regarding ethical issues.

PHYSICAL EDUCATION (PED)

PED 103. WEIGHT TRAINING—BEGINNING (0-2-1)
This course introduces the basics of weight training. Developing muscular strength, endurance, and tone is emphasized. On completion, students should be able to establish and implement a personal weight training program.

OAD 218. OFFICE PROCEDURES (3-0-3)
PREREQUISITE: OAD 103.
This course is designed to develop an awareness of the responsibilities and opportunities of the office professional through classroom instruction and outside lab. Current operating functions, practices and procedures, work habits, attitudes, oral and written communications, and professionalism are emphasized. On course completion, the student should be able to demonstrate the ability to effectively function in an office support role.

OAD 232. THE ELECTRONIC OFFICE (3-0-3)
PREREQUISITE: OAD 126.
This course is designed to develop skill in the use of integrated software through classroom instruction and outside lab. Use of computerized equipment, software, networking, and communications technology is emphasized. On course completion, the student should be able to satisfactorily perform a variety of office tasks using current technology.

ORIENTATION (ORI/ORT)

ORI 101. ORIENTATION TO COLLEGE (1-0-1)
PREREQUISITE: As required by program.
This course aids new students in their transition to the institution, exposes new students to the broad educational opportunities of the institution, and integrates new students into the life of the institution.

ORI 103. MASTER STUDENT (2-0-2)
This course helps students develop practical knowledge and skills toward a successful college experience, both academically and personally. Topics include: time, reading, memory, notes, tests, diversity, thinking, writing, relationships, health, and career planning.

PED 104. WEIGHT TRAINING—INTERMEDIATE (0-2-1)
PREREQUISITE: PED 103 or instructor permission.
This course provides advanced levels of weight training. Meeting individual training goals and addressing weight training needs and interests are emphasized. On completion, students should be able to establish and implement an individualized advanced weight training program.

PED 105. PERSONAL FITNESS (0-2-1)
This course is designed to provide the student with information that facilitates participation in a personally developed fitness program. Topics include cardiovascular fitness, muscular strength and endurance, flexibility, and body composition.

PED 118. GENERAL CONDITIONING—BEGINNING (0-2-1)
This course provides an individualized approach to general conditioning using five major components. The scientific basis for setting up and engaging in personalized physical fitness and conditioning programs is emphasized. On completion, students should be able to set up and implement an individualized physical fitness and conditioning program.

PED 119. GENERAL CONDITIONING—INTERMEDIATE (0-2-1)
PREREQUISITE: PED 118 or instructor permission.
This course is an intermediate-level fitness and conditioning program class. Topics include specific exercises contributing to fitness and the role exercise plays in developing body systems. On course completion, students should be able to implement and evaluate an individualized physical fitness and conditioning program.

PED 200. FOUNDATIONS OF PHYSICAL EDUCATION (3-0-3)
In this course, the history, philosophy, and objectives of health, physical education, and recreation are studied, with emphasis on the
physiological, sociological, and psychological values of physical education. It is required of all physical education majors.

The following varsity sports may be repeated for credit up to a maximum of six (6) credit hours:

PED 252. VARSITY BASEBALL (0-2-1)
PREREQUISITE: Instructor permission.
This course offers advanced baseball techniques. Refining skills and developing more advanced strategies and techniques are emphasized. On course completion, students should be able to play baseball at a competitive level.

PED 254. VARSITY SOFTBALL (0-2-1)
PREREQUISITE: Instructor permission.
This course introduces fundamental skills and rules of softball. Proper techniques and strategies for playing softball are emphasized. On course completion, students should be able to play competitive softball.

PHYSICAL GEOGRAPHY (GEO)

GEO 100. WORLD REGIONAL GEOGRAPHY (3-0-3)
This course surveys various countries and major regions of the world with respect to location and landscape, world importance, political status, population, type of economy, and external and internal organizational problems and potentials.

GEO 101. PRINCIPLES OF PHYSICAL GEOGRAPHY I (3-2-4)
This course is the first in a two-part sequence including topics such as weather and climate relative to the earth and relationships between the earth and sun. Laboratory is required.

GEO 102. PRINCIPLES OF PHYSICAL GEOGRAPHY II (3-2-4)
This course is the second in a two-part sequence including topics such as land forms, landscapes, soil, and vegetation of the earth. Laboratory is required.

PTA 201. PTA SEMINAR (2-0-2)
PREREQUISITE: PTA 200.
This course is a continuing study of issues and trends in PT practice. Issues such as licensure, job skills, board exam review, practitioner roles, and legal and ethical issues are emphasized. On course completion, the student should have acquired necessary skills for transition from student to practitioner. CORE

PTA 202. PTA COMMUNICATION SKILLS (2-0-2)
PREREQUISITE: Program admission.
This course is the study of verbal and non-verbal communication and documentation in health care. Terminology, format, computer use, reimbursement, interpersonal communication, and legal issues are emphasized. On course completion, students should be able to discuss and demonstrate communication methods for achieving effective interaction with patients, families, the public, and other health care providers.

PTA 204. PTA FORUM I (1-0-1)
PREREQUISITE: Program admission.
This course consists of independent visits to relevant clinical and related sites and activities. Students observe and assist with sports and recreational activities and visit specialized clinical sites. On course completion, the student should have broad exposure to activities in which physically challenged individuals participate and specialized clinical areas.

PTA 210. INTRODUCTION TO PHYSICAL THERAPY CLINIC (0-5-1)
PREREQUISITE: Program admission.
This clinical course is designed to introduce the practice of physical therapy in the clinical setting. Emphasis is on student observation of techniques in the clinic that have been taught in the classroom and will entail on-going communication among the clinical instructor, student, and course coordinator. On course completion, the student should be able to demonstrate practical application of basic physical therapist assistant skills.

PTA 220. FUNCTIONAL ANATOMY AND KINESIOLOGY (3-0-3)
PREREQUISITE: Program admission.
This course provides an in-depth, clinically oriented study of functional anatomy. The musculoskeletal system, nervous system, and study of human movement are emphasized. On course completion, the student should be able to identify specific anatomical structures and analyze human movements. CORE

PTA 221. KINESIOLOGY LAB (0-3-1)
PREREQUISITE: Program admission.
This laboratory course allows for a hands-on appreciation of functional anatomy and kinesiology. Emphases may include muscle and joint function, ROM/strength testing, palpation skills, and exercise concepts. On course completion, the student should be able to integrate content areas into an understanding of normal gait, posture, and movement patterns.

PTA 222. KINESIOLOGY AND THERAPEUTIC LAB (0-6-2)
PREREQUISITE: Program admission.
This laboratory course allows for a hands-on appreciation of anatomical structures and kinesiological concepts as they relate to therapeutic exercise. Emphases may include muscle and joint function, testing, applications, and therapeutic exercise. On course completion, the student should be able to integrate content areas into an understanding of normal human movement.

PTA 230. NEUROSCIENCE (2-0-2)
PREREQUISITE: Program admission.
This course provides an overview of the neuroanatomy of the CNS and PNS as it relates to treatment necessary for patients with dysfunctions of these systems. Emphases may include structure and function of the nervous system, neurophysiological concepts, human growth and development, and neurological dysfunctions. On course completion, the student should be able to identify and discuss specific anatomical structures and function of the nervous system as well as basic concepts of human growth and development and identify neurological pathologies. CORE

PTA 231. REHABILITATION TECHNIQUES (0-6-2)
PREREQUISITES: Program admission and instructor permission. This course allows for hands-on appreciation of advanced rehabilitation techniques. Orthopedic and neurological treatment techniques, therapeutic exercise procedures, and analysis and treatment of pathological gait are emphasized. On course completion, the student should be able to demonstrate an understanding of advanced rehabilitation techniques appropriate to orthopedic and neurological dysfunctions. CORE

PTA 232. ORTHOPEDICS FOR THE PTA (2-0-2)
PREREQUISITE: Program admission. This course provides the student with an overview of orthopedic conditions seen in physical therapy. The study of orthopedic conditions and appropriate physical therapy intervention and a review of related anatomical structures are emphasized. On course completion, the student should be able to discuss PT interventions for common orthopedic conditions.

PTA 240. PHYSICAL DISABILITIES 1 (2-0-2)
PREREQUISITE: Program admission. This course presents a body systems approach to etiology, pathology, signs/symptoms, and treatment of conditions seen in PT. Emphases may include conditions most commonly treated in physical therapy. On course completion, the student should be able to discuss basic pathological processes, treatment options, and prognoses of conditions studied. CORE

PTA 241. PHYSICAL DISABILITIES II (2-0-2)
PREREQUISITE: PTA 240.

PTA 268. CLINICAL PRACTICUM (0-25-5)
PREREQUISITES: Program admission and instructor permission. This clinical education experience provides practice in the health care environment, using entry-level skills attained in previous classroom instruction. The course entails on-going communication among clinical instructor, student, and course coordinator. On course completion, the student should be able to demonstrate entry-level competency in skills necessary for functioning as a physical therapist assistant. CORE

PTA 290. THERAPEUTIC EXERCISE (0-3-1)
PREREQUISITE: Program admission. This lab course provides exercise techniques commonly used in PTA practice. It may include aquatic, isometric, isotonic, isokinetic, plyometric, Swiss ball, and aerobic exercises. On course completion, the student should have entry-level skills in exercise application.

PHYSICS (PHY)

PHY 201. GENERAL PHYSICS I - TRIGONOMETRY BASED (3-2-4)
PREREQUISITE: MTH 113 or equivalent. This course is designed to provide general physics at a level that assures previous exposure to college algebra and basic trigonometry. Specific topics include mechanics, properties of matter and energy, thermodynamics, and periodic motion. Laboratory is required.

PHY 202. GENERAL PHYSICS II - TRIGONOMETRY BASED (3-2-4)
PREREQUISITE: PHY 201. This course is designed to provide general physics using college algebra and basic trigonometry. Specific topics include wave motion, sound, light, optics, electrostatics, circuits, magnetism, and modern physics. Laboratory is required.

PHY 213. GENERAL PHYSICS WITH CALCULUS I (3-2-4)
PREREQUISITE: MTH 125 or permission. This course provides a calculus-based treatment of the principle subdivisions of classical physics: mechanics and energy. Laboratory is required.

PHY 214. GENERAL PHYSICS WITH CALCULUS II (3-2-4)
PREREQUISITE: PHY 213. This course provides a calculus-based study in classical physics and includes simple harmonic motion, waves, sound, light, optics, electricity and magnetism. Laboratory is required.

PLUMBING (PLB)

PLB 111. INTRODUCTION TO PLUMBING (3-0-3)
COREQUISITE: PLB 112. This course covers fundamental plumbing principles, practices, and history. Topics include basic plumbing principles, safety, job-seeking skills, blueprint reading, plumber’s math, shop orientation, and College policies. On completion, the student should be able to seek employment, understand basic plumbing principles, read and interpret blueprints, work safely, and use formulas to solve plumbing problems involving measurement and layouts. Non-degree credible. CORE

PLB 112. PLUMBING APPLICATIONS (0-9-3)
COREQUISITE: PLB 111. This course in an application of PLB 111, Introduction to Plumbing. Topics include orientation, basic plumbing principles, safety, history, plumber’s math, job-seeking skills, drawing interpretation and creation.
PLB 113. PIPES AND FITTINGS (3-0-3)
COREQUISITE: PLB 114.
This course includes the theory of joining pipe and fittings. Topics include methods of joining pipe and fittings, selection and use of power tools, and methods of securing piping. On completion the student should be able to identify pipe and fittings, identify tools, properly care for tools, and identify various types of pipe securing devices. Non-degree credible. CORE

PLB 114. JOINING PIPES AND FITTINGS (0-9-3)
COREQUISITE: PLB 113.
This course covers proper methods for identifying and joining all types of pipes and fittings, hanging and securing pipe and using materials and tools. Emphasis is on plumbing materials, tools, suppliers, equipment, and methods. On completion, the student should be able to join various pipe and fittings. Non-degree credible. CORE

PLB 115. PRESSURE AND NON-PRESSURE SYSTEMS (3-0-3)
This course covers pressure and non-pressure systems, including piping for potable water, drainage, waste, vents, gas, air, and water. Topics include types of plumbing systems and system design and size. On completion, the student should be knowledgeable of system functions. Non-degree credible. CORE

PLB 116. PRESSURE AND NON-PRESSURE SYSTEMS APPLICATIONS (0-9-3)
COREQUISITE: PLB 115.
This course is an application of PLB 115, Pressure and Non-Pressure Systems. Emphasis is on the different kinds of plumbing systems and the design, installation, and function. On completion, the student should be able to rough-in plumbing systems. Non-degree credible. CORE

PLB 117. PLUMBING CODES (3-0-3)
COREQUISITE: PLB 118.
This course includes reading and interpreting the Southern Standard Code (SBCCI), local codes, and general regulations. Emphasis is on the Southern Standard Code (SBCCI), local codes, and general regulations for plumbing. Emphasis is on fixture unit value, system sizing, minimum plumbing requirements, and construction of pressure and non-pressure systems in accordance with state and local plumbing codes. Non-degree credible.

PLB 211. PLUMBING REPAIR AND INSTALLATION (3-0-3)
COREQUISITE: PLB 211.
This course is an application of PLB 211, Plumbing Repair and Installation. Topics include repairing and installing plumbing fixtures and choosing appropriate fixtures for the job. On completion, the student should be able to install new fixtures and remove, repair, and replace existing plumbing fixtures. Non-degree credible.

PLB 213. PROCESS PIPING (3-0-3)
COREQUISITE: PLB 214.
This course focuses on various piping procedures and systems used to transport materials for industrial processes. Topics include modern materials and installation techniques. On completion, the student should be able to identify and understand the technique of process piping installation, layout, and design. Non-degree credible.

PLB 214. PROCESS PIPING APPLICATIONS (0-9-3)
COREQUISITE: PLB 213.
This course is an application of PLB 213, Process Piping, including installation of process piping. On completion, the student should be able to install process piping. Non-degree credible.

PLB 217. PUMPS AND COMPRESSORS (3-0-3)
This course introduces students to pump and compressor equipment used in plumbing systems, including the use of mechanical means to move fluid through piping systems. On completion, the student should have the skills needed in selecting and installing pumps and compressors. Non-degree credible.

PLB 218. PUMP AND COMPRESSOR APPLICATIONS

PLB 218. CODE APPLICATIONS (0-9-3)
COREQUISITE: PLB 217.
This course is an application of PLB 117, Plumbing Codes. Emphasis is on fixture unit value, system sizing, minimum plumbing requirements, and construction of pressure and non-pressure systems according to code. On completion, the student should be able to calculate and construct pressure and non-pressure systems. Non-degree credible. CORE

PLB 120. SPECIAL PROJECT: PLUMBING CODE I (0-3-1)
This course is a continuation of PLB 120, Special Project: Plumbing Code I. Emphasis will be given to the application of basic principles, definitions, materials, facility requirements, and technical review. On completion, the student should be able to demonstrate the ability to correctly apply state and local plumbing codes. Non-degree credible.

