

Faculty (ADN)

Each semester, faculty members coordinate office hours around their instructional duties. *Students should make appointments to interact with faculty members during these times.* Faculty members can be contacted in person or via Blackboard, phone, or email.

Students are responsible for information given in class or clinical. This information comes from the instructor. Please contact your instructor directly instead of calling the ADN Program Office. In the event that a faculty member is not available for phone calls, they can alternatively be reached through Blackboard or email.
