

New Student Advising and New Student Experience

New Student Advising provides individualized, one-on-one sessions with a professional advisor located in the Advising Center on the Dothan or Eufaula campus. These sessions are designed to support student success and help new students navigate their college experience effectively.

Advisors assist students with:

- Developing short- and long-term academic plans
- Understanding transfer requirements
- Selecting appropriate courses for their program of study
- Navigating registration procedures and class scheduling
- Interpreting college policies
- Addressing academic concerns and special needs
- Responding to general questions or concerns

Advising sessions are available by appointment or on a walk-in basis.

New Student Experience

The New Student Experience is a day-long program designed to equip new students with essential information, supplies, and resources to ensure a successful start to their first day of classes. This program helps students become familiar with campus services, expectations, and the support systems available throughout their academic journey.

The New Student Experience is offered on both the Dothan and Eufaula campuses. Registration services are also available during the event for students who have not yet registered for classes.