PLB 121. SPECIAL PROJECT: PLUMBING CODE II (0-3-1)
This course enables students to read and follow schematics, diagrams, and rough-in sheets to install or repair plumbing fixtures, to troubleshoot, and to make repairs. Topics include installing, troubleshooting, repairing, removing, and replacing plumbing fixtures. On completion, the student should be able to make plumbing repairs and install plumbing fixtures. Non-degree credible.

POL 211. AMERICAN NATIONAL GOVERNMENT (3-0-3)
PREREQUISITE: Instructor permission.
This course surveys the background, constitutional principles, organization, and operation of the American political system. Topics include the U.S. Constitution, federalism, civil liberties, civil rights, political parties, interest groups, political campaigns, voting behavior, elections, the presidency, bureaucracy, Congress, and the justice system. On completion, students should be able to identify and explain relationships among the basic elements of American government and function as more informed participants of the American political system.

PRACTICAL NURSING (LPN)

LPN 104. PHARMACOLOGY (2-0-2)
PREREQUISITE OR COREQUISITE: MTH 105 or higher and program admission.
This course introduces pharmacological concepts and safety practices involved in the use of medications as therapeutic agents. Content includes selected pharmacological interventions and calculation of dosages and solutions. The nursing process is emphasized. On
completion, students should be able to compute dosages and safely prepare and administer medications. **CORE**

**LPN 105. FUNDAMENTALS OF NURSING (3-9-6)**
PREREQUISITE OR COREQUISITE: Program admission and LPN113.
This course provides an introduction to the basic knowledge and essential skills required in the role of the Practical Nurse. Content includes knowledge related to nursing, legal-ethical, ethnic diversity, health-care continuum, and the nursing process. Concepts related to physiological and psychosocial needs of the individual are integrated throughout the content. This course provides the student with opportunities to develop and practice basic skills in the laboratory and apply these skills in the clinical setting. The nursing process, basic nursing skills, and safety are emphasized. Laboratory and clinical components are required. **CORE**

**LPN 107. DIRECTED STUDY FOR LPN (1-3-0-1-3)**
PREREQUISITE: Instructor permission. (OPTIONAL)
This course provides the student with an opportunity to expand knowledge of practical nursing. Learning activities will be tailored to meet the unique needs of the student and are designed to correct deficiencies or improve areas of weakness. On completion, students will meet requirements as specified in a preconstructed contractual agreement.

**LPN 112. HEALTH ASSESSMENT (1-0-1)**
PREREQUISITE: LPN113
This course is designed to provide students with the opportunity to learn theory and application in history-taking and physical examination skills for individuals across the life span. Interviewing skills, data collection, and documentation of findings appropriate to nursing practice are emphasized. On completion, students should be able to complete a health history and perform a non-invasive assessment, identify needs, formulate nursing diagnoses, and document appropriate to the practical nursing role.

**LPN 113. BODY STRUCTURE AND FUNCTION/MEDICAL VOCABULARY (4-0-4)**
This course is designed to use the nursing process to focus on the childbearing and child-rearing stages of the family unit. This introductory course focuses on the role of the Practical Nurse in meeting the physiological, psychosocial, cultural, and developmental needs of the family during antepartal, intrapartal, postpartal, newborn, and childhood. Course content includes aspects of growth and development, health teaching, health promotion, and prevention. Nutrition and pharmacology are integrated. On completion, students will demonstrate the knowledge necessary to deliver safe and effective nursing care. **CORE**

**LPN 132. ADULT NURSING II (2-6-4)**
PREREQUISITES: Program admission, LPN 105, LPN113, COM103, and MAH105.
This course is a study in the application of the nursing process. It provides the student with the basic knowledge and skills necessary to meet the needs of individuals experiencing acute and chronic alterations in health throughout the adult life span. Providing and managing care for individuals experiencing surgery, fluid and electrolyte disorders and diseases/disorders of the integumentary and genitourinary systems are emphasized. Selected content focuses on clients with special needs. Concepts of nutrition, pharmacology, and therapeutic communication are integrated. On completion, students will demonstrate the knowledge and skills necessary to provide safe and effective care. **CORE**

**LPN 133. GERIATRIC NURSING CONCEPTS (2-0-2)**
PREREQUISITES: Program admission, instructor permission, and LPN113.
This course is designed to provide the student with an opportunity to explore physiological, psychosocial, cultural, and developmental needs of the geriatric client. Content includes physical and psychosocial needs unique to the geriatric client; methods of health promotion, maintenance, and restoration; and issues related to death and dying, long-term care, and pharmacological considerations. On completion, students will demonstrate knowledge and skills necessary to provide effective care to the geriatric client.

**LPN 118. MENTAL HEALTH CONCEPTS (2-0-2)**
PREREQUISITES: Program admission and LPN113.
This course is designed to provide an overview of psychosocial adaptation and coping concepts used throughout the life span. Topics include therapeutic communication skills, normal and abnormal behaviors, treatment modalities, and developmental needs. On completion, students will demonstrate the ability to assist clients in maintaining psychosocial integrity through the use of the nursing process. **CORE**

**LPN 122. ADULT NURSING I (2-6-4)**
PREREQUISITE OR COREQUISITE: Program admission, LPN104, LPN 105, LPN113, MAH105, and COM103.
This course is a study in basic application of the nursing process. It provides the student with the knowledge and skills necessary to meet the needs of individuals experiencing acute and chronic alterations in health throughout the adult life span. Providing and managing care for individuals experiencing surgery, fluid and electrolyte disorders and diseases/disorders of the integumentary and genitourinary systems are emphasized. Selected content focuses on clients with special needs. Concepts of nutrition, pharmacology, and therapeutic communication are integrated. On completion, students will demonstrate the knowledge and skills necessary to provide safe and effective care. **CORE**

**LPN 124. FAMILY-CENTERED NURSING (4-6-6)**
PREREQUISITES: Program admission, instructor permission, LPN104, LPN105, LPN113, COM103, and MAH 105.

**LPN 140. NCLEX-PN EXAMINATION REVIEW (1-0-1)**
PREREQUISITE OR COREQUISITE: COM103, LPN104, LPN105, LPN112, LPN113, LPN118, LPN122, LPN124, LPN132, LPN133, LPN142, LPN145.
This course is designed to assist the student in preparing for the practical nursing licensure examination (NCLEX-PN). Test-taking skills, computer-assisted simulations and practice tests, development of a prescriptive plan for remediation, and content review specific to the practice of practical nursing are emphasized.

**LPN 142. ADULT NURSING III (3-12-7)**
PREREQUISITES: Program admission, LPN 104, LPN105, LPN113, COM103, MAH105.
This course provides concepts related to nursing care of adults experiencing alterations in health. Content focuses on the nurse's role in meeting the needs of clients experiencing disorders/diseases involving the nervous and sensory, reproductive, endocrine, and gastrointestinal systems. Concepts of nutrition, pharmacology, and therapeutic communication are integrated. On completion, students should be able to provide comprehensive nursing care in a safe and effective manner. **CORE**

**LPN 145. CURRENT ISSUES/ROLE TRANSITION (2-0-2)**
PREREQUISITES: Program admission, instructor permission, and LPN113.
This course is designed to provide the student with the knowledge and skills necessary to make the transition from student to LPN practitioner. Content includes the professional responsibilities of the LPN, leadership skills, quality assurance, fiscal management, professional accountability, resume preparation, job interviewing skills, obtaining/resigning employment, and preparation for the NCLEX-PN. On completion, students will demonstrate knowledge and skills necessary for entry into Practical Nursing. **CORE**

**PSYCHOLOGY (PSY)**
学生将掌握特定放射学程序的实践应用。

**PSY 200. GENERAL PSYCHOLOGY (3-0-3)**

这门课程是一门心理学课程，注重于行为的生物基础。

**PSY 210. HUMAN GROWTH AND DEVELOPMENT (3-0-3)**

**PREREQUISITE:** PSY 200.

此课程研究人类生理、社会与心理因素对人类行为的影响。

**PSY 240. STATISTICS FOR THE SOCIAL SCIENCES (3-0-3)**

**PREREQUISITE:** PSY 200.

此课程介绍在社会科学研究和报告撰写中使用的统计方法。

**RADILOGIC TECHNOLOGY (RAD)**

**RAD 121. INTRODUCTION TO RADIOGRAPHY (2-0-2)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍放射学的理论和实践。

**RAD 124. METHODS OF PATIENT CARE (1-2-2)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍患者护理和放射学。

**RAD 127. ANATOMY AND POSITIONING OF HEAD, TRUNK, EXTREMITIES (3-3-4)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍人体解剖定位。

**RAD 140. CLINICAL ORIENTATION (0-3-1)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍临床环境。

**RAD 141. CLINICAL EDUCATION I (0-6-2)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍临床教育一。

**RAD 142. CLINICAL EDUCATION II (0-9-3)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍临床教育二。

**RAD 212. SPECIAL PROCEDURES (1-0-1)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍特殊程序。

**RAD 213. RADIOGRAPHIC PATHOLOGY (2-0-2)**

**PREREQUISITES:** Program admission and instructor permission.

此课程介绍放射学病理学。
This course provides a basic understanding of the concepts of disease. A body system approach to pathology is emphasized. On course completion, the student will identify radiographic manifestations of disease and disease processes.  

**RAD 214. CROSS-SECTIONAL ANATOMY (1-0-1)**  
PREREQUISITES: Program admission and instructor permission.  
This course provides an introduction to cross-sectional anatomy of the human body. Topics include sectional anatomy as demonstrated by computed tomography, magnetic resonance, and ultrasound. On course completion, the student will be able to identify cross-sectional anatomy from CT, MR, and Ultrasound.

**RAD 215. REVIEW SEMINAR (2-0-2)**  
PREREQUISITES: Program admission and instructor permission.  
This course provides a consolidated and intensive review of basic areas of expertise needed by the entry-level technologist. Topics include basic review of all content areas, radiographic management, test-taking techniques, and job-seeking skills. On course completion, the student will be able to pass comprehensive tests on topics discussed in the radiologic technology program.  

**RAD 221. CLINICAL PRACTICUM I (0-15-5)**  
PREREQUISITES: Program admission and instructor permission.  
This course is designed to provide an on-site clinical experience. Developing proficiency in radiographic procedures specific to the clinical setting, which may include upper extremity, lower extremity, basic fluoroscopy and thorax, is emphasized. On course completion, students will demonstrate practical applications of specific radiographic procedures.  

**RAD 222. CLINICAL PRACTICUM II (0-15-5)**  
PREREQUISITES: Program admission and instructor permission.  
This course is designed to provide an on-site clinical experience. Developing proficiency in radiographic procedures specific to the clinical setting, which may include complex upper and lower extremity exams, portable radiography, surgery, and contrast studies, is emphasized. On course completion, students will demonstrate practical applications of specific radiographic procedures.

**RAD 223. CLINICAL PRACTICUM III (0-15-5)**  
PREREQUISITES: Program admission and instructor permission.  
This course is designed to provide an on-site clinical experience. Developing proficiency in radiographic procedures specific to the clinical setting, which may include skull, sinuses, spines, and pediatrics, is emphasized. On course completion, students will demonstrate practical applications of specific radiographic procedures.

**RAD 224. CLINICAL PRACTICUM IV (0-15-5)**  
PREREQUISITES: Program admission and instructor permission.  
This course is designed to provide an on-site clinical experience. Developing proficiency in radiographic procedures specific to the clinical setting, which may include trauma, computed tomography, and advanced fluoroscopy, is emphasized. On course completion, students will demonstrate practical applications of specific radiographic procedures.

**READING (RDG)**

**RDG 083. DEVELOPMENTAL READING I (3-0-3)**  
PREREQUISITE: Score of 23-32 on the reading section of the ASSET or a score of 44 or below on the reading section of the COMPASS.  
This course is designed to assist students whose placement test scores indicate serious difficulty with decoding skills, comprehension, vocabulary, and study skills.  

*Non-degree credible.*

**RDG 084. DEVELOPMENTAL READING II (3-0-3)**  
PREREQUISITE: A grade of "S" in RDG 083, or a score of 33-38 on the reading section of the ASSET, or a score of 45-69 on the reading section of the COMPASS.  
This course is designed to assist students whose placement test scores indicate moderate difficulty with decoding skills, comprehension, vocabulary, and study skills.  

*Non-degree credible.*

**RDG 114. CRITICAL READING FOR COLLEGE (2-0-2)**  
PREREQUISITE: Instructor permission or a score of 39-53 on the reading section of the ASSET.  
This course is designed to enhance critical reading skills. Topics include vocabulary enrichment, reading flexibility, metacognitive strategies, and advanced comprehension skills, including analysis and evaluation. On course completion, students should be able to demonstrate comprehension and analysis and respond effectively to material across disciplines.
RELIGION (REL)

REL 100. HISTORY OF WORLD RELIGIONS (3-0-3)
This course emphasizes beliefs and practices of major contemporary religions of the world. This includes religions of Africa, the Orient, and the Western world. On course completion, the student should have an understanding of the history and origins of various world religions.

REL 151. SURVEY OF THE OLD TESTAMENT (3-0-3)
This course is an introduction to the content of the Old Testament with emphasis on the historical context and contemporary theological and cultural significance of the Old Testament. On course completion, the student should have an understanding of the significance of Old Testament writings.

REL 152. SURVEY OF THE NEW TESTAMENT (3-0-3)
This course is a survey of books of the New Testament, with special attention given to historical and geographical settings. On course completion, the student should have an understanding of the books of the New Testament and cultural and historical events associated with these writings.

RESPIRATORY THERAPIST (RPT)

RPT 210. CLINICAL PRACTICE I (0-10-2)
PREREQUISITE: Admission to professional phase of program.
This clinical course provides initial hospital orientation and development of general patient assessment and communication skills required for safe and effective patient care. Application of classroom and laboratory experiences within the clinical environment is emphasized. On course completion, students should demonstrate adequate psychomotor skills and cognitive abilities necessary for initial patient contact and safe and effective performance of basic respiratory care procedures. CORE

RPT 211. INTRODUCTION TO RESPIRATORY CARE (2-0-2)
PREREQUISITE: Admission to professional phase of program.
This course is designed to acquaint the student with responsibilities of the respiratory care practitioner (RCP) as a member of the health care team. History of the profession, credentialing mechanism, licensure, medical ethics, communication skills, basic medical terminology, and patient assessment are emphasized. On course completion, students should be able to demonstrate effective communication skills, proper use of aseptic techniques, deference to appropriate professional ethics and behavior, and ability able to perform basic patient assessment. CORE

RPT 212. FUNDAMENTALS OF RESPIRATORY CARE I (2-4-4)
PREREQUISITE: Admission to professional phase of program.
A fundamental course that presents the scientific basis for respiratory care procedures and application of basic chemistry and physics related to compressed gases and respiratory care equipment operation. Experimental laboratory is required. Design, functional characteristics, and operation of commonly encountered respiratory care equipment; use of medical gases; and applied chemistry, physics, and mathematics are emphasized. On course completion, the student should be able to demonstrate an adequate knowledge base concerning function and troubleshooting of respiratory care equipment and concepts of applied physics, chemistry, and mathematics. CORE

RPT 213. ANATOMY AND PHYSIOLOGY FOR THE RCP (3-0-3)
PREREQUISITE: Admission to professional phase of program.
This course provides detailed lecture and audiovisual presentations that concentrate on the cardiopulmonary and renal systems. Structure, function, and physiology of the cardiopulmonary and renal systems and the role each plays in maintaining homeostasis are emphasized. On course completion, the student should be able to demonstrate adequate knowledge of structure, function, and physiology of the cardiopulmonary and renal systems. CORE

RPT 214. PHARMACOLOGY FOR THE RCP (2-0-2)
PREREQUISITE: Admission to professional phase of program.
This course is a detailed study of drugs encountered in respiratory care practice and function of the autonomic nervous system. Determination of drug dosages; applied mathematics; clinical pharmacology; and indications, hazards, intended actions, and side effects of agents used in respiratory care are emphasized. On course completion, the student should be able to complete a dosage calculation test with 90% proficiency and demonstrate an adequate understanding of the clinical pharmacology of respiratory care drugs and general principles of pharmacology. CORE

RPT 220. CLINICAL PRACTICE II (0-10-2)
PREREQUISITES: Admission to professional phase of program and Instructor permission.
This course is a continuation of RPT 210 and allows continued integration of classroom and laboratory instruction into the clinical practice of respiratory care. Bedside patient assessment techniques, airway care, hyperinflation therapy, protocol implementation, development of patient care plans, oxygen, humidity, aerosol administration, and an introduction to management of mechanical ventilation of the adult are emphasized. On course completion, the student should be able to demonstrate appropriate psychomotor skills and cognitive abilities necessary to successfully function as primary care giver for routine respiratory care procedures. CORE

RPT 221. PATHOLOGY FOR THE RCP I (2-2-3)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This course is a survey of commonly encountered diseases and disorders that may affect function of the cardiopulmonary system and clinical manifestations and treatment rationales related to respiratory care practice. Practical laboratory is required, and application of sound diagnostic techniques in gathering data in support of diagnosis of specific disease entities as well as progression of pathological changes in cardiopulmonary function are emphasized. On course completion, the student should be able to demonstrate ability to gather appropriate information from various sources in support of diagnosis of specific cardiopulmonary disease as well as adequate understanding of cardiopulmonary pathology. CORE

RPT 222. FUNDAMENTALS OF RESPIRATORY CARE II (2-4-4)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This course is a continuation of RPT 212 and continues to present scientific basis for selected respiratory care procedures. Experimental laboratory is required, and therapeutic techniques used in bronchial hygiene, hyperinflation therapy, mechanical ventilation of the adult, manual resuscitation equipment, equipment used in bedside assessment, and mechanical ventilation are emphasized. On course completion, the student should be able to demonstrate cognitive abilities and psychomotor skills required to perform procedures presented. CORE

RPT 223. ACID/BASE REGULATION AND ABG ANALYSIS (2-0-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This course provides lecture and audiovisual presentation of material essential to understanding acid/base physiology and arterial blood gas (ABG) interpretation. ABG sampling techniques, quality assurance, basic chemistry related to acid/base balance, evaluation of oxygen transport, and role of the respiratory and renal systems in maintaining homeostasis are emphasized. On course completion, the student should be able to demonstrate understanding of fundamental concepts of acid-base balance and regulation of homeostasis by the respiratory and renal systems. CORE

RPT 230. CLINICAL PRACTICE III (0-10-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This course, third in a clinical sequence, is designed to allow the student to function in the role of primary care giver. Mastery of basic respiratory care procedures, administration of aerosol drugs, and care of the patient receiving mechanical ventilation are emphasized. On course completion, the student should be able to demonstrate psychomotor skills and cognitive abilities necessary to function safely and effectively in the role of primary care giver. CORE

RPT 231. PATHOLOGY FOR THE RCP II (2-2-3)
PREREQUISITES: Admission to professional phase of program and instructor permission.

A continuation of RPT 221, this course continues to present specific disease entities that may impair cardiopulmonary function. Laboratory study is directed toward diagnostic techniques, and course emphasis is on etiology, diagnosis, prognosis, and treatment rationale for each medical problem presented. On course completion, the student should be able to demonstrate cognitive abilities necessary to integrate clinical and laboratory data obtained from various sources in support of diagnosis and treatment of specific disease entities presented. CORE

RPT 232. DIAGNOSTIC PROCEDURES FOR THE RCP (2-0-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.

A lecture course designed to present the value of various procedures as diagnostic aids in cardiopulmonary disease. Procedures such as complete pulmonary function testing, bronchoscopy, cardiac diagnostic procedures, and ventilation/perfusion studies are emphasized. On course completion, the student should be able to demonstrate cognitive and psychomotor cognitive abilities necessary to perform routine diagnostic procedures. CORE

RPT 233. SPECIAL PROCEDURES FOR THE RCP (2-0-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This course presents special procedures and medical specialties and identifies various tasks required of the RCP while functioning in an assistive role to the physician. Phlebotomy, bronchoscopy, hemodynamic assessment, and advanced cardiopulmonary monitoring techniques are emphasized. On course completion, the student should be able to demonstrate cognitive and psychomotor abilities necessary to perform assistive functions during various procedures presented. CORE

RPT 234. MECHANICAL VENTILATION FOR THE RCP (2-2-3)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This course continues and expands on the presentation of material concerning mechanical ventilation previously introduced in RPT 222 to include indications, modifications, and discontinuance of mechanical ventilation. Laboratory is required, and application of scientific principles to the clinical use of various modes of mechanical ventilation is emphasized. On course completion, the student should be able to demonstrate cognitive and psychomotor skills required to effectively institute and maintain various methods of mechanical ventilation. CORE

RPT 240. CLINICAL PRACTICE IV (0-20-4)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This course, last in a required clinical sequence, provides opportunities to further refine clinical skills. Critical care, neonatal mechanical ventilation, home care, and discharge planning are emphasized. On course completion, the student should be able to demonstrate cognitive and psychomotor skills required to function in the role of advanced respiratory care practitioner. CORE

RPT 241. REHABILITATION AND HOME CARE FOR THE RCP (2-0-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This course presents special considerations that apply to rehabilitation and home care of the patient with cardiopulmonary disorders. The role of RCP within the home care medical community and modification of techniques and procedures necessary for effective home care are emphasized. On course completion, the student should be able to demonstrate an understanding of discharge planning and disease management protocols as they apply to rehabilitation and continuation of effective respiratory care in the home environment. CORE

RPT 242. PERINATAL/PEDIATRIC RESPIRATORY CARE (2-2-3)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This course presents a unique requirement for appropriate delivery of respiratory care to the neonatal and pediatric patient. Experimental laboratory is required, and a detailed outline of fetal lung development, fetal circulation, neonatal cardiopulmonary disorders, and specialized equipment and techniques as well as general considerations of provision of care to neonatal and pediatric patients are emphasized. On course completion, the student should be able to demonstrate cognitive and psychomotor skills required for safe and effective delivery of respiratory care to the neonatal and pediatric patient. CORE

RPT 243. COMPUTER APPLICATIONS FOR THE RCP (1-3-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This course is designed to allow practice using computer-assisted clinical simulation software as well as provide a general program review in preparation for credentialing examinations. Development of critical thinking skills, specific to the discipline, and computer literacy are emphasized. On course completion, students should be able to demonstrate computer literacy and satisfactory performance on nationally standardized comprehensive self-assessment examinations.

RPT 254. PATIENT ASSESSMENT (1-3-2)
PREREQUISITE: Admission to professional phase of program or instructor permission.

This course is designed for the respiratory therapy student or respiratory care practitioner who desires to augment previous instruction in patient assessment techniques and further refine clinical assessment abilities. Physician interaction and development of discrete clinical assessment skills are emphasized. On completion, students/practitioners should be able to demonstrate improved assessment skills pertaining to evaluation of patients with cardiopulmonary disorders.

RPT 256. WRITINGS AND RESEARCH FOR THE RCP I (1-0-1)
PREREQUISITE: Instructor permission.

This course is provided to allow for independent research on a topic of special interest within the field of respiratory care. A written narrative of research activities or a literature research paper is required. On completion, students should be able to effectively communicate in written narrative form the results of independent study.

RPT 258. PHYSIOLOGIC MONITORING FOR THE RCP (2-5-3)
PREREQUISITE: Instructor permission.

This course provides the didactic instruction and clinical experience necessary to allow the respiratory care practitioner to function as a physiologic monitoring technician. Emphasis is on expanded functions required which include hemodynamic monitoring equipment set-up, calibration and monitoring, intra-aortic balloon pump set-up and operation, and enhancement of phlebotomy and physician assistive functions. On completion, students/practitioners should be able to demonstrate the necessary cognitive and psychomotor skills required to function safely and effectively in this role.

RPT 260. SPECIAL TOPICS CLINICAL SESSION I (0-10-2)
PREREQUISITES: Admission to professional phase of program and instructor permission.

This clinical session gives the student individual exposure to an area of special interest. Cooperative agreements with clinical affiliates allows the student to select from a large number of special interest areas of
emphasis. On completion, students should have a better understanding of the specialty skills required to function within the area of interest.

RPT 262. MANAGEMENT AND SUPERVISION FOR THE RCP (3-0-3)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This course is a survey of management and supervision techniques used in the health care industry. Direct supervision techniques and duties and responsibilities of middle managers in the health care industry are emphasized. On completion, students should possess the cognitive ability to perform basic tasks of the middle manager to include planning, supervision, evaluation, scheduling, and budget preparation.

RPT 264. RESPIRATORY CARE PRACTITIONER UPDATE I (1-0-1)
PREREQUISITE: Admission to professional phase of program or instructor permission.
This course presents recent developments in the field of respiratory care in a seminar format for both students and practitioners. Emphasis is on continuing professional education and content that includes new or emerging technology and techniques as they are developed. On completion, students or practitioners should be able to demonstrate acquired cognitive abilities concerning the topic of emphasis and on successful completion of the final examination, a certificate is issued describing the topics presented.

RPT 266. SEMINAR IN RESPIRATORY MEDICINE I (1-0-1)
PREREQUISITE: Admission to professional phase of program or instructor permission.
This course is a series of physician lectures designed to present topics of special interest to the student or practitioner. Current medical practice within the fields of pulmonary medicine and cardiology is emphasized. On completion, students should be able to demonstrate an increased knowledge base concerning topics of special interest presented.

RPT 268. WRITING AND RESEARCH FOR THE RCP II (1-0-1)
PREREQUISITES: Completion of RPT 256 and instructor permission.
This course is a continuation of RPT 256 and is provided to allow for independent research on a topic of special interest within the field of respiratory care. A written narrative of research activities or a literature research paper is required. On completion, students should be able to effectively communicate in written narrative form the results of independent study.

RPT 270. ADVANCED CLINICAL SESSION II (0-20-4)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This clinical session allows the advanced student to gain extensive clinical experience in an area of special interest within the field of respiratory care. Cooperative agreements with clinical affiliates will allow the student to choose from a variety of specialty areas. On completion, students should be able to demonstrate an advanced level of cognitive abilities and clinical skills within the area of emphasis.

RPT 272. WRITINGS AND RESEARCH FOR THE RCP II (1-0-1)
PREREQUISITES: RPT 268 and instructor permission.
This course is a continuation of RPT 268 and is provided to allow for independent research on a topic of special interest within the field of respiratory care. A written narrative of research activities or a literature research paper is required. On completion, students should be able to effectively communicate in written narrative form the results of independent study.

RPT 273. DIRECTED STUDY FOR THE RCP I (1-0-1)
PREREQUISITES: Admission to professional phase of program and instructor permission.
This course provides a venue to give the student an opportunity to more completely develop ideas and concepts presented in selected respiratory therapy core classes. Designed for the student who may need additional instruction for effective learning, this series of courses focuses on development of effective strategies for independent learning. On completion, students should be able to demonstrate increased cognitive skills in the area of course emphasis.

RPT 274. DIRECTED STUDY FOR THE RCP II (1-0-1)
PREREQUISITE: RPT 273 or instructor permission.
This course is a continuation of RPT 273 and allows for further development of strategies for mastering essential core material presented in respiratory therapy classes. Individual development and enhancement of individual cognitive abilities within the discipline are emphasized. On completion, students should be able to demonstrate increased cognitive skills pertaining to course material.

RPT 276. SEMINAR IN RESPIRATORY MEDICINE II (1-0-1)
PREREQUISITE: RPT 266 or instructor permission.
This course is a continuation of RPT 266 and also presents topics of special interest to the student or practitioner. Guest lecturers present topics of general interest in the respiratory care profession. On completion, students should be able to demonstrate an increased knowledge base concerning topics of special interest presented.

RPT 278. RESPIRATORY CARE PRACTITIONER UPDATE II (1-0-1)
PREREQUISITE: Admission to professional phase of program or instructor permission.
This course presents recent developments within the field of respiratory care in a seminar format for both students and practitioners. Emphasis is on continuous professional education and content that would include new or emerging technology and techniques as they are developed. On completion, students or practitioners should be able to demonstrate acquired cognitive abilities.

RPT 280. SLEEP DIAGNOSTICS CLINICAL SESSION I (0-15-3)
PREREQUISITE: Admission to sleep medicine option or instructor permission.
This course provides clinical orientation to the sleep laboratory and includes initial patient interaction, set-up and operation of equipment used during overnight monitoring of patients undergoing sleep diagnostic testing. The patient selection process, clinical assessment skills, electrode application, and monitoring techniques are emphasized. On completion, students should be able to demonstrate proper preparation techniques and recording of an overnight polysomnogram.

RPT 281. FUNDAMENTALS OF SLEEP MEDICINE I (3-3-4)
PREREQUISITE: Admission to sleep medicine option or instructor permission.
This course presents fundamentals of polysomnographic technology. Historical perspectives and calibration and operation of various polysomnographic equipment, including tabulation and scoring a sleep study, are emphasized. On completion, students should be able to prepare a patient for an overnight sleep study, troubleshoot recording equipment, monitor overnight recordings, and identify stages of sleep.

RPT 282. PHARMACOLOGY FOR SLEEP MEDICINE (3-0-3)
PREREQUISITE: Admission to sleep medicine option or instructor permission.
This course familiarizes the student with various drugs used in the prevention and treatment of sleep disorders as well as commonly encountered drugs that may adversely affect the sleep pattern. Dosages, indications, contraindications, and therapeutic objectives of drug treatment for sleep disorders are emphasized. On completion, students will understand the therapeutic actions and adverse effects of selected drugs used in the field of sleep medicine.

RPT 285. SLEEP DIAGNOSTICS CLINICAL SESSION II (0-15-3)
PREREQUISITE: Admission to sleep medicine option or instructor permission.
This clinical session gives the student full exposure to all aspects of the sleep diagnostics laboratory. Performance and scoring of complete polysomnograms, departmental management, and day-to-day operation of a sleep diagnostics laboratory are emphasized. On completion, students should be able to demonstrate the cognitive and psychomotor skills necessary to select and admit patients, access computer software, and tabulate and score the complete polysomnogram.

RPT 286. FUNDAMENTALS OF SLEEP MEDICINE II (3-3-4)
PREREQUISITE: Admission to sleep medicine option or instructor permission.
This course provides more advanced and complete knowledge concerning polysomnographic techniques including advanced patient assessment, performance, scoring, and reporting of complete testing. Various types of equipment used in sleep medicine, the role of surgical intervention, and home care of the sleep disordered patient are emphasized. On completion, student should be able to demonstrate the cognitive and psychomotor skills necessary to safely and effectively perform complete polysomnographic testing and treatment of patients with selected sleep disorders.

RPT 287. PATHOPHYSIOLOGY OF SLEEP DISORDERS (3-0-3)
PREREQUISITE: Admission to sleep medicine option or instructor permission.
This course is a series of lectures designed to acquaint the student with various acute and chronic disorders that may be associated with development of sleep dysfunction. Refinement of patient assessment skills, etiology, diagnosis, and treatment of each condition presented is emphasized. On completion, students should be able to demonstrate a basic understanding of various disorders and their potential to contribute to dysfunctional sleeping patterns as well as methods of prevention, treatment, and management.

SMALL ENGINE REPAIR (SER)
SER 111. FUNDAMENTALS OF SMALL ENGINE REPAIR (1-5-3)
This course introduces the theory and operating principles of internal combustion engines. Basic engine systems, special tools and testing equipment, shop safety rules, and equipment are emphasized. On completion, students should understand shop rules and be able to identify engine components, identify special tools and demonstrate their use, discuss the process of internal combustion, identify shop safety rules, list engine components, and explain their function. Non-degree credible. CORE

SER 112. FOUR-STROKE CYCLE ENGINE (3-0-3)
This course covers service and repair of the four-stroke cycle engine. Function and operating principles of fuel systems, ignition, starters, exhaust, and lubrication systems are emphasized. On completion, students should understand service and repair procedures for all related engine systems. Non-degree credible. CORE

SER 113. FOUR-STROKE CYCLE ENGINE LAB (0-9-3)
This course provides hands-on experience in engine repair. The cylinder block and all internal components; fuel, ignition, and cooling systems; lubrication; and exhaust systems are emphasized. On completion, students should be able to apply small engine service and repair procedures. Non-degree credible. CORE

SER 121. TWO-STROKE CYCLE ENGINE (1-6-3)
This course covers the service and repair procedures for the two-stroke cycle engine. Engine construction and induction, carburetion, and exhaust systems are emphasized. On completion, students should be able to repair and maintain two-stroke engines. Non-degree credible. CORE

SER 122. ENGINE RECONDITIONING (2-0-2)
This course provides the knowledge and techniques involved in reconditioning small gasoline engines. Valve service, cylinder reconditioning, bearings, and precision measuring tools are emphasized. On completion, students should be able to use inside and outside micrometers, reface valves and valve seats, resize cylinder bores, and replace various types of bearings. Non-degree credible. CORE

SER 123. ENGINE RECONDITIONING LAB (0-9-3)
This course provides practical experience in troubleshooting and complete reconditioning of small gasoline engines. Correct measuring of crankshafts, connecting rods, pistons, valves, and various other engine components is emphasized. On completion, students should be able to resize cylinder bores, perform valve service, replace pistons and rings, time camshafts, set and adjust all components to specifications. Non-degree credible. CORE

SER 124. SPECIAL PROJECTS IN LAWN, GARDEN, AND INDUSTRIAL ENGINES (0-9-3)
This special projects course is designed to augment the required curriculum while meeting the individual needs of the student. Hands-on training to further develop the student's mechanical and diagnostic skills is emphasized. On completion, students should be able to diagnose and repair various lawn, garden, and industrial equipment. Non-degree credible.

SER 132. LAWN AND GARDEN EQUIPMENT (1-5-3)
This course covers riding mowers, tillers, edgers, and generators. Mechanical and electrical systems are emphasized. On completion, students should be able to service and repair mechanical and electrical components of lawn and garden equipment. Non-degree credible.

SER 142. CHAIN SAWS AND STRING TRIMMERS (1-6-3)
This course instructs students in diagnosing and repairing problems unique to chain saws and string trimmers. Fuel systems, lubrication, and drive systems; clutches; right angle drives; and cutting chains are emphasized. On completion, students should be able to service and repair chain saws and string trimmers. Non-degree credible.

SOCIODEMIOLOGY (SOC)
SOC 200. INTRODUCTION TO SOCIODEMIOLOGY (3-0-3)
This course is an introduction to vocabulary, concepts, and theory of sociological perspectives of human behavior.

SPEECH (SPH)
SPH 106. FUNDAMENTALS OF ORAL COMMUNICATIONS (3-0-3)
This course is performance based and includes principles of human communication: intrapersonal, interpersonal, and public. It surveys current communication theory and provides practical application.

SPH 111. SIGN LANGUAGE I (3-0-3)
This course provides the basics of communication through sign language.

SPH 112. SIGN LANGUAGE II (3-0-3)
This course expands vocabulary and proficiency in sign language.

THEATER (THR)
THR 113. THEATER WORKSHOP I (2-0-2)
This is the first in a four-course sequence that provides practical experience in production and performance of a dramatic presentation, with assignments in scenery, lighting, props, choreography, sound, costumes, make-up, publicity, acting, directing, and other aspects of theater production.

THR 114. THEATER WORKSHOP II (2-0-2)
PREREQUISITE: THR 113.
This course is a continuation of THR 113.

THR 120. THEATER APPRECIATION (3-0-3)
This course increases appreciation for contemporary theater. Theater as an art form through the study of history and theory of drama and the
Contributions to modern media are presented, with emphasis on playwright, actor, director, designer, and technician to modern media. Attendance at theater production may be required.

**THR 213. THEATER WORKSHOP III (2.0-2)**
PREREQUISITE: THR 114.
This course is a continuation of THR 113, 114.

**THR 214. THEATER WORKSHOP IV (2.0-2)**
PREREQUISITE: THR 213.
This course is a continuation of THR 113, 114.

**Upholstery (Uph)**

**UPH 111. UPHOLSTERY FUNDAMENTALS AND DESIGN (3.0-3)**
PREREQUISITE: Determined by instructor.
This course introduces a working knowledge of upholstery techniques and hands-on experience using the fundamentals of upholstery/design. Safety, upholstery terminology, housekeeping, tools, equipment, minor sewing machine repair, a brief history of furniture styles, color, fabrics, woods, and an introduction to principles and elements of furniture/automotive design are emphasized. On completion, students should be able to cite the principles and elements of design and apply upholstery techniques in all areas specified. Non-degree credible. CORE

**UPH 112. UPHOLSTERY DESIGN FURNITURE LAB (0.9-3)**
PREREQUISITE: Determined by instructor.
This course teaches specific techniques and applications in furniture design foundations. Proper use, care, storage, and maintenance of tools and equipment and proper application of design techniques working with the function, beauty, and individuality of a good design plan or foundation are emphasized. On completion, students should be able to identify tools and equipment and apply foundations and techniques including tying springs, applying stuffing and padding, and using a variety of materials to achieve a good design plan. Non-degree credible. CORE

**UPH 113. UPHOLSTERY DESIGN AUTO LAB (0.9-3)**
PREREQUISITE: Determined by instructor.
This course provides an introduction to automotive techniques and design with application or live work projects. Application of design techniques, including work with springs, door panels, headliners, auto seating, rear shelves, carpet, windshield, arm rests, and dashboards is emphasized. On completion, students should be able to perform hands-on upholstery techniques including design to automotive upholstery. Non-degree credible. CORE

**UPH 114. UPHOLSTERY DESIGN EXPERIMENTAL LAB (0.6-3)**
PREREQUISITE: Determined by instructor.
This course is an experimental lab in upholstery/design. It consists of demonstrations by the instructor and experimentation by students. On completion, students should be able to demonstrate, with appropriate safety precautions, the basic principles of upholstery/design. Non-degree credible.

**UPH 121. CORRELATIVE DECORATIVE ELEMENTS (3.0-3)**
PREREQUISITE: Determined by instructor.
This course effectively brings together the elements and principles of design while allowing the student to specialize in automotive, furniture, or both areas, including job planning and decorative techniques. This course covers job planning, layouts, and correlation of decorative elements, including simple floor plans, color, draperies, and wall coverings, with special emphasis on diamonds, channeling, and decorative trims. On completion, students should be able to plan layouts, identify and apply principles and elements of design, and select decorative trims that blend with the decor. Non-degree credible. CORE
WELDING TECHNOLOGY (WDT)

WDT 111. CUTTING PROCESSES THEORY (3-0-3)
This course covers rules of safety and identification of shop equipment and provides the student with skills and knowledge necessary for the safe operation of oxy-fuel, carbon arc, and plasma arc cutting. Topics include safety, proper equipment set-up, and identification of oxy-fuel, carbon arc, and plasma arc cutting equipment. On completion, students should be able to identify safety hazards, gases, equipment and components, and set-up equipment for proper application. **CORE**

WDT 112. SHIELDED METAL ARC FILLET THEORY (3-0-3)
This course provides instruction on safety practices and terminology in shielded metal arc welding (SMAW) processes. Safety, welding terminology, equipment identification, set-up and operation, and related information in the shielded metal arc welding process are emphasized. On completion, students should be able to identify safety hazards and welding equipment, understand welding terminology related to SMAW, and know the proper clothing to wear while in a welding environment. **CORE**

WDT 113. BLUEPRINT READING (3-0-3)
This course provides an understanding and fundamentals of industrial blueprint reading. Reading and interpreting lines, views, dimensions, weld joint configurations, and weld symbols are emphasized. On completion, students should be able to interpret welding symbols and blueprints as they apply to welding and fabrication. **CORE**

WDT 114. GAS METAL ARC FILLET THEORY (3-0-3)
This course provides instruction and demonstration using various transfer methods to gas metal arc fillet welds. Topics included are safety, equipment set-up, joint design and preparation, and gas flow rates. On completion, students should be able to perform fillet welds with prescribed electronic wires and transfer modes in various positions.

**WDT 155. GTAW CARBON PIPE LAB (0-9-3)**
COREQUISITE: WDT 115 or instructor permission.
This course provides students with skills in welding carbon steel pipe with gas tungsten arc weld (GTAW), using filler metals in the F6 group. Welding carbon steel pipe, using the gas tungsten arc welding technique in the 2G, 5G, and 6G positions, is emphasized. On completion, students should be able to perform gas tungsten arc welding on carbon steel pipe with prescribed filler metals in the 2G, 5G, and 6G positions in accordance with applicable codes.

**WDT 156. GTAW STAINLESS PIPE LAB (0-9-3)**
COREQUISITE: WDT 116 or instructor permission.
This course provides students with skills in purging and welding stainless steel pipe with gas tungsten arc weld (GTAW), using filler metals in the F6 group. Purging and welding stainless steel pipe, using the gas tungsten arc welding technique in the 2G, 5G, and 6G positions, are emphasized. On completion, students should be able to perform gas tungsten arc welding on stainless steel pipe using the appropriate purging gas and prescribed filler metals in the 2G, 5G, and 6G positions in accordance with applicable codes.

**WDT 217. SMAW CARBON PIPE THEORY (3-0-3)**
This course introduces the practices and procedures of welding carbon steel pipe, using the shielded metal arc weld (SMAW) process. Pipe positions, electrode selection, joint geometry, joint preparation, and fit-up are emphasized. On completion, students should be able to identify pipe positions, electrodes, proper joint geometry, joint preparation, and fit-up in accordance with applicable codes.

**WDT 228. GAS TUNGSTEN ARC FILLET THEORY (3-0-3)**
This course introduces the gas tungsten arc welding process as described in AWS D1.1 code for fillet welds of ferrous and nonferrous metals. Safe operating practices, handling cylinders, process principles, tungsten types and shapes, and base and filler metal identification are emphasized. On completion, students should be able to explain safe operating practices and principles, identify various tungsten types and sizes, and recognize various base and filler metals.

**WDT 257. SMAW CARBON PIPE LAB (0-9-3)**
COREQUISITE: WDT 217 or instructor permission.
This course provides skills in welding carbon steel pipe with the shielded metal arc weld (SMAW) process, using electrodes in the F3 and F4 group. Welding pipe in the 2G, 5G, and 6G positions is emphasized. On completion, students should be able to perform shielded metal arc welding on carbon steel pipe with prescribed electrodes in the 2G, 5G, and 6G positions to applicable codes.

**WDT 268. GAS TUNGSTEN ARC FILLET LAB (0-9-3)**
This course provides instruction and demonstration on the gas tungsten arc welding process to produce fillet welds, using both ferrous and nonferrous metals, according to AWS D1.1 code. Topics include safe operating principles, equipment set-up, and correct selection of tungsten, polarity, shielding gas, and filler metals. On completion, students should be able to produce fillet welds on ferrous and non-ferrous metals, using the gas tungsten arc process according to AWS D1.1 code.

The policies and procedures in this catalog are subject to change due to actions of the State Board of Education, Federal and State legislative actions, and changes in levels of financial support provided by Federal and State agencies. Wallace Community College intends to deliver the courses, offer the programs, and provide the services described in this document unless circumstances require adjustments. Wallace Community College faculty and staff will communicate changes when they occur.

STUDENT HANDBOOK
STUDENT HANDBOOK

STUDENT AFFAIRS

Philosophy. Each member of the Student Affairs staff at Wallace Community College is dedicated to the belief that all people should have the opportunity to reach their maximum potential. Functions that comprise Student Affairs are the following: Admissions, Career Planning, Counseling Services, Job Placement, Records, Student Activities, Student Financial Services, and Testing Services.

STUDENT RIGHTS AND RESPONSIBILITIES

Wallace Community College (WCC) desires to make provisions for students to be as knowledgeable as possible regarding College policies and procedures and their rights and responsibilities relating to them. The information in this section and the sections that follow are designed to clarify information pertaining to rights that are granted to students and responsibilities which students should fulfill as members of the Wallace Community College family.

The submission of an application for admission to Wallace Community College represents a voluntary decision on the part of the prospective student to participate in the programs offered by the institution pursuant to the policies and procedures of the College, The Alabama College System, and state and federal agencies where applicable. College approval of a student’s application, in turn, represents the extension of a privilege to join the College community and to remain a part of it as long as he/she meets the required academic and behavioral standards.

Each individual student is guaranteed the privilege of exercising his/her rights without fear or prejudice. Such rights include, but are not limited to, the following:

- Students are free to pursue their educational goals;
- No disciplinary sanctions may be imposed upon a student without the recourse of due process, except as outlined in the Student Code of Conduct;
- Free inquiry, expressions, and assembly are guaranteed to all students provided their actions do not interfere with the rights of others or the effective operation of the College;
- Academic Evaluation of student performance shall be neither arbitrary nor capricious.

Within the limits of its facilities on all campuses and sites, WCC will be open to all persons without regard to sex, race, creed, disability, or national origin. It is the responsibility of the College to publish its educational objectives and to make available the criteria it shall use in evaluating student success in all programs. It is the responsibility of the student to acquaint himself/herself with these objective and criteria as published and set forth by WCC. The facilities and services of the College will be available to all enrolled students, provided they are used in a manner which is appropriate to an academic environment and with regard to College policies and operating procedures.

The College’s Student Code of Conduct addresses behavior and actions which adversely impact the achievement of educational goals. It is the responsibility of the student to become familiar with the regulations governing student conduct and to adhere to policies where applicable. Lack of knowledge regarding College policies will not excuse any student from adherence to policies or sanctions that may be imposed for violations. The College reserves the right to dismiss any student whose conduct and behavior poses a threat to the College environment or the health, safety, or security of others.

ACTIVITIES AND ORGANIZATIONS

Wallace Community College is committed to planning and implementing activities and experiences that are conducive to facilitating student achievement of personal and professional goals. Pursuant to that end, students serve, when appropriate, as voting members of College standing committees and have all rights and responsibilities associated with committee membership.

Athletics. Wallace Community College participates in intercollegiate baseball and women’s softball. Interested students should contact the Athletic Department on the Wallace Campus.

Extracurricular Activities. In addition to the athletic program, the College provides opportunities for participation in student government and various clubs and social functions. Active efforts have been made to help develop a well-rounded program of recreational, social, and cultural activities that will contribute to the student's enjoyment of college life, personal growth, and social development. Annual and semester activities are scheduled on all campuses to provide additional activities for students.

Student Publications. The College has maintained a commitment to student publications for many years and values the learning experiences available to students who desire to participate in producing student publications. Any publication containing opinions and editorial content must be the responsibility of the student organization publishing it. The College has a responsibility to ensure that participating students are adequately informed concerning issues related to responsible journalism. The advisors of student organizations oversee the production of any student publications, offer guidance to student participants, and ensure their awareness and understanding of the rights and responsibilities of a free press. The College supports a free student press and expects students participating in the production of student publications to uphold the highest standards of journalistic responsibility and integrity, but it reserves the right to reject and/or edit material submitted for inclusion in any publication, including, but not limited to, newsletters, flyers, and brochures. Any student publications containing announcements intended to provide timely information about College and community events must also be reviewed by the advisor of the respective organization to ensure that the contents of the publication are accurate and meet the intended purpose.

Procedures for Approval of Off-Campus Activities. Off-campus activities must be approved by the appropriate Campus Dean. An Activity Request Form (available from Enrollment Services in Grimsley Hall on the Wallace Campus and the Student Affairs Department in the Administration Building on the Sparks Campus) must be submitted a minimum of seven working days prior to the event.

Social Functions. Social functions such as parties, dances, activities, guest speakers, or other entertainment must be sponsored by recognized campus organizations. College facilities are made available for such activities when possible. Approval for such activities begins by submitting an Activity Request Form, which may be obtained from Enrollment Services in Grimsley Hall on the Wallace Campus and the Student Affairs Department in the Administration Building on the Sparks Campus. Wallace Community College students who bring guests or visitors onto College property or to any College-sponsored activity are responsible for their conduct.

Organizations. Current active student organizations on the Wallace Campus include the Association of Students of Practical Nursing, Baptist Campus Ministries, Chamber Choir, Circle K, Diplomats, Jazz Band, Phi Theta Kappa (PTK), Student Government Association (SGA), Wallace Association of Nursing Students (WANS), and Wallace College Singers. Student organizations on the Sparks Campus include the Vocational Industrial Clubs of America (VICA), SGA, Phi Beta Lambda (PBL), PTK, National Vocational-Technical Honor Society, and Diplomats.

Students should contact the Assistant Dean of Student Affairs on the Wallace Campus or the Dean of Student Affairs on the Sparks Campus for specific, written information concerning campus organizations, formation of new organizations, club advisors (eligibility and role), policies and procedures related to campus organizations, and other related matters.
CAMPUS REGULATIONS
Code of Student Conduct
As members of the learning community at the institution, students have a number of rights, privileges, and responsibilities. Those rights and privileges include the right to sound and professionally presented instructional programs and the right to due process in instances involving disciplinary actions or academic grievances.

The Code of Student Conduct is the standard of conduct by which students and organizations are expected to abide. They shall be aware of the Code and know they will be held accountable for its provisions. By enrollment at the College, a student or organization neither relinquishes rights nor escapes responsibilities of local, state, or federal laws and regulations. The College has an interest in maintaining a campus environment that is conducive to the educational mission in addition to the safety, health, and well-being of all students and other individuals on campus. Students and organizations are obligated to abide by the rules and policies established by the College. Students at the College are considered responsible adults, serious of purpose, and enrolled for the primary purpose of furthering educational goals. It is assumed that students enrolling in the College are mature, have a desire for constructive learning, and are attending with that purpose in mind. Common courtesy and cooperation are expected of all students. Interference, injury, or intentional attempt to injure or interfere with the personal or property rights of any person, whether a student member of the College community or a visitor of the College itself, is strictly prohibited.

Note: Faculty and staff members (including College counselors) and students should note that any expectation of confidentiality does not include any illegal act. Faculty and staff members (including College counselors) are required to notify law enforcement officials and College officials when they learn of a criminal act.

Application. The Code of Student Conduct applies to individual students and student organizations and is applicable to on- and off-campus College functions. Any student or group involved in unacceptable or prohibited conduct shall be disciplined in a manner commensurate with the nature and severity of the act of misconduct.

Any indication of facts that could cause imminent danger or harm to the health, safety, and welfare of the accused, students, faculty members, other individuals, or College property, or any indication of mental or physical harassment of students (hazing) by an organization or student may result in immediate interim suspension of the organization or student by the designated College official on each campus or Dean of Student Affairs. This interim suspension may continue only for a period of 72 hours until such time as a disciplinary hearing is held to consider the matter.

Imposition of the sanctions stated above may be stayed pending appeal, at the discretion of the President of the College, on written request by the student or organization.

Misconduct. Student conduct is expected to be in accordance with standards of common decency and decorum, with recognition of and respect for personal and property rights of others and the educational mission of the College. A student shall be subject to disciplinary action by the College, up to and including permanent expulsion, for misconduct on any property owned or controlled by the College; or off College property at any function that is authorized, sponsored, or conducted by the College; or in parking lots adjacent to areas or buildings where College functions are being conducted. Such misconduct shall include the commission of or attempt to commit any of the following acts:

1. Any form of dishonesty including cheating, knowingly furnishing false information to the members of the College faculty or to any other officer or employee of the College, and alteration or use of College documents or instruments of identification with intent to defraud (cheating is defined as dishonesty in completing academic assignments, such as having in one's possession materials other than those specifically approved by one's instructor during tests; submission of work that was prepared by someone else to an instructor as one's own work; plagiarism, representation of someone else's writing or ideas as one's own; assistance in the foregoing practices).

Plagiarism is the act of using the words and/or work of another author and attempting to pass it on as one's own work. Examples of plagiarism include, but are not limited to, a student’s submitting, under his/her own name, an essay, report, research paper, or some other assignment that has been written in part or in whole by another person. Plagiarism also occurs when there is a pattern of failing to document and punctuate materials from research sources appropriately (as designated by the instructor and the research style that the instructor requires and publishes to his/her students); and/or the consistent failure to document accurately and in proper style any material that is not common knowledge, which the student has included in an assignment.

2. Forgery, altering, or misusing College documents, records, or identification.

3. Issuing a worthless check made payable to the College or to its Bookstore. A student will be notified by the Business Office when a check for tuition, books, fees, or other charges is returned for insufficient funds. The student will have 72 hours in which to satisfy that obligation. If the obligation is not satisfied in that time, the student's enrollment will be voided.

4. Failure to properly comply with any reasonable direction given by a College official acting within the capacity and performance of his/her position.

5. Violation of written College rules, policies, or regulations.

6. Obstruction or disruption of teaching, research, administration, service, disciplinary procedures or policies and/or procedures of clinical affiliates while at their sites, other College activities, or other activities on College premises.

An instructor has the obligation to maintain order in the classroom to preserve the integrity of the learning environment. If the behavior of a student disturbs or otherwise interferes with instruction, the student will be asked to leave the class. The student may be allowed to return to the next class meeting after consultation with the instructor and a third party. The third party may be another faculty member, division chair, or a dean. The instructor may have a consultation with the department chair and the Dean of Student Affairs to determine if the student should appear before the Judiciary Committee.

7. Destruction, damage, or misuse of College, public, or private property (the student is responsible for any damage done to College property).

8. Conduct in violation of federal or state statutes or local ordinances that threatens the health and/or safety of the College community or that could adversely affect the educational environment of the College.

9. Conviction of any misdemeanor or felony that adversely affects the educational environment of the College.

10. Obtaining College services by false pretenses including, but not limited to, misappropriation or conversion of College funds, supplies, equipment, labor, material, space, facilities, or services.
11. Hazing, i.e., any mental or physical requirement or obligation placed on a person by a member of any organization, or by an individual or group of individuals that could cause discomfort, pain, or injury or that violates any legal statute or College rule, regulation, or policy. Hazing has been defined as, but is not limited to, striking, laying open hand on, treating with violence, or offering to do bodily harm to a person with intent to punish or injure the individual, or other treatment of a tyrannical, abusive, shameful, insulting, or humiliating nature. Hazing is any action taken or situation created, whether on or off the campus premises, to produce mental or physical discomfort, embarrassment, harassment, or ridicule, including servitude often called personal favors. The College does not approve of or condone hazing; thus, activities of this nature shall be dealt with promptly and sternly.

12. Lewd, obscene, licentious, or indecent conduct or verbal or written threat of such action against another person, including sexual harassment/misconduct.

13. Harassment, intimidation, bribery, physical assault, etc., or any other means, implied or explicit, to influence any member of a judicial body named in the Code including witnesses, faculty members, staff members, and students before, during, or after a hearing. Organizations shall be responsible for the actions of their individual members, alumni, advisors, etc. in this type of situation.

14. Possession of firearms or weapons (including hunting guns, bows, crossbows, etc.), ammunition, explosives, fireworks, or any other dangerous instrumentalities.

15. Intoxication from, or the possession and/or consumption of, any alcoholic beverage or non-prescribed controlled substance.

16. Unauthorized manufacture, sale, delivery, or possession of any drug or drug paraphernalia defined as illegal under local, state, or federal law.

17. Theft, accessory to theft, and/or possession and/or transportation and/or sale of stolen property.

18. Physical abuse, threat of violence, intimidation, and physical or mental harassment.

19. Trespassing or unauthorized entry.

20. Entering false fire alarms, tampering with fire extinguishers, alarms, or other safety equipment.

21. Publishing, aiding in publishing, circulating, or aiding in circulation of anonymous publications or petitions of a libelous, slanderous, scurrilous, or unduly offensive nature.

22. Smoking or using any tobacco product in classrooms, laboratories, library-media buildings, gymnasiums, or other locations where prohibited (including clinical sites).

23. Playing a device such as a tape player, radio, or other electronic device in the student center, hallways, classrooms, or any other place where such activity would interfere with normal activity of the College.

24. Any form of illegal activity defined by state or federal law or municipal ordinance.

25. Disruptive or disorderly conduct that interferes with the rights and opportunities of those who attend the College to use and enjoy College facilities.

26. Failure to obtain clearance from an instructor to leave a class, lab, clinical, or campus during class/clinical hours.

27. Failure to wear appropriate dress for the department in which the student is enrolled.

28. Participation in any form of gambling.

29. Unauthorized possession of a key to any College facility or vehicle.

If a student violates any of the provisions listed above while engaged as a representative of a student organization, the organization will be subject to having its approval suspended or terminated.

Acceptable Use Policy
These guidelines are to assist with the interpretation and administration of the Acceptable Use Policy for Information Technology Resources. They outline the responsibilities each student and employee assumes when using information technology resources.

The purpose of information technology resources is to provide educational resources for the College’s students and employees. Access to these resources is a privilege and must be treated with the highest standard of ethics. The College expects all students and employees to use information technology resources in a responsible manner; respecting the public trust through which they have been provided, the rights and privacy of others, the integrity of the facilities and pertinent laws, and College policies and standards.

This policy outlines the standards for acceptable use of Wallace Community College’s information technology resources, which include, but are not limited to, equipment, software, networks, data, and telephones.

This policy applies to all users of the College’s information technology resources, including faculty, staff, students, guests, organizations, and individuals accessing external network services, such as the Internet via College facilities. Violation of this policy may result in suspension or revocation of utilization privileges, administrative discipline, or immediate termination of the violator’s relationship with Wallace Community College and could lead to criminal and civil prosecution.

Acceptable use of the College’s Internet connection provided via the Alabama Research and Education Network (AREN) is also governed by this document. Any activity that is not listed here, which violates local, state, or federal laws, or violates the AREN Acceptable Use Policy, is also considered a violation of this Acceptable Use Policy.

User Responsibilities. Use of the College’s information technology resources is permitted based on acceptance of the following specific responsibilities and the understanding that computer use may be monitored:

Use only those information technology resources for which you have permission. Example: It is unacceptable to:

- use resources you have not been specifically authorized to use;
- use someone else’s account and password or share your account and password with someone else;
- access files, data, or processes without authorization; and
- purposely seek out, exploit, or seek to exploit security flaws to gain system or data access.

Use information technology resources for their intended purpose. Example: It is unacceptable to:

- send forged email;
- use electronic resources for harassment or stalking other individuals;
- send bomb threats or hoax messages;
- send chain letters that may interfere with the system’s efficiency;
- intercept or monitor any network communications not intended for you;

- send chain letters that may interfere with the system’s efficiency;
- intercept or monitor any network communications not intended for you;
· use computing or network resources for commercial advertising or other commercial purposes;
· attempt to circumvent security mechanisms;
· use network resources to download news, music, graphics, or other communications not related to College activities.

Protect the access and integrity of information technology resources. Example: It is unacceptable to:

· knowingly release a virus that damages or harms a system or network,
· prevent others from accessing an authorized service,
· attempt to deliberately degrade performance or deny service,
· corrupt or misuse information,
· alter or destroy information without authorization,
· engage in spamming (sending an annoying or unnecessary message to a large group of people).

Respect the privacy of others. Example: It is unacceptable to:

· access or attempt to access another individual’s password or data without explicit authorization;
· access or copy another user’s electronic mail, data, programs, or other files without permission;
· use obscene, profane, lewd, vulgar, rude, inflammatory, threatening, or disrespectful language;
· continue sending email messages to someone after being told to stop; and
· post derogatory information or statements about a person.

Abide by applicable laws and College policies and respect the copyrights and intellectual property rights of others, including the legal use of copyrighted software. Example: It is unacceptable to:

· make more copies of licensed software than the license allows;
· plagiarize works that you find on the Internet; and
· deliberately upload, download, distribute, or possess pornographic material.

System Administrators’ Responsibilities. Systems Administrators and providers of College information technology resources have the additional responsibility of ensuring the integrity, confidentiality, and availability of the resources they are managing. Persons in these positions are granted significant trust to use their privileges appropriately for their intended purpose and only when required to maintain the system. Any private information seen in carrying out these duties must be treated in the strictest confidence, unless it relates to a violation or the security of the system.

Although information technology providers throughout the College are responsible for preserving the integrity and security of resources, security sometimes can be breached through actions beyond their control. Users are urged to take appropriate precautions such as safeguarding accounts and passwords and promptly reporting any misuse or violations of the policy.

Violations. Every member of the College community has an obligation to report suspected violations of the above guidelines or of the Acceptable Use Policy for Information Technology Resources. Reports should be directed to the department responsible for the particular system involved. Reported violations will be addressed in conformance with published College policy.

Wallace Community College is provided access to the Internet as a member of the Alabama Research and Education Network, which is supported by the Alabama Supercomputer Authority. Therefore, any users of the Internet are to be made aware of the Acceptable Use Policy of the Alabama Supercomputer Authority for full compliance of this policy.

Disciplinary Procedure
3. Such complaints must be directed to the designated official at each College location and must be presented in writing. The written charge must define the specific charge and state the grounds for the charge.

4. The designated College official at each College location shall conduct, or have conducted, a thorough investigation of allegations within 5 working days from the receipt of the written complaint. After the investigation, the student or group will be offered an opportunity to admit to the charge, accept sanctions and waive the right to a further hearing. If the student or group denies the charge and in the designated College official's opinion, after a review of the complaint and information obtained in the investigation, there is enough probable cause to reasonably believe that the student or group in question did commit the offense, the designated College official will discuss the complaint and evidence with the student or group. The designated College official will offer the student or group every opportunity to explain its actions. If sanctions are necessary, this action will be fully explained and prescribed in writing, and administered by the designated College official.

5. The student or organization will be offered the opportunity to execute a statement accepting the sanctions deemed appropriate by the designated College official and waive the right to the appeal process. Any student or group who fails to execute the aforementioned statement shall be deemed to have requested a hearing before the Dean of Student Affairs.

6. On appeal, the student or group will be directed to the Dean of Student Affairs, who will hear the appeal and determine, based on evidence and testimony(s), if the student or group is guilty as determined by the designated College official and will determine appropriate sanctions. If the Dean of Student Affairs determines that the student or group is not guilty, the student or group will be cleared of all charges. If the student or group is found guilty by the Dean of Student Affairs, they will be given an opportunity to execute a statement accepting the sanctions imposed by the Dean. If the student or group declines the opportunity to execute a statement accepting the sanctions deemed appropriate by the Dean of Student Affairs and waives the right to the appeal process, it will be necessary to move to the next level of appeal—the Judiciary Committee.

7. In the event that the student or organization requests a hearing before the Judiciary Committee, the student shall be provided with a written statement of the charges as filed to provide the student or organization reasonable notice of the conduct or circumstances on which the alleged violation is based. This statement will be presented by the chairperson of the Judiciary Committee. Said statement shall advise the student or organization that it is permissible to appear alone or with counsel before the Judiciary Committee and to be present during all phases of the hearing except during the Committee's deliberation. Counsel shall not speak for or on behalf of the accused student or organization but may act only in an advisory capacity. Counsel may not question or cross-examine witnesses or Committee members. Additionally, the statement shall set out that the advised student or organization will be provided the opportunity to present evidence and to conduct reasonable cross-examination of witnesses.

8. The hearing before the Judiciary Committee shall be scheduled as soon as it is practical but no later than 30 calendar days from the date of the student's or organization's meeting with the Dean of Student Affairs.

9. A student or organization that has requested a hearing before the Judiciary Committee and that fails to appear at the designated date, hour, and place of the hearing, after notification thereof, shall be deemed to have waived the right to a hearing and the right to appear before the Judiciary Committee. The Judiciary Committee may then proceed with the hearing. In the event the accused student or organization shall be unable to attend the hearing for good cause at the appointed time, prior written notice of the inability to attend shall be submitted to the Dean of Student Affairs, whereupon a new date shall be set by the Dean of Student Affairs. Only one such extension shall be granted except where additional extensions would cause undue hardship to the student or organization.

10. The hearing before the Judiciary Committee shall not be conducted as a courtroom trial, but shall proceed as follows:

One appointed faculty member shall serve as Chairperson of the Judiciary Committee. The Chairperson shall screen the committee members prior to the hearing for any prejudicial knowledge. In the event of special prejudicial knowledge, those members may be replaced by the President or his/her designee with other qualified faculty members and/or students. A simple majority of the members present will be allowed to make a judgment and render a decision in the matter with regard to a finding of guilt and the imposition of appropriate disciplinary action. (A minimum of 3 committee members must be present to hear and rule on the case.)

A record of all proceedings shall be kept in the form of a tape recording, and a copy may be reproduced at the expense of the accused students or organization.

11. The chairperson's duties include the following:

a. Arranging for appropriate times and places for committee meetings and hearings;

b. Informing, in writing when possible, the parties to the action being considered of the times and places of committee hearings, which they are requested or required to attend, and supplying them with a statement of the charge.

c. Informing appropriate persons that a hearing is pending.

d. Arranging for the hearing to be electronically recorded.

e. Conducting the hearing.

f. Maintaining committee records and all documents that will be presented to the Dean of Student Affairs after the conclusion of the meeting.

g. Informing, in writing, the appropriate persons of the decisions of the committee. Such decisions will include findings and, if appropriate, sanctions.

h. Arranging for appropriate security when necessary during hearings.

Proceedings shall open with the Chairperson of the Judiciary Committee reading the following statement:

“A College is an academic institution, not a courtroom or administrative hearing. The Judiciary Committee is not bound by the rules of legal evidence which would apply in a court proceeding. The committee is allowed to admit and consider evidence that might not be admissible in a court of law. This includes hearsay. However, evidence must be relevant to the charge.”
Note: Formal rules of evidence shall not be observed in proceedings before the Judiciary Committee. However, the chairperson of the Committee shall be authorized to exclude irrelevant, redundant, or unduly inflammatory evidence. The findings of the Committee on the issue of violation(s) of the Code of Student Conduct will be based solely on evidence introduced at the hearing. Evidence of previous violations of rules and regulations or violations of local, state, or federal laws, ordinances, and regulations shall not be considered in any way by the Committee in determining whether the violation charges were committed, but such evidence may be considered by the Committee in consideration of the appropriate sanctions. They may also be introduced as evidence in rebuttal of any related character evidence introduced by the accused party.

The Chairperson of the Judiciary Committee will then read the charge against the student or organization. The student or the organization's president shall then make a plea of guilty or not guilty. If the accused student or group admits guilt, the committee will go directly into closed session to deliberate sanctions.

The plaintiff or representative of the plaintiff shall present the evidence against the accused student or organization. The accused student or organization will be afforded the opportunity for reasonable cross-examination.

The accused student or organization may then present evidence by oral testimony, witnesses, and/or written sworn affidavits. Reasonable cross-examination will be afforded.

Rebuttal evidence may be presented by either party as necessary but not so as to be redundant.

The accused student or organization may make a closing statement.

1. **Exoneration.**

2. **Reprimand.** A written notice that continuation or repetition of improper conduct may be cause for further disciplinary action.

3. **Restitution.** Compensation for damages to property limited to the actual cost of repair or replacement.

4. **Probation.** This sanction is for a designated period of time which may include exclusion from privileges such as extracurricular activities and/or on-campus driving privileges. Additionally, if the student is determined by any of the disciplinary procedures herein set out to be in subsequent violation of the Code of Student Conduct during the probationary period, the student may be either suspended or expelled. Provisions of the probationary period shall be determined and expressed by the Committee.

5. **Voluntary Withdrawal.** A student may be given the option to voluntarily withdraw from the College in lieu of disciplinary action. The Judiciary Committee may specify a period of time before the student may apply for readmission. To qualify for readmission, the student must receive approval from the instructional dean and meet the academic standards for readmission. Students will not be eligible for any refund from the College. If a student withdraws before disciplinary procedures are carried out, the student will be subject to discipline as may be imposed by the designated College official at the time of reentry to the College.

6. **Suspension.** Separation from the College for a definite period of time. A student may be suspended for a specific period of time not to exceed two years. To qualify for readmission after suspension, a student must receive approval of the instructional dean and meet all reasonable requirements and academic standards for readmission. Students will not be eligible for refunds.

The plaintiff, College, and the accused student may each have an attorney or other personal representative present to act as an advisor. The respective attorneys or personal representatives shall not be advocates and shall not question witnesses or have any role other than to act as advisors to the Committee or the accused.

After presentation of all evidence, the Judiciary Committee shall enter closed session. The Committee shall deliberate and make its determination of findings and determine appropriate sanctions if the student or organization is found guilty.

Once the Judiciary Committee has reached its decision, the student or organization and the student's or organization's counsel or advisor may return and be informed of the results.

If the accused student or organization is found not guilty, the hearing is ended. If the accused student or organization is found guilty, the Chairperson of the Judiciary Committee will disclose the findings and sanctions determined by the committee. The student or organization shall then have an opportunity to make a statement to the Judiciary Committee, accepting the findings and sanctions recommended by the committee or declining to accept the findings and sanctions. If the student or group declines to accept the findings and sanctions imposed by the committee, an appeal may be filed with the President or designee. Appeals to the President or designee must be filed in accordance with procedures outlined in the Appeals section of this document.

The student or organization shall be provided with a written statement of the determination of the Judiciary Committee within 72 hours of the close of the hearing.

**Sanctions.** A student or group of students deemed to be in violation of the Code of Student Conduct is subject to imposition of one or more of the following sanctions:

- **7. Expulsion.** An indefinite termination of student status from the College for a period of not less than two years. To qualify for readmission after expulsion, a student must receive the approval of the instructional dean and meet all reasonable requirements and academic standards for readmission. Students will not be eligible for a refund. Under certain conditions, expulsion could mean the permanent severance from the College.

**Appeal.** The determination and sanction imposed by the Judiciary Committee are subject to review on appeal by the President of the College or his/her designee. The President of the College or designee has discretionary authority to modify or affirm the sanction(s) imposed by the Judiciary Committee; to exonerate the accused student or organization; and/or to order a rehearing of the case in question.

A student or organization has seven (7) calendar days from the day of the hearing and determination by the Judiciary Committee to request a review of the proceedings and/or the sanction. Such appeal request must be submitted in writing to the designated College official on each campus. Failure to request an appeal as stated herein shall be a waiver of a review by the President of the College or designee and all rights in relation thereto; furthermore, failure to request an appeal as stated herein shall be an admission of the charges and a consent to the sanctions imposed by the Judiciary Committee.

A written appeal must expressly state the grounds of such appeal, which are limited to newly discovered evidence, violation of procedures, or that the imposed sanction was unduly harsh, improper, or lenient under the circumstances.

The designated College official may appeal the decision of the Judiciary Committee to the President of the College or his/her designee if the sanctions delivered are not appropriate or if the Committee failed to act.

The student or organization shall be provided a written statement of the decision of the President or designee within seven (7) days from the date of filing the request for appeal.
STUDENT ACADEMIC GRIEVANCES

Policy. The College has established policy and procedures to resolve student academic grievances that result from the acts or omissions of faculty members or administrators. This resolution should be achieved at the lowest level and in the most equitable way possible. The burden of proof rests with the complainant.

Procedures. When students believe they have an academic grievance, they should first seek to resolve it by discussions with the faculty member or administrator involved. If these discussions are not satisfactory, the complaint should be taken to the next highest level listed in the following procedure. If the grievance arises from a classroom situation, students should take the following steps in seeking redress:

1. Consult with the instructor involved, in person or by written contact, no later than 12 calendar days following the incident.
2. If agreement on or compromise of the problem is not achieved within 3 days, take the grievance to the appropriate Division Director.
3. If agreement on or compromise of the problem is not achieved within 3 days, take the grievance to the appropriate Instructional Coordinator.
4. If still not satisfied that a fair and equitable solution has been found within 3 days, take academic grievances to the Dean of Instructional Affairs. If still not satisfied, move to step 5.
5. The student should read the Judgments section of this policy carefully before contacting the Dean of Student Affairs for a hearing before the Admissions and Academic Standards Committee.
6. As a last resort and only after steps 1-5 have been carried out or conscientiously attempted, a student may take a grievance in writing to the Dean of Student Affairs and the Chairperson of the Admissions and Academic Standards Committee. The grievance must be filed within 20 class days of the term following that in which the grievance occurred.

No instructor or administrator shall be allowed to delay resolution of an academic grievance by failing to hold a consultation with a student within a reasonable length of time of the initial request. Normally such consultation should occur immediately after receipt of the student request, unless bona fide reasons such as illness, personal emergency, or campus absences for professional reasons make the time limit unreasonable.

In some instances when the personalities or problem involved would make starting at the level of the complaint too awkward or embarrassing, students may initiate a complaint at the next higher level listed.

Types of Grievances. No list of grievance types could cover all contingencies that might arise. However, this procedure should be able to resolve the following types of grievances, which are among those expressed most often by students:

1. Errors in calculation or recording quiz or other grades.
2. Improper lowering of grade on basis of an alleged violation of an attendance policy.
3. Failure of a faculty member to follow College policies in conduct of classes or examinations.

Certain types of grievances should not be brought to the Committee, although they may be brought to the attention of the Department Chairperson and, if necessary, the appropriate dean so that a continuing administrative effort may be made to ameliorate problems. Examples of these grievances include:

1. Gross differences in grading by instructors teaching separate sections of the same course.
2. Personal habits of the instructor that distract students in their attempts to learn course material.
3. Fine distinctions in grading (e.g., the line between an "A" and a "B," or between a "D" and an "F") may be appealed only to the instructor.
4. Unannounced quizzes will not be considered a grievance, unless they are contrary to the class syllabus or information provided to the class by the instructor.

Role of the Admissions and Academic Standards Committee. There shall be seven (7) voting members of one or more academic standards committees to be appointed by the President of the College as follows: five (5) professional employees and two (2) students. A simple majority of members present may rule on any request or issue before the Committee. The role of the Admissions and Academic Standards Committee shall be to hear academic grievances, to hear academic appeals for students who have been suspended from the College for academic reasons, and to provide input on College policies.

The chairperson of the committee shall be the administrative officer of the committee. The chairperson's duties shall include arranging for appropriate times and places for committee meetings and hearings; informing committee members of the times and places of committee meetings and hearings; informing, in writing, all interested parties of the times and places of committee hearings that they are requested to attend and supplying them with a statement of alleged grievances; informing all other interested parties that a grievance is pending; securing and distributing to the committee written material appropriate for its consideration; arranging for recording of committee proceedings; maintaining committee records that are to be kept on permanent file in the Office of the Dean of Student Affairs; and informing, in writing, the appropriate individuals of the decisions of the committee.

Members of the committee may at any time disqualify themselves from consideration of any given case or cases because of personal bias. In such a case, a replacement member will be appointed by the President.

Either party to the hearing may request of the chairperson, in writing, that any member or members of the committee be excluded from consideration of the case. Such a request must be for cause and be brought to the chairperson's attention as the first step in the hearing. In the event a member is disqualified by majority vote of the committee from consideration of a case, the President shall appoint a replacement. The replacement must meet the general requirements of regular committee members.

Procedures For Hearing. Each Admissions and Academic Standards Committee may establish and publish its own procedures in accordance with provisions for academic due process and in accordance with the stipulation stated below:
The only persons present at meetings of the committee shall be committee members, parties to the action being considered by the committee and their representatives (not to exceed two), witnesses actually testifying before the committee, and two representatives of the Student Affairs Division. The College and the complainant may have an attorney present during the hearing. The attorneys may only advise. They may not cross examine, question, or address the committee in any way.

The committee, as a whole, shall arrange for a swift and comprehensive investigation of the matter under consideration. It shall then decide, on the basis of written statements and discussions presented by the complainant and respondent, and review of evidence, whether or not there are sufficient grounds to hear a case and whether or not the committee will accept written statements in lieu of personal appearances by witnesses. If the committee decides that there are not sufficient grounds to hear a case and closes the case, it shall notify the complainant and respondent in writing as to the reasons for its actions.

If the committee determines that the case merits further consideration, the parties involved shall be informed in writing, consulted as to the possibility of correcting the situation, and, if a hearing is still required, be advised in writing of the scheduled time and place of the hearing.

At the hearing, the complainant, individuals directly involved, and witnesses may testify and be questioned by the opposite party and committee members. Only evidence presented in the hearings may be considered in the final judgment. Written statements by witnesses in lieu of personal appearance shall not be allowed except in rare instances. A record of the hearing, tape recorded or otherwise preserved, shall be reserved for reference and review until the case has been finally resolved.

**Consumer Complaint Information.** Wallace Community College believes that all students should have easy access to a process for resolving any conflicts, complaints, or grievances. Several policy/procedural statements are contained in the College Catalog and Student Handbook.

Any member of the College community who believes that he or she has been the victim of sexual harassment or any other form of discrimination, may bring the matter to the attention of any academic or administrative officer on any campus or instructional site. When a complaint has been reported to any of these individuals, the recipient of the complaint will forward the complaint to the Title Compliance Coordinator.

**ADA/Other Civil Rights/Title IX Policy.** Wallace Community College is committed to an environment conducive to learning and free from harassment or discrimination (intentional or implied) with regard to race, religion, disability, age, or national origin. A grievance process is in place to ensure the rights of all students with regard to unencumbered learning. Designated compliance officers assist students in resolving grievances at the lowest possible level or in accessing subsequent steps in the grievance procedure. Students are strongly encouraged to use this process should problems arise.

**Sexual Harassment Policy.** Wallace Community College is committed to an environment conducive to learning and free from harassment or discrimination (intentional or implied) with regard to sex. Wallace Community College administration will take all necessary steps to ensure that sexual harassment, in either the hostile environment or quid pro quo form, does not occur at any facility or at any event/activity sponsored by this College. This policy applies to all members of the College community, who are encouraged to report promptly complaints about sexual harassment.

Any member of the College community who believes that he or she has been the victim of sexual harassment may bring the matter to the attention of any academic or administrative officer, dean, director, supervisor, counselor, teacher, or advisor. When a complaint has been reported to any of these individuals, the recipient of the complaint will forward the complaint to the appropriate College official, who shall be

**Judgments.** Committee members shall arrive at a judgment in consultation among themselves after the parties have been dismissed. Only members of the committee who have been present during all of the meetings and who have heard all testimony relating to the alleged grievance may vote on the case. A majority vote of such qualified members shall constitute a judgment. A decision of the committee relating to redress of grievances is final insofar as the committee is concerned.

The committee has been delegated by the President the authority to change or direct changes in student grades, faculty conduct, or other disputed areas. A course of action deemed appropriate by the committee shall be carried out unless the student or faculty member chooses to appeal the committee's decision to the President of the College or designee. The appeal must be made in writing to the President or designee no later than 7 calendar days after the date of the committee's decision and must be resolved within a maximum of 30 calendar days.

If redress requires a policy change or if a policy change appears advisable or necessary, the committee shall refer its recommendations to the President of the College or appropriate administrator.

**SEXUAL HARASSMENT/ADA/OTHER CIVIL RIGHTS/TITLE IX GRIEVANCE AND PROCEDURES POLICY**

**Note:** Faculty and staff members and students should know that any expectation of confidentiality does not include any illegal act. Faculty and staff members, including College counselors, are required to notify law enforcement and College officials when they learn of a criminal act.

All employees of Wallace Community College are expected to treat students with respect and dignity at all times. Behaviors, words, or actions that create (directly or indirectly) a working or learning environment hostile to members of either sex will not be tolerated. Recognizing that individual perceptions differ, the College subscribes to the reasonable person standard, which measures sexual harassment by whether or not such conduct would substantially affect the work environment of a reasonable person. Employees are cautioned to be conservative in projecting how a reasonable person would react and are strongly advised to ask their administrators and/or compliance officers if in doubt. The College will not tolerate quid pro quo harassment whereby sexual favors are requested or demanded in exchange for grades, employee ratings, promotions, etc.

The College reaffirms the Equal Employment Opportunity Commission guidelines which state that whether or not there is sexual harassment is a matter which must be viewed from the perspective of the recipient. In other words, harassment may exist even when no direct intent to harass is present. Therefore, all employees are encouraged to be aware of the environment they help to create and to be sensitive to the perceptions of others.

Students with any conflict, complaint, or grievance will initially report to any College official. Students may also report directly to the Sexual Harassment Officers listed above.

**Legal Authority**

Sexual harassment is a form of sex discrimination which is prohibited by Title VII of the Civil Rights Act of 1964 and by Title IX of the Education Amendments. Wallace Community College also subscribes to the guidelines of the Equal Employment Opportunity Commission.
**Definition**

Sexual harassment may involve the behavior of a person of either sex against a person of the opposite or same sex, and occurs when such behavior constitutes unwanted sexual advances, unwelcome requests for sexual favors, and other unwelcome verbal or physical behavior of a sexual nature. Sexual harassment is either hostile environment or quid pro quo when:

1. Submission to such conduct is made either explicitly or implicitly a term or condition of a person's employment or academic advancement (quid pro quo);
2. Submission to or rejection of such conduct by an individual is used as the basis for decisions affecting an individual's employment or academic standing (quid pro quo);
3. Such conduct has the purpose or effect of unreasonably interfering with a person's work or academic performance or creating an intimidating, hostile, or offensive work, learning or social environment (hostile environment).

A third party may also file a complaint under this policy if the sexual conduct of others in the education or work environment has the purpose or effect of substantially interfering with the third party's welfare, academic, or work performance.

**Examples of Prohibited Behavior**

Prohibited acts that constitute sexual harassment may take a variety of forms. Examples of the kinds of conduct that may constitute sexual harassment include, but are not limited to:

1. Unwelcome sexual propositions, invitations, solicitations, and flirtations.
2. Threats or insinuations that a person's employment, wages, academic grade, promotional opportunities, classroom or work Wallace Community College regards as inappropriate any and all romantic relationships between students and instructors/staff members who have any power over students. The College urges all faculty and staff to refrain from beginning or continuing all such relationships since such behavior may be perceived as unwelcome, even if consensual, and can be seen at the time or later as sexual harassment. The College expects compliance with the above position by all instructors and staff and hereby notifies all instructors and staff that violation of this policy leading to concern regarding sexual harassment may result in sanctions.

**Complaint/Grievance Procedures**

Wallace Community College is committed to an environment conducive to learning and free from discrimination (intentional or implied) with regard to sex, race, age, national origin, religion, or disability. The following procedure is in place at Wallace Community College to provide recourse for any students who feel that their civil rights have been violated or that they have not been treated fairly with regard to those rights. The College recognizes two distinct levels of action: Complaints and Grievances.

**Complaint Procedures**

**ADA/Other Civil Rights/Title IX**

Any student who desires to make a complaint regarding a College action under ADA, other civil rights, or Title IX shall, within 10 work days of an alleged violation, report the complaint to the Dean of Student Affairs or the Campus Dean. A conference will then be arranged with the appropriate College compliance officer. If the complaint is about the designated College compliance officer, the written complaint shall be sent directly to the President's Office. The President will assign the complaint to another member of the administrative staff.

It shall be the responsibility of the designated College compliance officer to attempt to secure a solution to the complaint. The compliance officer will meet with the parties involved and attempt to solve the problem or address the concern in an informal session. If, after discussion, it is determined that the complaint can be resolved immediately, the designated College compliance officer will take action assignments or other conditions of employment or academic life may be adversely affected by not submitting to sexual advances.

1. Unwelcome sexual propositions, invitations, solicitations, and flirtations.
2. Threats or insinuations that a person's employment, wages, academic grade, promotional opportunities, classroom or work Wallace Community College regards as inappropriate any and all romantic relationships between students and instructors/staff members who have any power over students. The College urges all faculty and staff to refrain from beginning or continuing all such relationships since such behavior may be perceived as unwelcome, even if consensual, and can be seen at the time or later as sexual harassment. The College expects compliance with the above position by all instructors and staff and hereby notifies all instructors and staff that violation of this policy leading to concern regarding sexual harassment may result in sanctions.

**Sexual Harassment**

Within 10 work days of an alleged violation, the complaint will initially report to any College official. A conference will then be arranged with the appropriate College Sexual Harassment Officer. If the complaint is about the designated College Sexual Harassment Officer, the written complaint shall be sent directly to the President's Office. The President will assign the complaint to another member of the administrative staff.

The purpose of this procedure is to secure, at the lowest possible level, equitable solutions to any problem that may arise. These proceedings will be kept as informal and confidential as may be appropriate. The 10-day request is in no way intended to limit a complainant's right to assistance after that time period, but rather to ensure timely resolution of any complaint.

**Consensual Relationships**

Wallace Community College believes that consenting romantic and sexual relationships between faculty members and students are generally deemed very unprofessional and very unwise because such relationships may result in a conflict of interest and/or a power differential between members of the College community. A power differential may result in situations such as the following: (1) an instructor and a student in that instructor's class and (2) an instructor/staff member and a student who are participating in an extracurricular activity requiring the student to report to the instructor/staff member in that activity.

A faculty member who enters into a sexual relationship with a student where a professional power differential exists must realize that, if a charge of sexual harassment is subsequently lodged, it will be exceedingly difficult to prove immunity on the grounds of mutual consent. The faculty member or supervisor must also be aware that Wallace Community College can be sued as well if sexual harassment can be proven.

Complaint procedures are established to resolve the complaint and will submit a written report to the President within 10 working days of the filing of the complaint. The report shall contain the original written complaint, a brief summary of any information essential to an understanding of the problem, and a description of the action taken. Copies will be sent to all parties involved in the discussion. Confidentiality will be observed in this process.

If, after discussion, it is determined that the complaint cannot be resolved immediately but requires instead a plan of resolution, the designated College compliance officer will submit a written report to the President within 10 working days of the filing of the complaint. The report shall contain the original written complaint, a brief summary of any information essential to an understanding of the problem, and a description of the plan to resolve the problem. Copies will be sent to all parties involved in the discussion. This plan is subject to modification by the President or designee, who will inform the submitting designated College compliance officer in writing of any changes. Unless this duty is otherwise assigned by the President, the submitting designated College compliance officer has the responsibility of monitoring implementation of the plan and advising the President, in writing, when the plan has been completed.

The purpose of this procedure is to secure, at the lowest possible level, equitable solutions to any problem that may arise. These proceedings will be kept as informal and confidential as may be appropriate. The 10-day request is in no way intended to limit a complainant's right to assistance after that time period, but rather to ensure timely resolution of any complaint.
IF ANY STUDENT'S COMPLAINT CANNOT BE RESOLVED AT THIS LEVEL, SUCH AN UNRESOLVED COMPLAINT SHALL BE TERMED A GRIEVANCE.

Grievance Procedure
The following grievance procedure is in place at this institution to provide recourse for any persons who feel that their civil rights have been violated and who have not been able to remedy the situation at the complaint level.

Steps To Be Followed

1. The original and two copies of Grievance Form A must be filed with the Office of the President of the institution within 30 calendar days following date of alleged violation(s). The alleged violation(s) must be clearly and specifically stated. The complainant is advised to keep copies of all forms used.

2. The President of the institution or his/her designee will have 30 calendar days following receipt of Grievance Form A to investigate and study complainant's allegation, hold a formal hearing, and make a written report of findings to complainant. The report must be mailed to complainant by certified mail, return receipt requested.

3. Complainant must, within 15 calendar days following receipt of the report from the President's Office, file with the President's Office a written notice of acceptance or appeal of the report. If a notice of appeal is filed, Appeal Form B must be used. Complainant must state clearly and specifically on Form B the objections to the findings and/or decisions of the report. Copies of Form B must be provided for the President and the Chancellor of The Alabama College System. If the complainant fails to file

Note: The complainant has the right to further appeal to the proper court or to the Office of Civil Rights of the U.S. Department of Education. All parties shall have the right to legal counsel and to produce witnesses in their own behalf. If the last day for filing notice of appeal falls on Saturday, Sunday, or legal holiday, the filing deadline is extended until 5:00 p.m. on the next working day.

Hearing Procedures. In the event that a hearing is scheduled within the time frame designated by the grievance officer, the President shall designate a qualified, unbiased person or committee to conduct each grievance hearing. Compliance officers will not be required to serve as hearing officers. The hearing officer or committee shall notify the complainant and each respondent of the time and place of the hearing, the witness list, and the right to have an attorney or representative present. The only persons present at meetings of this committee shall be committee members, parties to the action being considered by the committee, and their representatives (not to exceed two) and witnesses actually testifying before the committee. The institution and complainant may have an attorney present, at the respective party's cost, during the hearing. Attorneys may only advise; they may not cross examine, question, or address the committee in any way.

The grievance statement will be formally presented at the meeting. After the grievance is read into the record, the complainants will have the opportunity to present such oral testimony and other supporting evidence as they shall deem appropriate to their claim. Respondents shall then be given the opportunity to present such oral testimony and other evidence they deem appropriate to the respondents' defense against the charges. No cross examination will be allowed. Either party may ask the hearing officer to ask a question of the other party, and the hearing officer may or may not choose to do so. In the event that the College, or the administration of the College at large, is the party against whom the grievance is filed, the President shall designate a representative to appear at the hearing on behalf of the respondent. In the event that the College is the respondent, the College representative shall not be an attorney unless the complainant is assisted by an attorney or other personal representative.

The hearing shall be recorded either by a court reporter or on audio or video tape or by other electronic recording medium as agreed to by all parties in advance of the hearing. In addition, all items offered into evidence by the parties, whether admitted into evidence or not, shall be marked and preserved as part of the hearing record.

Report of Findings
Following the hearing, a written report of the findings shall be made to the President, the hearing officer, or the chairman of the committee. The report shall contain at least the following:

1. Date and place of the hearing
2. The name of each member of the hearing committee
3. A list of all witnesses for all parties to the grievance
4. Findings relevant to the grievance
5. Decisions and recommended consequences
6. Recommendation(s) to the President arising from the grievance and the hearing thereon

Non-Retaliation. No faculty, administrator or staff, applicant for employment, student, or member of the public may be subject to restraint, interference, coercion, or reprisal for action taken in good faith to seek advice concerning any sexual harassment, ADA, other civil rights, or Title IX matter, to file a complaint/grievance, or to serve as a witness or a panel member in the investigation of a complaint/grievance.

Filing a False Report. It is a violation of the faculty/staff and student conduct policies to file a false report.

Overview of Complaint/Grievance Procedure. Students will initially report to the Dean of Student Affairs. The complainant will then be assigned the appropriate College compliance/grievance officer.

COMPLAINT
ADA/Other Civil Rights/Title IX:
Immediately Resolved. College Compliance Officer takes action; written report to President within 10 working days of receipt of complaint.

Plan of Resolution. Written report to President within 10 working days of receipt of complaint; College Compliance Officer monitors plan.

Not Resolved at this level; GRIEVANCE.

Sexual Harassment:
Immediately Resolved. Conference with Compliance Officer; informal resolution of complaint.

Not Resolved at this level; GRIEVANCE.

GRIEVANCE
Conference with Grievance Officer; Grievance Form A; within 30 calendar days of occurrence

Hearing Requested. Hearing by designated committee or person; written report to President within 30 calendar days of receipt of Form A.

No Hearing Requested. Grievance Officer investigates; written report to President within 30 calendar days of receipt of Form A.

PRESIDENTIAL Review: If warranted; in opinion of the President.

Appeal to Chancellor. Grievance Form B; within 15 calendar days of receipt of College decision; form sent to respective Grievance Officer and Chancellor; investigation, hearing, written report to Complainant and Respondent within 30 calendar days of receipt of Form B.

Appeal to State Board of Education. Grievance Form C; within 15 calendar days of receipt of Chancellor's decision; form sent to Chancellor; appeal presented to State Board at or prior to their next scheduled meeting; investigation, hearing, written report to Complainant

Student Access to Educational Records. All students have the right to review their educational records with the following exceptions as outlined by FERPA:

1. Financial information submitted by parents.

2. Confidential letters and recommendations placed in their files prior to January 1, 1975, provided these letters were collected under established policies of confidentiality and were used only for the purposes for which specifically collected.

3. Confidential letters and statements of recommendation, placed in the records after January 1, 1975, to which the students have waived their right to inspect and review and that are related to the students' admission, application for employment or job placement, or receipt of honors.

4. Education records containing information about more than one student; however, in such cases the College must allow access to that part of the record which pertains only to the inquiring student. Wallace Community College does not provide copies of education records, except transcripts, unless geographic distance precludes students from effectively having access to their education records.

To review records, students and former students may go to the Admissions and Records Office, present a valid photo identification card, and ask to review the record. If it is an inappropriate time to retrieve the record on short notice, students may be requested to complete a Request to Review Education Records form in the Admissions and Records Office. Because of various circumstances, the College may delay to a maximum of 45 days release of the records for review. The College is not required to provide access to records of applicants for admission who are denied acceptance or, if accepted, do not attend.

Wallace Community College does not provide copies of the contents of student records unless a student is not within commuting distance of the

and Respondent within 30 calendar days of receipt of Form C by the Board.

Contact Persons/Compliance Officers. Students are strongly encouraged to contact the Dean of Student Affairs if they need to use the grievance process for problems concerning sexual harassment, Americans with Disabilities Act (ADA), Section 504, Title IX, or other civil rights issues. The Dean of Student Affairs will direct students to the appropriate contact person.

POLICY AND PROCEDURES FOR PRIVACY OF STUDENT EDUCATIONAL RECORDS
For Wallace Community College to comply with requirements of the Family Educational Rights and Privacy Act of 1974 (FERPA), the following policies and procedures have been established. Wallace Community College accords all rights under the law to students who are declared independent. For the purpose of this policy, whenever a student has attained 18 years of age OR is attending an institution of postsecondary education, the permission or consent required of and the rights accorded to the parents of the student shall thereafter only be required of and accorded to the student. Responsibility for protection of the privacy of student educational records rests primarily with the Assistant Dean of Student Affairs of the College. Educational records are defined by FERPA to include records, files, documents, and other materials that contain information directly related to students and are maintained by an educational agency or institution or by a person acting for such agency or institution. There are six exceptions to this definition of educational records as published in the GUIDELINES FOR POSTSECONDARY INSTITUTIONS FOR IMPLEMENTATION OF THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT OF 1974 AS AMENDED, Revised Edition 1998, a publication of the American Association of Collegiate Registrars and Admissions Officers.

College and is, therefore, physically unable to be present to view the records on campus. A copying fee of 25 cents per sheet will be assessed.

Challenge of the Contents of Educational Records. Students may challenge information in their educational records that they believe to be incorrect, inaccurate, or inappropriate. This challenge must be in writing and must be submitted to the appropriate records custodian, who is responsible for the records in question, if they do so within one year of the term in question. The Records Custodian must decide within a reasonable period of time whether corrective action will be taken, and the Records Custodian must provide written notification to the student and the Assistant Dean of Student Affairs of the corrective action that has been approved. Students who are not provided full relief sought by their challenge must be referred to the Dean of Student Affairs who will inform them of their right to a formal hearing. Students must make their request for a formal hearing in writing to the Dean of Student Affairs.

The following procedures shall apply:

1. The hearing panel that will adjudicate such challenges will be the Admissions and Academic Standards Committee.

2. Within a reasonable period of time after receiving the written request for a hearing, the chairperson of the Admissions and Academic Standards Committee must inform students of the date, place, and time of the hearing reasonably in advance of the hearing.

3. Students will be afforded a full and fair opportunity to present evidence relevant to the issue raised. They may be assisted or represented at the hearing by one or more persons of their choice, including an attorney, at their expense.

4. Decisions made by the Admissions and Academic Standards Committee must be in writing, must be based solely on the evidence presented at the hearing, and must include a summary of the evidence and the reasons for the decision. The decision
should be delivered in writing to the student, the Dean of Student Affairs, and the Assistant Dean of Student Affairs.

a. The Admissions and Records Office will correct or amend the educational record in accordance with the decision of the hearing if the decision is in favor of the student and inform the student in writing of the amendment.

b. Should Wallace Community College decide not to amend the record in accordance with the student's request, the Assistant Dean of Student Affairs must inform the student that:

(1) The student has the opportunity to place with the educational record a statement commenting on the information in the record or a statement setting forth any reason for disagreeing with the decision of the hearing.

(2) The statement placed in the educational record by the student will be maintained as part of the record for as long as the record is held by Wallace Community College.

(3) This record, when disclosed to an authorized party, must include the statement filed by the student.

Disclosure of Educational Record Information. Wallace Community College shall obtain written consent from students before disclosing any personally identifiable information from their education records. Such written consent must: (1) specify the records to be released, (2) state the purpose of the disclosure, (3) identify the party or class of parties to whom disclosure may be made, and (4) be signed and dated by the student.

1. To officials within the College who have been determined by the College to have a legitimate educational interest in the records. School officials include: counselors and instructors who are involved in counseling students, administrators who assist in counseling and who advise students with other problems, professional and clerical staff who directly relate to the administrative tasks of the College, College law enforcement officials, and College attorneys.

A school official has a legitimate educational interest if the official is performing a task that is specified in his or her position description or by a contract agreement, performing a task related to a student's education, or performing a task related to the discipline of a student. When doubt is raised by the Assistant Dean of Student Affairs about an individual's need to know or legitimate educational interest in having access to specific information, the issue shall be decided by the President of Wallace Community College.

2. To certain officials of the U.S. Department of Education, the Comptroller General, and state and local educational authorities in connection with certain state or federally supported education programs.

3. In connection with a student's request for or receipt of financial aid, as necessary to determine the eligibility, amount, or conditions of the financial aid, or to enforce the terms and conditions of that aid.

4. To state and local officials to whom information is specifically required to be reported or disclosed pursuant to state statute adopted prior to November 19, 1974.

5. To organizations conducting certain studies for or on behalf of Wallace Community College.

6. To accrediting organizations to carry out their accrediting functions.

FERPA states that certain information from student records may be classified as directory information. The following information has been declared by Wallace Community College as directory information:

- Name
- Address
- Telephone listing
- Date of birth
- Participation in officially recognized activities and sports
- Major field of study
- Weight and height of a member of an athletic team
- Dates of attendance
- Degrees and awards received
- Most recent educational institution attended
- Photographs
- Enrollment status
- E-mail address

This information will be released to inquiring individuals or agencies unless students sign a Do Not Release Directory Information form during the first two weeks of the term. Do Not Release forms are available at the following College locations: the Admissions and Records Office on the Wallace Campus in Dothan, the Student Affairs Department on the Sparks Campus in Eufaula, and the Administrative Office at either the Fort Rucker Center. THIS FORM MUST BE RESUBMITTED ANNUALLY.

FERPA established rules stating that some personnel and agencies may have access to students' educational records without written consent of the students. Wallace Community College will disclose information from a student's educational record only with the written consent of the student except:

7. To parents of eligible students who claim the students as dependents for income tax purposes. Determining dependency, as defined by Section 152 of the Internal Revenue Code, requires a copy of the parents' most recent Federal Income Tax Form.

In case of a divorce, separation, or custody when only one parent declares the student as dependent, Wallace Community College will grant equal access to the student's education records upon demonstration of dependency as described above.

8. To appropriate parties in a health or safety emergency, subject to a determination by the President or deans.

9. To personnel complying with a judicial order or lawfully issued subpoena, provided that the Admissions and Records Office makes a reasonable attempt to notify students in advance of compliance.

Note: Wallace Community College is not required to notify students if a federal grand jury subpoena, or any other subpoena issued for a law enforcement purpose, orders the College not to disclose the existence or contents of the subpoena.

10. To an alleged victim of any crime of violence (as that term is defined in 18 U.S.C. 16) of the results of any institutional disciplinary proceeding against the alleged perpetrator of that crime with respect to that crime.

Wallace Community College will inform parties to whom personally identifiable information is released that they are not permitted to disclose the information to others without the written consent of the students. The College will maintain a record of all requests for and/or disclosure of information from a student's educational records. The record will indicate the name of the party making the request, any additional party to whom it may be redisclosed, and the legitimate interest the party had in requesting or obtaining the information. The record may be reviewed by the eligible student.
A list of the types of records that Wallace Community College maintains, their locations, and their custodians is provided on page 129.

**Annual Notification of FERPA Rights.** Wallace Community College will give annual notice to current students of their rights under the Act by publishing information in this catalog, the Student Handbook, and by attaching the Annual Notification Statement to fall term registration materials. New students will receive information concerning their rights under the Act through distribution of an information sheet at Orientation.

**Facsimile Records (FAX).** Wallace Community College honors FAX requests to send official transcripts to third parties, and Wallace Community College will accept FAX transcripts for advising purposes only. An official transcript is required for admission purposes.

**Computer Access to Records.** Wallace Community College has established policies for initially instructing and periodically reminding school officials of FERPA's confidentiality requirements before it gives them access to the computer system. These school officials are informed of the criteria Wallace Community College uses to determine legitimate educational interest and of their responsibility for assuring that access is not abused.

**Students Rights after Ceasing Attendance or Graduation.** Students who have ceased attendance or have graduated from Wallace Community College have basically the same FERPA rights as students currently attending, including the right to (1) inspect their educational records, (2) have a hearing to amend an educational record, and (3) have their educational record privacy protected by Wallace Community College. Former students do not have the right to request of Wallace Community College non-disclosure unless they asked, at their last opportunity as students, that no directory information be disclosed.

**Privacy Rights of Deceased Students.** For 25 years following the death of a student, release of educational record information will not be made unless authorized by the student's parents or the executor/executrix of the deceased student's estate.

**DRUG AND ALCOHOL ABUSE—STANDARDS OF CONDUCT AND ENFORCEMENT**

Wallace Community College is a public educational institution of the State of Alabama and, as such, shall not allow on its premises, or at any activity it sponsors, the possession, use, or distribution of any alcoholic beverage or any illicit drug by any student, employee, or visitor. In the event of confirmation of such prohibited possession, use, or distribution by a student or employee, Wallace Community College shall, within the scope of applicable federal and state due process requirements, take such administrative or disciplinary action as is appropriate. For a student, the disciplinary action may include, but is not limited to, suspension, expulsion, and/or arrest or referral to the appropriate law enforcement agency. Any visitor engaging in any act prohibited by this policy shall be called on to immediately cease such behavior.

If any student or visitor shall engage in any behavior prohibited by this policy which is also a violation of federal, state, or local law or ordinance, that employee, student, or visitor shall be subject to referral to law enforcement officials for arrest and prosecution.

For specific and detailed information concerning (1) legal sanctions regarding unlawful use, possession, or distribution of alcoholic beverages and illicit drugs; (2) health risk of drug and alcohol use and abuse; and (3) where to get assistance, contact any College counselor. Complete printed information is located in the Grimsley Hall Counseling Center on the Wallace Campus, the Student Affairs Department on the Sparks Campus, and the Administrative Office at the Fort Rucker Center.

**MOTOR VEHICLE REGULATIONS**

**General Rules and Regulations**

1. All motor vehicles must be registered with the College police during registration or within two days after the beginning of the term.

2. Decals must be affixed to the right rear window or bumper. Improper mounting will void the decal and subject student to a citation.
3. Temporary parking permits will be issued by College police on request when a student must drive an unregistered vehicle for a short period of time.

4. Disabled stickers and/or tags are required for any individuals parking in spaces designated for persons with disabilities.

Traffic Regulations. The following information is provided to assist students, faculty, and staff with understanding campus regulations related to operating vehicles on campus. Any questions should be directed to the Dean of College Services and Wallace Campus.

Students, faculty, and staff must register vehicles routinely driven on campus at the Campus Police Department or Business Office. Registration information includes Social Security number, owner's license number, vehicle tag number, and vehicle make and model. Liability insurance is recommended for all vehicles.

At vehicle registration, campus police or College personnel will issue an identification decal. The decal must be permanently affixed to the lower right back window. On motorcycles the decal should be affixed to any area where it may be easily seen. Only the current decal should be displayed.

If a temporary vehicle (without a decal) must be driven on campus, the student must obtain a temporary parking permit at the Campus Police Department or Business Office. The license tag number of the temporary vehicle is necessary to receive a temporary permit.

The following rules must be observed:

1. Students, faculty, and staff must park in designated areas.
2. Faculty members may not give students permission to use faculty parking areas.
3. Parking is prohibited in loading and no parking zones.
4. All stop signs must be obeyed.
5. Speed on all campus roads is limited to 15 mph except where posted otherwise, but any speed not safe for road conditions, including vehicular and pedestrian congestion, is prohibited.
6. All parking must conform to marked-off areas. All parallel parking must be within 12 inches of curbs.
7. Vehicles left on campus overnight must be registered with the Campus Police Department.
8. Driving and parking on the grass and sidewalks is prohibited. Parking at crosswalks, loading zones, and yellow curbs is prohibited.
9. Double parking is prohibited.
10. Blocking driveways, entrances, and exits to parking areas or buildings is prohibited.
11. Drivers must yield to pedestrians in designated crosswalks.
12. In all lots marked with parking spaces, vehicles must be parked facing into the spaces.
13. Unregistered or illegally parked vehicles may be towed away at the owner's expense.
14. All motor vehicles on campus must have lights, mufflers, brakes, license tags, and any other equipment required by Alabama state law.
15. All other State of Alabama traffic laws will be enforced on campus.

A citation and fine will be issued for each violation. Vehicles may be towed away at owner's expense for chronic violations. If a vehicle is parked in such a manner and cannot be towed, the Campus Police will immobilize it with a car boot to the wheel area. This action will result in an additional fine to the owner/driver of the vehicle.

Fines may be paid at the Business Office in the Administration Building during normal business hours. Failure to pay fines will result in increased fines, student registration and graduation holds, and possible towing of the vehicle at owner's expense.

Appeals for parking or moving violations may be made to the Student Supreme Court after notifying the Chief of Police and Dean of College Services and Wallace Campus of the intended appeal. Decisions of the Student Supreme Court are final. Appeals should be made in writing and directed to the Student Government Association sponsor for scheduling purposes.

The Campus Police Department is provided as a service to the campus community and is supervised by the Dean of College Services and Wallace Campus. Any questions or concerns regarding Campus Police should be directed to the Dean of College Services and Wallace Campus in the Administration Building on the Wallace Campus.
